Injectons and Infusions Coding Toolkit HCPro,2014-05-14 Updated with 2012 CPT changes! Hospitals have long struggled under complicated guidelines for coding injection and infusion services. But those days are over. Now, using a simple coding decision tree as your guide, you can master coding for these common procedures without having to master complex coding guidelines. The Injectons and Infusions Coding Toolkit was developed by the staff at The University of Texas MD Anderson Cancer Center, a high-volume and world-renowned cancer treatment facility in Houston, TX. They designed a tool that makes it easy for staff to capture correct codes at point-of-service -- or for coders to use to assign appropriate codes to bill. The toolkit takes the guesswork out of: \* Selecting the initial service \* Deciding which codes can be reported in combination with other codes Your toolkit is updated with 2012 CPT changes and includes everything you need to get started today, including: \* 5 copies of the color-coded, laminated coding decision tree \* 5 copies of pocket-sized cheat sheets to help identify frequently used codes \* A CD-ROM with the coding tree files you can customize for your facility \* A PDF training guide and a PowerPoint training presentation

**Justcoding's Injectons and Infusions Coding Handbook (Pack of 5)** Jugna Shah,2015-04-01 JustCoding's Injectons and Infusions Coding Handbook(Pack of 5) Jugna Shah, MPH Drug administration coding doesn't need to be difficult. Drug administration is one of the most common services provided in the outpatient setting, and while the rules and codes have not changed significantly since 2009, coders still have questions about how to apply the CPT® guidelines and follow CMS' guidance. This handbook begins with a review of drug administration concepts, including definitions of common terms. It then walks through the hierarchy that outpatient facility coders use to select the initial drug administration service. The handbook also explains how to properly determine when to report concurrent, subsequent, and additional hours of substances and when to report hydration. Included are 15 case examples of varying complexity for coders to test their understanding of drug administration principles. The correct coding for each example is provided, along with explanations highlighting key code assignment concepts. The handbook concludes with some frequently asked questions about drug administration. Resolve your toughest drug administration coding challenges!
