Night Siege Joseph Allen Hynek, Philip J. Imbrogno, Bob Pratt, 1987 Five thousand responsible people claim to have seen something... Some say it is larger than a football field. The color seems to be dark metallic gray, with brilliant flashing colored lights that form a V. It is unclear whether there is one object--or several. One thing is clear: Something is in the air above the homes, the highways, the ponds, the very backyards of one of the most densely populated suburban areas in the U.S.A.

Missing Time Budd Hopkins, 2021-04-20 Originally published in 1981, this pioneering work by Budd Hopkins was the first focused study of an enigma that would come to captivate the world and challenge our understanding of the universe. The influence of *Missing Time* was such that its title is now deeply embedded into the lexicon of UFO studies--synonymous with that most controversial and troubling of topics: alien abduction. At the time of its writing, Hopkins could not have predicted the impact of *Missing Time*, not only within UFOlogy, but in popular culture worldwide. The facts, stories, and theories presented herein laid the foundation for the first mainstream debates surrounding reports of human encounters with small, grey-skinned entities--non-human beings with hypnotic black eyes who came silently in the night for their own mysterious purposes. These vivid descriptions as documented by Hopkins would trigger buried memories worldwide in people from all walks of life--to the extent that the so-called Greys now represent the dominant cultural imagining of an alien lifeform. *Missing Time* is a comparative study of individuals distinct from one another in their life circumstances, separated by geography, but connected by their shared experience of a disturbing mystery with profound implications. An essential addition to the library of any serious scholar of the anomalous, and of all who dare to explore the physical, psychological, and spiritual extremities of human experience.

The Day After Roswell Philip Corso, 2012-12-11 Since 1947, the mysterious crash of an unidentified aircraft at Roswell, New Mexico, has fueled a firestorm of speculation and controversy with no conclusive evidence of its extraterrestrial origin -- until now. Colonel Philip J. Corso (Ret.), a member of President Eisenhower's National Security Council and former head of the Foreign Technology Desk at the U.S. Army's Research & Development department, has come forward to tell the whole explosive story. Backed by documents newly declassified through the Freedom of Information Act, Colonel Corso reveals for the first time his personal stewardship of alien artifacts from the crash, and discloses the U.S. government's astonishing role

in the Roswell incident: what was found, the cover-up, and how these alien artifacts changed the course of 20th century history.

Triangular UFOs David Marler,2013-06-17 For years, serious researchers have known that triangular-shaped UFOs are one of the most common types observed. The phenomenon has sparked intense debate among many and excited the imagination of many others. But until now, there has never been a book-length treatment of this fascinating subject.Finally, we have one. David Marler has provided a comprehensive analysis of the triangles. He has collected, collated, and analyzed hundreds of reports. In the process, he has created a detailed profile of these objects and written a rich narrative of their history.Marler is well-suited to the task, having at his disposal an enormous collection of newspaper archives, declassified military reports, UFO books and journals, and the transcripts of many first-hand interviews he has conducted. He has also received input from many prominent individuals from within the military, FAA, Aerospace, and UFO research field.He tackles the arguments made by skeptics that dismiss these triangular UFO reports outright. He also address the claims of so-called insiders who claim these objects are a creation of the U.S. military.The results of his years of research are documented in his book, Triangular UFOs: An Estimate of the Situation. It is a book that has long been needed, not only by the UFO research community, but the general public, as it opens up an entirely new discussion that has long been ignored: who is making the triangles?

The Blue Planet Project ,2013-02-25 Blue Planet Project is allegedly the notebook of a scientist who worked on a top secret United States government program involving alien research. The document contains notes and drawings supposedly made by the scientist. The scientist visited various ufo crash sites, and the notes and drawings were allegedly made from those visits. This book is in the public domain.

Haunting Experiences Diane Goldstein,Sylvia Grider,Jeannie Banks Thomas,2007-09-15 Ghosts and other supernatural phenomena are widely represented throughout modern culture. They can be found in any number of entertainment, commercial, and other contexts, but popular media or commodified representations of ghosts can be quite different from the beliefs people hold about them, based on tradition or direct experience. Personal belief and cultural tradition on the one hand, and popular and commercial representation on the other, nevertheless continually feed each other. They frequently share space in how people think about the supernatural. In Haunting Experiences, three well-known folklorists seek to broaden the discussion of ghost lore by examining it from a variety of angles in various modern contexts. Diane E. Goldstein, Sylvia Ann Grider, and Jeannie Banks Thomas take ghosts seriously, as they draw on contemporary scholarship that emphasizes both the basis of belief in experience (rather than mere fantasy) and the usefulness of ghost stories. They look closely at the narrative role of such lore in matters such as socialization and gender. And they unravel the complex mix of mass media, commodification, and popular culture that today puts old spirits into new contexts

Congressional Record United States. Congress,1981 The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

Architects of Buddhist Leisure Justin Thomas McDaniel,2017-04-01 Buddhism, often described as an austere religion that condemns desire, promotes denial, and idealizes the contemplative life, actually has a thriving leisure culture in Asia. Creative religious improvisations designed by Buddhists have been produced both within and outside of monasteries across the region—in Nepal, Japan, Korea, Macau, Hong Kong, Singapore, Laos, Thailand, and Vietnam. Justin McDaniel looks at the growth of Asia’s culture of Buddhist leisure—what he calls “socially disengaged Buddhism”—through a study of architects responsible for monuments, museums, amusement parks, and other sites. In conversation with noted theorists of material and visual culture and anthropologists of art, McDaniel argues that such sites highlight the importance of public, leisure, and spectacle culture from a Buddhist perspective and illustrate how “secular” and “religious,” “public” and “private,” are in many ways false binaries. Moreover, places like Lek Wiriyaphan’s Sanctuary of Truth in Thailand, Suối Tiên Amusement Park in Saigon, and Shi Fa Zhao’s multilevel museum/ritual space/tea house in Singapore reflect a growing Buddhist ecumenism built through repetitive affective encounters instead of didactic sermons and sectarian developments. They present different Buddhist traditions, images, and aesthetic expressions as united but not uniform, collected but not concise: Together they form a gathering, not a movement. Despite the ingenuity of lay and ordained visionaries like Wiriyaphan and Zhao and their colleagues Kenzo Tange, Chan-soo Park, Tadao Ando, and others discussed in this book, creators of Buddhist leisure sites often face problems along the way. Parks and museums are complex adaptive systems that are changed and influenced by budgets, available materials, local and global economic conditions, and visitors. Architects must often compromise and settle at local optima, and no matter what they intend, their buildings will develop lives of their own. Provocative and theoretically innovative, *Architects of Buddhist Leisure* asks readers to question the very category of “religious” architecture. It challenges current methodological approaches in religious studies and speaks to a broad audience interested in modern art, architecture, religion, anthropology, and material culture.

The Canadian UFO Report Chris A. Rutkowski,Geoff Dittman,2008-07-03 The Canadian UFO Reports is a popular history of the UFO phenomenon in Canada, something that has captured the imaginations of young and old alike. Drawn from government documents and civilian case files - many previously unpublished - the book includes a chronological overview of the best Canadian UFO cases, from the very first sighting of fiery serpents over Montreal in 1662 to reports from the past year. There are chapters on the government's involvement with UFOs, UFO landing pads, media interest, and even UFO abductions. What were the ghost airplanes seen over the Parliament Buildings in 1915, or the flying saucers seen by military

officers over Goose Bay Air Force Base, Newfoundland, in the 1940s and 1950s? Was a prospector burned by a UFO in Manitoba in 1967? Did a UFO crash off the coast of Nova Scotia? Was Quebec invaded by UFOs in 1973? Find out here.

The Andreasson Affair Raymond E. Fowler,2014-10-20 This examination of a case of alien abduction “will captivate, bother, intrigue, and even frighten as one . . . contemplates its implications” (Dr. J. Allen Hynek, founder, Center for UFO Studies (CUFOS) Reviews). The Andreasson Affair is more than just a classic example of a close encounter. It is—to use the jargon of ufologists—a case of such “high strangeness” that even the most open-minded investigators were at first inclined to dismiss it out of hand. Yet it has become probably the best documented case of its kind to date, the subject of an intensive 12-month investigation conducted for the Center for UFO Studies (CUFOS) that involved, among other things, the recording of large quantities of testimony given under hypnosis, extensive lie detector testing of witnesses, detailed analysis of corroborative circumstantial evidence, exhaustive comparison with other such accounts, and much more. The Andreasson Affair includes: The most detailed description of any UFO abduction experience. Betty’s precise drawings of her experience. A supporting foreword to the book by astronomer Dr. J. Allen Hynek. Verification of all events associated with Betty’s experience. This new edition contains a new afterword for a new generation “Something extraordinary happened to Betty Andreasson. Maybe she encountered non-human visitors or maybe something even more strange. Whatever the origin of her experience, her immensely powerful story awed me. Its rich and provocative imagery will remain with me forever.” —Whitley Strieber, author of *Communion*

Archaeology Anthropology and Interstellar Communication Douglas A. Douglas A. Vakoch,2015-03-24 Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.

Close Encounters of the Fourth Kind Courtlandt Dixon Barnes Bryan,1996 A Reporter's Notebook on Alien Abduction, UFOS, and the Conference at MIT Alien abduction is hardly the usual topic for a scientific conference, yet in 1992 just such a conference was held at MIT. Respected journalist C D B Bryan had serious doubts about UFO encounters , but decided to attend with an open mind. This startling and thought-provoking book is the result. Fascinating - compelling, terrifying, haunting, yet entirely rational' - The Baltimore Sun'

A Close Encounter Raymond E. Fowler,2017-12-15 This volume is more than just another predictable, formulaic

examination of a UFO sighting or alien encounter. Rather, the so-called Andreasson Affair is a case of such strangeness that even the most open-minded investigators were at first inclined to dismiss it. Yet it became the subject of an intensive twelve-month investigation that involved testimony given under hypnosis, extensive lie detector testing of witnesses, detailed analysis of corroborative circumstantial evidence, and exhaustive comparison with other such accounts. This enthralling text includes the most detailed description of any UFO abduction experience, Betty Andreasson's precise drawings of her experience, and alleged verification of all events associated with Betty's encounter.

Minor Histories Mike Kelley, 2004-02-06 The second volume of writings by Los Angeles artist Mike Kelley, focusing on his own work. What John C. Welchman calls the blazing network of focused confluences from which Mike Kelley's styles are generated is on display in all its diversity in this second volume of the artist's writings. The first volume, *Foul Perfection*, contained thematic essays and writings about other artists; this collection concentrates on Kelley's own work, ranging from texts in voices that grew out of scripts for performance pieces to expository critical and autobiographical writings. *Minor Histories* organizes Kelley's writings into five sections. *Statements* consists of twenty pieces produced between 1984 and 2002 (most of which were written to accompany exhibitions), including *Ajax*, which draws on Homer, Colgate- Palmolive, and Longinus to present its eponymous hero; *Some Aesthetic High Points*, an exercise in autobiography that counters the standard artist bio included in catalogs and press releases; and a sequence of creative writings that use mass cultural tropes in concert with high art mannerisms—approximating in prose the visual styles that characterize Kelley's artwork. *Video Statements and Proposals* are introductions to videos made by Kelley and other artists, including Paul McCarthy and Bob Flanagan and Sheree Rose. *Image-Texts* offers writings that accompany or are part of artworks and installations. This section includes *A Stopgap Measure*, Kelley's zestful millennial essay in social satire, and *Meet John Doe*, a collage of appropriated texts. *Architecture* features a discussion of Kelley's Educational Complex (1995) and an interview in which he reflects on the role of architecture in his work. Finally, *Ufology* considers the aesthetics and sexuality of space as manifested by UFO sightings and abduction scenarios.

Biological Invasions in South Africa Brian W. van Wilgen, John Measey, David M. Richardson, John R. Wilson, Tsungai A. Zengeya, 2020 This open access volume presents a comprehensive account of all aspects of biological invasions in South Africa, where research has been conducted over more than three decades, and where bold initiatives have been implemented in attempts to control invasions and to reduce their ecological, economic and social effects. It covers a broad range of themes, including history, policy development and implementation, the status of invasions of animals and plants in terrestrial, marine and freshwater environments, the development of a robust ecological theory around biological invasions, the effectiveness of management interventions, and scenarios for the future. The South African situation stands out because of the remarkable diversity of the country, and the wide range of problems encountered in its varied ecosystems, which has

resulted in a disproportionate investment into both research and management. The South African experience holds many lessons for other parts of the world, and this book should be of immense value to researchers, students, managers, and policy-makers who deal with biological invasions and ecosystem management and conservation in most other regions.

Monsterland Ronny Le Blanc,2016-05-19 There is an area known to the locals of Leominster, Massachusetts as MONSTERLAND. There are sightings of UFOS, Bigfoot and Orange Orbs. They have been coming and going for years. But where are they coming from? Why are they here? It seems that the state of Massachusetts has had a long history of sightings and encounters with these mysterious entities and they are occurring in the present day. Could all of these events somehow be connected? What is so special about Leominster that they have plagued the area for so long? Author and Researcher Ronny Le Blanc of Leominster thinks that he might have the answers to some of these questions. But the answers received lead to a whole new understanding of the unknown.... Welcome to MONSTERLAND

Wonders in the Sky Jacques Vallee,Chris Aubeck,2010-10-28 One of the most ambitious works of paranormal investigation of our time, here is an unprecedented compendium of pre-twentieth-century UFO accounts, written with rigor and color by two of today's leading investigators of unexplained phenomena. In the past century, individuals, newspapers, and military agencies have recorded thousands of UFO incidents, giving rise to much speculation about flying saucers, visitors from other planets, and alien abductions. Yet the extraterrestrial phenomenon did not begin in the present era. Far from it. The authors of *Wonders in the Sky* reveal a thread of vividly rendered-and sometimes strikingly similar- reports of mysterious aerial phenomena from antiquity through the modern age. These accounts often share definite physical features-such as the heat felt and described by witnesses-that have not changed much over the centuries. Indeed, such similarities between ancient and modern sightings are the rule rather than the exception. In *Wonders in the Sky*, respected researchers Jacques Vallee and Chris Aubeck examine more than 500 selected reports of sightings from biblical-age antiquity through the year 1879-the point at which the Industrial Revolution deeply changed the nature of human society, and the skies began to open to airplanes, dirigibles, rockets, and other opportunities for misinterpretation represented by military prototypes. Using vivid and engaging case studies, and more than seventy-five illustrations, they reveal that unidentified flying objects have had a major impact not only on popular culture but on our history, on our religion, and on the models of the world humanity has formed from deepest antiquity. Sure to become a classic among UFO enthusiasts and other followers of unexplained phenomena, *Wonders in the Sky* is the most ambitious, broad-reaching, and intelligent analysis ever written on premodern aerial mysteries.

Drawing Futures Laura Allen,Luke Caspar Pearson,2016 This compendium of projects, writings and interviews focuses on how the field of drawing expands synchronously alongside technological and computational developments. This book critically reassess the act of drawing and where its future may lie. Bringing together practitioners from many creative fields,

the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas. Drawings seduce, and the drawings in this book are tantalising evidence of this. Yet the aim of the book is to illustrate how drawing works as an abundantly rich, diverse, inventive, critical and serious research domain. In this regard, it is a study of the point and promise of drawing; which both explores the microscopic detail of the craft and envisions the radical possibilities inherent in its expression. The academics, artists and architects whose work lies within conceive of drawing as a rigorous, liberating form of expression.

The Ocean and Cryosphere in a Changing Climate Intergovernmental Panel on Climate Change (IPCC), 2022-04-30 The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.
