Learning from Megadisasters Federica Ranghieri,Mikio Ishiwatari,2014-06-26 While not all natural disasters can be avoided, their impact on a population can be mitigated through effective planning and preparedness. These are the lessons to be learned from Japan's own megadisaster: the Great East Japan Earthquake of 2011, the first disaster ever recorded that included an earthquake, a tsunami, a nuclear power plant accident, a power supply failure, and a large-scale disruption of supply chains. It is a sad fact that poor communities are often hardest hit and take the longest to recover from disaster. Disaster risk management (DRM) should therefore be taken into account as a major development challenge, and countries must shift from a tradition of response to a culture of prevention and resilience. Learning from Megadisasters: Lessons from the Great East Japan Earthquake consolidates a set of 36 Knowledge Notes, research results of a joint study undertaken by the Government of Japan and the World Bank. These notes highlight key lessons learned in seven DRM thematic clusters—structural measures; nonstructural measures; emergency response; reconstruction planning; hazard and risk information and decision making; the economics of disaster risk, risk management, and risk financing; and recovery and relocation. Aimed at sharing Japanese cutting-edge knowledge with practitioners and decision makers, this book provides valuable guidance to other disaster-prone countries for mainstreaming DRM in their development policies and weathering their own natural disasters.

The Economic Development of Latin America in the Twentieth Century André A. Hofman,2000 This book provides an assessment of Latin American 20th century economic performance from a comparative and historical perspective. The author uses growth accounting methods and previously unavailable long-term series data to present a comprehensive

analysis of Latin American development over the course of the century. The performance of Latin American economies over this period is compared to that of three groups of countries: the advanced capitalist economies of France, Germany, Japan, The Netherlands, UK and USA; the newly industrialised economies of Korea and Taiwan; and Spain and Portugal with which Latin America has historical ties. This presents a long-run comparative perspective of growth acceleration and slow-down in Latin America. The reasons for the comparatively poor or negative economic growth in the Lost Decade of the 1980s are examined as is the apparent economic recovery in the 1990s. The author also reviews other problems associated with the Latin American economies including debt problems, income inequality, high inflation, cyclical instability, and political and policy instability, and measures the ability of various countries to combat these challenges. Finally, the author analyses major stabilisation policies over the period and assesses their success. This book will prove a valuable asset to students and scholars of Latin American economics, international economics and development economics.

VLSI-SoC: Advanced Topics on Systems on a Chip Ricardo Reis,Vincent Mooney,Paul Hasler,2009-04-13 This book contains extended and revised versions of the best papers that were presented during the fifteenth edition of the IFIP/IEEE WG10.5 International Conference on Very Large Scale Integration, a global System-on-a-Chip Design & CAD conference. The 15th conference was held at the Georgia Institute of Technology, Atlanta, USA (October 15-17, 2007). Previous conferences have taken place in Edinburgh, Trondheim, Vancouver, Munich, Grenoble, Tokyo, Gramado, Lisbon, Montpellier, Darmstadt, Perth and Nice. The purpose of this conference, sponsored by IFIP TC 10 Working Group 10.5 and by the IEEE Council on Electronic Design Automation (CEDA), is to provide a forum to exchange ideas and show industrial and academic research results in the field of microelectronics design. The current trend toward increasing chip integration and technology process advancements brings about stimulating new challenges both at the physical and system-design levels, as well in the test of these systems. VLSI-SoC conferences aim to address these exciting new issues.

Colonizing Russia's Promised Land Aileen E. Friesen,2020-01-29 The movement of millions of settlers to Siberia in the late nineteenth and early twentieth centuries marked one of the most ambitious undertakings pursued by the tsarist state. *Colonizing Russia's Promised Land* examines how Russian Orthodoxy acted as a basic building block for constructing Russian settler communities in current-day southern Siberia and northern Kazakhstan. Russian state officials aspired to lay claim to land that was politically under their authority, but remained culturally unfamiliar. By exploring the formation and evolution of Omsk diocese - a settlement mission - *Colonizing Russia's Promised Land* reveals how the migration of settlers expanded the role of Orthodoxy as a cultural force in transforming Russia's imperial periphery by russifying the land and marginalizing the Indigenous Kazakh population. In the first study exploring the role of Orthodoxy in settler colonialism, Aileen Friesen shows how settlers, clergymen, and state officials viewed the recreation of Orthodox parish life as practised in European Russia as fundamental to the establishment of settler communities, and to the success of colonization. Friesen uniquely gives peasant settlers a voice in this discussion, as they expressed their religious aspirations and fears to priests and tsarist officials. Despite this agreement, tensions existed not only among settlers, but also within the Orthodox Church as these groups struggled to define what constituted the Russian Orthodox faith and culture.

Housing Estates in Europe Daniel Baldwin Hess,Tiit Tammaru,Maarten van Ham,2018-08-14 This open access book explores the formation and socio-spatial trajectories of large housing estates in Europe. Are these estates clustered or scattered? Which social groups originally had access to residential space in housing estates? What is the size, scale and geography of housing estates, their architectural and built environment composition, services and neighbourhood amenities, and metropolitan connectivity? How do housing estates contribute to the urban mosaic of neighborhoods by ethnic and socio-economic status? What types of policies and planning initiatives have been implemented in order to prevent the social downgrading of housing estates? The collection of chapters in this book addresses these questions from a new perspective previously unexplored in scholarly literature. The social aspects of housing estates are thoroughly investigated (including socio-demographic and economic characteristics of current and past inhabitants; ethnicity and segregation patterns; population dynamics; etc.), and the physical composition of housing estates is described in significant detail (including building materials; building form; architectural and landscape design; built environment characteristics; etc.). This book is timely because the recent global economic crisis and Europe's immigration crisis demand a thorough investigation of the role large housing estates play in poverty and ethnic concentration. Through case studies of housing estates in 14 European centers, the book also identifies policy measures that have been used to address challenges in housing estates throughout Europe.
