Origins of the Black Atlantic Laurent Dubois,Julius S. Scott,2013-01-11 Between 1492 and 1820, about two-thirds of the people who crossed the Atlantic to the Americas were Africans. With the exception of the Spanish, all the European empires settled more Africans in the New World than they did Europeans. The vast majority of these enslaved men and women worked on plantations, and their labor was the foundation for the expansion of the Atlantic economy during the seventeenth and eighteenth centuries. Until relatively recently, comparatively little attention was paid to the perspectives, daily experiences, hopes, and especially the political ideas of the enslaved who played such a central role in the making of the Atlantic world. Over the past decades, however, huge strides have been made in the study of the history of slavery and emancipation in the Atlantic world. This collection brings together some of the key contributions to this growing body of scholarship, showing a range of methodological approaches, that can be used to understand and reconstruct the lives of these enslaved people.

Slave Rebellion in Brazil João José Reis,1995-09 On the night of January 24, 1835, hundreds of African Muslim slaves poured into the streets of Salvador, capital of the Brazilian province of Bahia, to confront soldiers and armed civilians. Nearly 70 slaves were killed. More than 500 were sentenced to death, prison, whipping or deportation. Although the rebel slaves failed to win their freedom, the repercussions of their actions were felt throughout the nation, making this the most important urban slave rebellion in the Americas, and the only one in which Islam played a major role. In this history of the 1835 uprising, Joao Jose Reis draws on hundreds of police and trial records in which Africans, despite obvious intimidation, spoke out about their cultural, social, economic, religious and domestic lives in Salvador. Now available in this revised and expanded English edition, Slave Rebellion in Brazil is a portrait of the conditions of urban slavery and an absorbing account of conspiracy, uprising and punishment. --

“The Sting of Death” and Other Stories Toshio Shimao,1985-01-01 Until a recent “boom,” Shimao Toshio, writer of short fiction, critic, and essayist, was not widely known, even in Japan. He has never won the Akutagawa or the Naoki Prize, and none of his works had previously appeared in English translation. He is less well known than other writers (Yasuoka Shotaro, Kojima Nobuo, and Shono Junzo) with whom he has associated and whose works have been liberally translated into English. Yet, there are those who consider him to be one of the best contemporary writers in Japan. This volume by no means exhausts the scope of Shimao's fiction. There are no stories here, for instance, about childhood or student life, and none of his many travel stories. Some of his most famous stories-- When we Never Left Port, for example--have not been included. But the stories presented here do offer a considerable variety of style, from the pristine storybook language of The Farthest Edge of the Islands, to the young intellectual's jargon of Everyday Life in a Dream, to the visionary, hysterical, occasionally ritualistic prose of the sick wife stories, to the sober, difficult, almost ponderous narration of This Time That Summer. Shimao's approach to his material varies as well. Everyday Life in a Dream is the only representative here of a large number of stories usually called surrealistic by the critics, stories whose plots progress by the logic of dreams. The individual experience of real life are lived through a combination of conscious and unconscious perception. These stories are the least approachable and the least charming to the casual reader, but they serve, among other things, to highlight patterns in the more realistic fiction. The Farthest Edge of the Islands is a symbolic heightening of reality in another way, a romantic fairy tale beginning at the extremity of experience, at the farthest edge of the world. The other stories are presented as precise,

close chronicles of reality by a participant in that reality whose attention never waivers and who never allows himself to avert his eyes from a world that he sees as his responsibility and in a sense his fault. All but the first story, *The Farthest Edge of the Islands*, which is in third-person narration, are told in the first person by the character who plays Shimao's role in the life that inspired the fiction.

Ethnic Minorities in Socialist China: Development, Migration, Culture, and Identity Xiaorong Han, 2022-05-16
Ethnic Minorities in Socialist China: Development, Migration, Culture, and Identity, edited by Dr. Han Xiaorong and translated into English by Zeng Qiang, presents nine articles written by Chinese scholars about the transformation of China's ethnic minority groups in the socialist era. Focusing on seven of the 55 ethnic minorities in China, the nine articles cover four major themes: development, migration, culture and identity. These case studies are based on both fieldwork and written sources, and most authors make connections between their case studies and relevant social scientific theories. Peoples and places studied include the autonomous regions of Tibet and Inner Mongolia; the Hani, Dai, and Bai peoples of Yunnan Province; Miao farmers of Yangjiang in Guangdong; and the Yi people of the Pearl River Delta region. These studies, which originally appeared in *Open Times* (开放时代), broadly reflect the concerns, interests and perspectives of the Chinese scholars involved in the study of China's ethnic minorities.

Nonparametric Comparative Statics and Stability Douglas Hale, George Ledyard, John Maybee, James P. Quirk, 2014-07-14
The authors, leading researchers in the fields of mathematical economics and methodology, present the first comprehensive synthesis of literature on qualitative and other nonparametric techniques, which are important elements of comparative statics and stability analysis in economic theory. The topics covered show how to assess the comparative statics and stability of economic models without a precise quantitative knowledge of all model components. Applications of the analysis range from determining refutable hypotheses from theory to auditing the solutions of large, computer-based systems. This book discusses in depth the methodology involved in a nonparametric analysis of many neoclassical economic models. Constituting a virtually self-contained manual on such analysis, it provides detailed derivation of necessary and sufficient conditions for the existence of restrictive comparative statics and stability results for a range of specified models. Further, algorithms for applying certain of these conditions are given, with examples, as well as the underlying mathematical approach taken. A large body of research is unified covering issues that have been dealt with piecemeal in scattered but important journal articles by the authors and others. The book will prove invaluable to mathematical economists, mathematicians specializing in matrix or graph theory, applied economists working with large-scale economic models, and advanced students of economics. Originally published in 1999. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and

hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Taiwan—A Light in the East David Pendery, 2020-11-19 This book is an analytical study of Taiwan interspersed with personal elements from the author's life there in the last 20 years. Taiwan's unique confluence of colonial histories, Chinese nationalism and democratization offers a tangible alternative to the status quo in mainland China, albeit one that is becoming more marginal with time. With this in mind, the author offers a concise introduction to the politics and culture of contemporary Taiwan, investigating the Taiwanese identity, aesthetic and its future. A guide to navigating the coming years for Taiwan and greater China, this book will be of interest to scholars, political scientists and historians.

World of the Right Rita Abrahamsen, Jean-François Drolet, Michael C. Williams, Srdjan Vucetic, Karin Narita, Alexandra Ghciu, 2024-06-27 The contemporary radical Right is not merely a series of nationalist projects but a global phenomenon. This book shows how radical conservative thinkers have developed long-term counter-hegemonic strategies that challenge prevailing social and political orders both nationally and internationally. At the heart of this ideological project is a critique of liberal globalisation that seeks to mobilise transversal alliances against a common enemy: the 'New Class' of global managerial elites who are accused of undermining national sovereignty, traditional values, and cultures. 'World of the Right' argues that while the radical Right is far from a unified political movement, its calls for sovereignty, civilisational orders, and multipolarity enable complex, strategic convergences with illiberal states such as China and Russia, as well as states and people in the Global South. The potential consequences for the future of the liberal world order are profound and wide-ranging.

Converting Cultures Dennis Charles Washburn, A. Kevin Reinhart, 2007 This volume considers the concept of conversion as a tool for understanding transformations to modernity. It examines conversions to modernity within the Ottoman domain, India, China, and Japan as a reaction to the pressures of colonialism and imperialism.
