Gropius and the Spirit of TAC Arnold Koerte, 2025-02-21 This study describes how Walter Gropius of former Bauhaus fame transformed himself from the image of the omnipotent “Master-Builder” to the humble “Gropie” of later years. Having come as an emigre from his native Germany to the US, he had to cope with quite a different office culture based on teamwork: Not the “single genius” but a collective approach to problem solving was the order of the day, coupled with a conciliatory manner of debate among equals. With that, his legendary firm “The Architects Collaborative” (called TAC for short) in Boston was to become the star of the profession in the USA, over the course of some 50 years. Thanks to the combined talent and vigorous input of seven younger partners, the firm succeeded in gaining large commissions at home and internationally. The well-designed school and campus buildings in New England found their equivalent in large university projects such as in Baghdad and Tunisia. Internally, the special aura at TAC was personified by a strong collective spirit of individuals in their own right. In turn, the office attracted a highly motivated staff of apprentices from all around the world. Gropie’s personal charm, his humor and encouragement of young people got him life-long affection. Not the least, his pledge for the role of women in the profession left its mark on a whole new generation of architects’ offices to follow. The author was a member of this team from 1962 to 1964 and kept in touch with Gropie until his death in 1969. An eye-witness account setting straight TAC’s merits to “Mid-Century Modernism”.

Disfiguring Mark C. Taylor, 1992 Disfiguring is constructive or, perhaps more accurately, reconstructive. By exploring the religious dimensions of twentieth-century painting and architecture, he shows how the visual arts continue to serve as a rich resource for the theological imagination.

Postcards from the Trenches Allyson Booth, 1996-11-07 The unprecedented magnitude of death during World War I forever altered how people perceived their world and how they represented those perceptions. In *Postcards from the Trenches*, Allyson Booth traces the complex relationship between British Great War culture and modernist writings. She shows that, through the experience of the Great War, both civilian and combatant modernist writers found that language could no longer represent experience. She goes on to identify and contextualize several of the resulting modernist tropes: she links the dissolving modernist self to soldiers' familiarity with corpses, the modernist mistrust of factuality to the apparent inaccessibility of facts regarding the rape of Belgium, and the modernist interest in multiple viewpoints to the singularity of

perspective with which generals studied battlefield maps. Though her emphasis is on literary works by Robert Graves, E.M. Forster, and Vera Brittain, among others, Booth's analysis extends to memorials, posters, and architecture of the Great War. This interdisciplinary quality of Booth's study results in a much deeper understanding of how the Great War affected cultural representations and how that culture represented the War.

Bauhaus Women Elizabeth Otto, Patrick Rössler, 2019-03-21 Forty-five key women of the Bauhaus movement. *Bauhaus Women: A Global Perspective* reclaims the other half of Bauhaus history, yielding a new understanding of the radical experiments in art and life undertaken at the Bauhaus and the innovations that continue to resonate with viewers around the world today. The story of the Bauhaus has usually been kept narrow, localised to its original time and place and associated with only a few famous men such as Walter Gropius, Marcel Breuer, Paul Klee, Wassily Kandinsky and László Moholy-Nagy. *Bauhaus Women: A Global Perspective* bursts the bounds of this slim history by revealing fresh Bauhaus faces: Forty-five Bauhaus women unjustifiably forgotten by most history books. This book also widens the lens to reveal how the Bauhaus drew women from many parts of Europe and beyond, and how, through these cosmopolitan female designers, artists and architects, it sent the Bauhaus message out into the world and to a global audience.

Oppositions Reader K. Michael Hays, 1998 In its eleven-year history, *Oppositions*, the journal of the New York-based Institute for Architecture and Urban Studies (IAUS), had an impact far beyond what its modest cover might suggest. Indeed, *Oppositions* set the agenda, introduced the key players, and published the seminal pieces in the theorization of architecture in the last twenty years. It is a testament to the enduring importance of the journal that its issues are still highly sought after today, prized (and priced) as collector's items, and found behind the desk at virtually every architectural library. *Oppositions Reader* collects the most important essays from 26 issues of *Oppositions*. Essays from the editors of the series—Peter Eisenman, Kenneth Frampton, Mario Gandelsonas, Anthony Vidler, and Kurt Forster—are included, along with texts by such noted architects, theorists, and historians as Aldo Rossi, Alan Colquhoun, Leon Krier, Denise Scott Brown, Bernard Tschumi, Rem Koolhaas, Mary McLeod, Giorgio Ciucci, and Rafael Moneo. The page design, by Massimo Vignelli, has been faithfully reproduced. Harvard Professor K. Michael Hays has selected the writings for inclusion. Contributors include: Diana Agrest, Stanford Anderson, Giorgio Ciucci, Stuart Cohen, Alan Colquhoun, Francesco Dal Co, Peter Eisenman, William Ellis, Kurt W. Forster, Kenneth Frampton, Mario Gandelsonas, Giorgio Grassi, Fred Koetter, Rem Koolhaas, Leon Krier, Mary McLeod, Rafael Moneo, Joan Ockman, Martin Pawley, Aldo Rossi, Colin Rowe, Denise Scott Brown, Jorge Silvetti, Ignasi de Sol - Morales, Manfredo Tafuri, Bernard Tschumi, Anthony Vidler, and Hajime Yatsuka. It is an understatement to say that this volume is indispensable for any scholar or student interested in contemporary architectural theory.

Understanding Architecture Leland M. Roth, 2018-03-13 This widely acclaimed, beautifully illustrated survey of Western architecture is now fully revised throughout, including essays on non-Western traditions. The expanded book vividly

examines the structure, function, history, and meaning of architecture in ways that are both accessible and engaging.

Art of the Western World Bruce Cole, Adelheid M. Gealt, 1991-12-15 With fresh insight into what the great works meant when they were created and why they appeal to us now, here is a vivid tour of painting, sculpture, and architecture, past and present. Illuminating . . . a notable accomplishment.--The New York Times. Illustrated.

Vase Painting, Gender, and Social Identity in Archaic Athens Mark Stansbury-O'Donnell, 2013-05-05 This study explores the phenomenon of 'spectators' at the sides of Athenian narrative vase paintings.

Theatre and Performance in Digital Culture Matthew Causey, 2007-01-24 Theatre and Performance in Digital Culture examines the recent history of advanced technologies, including new media, virtual environments, weapons systems and medical innovation, and considers how theatre, performance and culture at large have evolved within those systems. The book examines the two Iraq wars, 9/11 and the War on Terror through the lens of performance studies, and, drawing on the writings of Giorgio Agamben, Alain Badiou and Martin Heidegger, alongside the dramas of Beckett, Genet and Shakespeare, and the theatre of the Kantor, Foreman, Societas Raffaello Sanzio and the Wooster Group, the book positions theatre and performance in technoculture and articulates the processes of aesthetics, metaphysics and politics. This wide-ranging study reflects on how the theatre and performance have been challenged and extended within these new cultural phenomena.

Ian McHarg and the Search for Ideal Order Kathleen John-Alder, 2019-09-17 Ian McHarg and the Search for Ideal Order looks at the well-known and studied landscape architect, Ian McHarg, in a new light. The author explores McHarg's formative years, and investigates how his ideas developed in both their complexity and scale. As a precursor to McHarg's approach in his influential book *Design with Nature*, this book offers new interpretations into his search for environmental order and outlines how his struggle to understand humanity's relationship to the environment in an era of rapid social and technological change reflects an ongoing challenge that landscape design has yet to fully resolve. This book will be of great interest to academics and researchers in landscape architectural history.

Bauhaus 1919-1933 Barry Bergdoll, Leah Dickerman, 2009 The Bauhaus, the school of art and design founded in Germany in 1919 and shut down by the Nazis in 1933, brought together artists, architects and designers in an extraordinary conversation about modern art. *Bauhaus 1919-1933*, published to accompany a major multimedia exhibition at MoMA, is the first comprehensive treatment of the subject by MoMA since 1938 and offers a new generational perspective on the 20th century's most influential experiment in artistic education. It brings together works in a broad range of mediums, including industrial design, furniture, architecture, graphics, photography, textiles, ceramics, theatre and costume design, and painting and sculpture - many of which have rarely if ever been seen outside of Germany. Featuring about 400 colour plates and a rich range of documentary images, this publication includes two overarching images by the exhibition's curators, Leah Dickerman and Barry Bergdoll, concise interpretive essays on key objects by over twenty leading scholars, and an illustrated, narrative

chronology.

American Architecture Leland M. Roth, 2018-05-04 More than fifteen years after the success of the first edition, this sweeping introduction to the history of architecture in the United States is now a fully revised guide to the major developments that shaped the environment from the first Americans to the present, from the everyday vernacular to the high style of aspiration. Eleven chronologically organized chapters chart the social, cultural, and political forces that shaped the growth and development of American towns, cities, and suburbs, while providing full description, analysis, and interpretation of buildings and their architects. The second edition features an entirely new chapter detailing the green architecture movement and architectural trends in the 21st century. Further updates include an expanded section on Native American architecture and contemporary design by Native American architects, new discussions on architectural education and training, more examples of women architects and designers, and a thoroughly expanded glossary to help today's readers. The art program is expanded, including 640 black and white images and 62 new color images. Accessible and engaging, *American Architecture* continues to set the standard as a guide, study, and reference for those seeking to better understand the rich history of architecture in the United States.

Herbert Bayer, Graphic Designer Patrick Rössler, 2023-05-18 Herbert Bayer was one of the most extraordinary artists associated with the Bauhaus school. A true multimedia artist, he united graphic design, art, and architecture in a unique style that came to represent the bold aesthetic approach of the movement. A teacher with the school until 1928, Bayer went on to become a highly successful graphic designer in Germany, and later one of the most prominent figures in the 20th-century art scene of the United States. This broad biographical account, which presents previously unseen archival photographs and episodes from the life of Bayer and other influential Bauhaus artists such as Walter Gropius, Marcel Breuer and László Moholy-Nagy, follows Bayer through the Weimar Republic, Nazi Germany and finally to his exile in the United States. Specifically, Patrick Rössler reveals for the first time Bayer's unique experience of 1930s Germany, where, with his commercial and artistic life shattered by terror and censorship, he distracted himself with leading a hedonistic life. Shining a light on Bayer's time in Berlin during the Weimar Republic, and his route out of the Nazi state, Rössler provides rich new insights into how Bauhaus artists navigated a protracted period of social upheaval and dictatorship, where commercial success was fraught with a deep hostility towards the regime and the temptations of emigration. Revealing the tensions of an avant-garde artist struggling to practice during a period of repression, *Herbert Bayer, Graphic Designer* speaks to both the memory of those who left Nazi Germany, but also the perseverance of artists and intellectuals throughout history who have worked under authoritarian regimes. Drawing on never before interpreted documents, letters and archival material, Rössler tells Bayer's compelling story - documenting the life of a unique artist and offering a valuable contribution to research in émigré experiences.

Brazil Built Zilah Quezado Deckker,2013-09-13 Brazil Built is an examination of the architecture of the Modern Movement in Brazil. In the 1940s and 1950s, Brazil acquired unprecedented prestige in the world of Modern architecture. Brazil was regarded as the country which had inherited the progressive Modernism of the pre-war period in Europe, and which, furthermore, had initiated a new phase of the assimilation of cultural and environmental considerations. This book constitutes a unique presentation of the major Modern buildings in Brazil in a historical context. Prompted by the contemporary re-evaluation of Modernism, and renewed interest in Brazil, this book examines how these Modern buildings came into being, how they came to be so highly regarded and the changing reactions to them in Brazil and abroad.

Modern Architectural Theory Harry Francis Mallgrave,2009-07-13 Modern Architectural Theory is the first book to provide a comprehensive survey of architectural theory, primarily in Europe and the United States, during three centuries of development. In this synthetic overview, Harry Mallgrave examines architectural discourse within its social and political context. He explores the philosophical and conceptual evolution of its ideas, discusses the relation of theory to the practice of building, and, most importantly, considers the words of the architects themselves, as they contentiously shaped Western architecture. He also examines the compelling currents of French rationalist and British empiricist thought, radical reformation of the theory during the Enlightenment, the intellectual ambitions and historicist debates of the nineteenth century, and the distinctive varieties of modern theory in the twentieth century up to the profound social upheaval of the 1960s. Modern Architectural Theory challenges many assumptions about architectural modernism and uncovers many new dimensions of the debates about modernism.

Cultural Techniques Bernhard Siegert,2015-05-01 In a crucial shift within posthumanistic media studies, Bernhard Siegert dissolves the concept of media into a network of operations that reproduce, displace, process, and reflect the distinctions fundamental for a given culture. Cultural Techniques aims to forget our traditional understanding of media so as to redefine the concept through something more fundamental than the empiricist study of a medium's individual or collective uses or of its cultural semantics or aesthetics. Rather, Siegert seeks to relocate media and culture on a level where the distinctions between object and performance, matter and form, human and nonhuman, sign and channel, the symbolic and the real are still in the process of becoming. The result is to turn ontology into a domain of all that is meant in German by the word Kultur. Cultural techniques comprise not only self-referential symbolic practices like reading, writing, counting, or image-making. The analysis of artifacts as cultural techniques emphasizes their ontological status as "in-betweens," shifting from firstorder to second-order techniques, from the technical to the artistic, from object to sign, from the natural to the

cultural, from the operational to the representational. Cultural Techniques ranges from seafaring, drafting, and eating to the production of the sign-signal distinction in old and new media, to the reproduction of anthropological difference, to the study of trompe-l'oeils, grids, registers, and doors. Throughout, Siegert addresses fundamental questions of how ontological distinctions can be replaced by chains of operations that process those alleged ontological distinctions within the ontic. Grounding posthumanist theory both historically and technically, this book opens up a crucial dialogue between new German media theory and American postcybernetic discourses.

Le Corbusier in America Mardges Bacon, 2001 In this study of Le Corbusier's American tour, Mardges Bacon reconstructs his encounter with America in all its fascinating detail. It presents a critical history of the tour as well as a nuanced and intimate portrait of the architect.

Bauhaus Construct Jeffrey Saletnik, Robin Schuldenfrei, 2013-03 Looking at the status and meaning of Bauhaus objects in relation to the school's history, this book features contributions from some of the most brilliant scholars writing in the field today. It offers an entirely new treatment of the Bauhaus school and through a strong thematic structure, the questions and subsequent conclusions presented by the contributors re-examine the history of the Bauhaus and its continuing legacy.
