Business Innovation and Disruption in the Music Industry Patrik Wikström, Robert DeFillippi, 2016-01-29 Patrik Wikström and Robert DeFillippi bring together innovative, multidisciplinary perspectives on business innovation and disruption in the music industry. Authors from fields such as cultural studies, economics, management, media studies, musicology and human geography in North America, Europe and Asia focus on the “second wave” of digital disruption and the transformation of the music industry. The chapters are structured into three parts: the first part contextualizes changes in the music industry that have been driven by digital technologies since the end of the 1990s. The second part unpacks the impact of these disruptive technologies on business models in specific industry sectors and geographies, and the third and final part examines questions related to the emergence of subscription music services. Concluding chapters link back to the role of hackers as a subversive and innovative force in the music economy and examine how hacker creativity can be facilitated and encouraged to generate the next big music industry innovation. This multifaceted look at the music business will serve as a resource for both undergraduate and graduate students, as well as established scholars and industry professionals.

Taking Popular Music Seriously Simon Frith, 2017-07-05 As a sociologist Simon Frith takes the starting point that music is the result of the play of social forces, whether as an idea, an experience or an activity. The essays in this important collection address these forces, recognising that music is an effect of a continuous process of negotiation, dispute and agreement between the individual actors who make up a music world. The emphasis is always on discourse, on the way in which people talk and write about music, and the part this plays in the social construction of musical meaning and value. The collection includes nineteen essays, some of which have had a major impact on the field, along with an autobiographical introduction.

A History of Art in 21 Cats Nia Gould, 2019-08-13 Become litter-ate in the basics of important art movements through a host of beautifully illustrated cats, each one inspired by a specific period in art history: Surrealism, Cubism, Abstract Expressionism, Ancient Egyptian (of course), and many more. From Claude Meow-net to Jackson Paw-llock, these creative

cats will introduce you to key themes and artists you won't soon fur-get. Purr-haps even inspiring you to make your own version!

The Music Industry Patrik Wikström, 2013-04-25 The music industry is going through a period of immense change brought about in part by the digital revolution. What is the role of music in the age of computers and the internet? How has the music industry been transformed by the economic and technological upheavals of recent years, and how is it likely to change in the future? This is the first major study of the music industry in the new millennium. Wikström provides an international overview of the music industry and its future prospects in the world of global entertainment. They illuminate the workings of the music industry, and capture the dynamics at work in the production of musical culture between the transnational media conglomerates, the independent music companies and the public. *The Music Industry* will become a standard work on the music industry at the beginning of the 21st century. It will be of great interest to students and scholars of media and communication studies, cultural studies, popular music, sociology and economics. It will also be of great value to professionals in the music industry, policy makers, and to anyone interested in the future of music.
