

Tinder Drove Me To Freeze My Eggs

Robert Louis Stevenson, Jan Fields

[The Secret Despair of the Secular Left](#) Ana Levy-Lyons, 2025-06-10 A compelling and timely exploration of the spiritual void in modernity, and an invitation to reclaim a more connected and spiritually fulfilling way of life. What is lost when we lose our religion? Our traditions? Connection and community? In *The Secret Despair of the Secular Left*, Ana Levy-Lyons seeks to find out. Levy-Lyons, a rabbinical student with a previous 18-year career as a Unitarian Universalist minister, shares insights into what goes missing when we lose our religious underpinnings and deeply held beliefs and practices. Drawing from a wide range of perspectives, including Jewish, Christian, and eastern religious traditions, Indigenous societies, and countercultural communities, Levy-Lyons aims to understand the sources of our modern despair and help readers find pathways of healing and reconnection. Levy-Lyons investigates three primary losses in today's world: disconnection, dislocation, and disembodiment. Disconnection refers to the loss of ties to community and each other in a world dominated by virtual interactions and polarizing social media. Dislocation is our separation from the earth and our intrinsic relationship with the land and our roots. Finally, disembodiment finds us alienated from our physical selves and our spiritual essence. In a society increasingly detached from our essential nature, we have forgotten the profound knowledge and wisdom that our bodies hold. When we realize what we've lost, we experience deep grief. But in exploring and understanding these losses, we are also self-empowered to reclaim pathways to more connected, grounded, and spirit-filled lives.

Date-onomics Jon Birger, 2015-08-25 It's not that he's just not that into you—it's that there aren't enough of him. And the numbers prove it. Using a combination of demographics, statistics, game theory, and number-crunching, *Date-onomics* tells what every single, college-educated, heterosexual, looking-for-a-partner woman needs to know: The "man deficit" is real. It's a fascinating, if sobering read, with two critical takeaways: One, it's not you. Two, knowledge is power, so here's what to do about it. The shortage of college-educated men is not just a big-city phenomenon frustrating women in New York and L.A. Among young college grads, there are four eligible women for every three men nationwide. This unequal ratio explains not

only why it's so hard to find a date, but a host of social issues, from the college hookup culture to the reason Salt Lake City is becoming the breast implant capital of America. Then there's the math that says that a woman's good looks can keep men from approaching her—particularly if they feel the odds aren't in their favor. Fortunately, there are also solutions: what college to attend (any with strong sciences or math), where to hang out (in New York, try a fireman's bar), where to live (Colorado, Seattle, "Man" Jose), and why never to shy away from giving an ultimatum.

Victimhood Olympics Sophie-Marie Eve Riker, 101-01-01 Tired of being told masculinity is toxic while feminism rewrites reality? Do you feel silenced when feminists dismiss male struggles as irrelevant? Are you exhausted watching merit collapse under the weight of quotas and victim points? Ever wonder why feminists partner with Marxists to erase biological truth? - Exposes how "glass ceilings" are myths spun to guilt-trip society. - Reveals why victimhood is feminism's currency—and why it pays them, not you. - Debunks the "toxic masculinity" lie and restores pride in male strength. - Documents how abortion advocacy ignores women's silent regret and ethical decay. - Uncovers feminism's alliance with Marxism to dismantle families and freedoms. - Proves gender studies prioritize ideology over facts, sabotaging real progress. - Details how intersectionality divides women into warring "oppression tiers." - Shows why men's sacrifices throughout history deserve gratitude, not contempt. If you want to arm yourself with truth, crush feminist gaslighting, and reclaim pride in reality—buy this book today.

Motherhood, Rescheduled Sarah Elizabeth Richards, 2013-05-07 What would happen if we could stop time? A fascinating, inside look at five women who had their eggs frozen reveals what it's like for them to be free of the constant ticking of their biological clocks. How would you live your life if you could stop your biological clock? If you could be free of the baby panic that has tormented an entire generation of women who postponed motherhood to pursue careers or find the right mate? Would you date better? Marry later? Relax more? In *Motherhood, Rescheduled*, journalist Sarah Elizabeth Richards tells the stories of four women—including herself—who attempt to turn back time by freezing their eggs and chart a new course through their thirties and forties. Their journeys are bumpy, hilarious, sometimes heartbreaking, but always rewarding. Just a decade ago, the idea of women freezing their eggs seemed futile or dangerous. But with new advances in medicine, women who choose this route face no higher risk of birth defects in their babies than other women, and pregnancy rates using frozen eggs are approaching those using fresh eggs. At a time when one in five American women between the ages of forty and forty-four is childless and half of those women say they wish they could have children, Richards offers a hopeful message: women approaching the end of their babymaking days do not need to settle, and even twentysomethings who want to prolong their dating years do not need to fret. Richards tells the history of this controversial science, from its moments of premature

enthusiasm to the exciting race that led to the big breakthroughs. She also explores the hard facts of egg freezing—from the cost and practical obstacles to the probabilities of success. Above all, she shares the stories of these women, and especially her own, with emotional honesty and compassion, and makes the journey for all ultimately redeeming.

Motherhood on Ice Marcia C. Inhorn,2023-05-01 Answers the question: Why are women freezing their eggs? Why are women freezing their eggs in record numbers? *Motherhood on Ice* explores this question by drawing on the stories of more than 150 women who pursued fertility preservation technology. Moving between narratives of pain and empowerment, these nuanced personal stories reveal the complexity of women’s lives as they struggle to preserve and extend their fertility. Contrary to popular belief, egg freezing is rarely about women postponing fertility for the sake of their careers. Rather, the most-educated women are increasingly forced to delay childbearing because they face a mating gap—a lack of eligible, educated, equal partners ready for marriage and parenthood. For these women, egg freezing is a reproductive backstop, a technological attempt to bridge the gap while waiting for the right partner. But it is not an easy choice for most. Their stories reveal the extent to which it is logistically complicated, physically taxing, financially demanding, emotionally draining, and uncertain in its effects. In this powerful book, women share their reflections on their clinical encounters, as well as the immense hopes and investments they place in this high-tech fertility preservation strategy. Race, religion, and the role of men in the lives of single women pursuing this technology are also explored. A distinctly human portrait of an understudied and rapidly growing population, *Motherhood on Ice* examines what is at stake for women who take comfort in their frozen eggs while embarking on their quests for partnership, pregnancy, and parenting.

The Story Book of Science Jean Henri Fabre,2013-03-01 Fabre had many scholarly achievements. He was a popular

teacher, physicist, chemist, and botanist. However, he is probably best known for his findings in the field of entomology, the study of insects, and is considered by many to be the father of modern entomology. Much of his enduring popularity is due to his marvelous teaching ability and his manner of writing about the lives of insects in biographical form.

Before the War and After the Union Sam Aleckson,2014-08-05 Through this text Aleckson attempts to suggest that African Americans are neither objects of pity for the north, nor tools to be used in labor by southern slaveholders, but something more. He places the black community in a hopeful and triumphant light, informing the reader that you may disfranchise the Negro, you may oppress him, you may deport him, but unless you destroy the disposition to laugh in his nature you can do him no permanent injury. All unconscious to himself, perhaps. It is not solely the meaningless expression of 'vacant mind, ' nor is it simply a ray-It is the beaming light of hope-of faith. God has blessed him thus. He sees light where others see only the blackness of night (p. 51). African Americans, Aleckson suggests, have been uniquely blessed by God to be able to persevere and overcome in the face of trials and adversity that implicitly would have destroyed others. Aleckson demonstrates in his narrative the spirit he points to. While undoubtedly exposed to great evil as a young slave and in his military service during the Civil War, Aleckson overcomes and perseveres, finding love and happiness in life despite his participation in a trying time in American history. The conclusion of the narrative reflects this optimistic spirit. Aleckson closes with a passionate post-racial appeal for all people to move past slavery and for both whites and African Americans to reconcile their differences and unite as a single people. His only fears, he explains, are for the American nation, for, I feel as an American, and cannot feel otherwise (p. 171). Hyrum Palmer
