Mine Safety Neil Gunningham,2007 Historically, the mining industry has had a high incidence of work related injury and disease, and of disasters involving multiple fatalities. It also faces OHS challenges far exceeding those confronting most other industry sectors.Mine safety legislation can play an important role in meeting those challenges. Although regulation is never likely to be the entire answer, good regulation not only brings laggards up to a minimum legal standard, it also encourages, rewards and facilitates leaders in going beyond them. Bad regulation, in contrast, constrains good enterprises from taking the initiative to improve OHS, while failing to deter bad ones.This book describes mine safety legislation in the mining states and analyses its strengths and weaknesses. It also examines the broader policy questions of how best to design, implement and enforce mine safety regulation.It argues that substantial reform will be necessary not only in setting standards, but also in their implementation, if further OHS improvements are to be achieved. This implies substantial changes in the way the mine safety inspectorates go about their tasks: in how they administer and enforce the law; and in the circumstances in which they choose to prosecute. It also requires the nurturing of a degree of trust between employers and workers (individually and collectively) and between both these parties and the mines inspectorates, that has been substantially lacking in recent years.

Employers' Liability and Workers' Compensation Ken Oliphant,Gerhard Wagner,2012-10-30 This large-scale comparative study analyses the two principal mechanisms employed in modern legal systems to deal with the social problem of occupational illness and injury, namely, employers' liability and workers' compensation. It provides a detailed description of the systems in operation in twelve countries around the world, investigating the complex legal structures and the interaction with other social institutions, as well as their inter-jurisdictional coordination through private international law. Current international trends are identified and assessed and the fundamental political issues highlighted and explored. The study's ultimate goals are not only descriptive but also to answer the question of how compensation and liability systems can best be adapted to meet society's needs in the 21st century. The countries covered are: Australia (Mark Lunney), Austria (Ernst Karner/Felix Kernbichler), Denmark (Vibe Ulfbeck), England and Wales (Richard Lewis), France (Florence G'Sell/Isabelle

Veillard), Germany (Raimund Waltermann), Italy (Alessandro P Scarso/Massimo Foglia), Japan (Keizo Yamamoto/Tomohiro Yoshimasa), the Netherlands (Siewert D Lindenbergh), Poland (Domenika Dörre-Nowak), Romania (Christian Alunaru/Lucian Bojin) and the United States of America (Michael D Green/Daniel S Murdock). The book is completed by three concluding essays that address general themes: Thomas Thiede, The European Coordination of Employers' Liability and Workers' Compensation Ken Oliphant, The Changing Landscape of Work Injury Claims: Challenges for Employers' Liability and Workers' Compensation Gerhard Wagner, New Perspectives on Employers' Liability - Basic Policy Issues

Employment, Labour and Industrial Law in Australia Louise Floyd, William Steenson, Amanda Coulthard, Daniel Williams, Anne C. Pickering, 2017-11-16 Employment, Labour and Industrial Law in Australia provides a comprehensive, current and accessible resource for the undergraduate and Juris Doctor student. With a social and political background to the law, this text provides insightful legal analysis underscored by practical business experience, while exploring key principles through a close evaluation of laws and lively discussion of prominent cases. Recognising the multi-faceted nature of the subject, the authors have included content on employment, labour and industrial law in the one text, while also presenting critical topics not often dealt with, namely: • current and in-depth analysis of trade union regulation • public work including the public sector, the judiciary and academics • workplace health and safety including worker's compensation, bullying, anti-discrimination and taxation • emerging issues including topics such as transnational and international employment law, migration and employment, as well as volunteers and work experience. To maintain currency within this rapidly changing area of law, the text has a website which will include updates for any major developments in the field as well as responses to end-of-chapter questions. Written by respected academics and practicing lawyers in the field, this book is a relevant and contemporary guide to this fascinating area of law.

Information Rights Philip Coppel KC, 2020-06-11 Retaining the position it has held since first publication, the fifth edition of this leading practitioner text on information law has been thoroughly re-worked to provide comprehensive coverage of the Data Protection Act 2018 and the GDPR. Information Rights has been cited by the Supreme Court, Court of Appeal and others, and is used by practitioners, judges and all those who practise in the field. The new edition maintains its style of succinct statements of principle, supported by case law, legislative provisions and statutory guidance. Reflecting its enlarged scope and to maintain easy referencing, the work has been arranged into two volumes. The first volume is a 1,250-page commentary, divided into six parts. The first part is an overview and introduction to overarching principles. The second part provides an authoritative treatment of the data protection regime. This covers all four forms of processing (general, applied, law enforcement and security services) under the GDPR and DPA 2018. Each obligation and each right is comprehensively treated, with reference to all known case-law, both domestic and EU, including those dealing with analogous provisions in the previous data protection regime. The third part provides a detailed treatment of the

environmental information regime. This recognises the treaty provenance of the regime and its distinct requirements. The fourth part continues to provide the most thorough analysis available of the Freedom of Information Act and its Scottish counterpart. As with earlier editions, every tribunal and court decision has been reviewed and, where required, referenced. The fifth part considers other sources of information rights, including common law rights, local government rights and subject-specific statutory information access regimes (eg health records, court records, audit information etc). The final part deals with practice and procedure, examining appeal and regulatory processes, criminal sanctions and so forth. The second volume comprises extensive annotated statutory material, including the DPA 2018, the GDPR, FOIA, subordinate legislation, international conventions and statutory guidance. The law is stated as at 1st February 2020.

Information Rights Philip Coppel, 2014-12-01 This is the fourth edition of what is the leading practitioner's text on freedom of information law. Providing in-depth legal analysis and practical guidance, it offers complete, authoritative coverage for anyone either making, handling or adjudicating upon requests for official information. The three years since the previous edition have seen numerous important decisions from the courts and tribunals in the area. These and earlier authorities supply the basis for clear statements of principle, which the work supports by reference to all relevant cases. The book is logically organised so that the practitioner can quickly locate the relevant text. It commences with an historical analysis that sets out the object of the legislation and its relationship with other aspects of public law. Full references to Hansard and other Parliamentary materials are provided. This is followed by a summary of the regime in five other jurisdictions, providing comparative jurisprudence which can assist in resolving undecided points. The potential of the Human Rights Act 1998 to support rights of access is dealt with in some detail, with reference to all ECHR cases. Next follows a series of chapters dealing with rights of access under other legislative regimes, covering information held by EU bodies, requests under the Data Protection Act and the Environmental Information Regulations, public records, as well as type-specific rights of access. These introduce the practitioner to useful rights of access that might otherwise be overlooked. They are arranged thematically to ensure ready identification of potentially relevant ones. The book then considers practical aspects of information requests: the persons who may make them; the bodies to whom they may be made; the time allowed for responding; the modes of response; fees and vexatious requests; the duty to advise and assist; the codes of practice; government guidance and its status; transferring of requests; third party consultation. The next 13 chapters, comprising over half the book, are devoted to exemptions. These start with two important chapters dealing with general exemption principles, including the notions of 'prejudice' and the 'public interest'. The arrangement of these chapters reflects the arrangement of the FOI Act, but the text is careful to include analogous references to the Environmental Information Regulations and the Data Protection Act 1998. With each chapter, the exemption is carefully analysed, starting with its Parliamentary history (giving full references to Hansard and other Parliamentary material) and the treatment given in the comparative

jurisdictions. The analysis then turns to consider all court judgments and tribunal decisions dealing with the exemption. The principles are stated in the text, with footnotes giving all available references. Whether to prepare a case or to prepare a response to a request, these chapters allow the practitioner to get on top of the exemption rapidly and authoritatively. The book concludes with three chapters setting out the role of the Information Commissioner and the Tribunal, appeals and enforcement. The chapter on appeals allows the practitioner to be familiar with the processes followed in the tribunal, picking up on the jurisprudence as it has emerged in the last eight or so years. Appendices include: precedent requests for information; a step-by-step guide to responding to a request; comparative tables; and a table of the FOI Act's Parliamentary history. Finally, the book includes an annotated copy of the FOIA Act, the Data Protection Act 1998, the Environmental Information Regulations 2004, all subordinate legislation made under them, EU legislation, Tribunal rules and practice directions, and the Codes of Practice. Contributors Prof John Angel, former President of the Information Tribunal Richard Clayton QC, 4-5 Gray's Inn Square Joanne Clement, 11 KBW Gerry Facena, Monkton Chambers Eleanor Gray QC

Duty of Officers Michael Tooma, 2012-04 Due Diligence: Duty of Officers is the first book in CCH's new Due Diligence series and examines the role and duties imposed on officers pursuant to the new Model Work Health and Safety laws, the majority of which commenced on 1st January 2012. The book contains a thorough explanation of all aspects of this duty including the definition of an officer, the elements of the due diligence concept, and liabilities for breach of the duty. It also includes practical and useful recommendations for compliance. This is an essential reference point for individuals and companies looking to avoid the onerous penalties for non-compliance under the new legislation.--Publisher's website.

The Webbs, Fabianism and Feminism Peter Beilharz, Chris Nyland, 2016-12-05 This book seeks to explore the understanding of Fabianism of both the Webbs and the Fabian Women's Group and how this understanding shaped their views regarding such gender-centred issues as the family wage; protective labour law; and women's place in the welfare state, the home and the labour market.

Perspectives on Corporate Citizenship Jörg Andriof, Malcolm McIntosh, 2017-09-29 A number of disparate but interconnected forces such as deregulation and globalization, rapid advances in communications technology and the rise in the power of the consumer and civil society have now combined to bring corporate responsibility to prominence in many corporate boardrooms. In this information age, the ramifications of not addressing best practice in environment, workplace, marketplace and community could range from bad press coverage to complete market exclusion. These are perilous times for the social construct of modern capitalism. In today's society successful companies will increasingly be those that recognize that they have responsibilities to a range of stakeholders that go beyond compliance with the law. If in the past the focus was on enhancing shareholder value, now it is on engaging stakeholders for long-term value creation. This does not mean that

shareholders are not important, or that profitability is not vital to business success, but that in order to survive and be profitable a company must engage with a range of stakeholders whose views may vary greatly. If in the past corporate social responsibility was simply seen as profitability plus compliance plus philanthropy, now responsible corporate citizenship means companies being more aware of and understanding the societies in which they operate. This means senior executives and managers being able to deal with a wide range of issues including greater accountability, human rights abuses, sustainability strategies, corporate governance codes, workplace ethics, stakeholder consultation and management. The aim and scope of *Perspectives on Corporate Citizenship* is to help capture and distil these and other emerging trends in terms of content, context and processes, in one concise volume. With contributions from the *crème de la crème* of leading thinkers from around the world, *Perspectives on Corporate Citizenship* is essential reading for students, scholars and all serious thinkers on one of the most critical issues of our time.

The Culpable Corporate Mind Elise Bant, 2023-04-20 This collection examines critically, and with an eye to reform, conceptions and conditions of corporate blameworthiness in law. It draws on legal, moral, regulatory and psychological theory, as well as historical and comparative perspectives. These insights are applied across the spheres of civil, criminal, and international law. The collection also has a deliberate focus on the 'nuts and bolts' of the law: the legal, equitable and statutory principles and rules that operate to establish corporate states of mind, on which responsibility as a matter of daily legal practice commonly depends. The collection therefore engages strongly with scholarly debates. The book also speaks, clearly and cogently, to the judges, regulators, legislators, law reform commissioners, barristers and practitioners who administer and, through their respective roles, incrementally influence the development of the law at the coalface of legal practice. Cited by the High Court of Australia in the judgment for *Productivity Partners Pty Ltd v Australian Competition and Consumer Commission* [2024] HCA 27.

Violence at Work Duncan Chappell, Vittorio Di Martino, International Labour Office, 2006 Violence at work, ranging from bullying and mobbing, to threats by psychologically unstable co-workers, sexual harassment and homicide, is increasing worldwide and has reached epidemic levels in some countries. This updated and revised edition looks at the full range of aggressive acts, offers new information on their occurrence and identifies occupations and situations at particular risk. It is organised in three sections: understanding violence at work; responding to violence at work; future action.

Overtake Countermeasures for Vehicles Melvin L Myers, 2022-01-17 This book describes the century-long emergence and battle to protect drivers and occupants of off-road and on-road vehicles from crush-related injuries from rollovers. Deaths and serious injuries have been associated with vehicle overturns that involve tractors, other motorized machinery, automobiles, and small vehicles. It took more than a century to attend to much of this epidemic of death and disabling injury that resulted

from these overturns. This book argues that a key factor in this response was epidemiology that reported rollover-related deaths and engineering revisionism that moved responses from “blame the victim” to rollbars to prevent the deaths.

Disclosure Paul Matthews,Hodge M. Malek,2012 This text provides detailed coverage of the new rules of disclosure. Topics covered include documentary disclosure, non-documentary disclosure and specialist jurisdictions.

Australian Master OHS and Environment Guide ,2007 The first point of reference for all OHS and environmental best practice and strategy providing operational guidance with examples to achieve optimal workplace safety and environmental sustainability.

Safe Design and Construction of Machinery Elizabeth Bluff,2017-03-02 The origin of this book is the compelling evidence that a high proportion of machinery-related deaths and injuries are attributable to genuine and serious risks originating within machine design and construction. This trend continues despite significant legal obligations, notably the European regulatory regime giving effect to the Machinery Directive (among others), and a substantial body of specialist knowledge originating in the disciplines of human factors and safety engineering. Grounded in empirical research with machinery manufacturers, this book aims to elucidate the factors and processes shaping firms’ performance for machinery safety, and considers their compatibility with legal obligations. Through a unique blending of rich empirical data coupled with safety, human factors, socio-legal and learning scholarship, the book provides both a nuanced account of firms’ performance for machinery safety, and makes conceptual and theoretical contributions to understanding and explaining their performance. Specifically, the book elucidates the role of knowledge and motivational factors - and how these are constituted - in shaping firms’ performance. It reveals the multiple state and non-state influences that create plural responses among manufacturing firms, which typically operate in supply chains and networks, and often globally. These insights provide the foundations to enhance regulatory design, and the book’s conclusion recommends some innovative directions for regulatory interventions to sustain the safe design and construction of machinery.

Discrimination Law and Practice Chris Ronalds,Elizabeth Raper,2012-07-02 This seminal textbook on the practical application of Australian discrimination law is suitable for all involved in this branch of the law - lawyers, business people, human resources and industrial relations staff, advocates and students. Discrimination Law and Practice examines important recent cases in key areas of discrimination law and particularly in all aspects of employment and harassment, the provision of goods and services and education.

Business Law 2014 Andy Gibson,Douglas Fraser,2013-10-11 Business Law 2014 - Your essential up-to-date business law resource The pace and scope of legislative reform of the law affecting business is increasing. There is a major shift to uniformity across the nation with a corresponding increase in new legislation and significant amendments to existing legislation. Business Law 2014 is a sophisticated and comprehensive text which provides a clear and current appreciation of

the main rules and legal principles encountered in a course for non-lawyers. It considers the legal environment in which businesses must operate in all states and territories. With a student-friendly, 4-colour format and a teaching and learning resource package second to none, Business Law 2014 also offers instructors a great opportunity to tailor textbook content to suit the breadth and depth of the areas you wish to teach.
