**Everything but the Coffee** Bryant Simon, 2009-10-20 Everything but the Coffee casts a fresh eye on the world's most famous coffee company, looking beyond baristas, movie cameos, and Paul McCartney CDs to understand what Starbucks can tell us about America. Bryant Simon visited hundreds of Starbucks around the world to ask, Why did Starbucks take hold so quickly with consumers? What did it seem to provide over and above a decent cup of coffee? Why at the moment of Starbucks' profit-generating peak did the company lose its way, leaving observers baffled about how it might regain its customers and its cultural significance? Everything but the Coffee probes the company's psychological, emotional, political, and sociological power to discover how Starbucks' explosive success and rapid deflation exemplify American culture at this historical moment. Most importantly, it shows that Starbucks speaks to a deeply felt American need for predictability and class standing, community and authenticity, revealing that Starbucks' appeal lies not in the product it sells but in the easily

consumed identity it offers.

*Basic Strategy in Context* Neil Thomson, Charles Baden-Fuller, 2010-06-01 *Basic Strategy in Context* centres on real-world firms and managers by giving each chapter's cases a higher weighting in importance and explanation than is normal. Given this emphasis on real-world as opposed to theoretical treatment the book enables the solving of practical business problems like those below. This emphasis on reality is cemented by the book's treatment of diversity as being the norm highlighted through European business cases from different countries. Giving example answers and links from case to theory rams home further the expected usefulness of the book to students about to enter industry. Often theory and cases are treated as different and separated topics; we believe that our integrated didactic treatment is quite unique. Finally we use the basic theories of strategy and then show how these mainly simple concepts can be extended to solve tricky business problems anywhere in any industry. Here is a sample of specific practical problems to which this book can show solutions: Why are resources important and how are they leveraged? Using the case of a British failure (Railtrack) we show the fatal consequences of neglecting existing resources, and then in a completely different country and industry (Carlo Gavazzi Space in Italy) how resources can be utilised from outside the firm to achieve leverage. Given our emphasis on diversity we highlight successful change in a foreign and inflexible environment (Japan and Carlos Ghosn). But can change be planned? Sometimes events or luck sabotage the best intentions as shown in the Samsung case. The book differentiates itself from the competition in four ways: Cases form the highlight of the book. Taking European and some international cases as the starting point, the objective is to link themes or topics to a description of their effect on the firm. The linkage will occur at the relevant point in the case, not in a separate section or in another book. The author team has used several longitudinal cases spread over a 15-20 year period. The longitudinal cases are supported by some new, non-longitudinal cases selected from award winning cases associated with the LRP Journal and the Gate2Growth Academic Network. We feel such an emphasis on cases is a novel feature. The theory is explained using a range of modern didactic methods not usually found in competitive offerings. Examples include colour coded and highlighted links from the theory to the case, questions inside each theory section with model answers and unanswered questions to test the student's grasp of the concepts. The book features a mixture of cases from short specific to academically challenging ones. Too often, superficial cases are placed at the end of chapters in strategy theory books. They are picked to emphasize the topics of the preceding chapters. The result is spoon-feeding, with little need or motivation to provoke individual thought or learning. The cases in this book are comprehensive, approximately 20 pages in length, with ample quantitative and qualitative data, thus forcing a modicum of effort from the student. Shorter cases are also included for ease of understanding and instructor flexibility. Another differentiating feature is the emphasis on diversity hence the use of European as opposed to US based cases.

The Indian Renaissance Sanjeev Sanyal,2008 India's recent economic performance has attracted world attention but the country is re-awakening not just as an economy but as a civilization. After a thousand years of the decline, it now has a genuine opportunity to re-establish itself as a major global power.In *The Indian Renaissance?*, the author, Sanjeev Sanyal, looks at the processes that led to ten centuries of fossilization and then at the powerful economic and social forces that are now working together to transform India beyond recognition. **Farming with Nature** Sara J. Scherr, Jeffrey A. McNeely, 2012-09-26 A growing body of evidence shows that agricultural landscapes can be managed not only to produce crops but also to support biodiversity and promote ecosystem health. Farming with Nature offers a synthesis of the state of knowledge of key topics in ecoagriculture. The book is a unique collaboration among renowned agricultural and ecological scientists, leading field conservationists, and farm and community leaders to synthesize knowledge and experience across sectors. The book examines: the knowledge base for ecoagriculture as well as barriers, gaps, and opportunities for developing improved ecoagriculture systems what we have learned about managing landscapes to achieve multiple objectives at a landscape scale existing incentives for farmers, other land managers, and investors to develop and invest in ecoagriculture systems pathways to develop, implement, manage, and scale up successful ecoagriculture Insights are drawn from around the world, in tropical, Mediterranean, and temperate environments, from farming systems that range from
