The Art and Culture of Early Greece, 1100-480 B.C. Jeffrey M. Hurwit, 1985 This handsomely illustrated book offers a broad synthesis of Archaic Greek culture. Unlike other books dealing with the art and architecture of the Archaic period, it places these subjects in their historical, social, literary, and intellectual contexts. Origins and originality constitute a central theme, for during this period representational and narrative art, monumental sculpture and architecture, epic, lyric, and dramatic poetry, the city-state (polis), tyranny and early democracy, and natural philosophy were all born.

Principles and Practice of Child Neurology in Infancy Colin Kennedy, 2021-02-08 The scope of the book includes all neurological problems in infancy. In the first half, it sets out in a succinct format the principles of working with families, of clinical assessment, of the use of investigations and treatments, and of evidence-based medicine. The second, symptom-based half of the book provides detailed guidance on the practice of child neurology in infancy. The authors are distinguished experts drawn from all over Europe. The contributors have approached their chapters using an accessible, didactic style and consistent organization of material. The emphasis throughout is on clinical methods, the use of appropriate investigations and treatments, and the avoidance of unnecessary or potentially harmful interventions. For quick reference, all chapters feature boxes highlighting key messages, common errors, and when to worry. The book is designed to be carried round as a handy reference.

Valvular Heart Disease Andrew Wang, Thomas M. Bashore, 2009-09-15 Challenges for the treatment of valvular heart disease include the growing need for effective yet less invasive interventions and therapies to treat these progressive conditions. With the development of potential new treatments, it is crucial for cardiac physicians to be well informed on the pathophysiology, assessment, treatment options and their outcomes of valvular diseases. Written by a highly experienced and internationally recognized group of cardiologists, cardiac surgeons, and researchers, Valvular Heart Disease offers insights into the widely varying hemodynamic effects and clinical course of heart valve conditions, as well as the contemporary management of these conditions. Offering a broad perspective on these diseases, Valvular Heart Disease expands on the recent guidelines developed by the major heart societies in the United State and Europe.

The Language of Fashion Roland Barthes, 2013-10-24 Roland Barthes was one of the most widely influential thinkers of the 20th Century and his immensely popular and readable writings have covered topics ranging from wrestling to photography. Barthes' essays here range from the history of clothing to the cultural importance of Coco Chanel, from Hippy style in Morocco to the figure of the dandy, from colour in fashion to the power of jewellery. Barthes' acute analysis and constant questioning make this book an essential read for anyone seeking to understand the cultural power of fashion.

Dawn draws still-unsuspecting Max deeper into the cult known as The Kingdom, as elsewhere Spawn deals with other Kingdom followers who are about to take the law into their own hands.

Natriuretic Peptides Aldo Clerico,Michele Emdin,2006-07-06 The rapid evergrowing knowledge in the field of neuro-humoral regulation of cardiovascular pathophysiology is changing the picture of current diagnosis and treatment of cardiac patients. The emerging conceptual revolutionary idea is that heart acts not as a pump, merely, but as a gland, that is as a regulator of circulatory homeostasis and salt-water balance. Cardiovascular pathophysiology has to be written, indeed, on this basis: no physiology textbook is up-to-date in describing the complexity and novelty of actual knowledge. The platea of either physiologists or clinicians involved in the study of the cardiovascular system and care of heart patients will accept with favour such an approach, combining the classical heamodynamic view with the new neuro-hormonal paradigma.
