*The New Fire* Ben Buchanan, Andrew Imbrie, 2022-03-08 AI is revolutionizing the world. Here's how democracies can come out on top. Artificial intelligence is revolutionizing the modern world. It is ubiquitous—in our homes and offices, in the present and most certainly in the future. Today, we encounter AI as our distant ancestors once encountered fire. If we manage AI well, it will become a force for good, lighting the way to many transformative inventions. If we deploy it thoughtlessly, it will advance beyond our control. If we wield it for destruction, it will fan the flames of a new kind of war, one that holds democracy in the balance. As AI policy experts Ben Buchanan and Andrew Imbrie show in *The New Fire*, few choices are more urgent—or more fascinating—than how we harness this technology and for what purpose. The new fire has three sparks: data, algorithms, and computing power. These components fuel viral disinformation campaigns, new hacking tools, and military weapons that once seemed like science fiction. To autocrats, AI offers the prospect of centralized control at home and asymmetric advantages in combat. It is easy to assume that democracies, bound by ethical constraints and disjointed in their approach, will be unable to keep up. But such a dystopia is hardly preordained. Combining an incisive understanding of technology with shrewd geopolitical analysis, Buchanan and Imbrie show how AI can work for democracy. With the right approach, technology need not favor tyranny.

*The Age of Unpeace* Mark Leonard, 2021-09-02 A FINANCIAL TIMES ECONOMICS BOOK OF THE YEAR 'Compulsively readable... An essential course in geopolitical self-help' - Adam Tooze 'Full of fresh - and often surprising - ideas' - Niall Ferguson 'Extraordinary... One of those rare books that defines the terms of our conversation about our times' - Michael Ignatieff We thought connecting the world would bring lasting peace. Instead, it is driving us apart. In the three decades since the end of the Cold War, global leaders have been working to create a connected world. They've integrated the world's economy, transport and communications, breaking down borders in the hope of making war impossible. In doing so, they unwittingly created a formidable arsenal of weapons for new kinds of warfare. Troublingly, we are now seeing rising conflict at every level, from individuals on social media all the way up to full-blown war in eastern Europe. The past decade has seen a new antagonism between the US, Russia and China; an inability to co-operate on global issues such as climate change and pandemic response; and a breakdown in the distinction between war and peace, as the theatre of conflict expands to include

sanctions, cyberwar and the pressures of large migrant flows. A leading authority on international relations, Mark Leonard lays out the ways that globalization has broken its fundamental promise to make our world safer and more prosperous, and explores how we might wrest a more hopeful future from an age of unpeace.

The Molecular and Structural Biology of Hair Kurt S. Stenn, A. G. Messenger, Howard P. Baden, 1991 These 32 papers and 28 poster papers offer scientific and clinical information on where research on hair currently stands. They discuss future directions which might help unravel the biological phenomena and mechanisms of the hair follicle.

*The Journal of Cell Biology*, 1995 No. 2, pt. 2 of November issue each year from v. 19 (1963)-47 (1970) and v. 55 (1972)- contain the Abstracts of papers presented at the Annual Meeting of the American Society for Cell Biology, 3d (1963)-10th (1970) and 12th (1972)-

**Science Fiction Literature in East Germany** Sonja Fritzsche, 2006 East German science fiction enabled its authors to create a subversive space in another time and place. One of the country's most popular genres, it outlined futures that often went beyond the party's official version. Many utopian stories provided a corrective vision, intended to preserve and improve upon East German communism. This study is an introduction to East German science fiction. The book begins with a chapter on German science fiction before 1949. It then spans the entire existence of the country (1949-1990) and outlines key topics essential to understanding the genre: popular literature, socialist realism, censorship, fandom, and international science fiction. An in-depth discussion addresses notions of high and low literature, elements of the fantastic and utopia as critical narrative strategies, ideology and realism in East German literature, gender, and the relation between literature and science. Through a close textual analysis of three science fiction novels, the author expands East German literary history to include science fiction as a valuable source for developing a multi-faceted understanding of the country's short history. Finally, an epilogue notes new titles and developments since the fall of the Berlin Wall.

Sediment Dynamics and Pollutant Mobility in Rivers Bernd Westrich, Ulrich Förstner, 2007-10-11 This is the first interdisciplinary book on the mobilization of nutrients and pollutants in the water phase due to hydrodynamic processes. Coverage includes the formation of aggregates in turbulent water; flocs and biofilms from organic reactions; and the formation of new surfaces for re-adsorption of dissolved pollutants. The book gathers papers resulting from an International Symposium on Sediment Dynamics and Pollutant Mobility in River Basins in Hamburg, Germany, March, 2006.

**Witwen** Britta-Juliane Kruse, 2012-02-14 Diese interdisziplinäre Untersuchung erschließt den Inhalt nur in historischen Publikationen erhaltener und bisher kaum erforschter Texte für den Witwenstand: Witwenspiegel, Gebetbücher, Traktate und Predigten. Deren Verfasser waren vor allem Theologen, die das Verhalten von Witwen innerhalb der Gesellschaft beeinflussen, ihnen aber zugleich Lebenshilfe und Trost bieten wollten. Die literaturwissenschaftliche Analyse ergänzt eine

mikrohistorische Studie zu den Lebensverhältnissen von Witwen in Nürnberg. Diese informiert in Text und Bild über deren Berufe und Wohnorte, Trauerkleidung und Rechtsverhältnisse sowie Maßnahmen zur Armenfürsorge vor der Einführung von Witwenkassen. Vielfältige kulturhistorische Dokumente belegen die bisher unterschätzte Stiftungspraxis von Witwen. Briefe und Selbstzeugnisse von Nürnberger Patrizierinnen oder Pfarrwitwen vermitteln facettenreiche, lebensnahe Eindrücke der Chancen und Probleme des Lebens im Witwenstand.

Für die 9. Auflage wurde das Logopädielexikon überarbeitet und um wichtige Begriffe aus der Logopädie ergänzt.

**Aging between Participation and Simulation** Joschka Haltaufderheide, Johanna Hovemann, Jochen Vollmann, 2020-04-06 With increasing urgency, decisions about the digitalized future of healthcare and implementations of new assistive technologies are becoming focal points of societal and scientific debates and addresses large audiences. Decisions require a careful weighing of risks and benefits and contextualizing in-depth ethical analysis with robust empirical data. However, up to now, research on social assistive technologies is mostly dispersed over different academic fields and disciplines. A comprehensive overview on discussions regarding values at stake and ethical assessment of recent developments especially in healthcare is largely missing. This publication initiates an interdisciplinary discourse on ethical, legal and social implications of socially assistive technologies in healthcare. Contributions include perspectives from nursing science, social sciences, philosophy, medical ethics, economics and law to present an - to our knowledge - first and comprehensive overview on different aspects of the use and implementation of socially assistive technologies from an ethical perspective. It combines practically relevant insights and examples from current research and development with ethical analysis to uncover exemplary moral tipping points between promotion of participation or well-being and risks and damages to these values. Healthcare professionals involved in implementation of smart technologies as well as scholars from the field of humanities, nursing and medicine, interested in the discussions on ethics and technology in healthcare, will benefit from this new contribution. The publication is part of the international DigitAs conference Aging between Participation and Simulation - Ethical Dimensions of Socially Assistive Technologies held at the Institute of Medical Ethics and History of Medicine (Ruhr University Bochum) from 4 February to 8 February 2019. Within this framework, twelve young scholars were invited to discuss their contributions with renowned experts in the field. The Institute of Medical Ethics and History of Medicine is one of the leading institutes in empirically informed ethical analysis in healthcare and medicine and is a member

of the European Association of Centres of Medical Ethics (EACME).

JIAC2009 book of abstracts C. Lokhorst,J. Huijsmans,R.P.M. de Louw,2023-09-04 The broad range of research topics reported in this abstract book is a valuable resource for researchers, advisors, teachers and professionals in agriculture. ICT in agriculture, the field of EFITA's interest, precision agriculture and precision livestock farming are becoming ever more relevant as the agricultural industry struggles to come to terms with various developments. These include issues of cooperation, Internet, standardisation, software architecture, robotics, environment, animal and human welfare, economics, traceability, farm management, vehicle guidance, crop management, animal disease and livestock management. Whilst some benefits have proved elusive, others contribute positively to today's agriculture. Research continues to be necessary and needs to be reported and disseminated to a wide audience. Also note that the reviewed papers from the 4th European Conference on Precision Livestock Farming and the 7th ECPA conference are presented in companion publications.

**Managing Expatriates** Brenton M Wiernik,Heiko Rüger,Deniz S. Ones,2017-12-18 This volume provides in-depth examinations of a variety of individual, social, and environmental factors that contribute to the success of expatriate employees. Using data from numerous large-scale studies from both the public and private sectors, this volume provides valuable insights into expatriate success with implications for both theoretical understanding and practical management. The authors explore factors that influence employees to pursue expatriation, contribute to expatriate adjustment and satisfaction, and ultimately drive expatriate performance, well-being, and success. The chapters in this book consider the role of sociodemographic characteristics, personality and individual differences, training and preparation, and social and organizational support in contributing to each of these outcomes. Using findings from diverse countries and sectors and data-focused analytic techniques, this volume provides novel insights into factors promoting expatriate success.

*Routledge Handbook of Defence Studies* David J. Galbreath,John R. Deni,2018-02-12 The Routledge Handbook of Defence Studies provides a comprehensive collection of essays on contemporary defence studies by leading international scholars. Defence studies is a multi-disciplinary study of how agents, predominantly states, prepare for and go to war. Whereas security studies has been broadened and stretched to cover at times the near totality of international and domestic affairs, and war studies has come to mean not just operations and tactics but also experiences and outcomes, defence studies remains a coherent area of study primarily aimed at how defence policy changes over time and in relation to stimulating factors such as alterations in power, strategy and technology. This new Handbook offers a complete landscape of this area of study and contributes to a review of defence studies in terms of policy, security and war, but also looks forward to new challenges to existing conceptions of defence and how this is changing as states and their militaries also change. The volume is divided into four thematic sections: Defence as Policy; Defence Practice; Operations and Tactics; and Contemporary

Defence Issues. The ability to review the field while also looking forward to further research is an important element of a sustainable text on defence studies. In as much as this volume is able to highlight the main themes of defence studies, it also offers an in-depth look into how defence issues can be examined and compared in a contemporary setting. This Handbook will be of great interest to students of defence studies, strategic studies, war studies, security studies and IR.

One Hundred Years at the Intersection of Chemistry and Physics Jeremiah James, Thomas Steinhauser, Dieter Hoffmann, Bretislav Friedrich, 2011-10-27 This volume, occasioned by the centenary of the Fritz Haber Institute, formerly the Institute for Physical Chemistry and Electrochemistry, covers the institute's scientific and institutional history from its founding until the present. The institute was among the earliest established by the Kaiser Wilhelm Society, and its inauguration was one of the first steps in the development of Berlin-Dahlem into a center for scientific research. Its establishment was made possible by an endowment from Leopold Koppel, granted on the condition that Fritz Haber, well-known for his discovery of a method to synthesize ammonia from its elements, be made its director. The history of the institute has largely paralleled that of 20th-century Germany. It undertook controversial weapons research during World War I, followed by a Golden Era during the 1920s, in spite of financial hardships. Under the National Socialists it experienced a purge of its scientific staff and a diversion of its research into the service of the new regime, accompanied by a breakdown in its international relations. In the immediate aftermath of World War II it suffered crippling material losses, from which it recovered slowly in the post-war era. In 1953, shortly after taking the name of its founding director, the institute joined the fledgling Max Planck Society. During the 1950s and 60s, the institute supported diverse researches into the structure of matter and electron microscopy in a territorially insular and politically precarious West-Berlin. In subsequent decades, as both Berlin and the Max Planck Society underwent significant changes, the institute reorganized around a board of coequal scientific directors and a renewed focus on the investigation of elementary processes on surfaces and interfaces, topics of research that had been central to the work of Fritz Haber and the first Golden Era of the institute.

*Mapping the Progress of Alzheimer's and Parkinson's Disease* Yoshikuni Mizuno, Abraham Fisher, Israel Hanin, 2002-03-31 1h The 5 International Conference on the Progress in Alzheimer's Disease and Parkinson's 51 1 Disease took place from March 31 to April 5 \ 2001 in Kroto, Japan. This international 1 conference was organized as a joint Congress with the 9 International Catecholamine Symposium. A total of 1258 clinicians and researchers participated in this joint congress 1h from 38 countries in the world. This book represents the proceedings of the 5 Conference on Alzheimer's and Parkinson's disease. The International Conference on the Progress in Alzheimer's and Parkinson's disease was first launched by Professor Abraham Fisher of Israel and Professor Israel Hanin of USA. The first conference was held in Eilat, Israel in 1985. The second conference was organized in Kyoto, Japan in 1989; the third one in Chicago, USA, in 1993, and the fourth one in Eilat,

Israel in 1997. The International Catecholamine Symposium (ICS) is an international meeting devoted to the development of basic as well as clinical research on catecholamines. The first Catecholamine Symposium was held in Bethesda, USA in 1958. Since then this symposium has occurred every 5 years. Professor Toshiharu Nagatsu was appointed as 1h the president of the 9 International Catecholamine Symposium, which was to be held in 200 I also in Japan. Therefore, we decided to organize a joint congress of the two meetings, because there is much overlap in research between Alzheimer's disease, Parkinson's disease, and catecholamines. We thank Professor Nagatsu very much for agreeing to organizing this joint congress.

**Animism, Materiality, and Museums** Glenn Peers, 2021-01-31 Written in response to an exhibition the author curated at The Menil Collection in 2013, these essays challenge us to find novel ways to explore Byzantine art. They marshal diverse disciplines - modern art, environmental theory, anthropology - to argue that Byzantine culture formed a special kind of Christian animism. While foreign to our world, that animism holds important lessons for our own relations to the world. Mutual probings of subject and art, of past and present, arise in these essays - some new and some previously published - opening up new explanations that will interest art historians, museum professionals, and anyone interested in how art makes and remakes the world.
