Computer Supported Qualitative Research António Pedro Costa, Luís Paulo Reis, António Moreira, Luca Longo, Grzegorz Bryda, 2021-04-03 This book includes selecting the articles accepted for presentation and discussion at WCQR2021, held on January 20th to 22nd, 2021 (Virtual Conference). The World Conference on Qualitative Research (WCQR) is an annual event that aims to bring together researchers, academics and professionals, promoting the sharing and discussion of knowledge, new perspectives, experiences and innovations on Qualitative Research. WCQR2021 featured four main application fields (Education, Health, Social Sciences, and Engineering/Technology) and seven main subjects: Rationale and Paradigms of Qualitative Research; Systematization of Approaches with Qualitative Studies; Qualitative and Mixed Methods Research; Data Analysis Types; Innovative Processes of Qualitative Data Analysis; Qualitative Research in Web Context; Qualitative Analysis with Software Support. The book is a valuable resource for everyone interested in qualitative research, emphasizing Computer-Assisted Qualitative Data Analysis Software (CAQDAS).

Guidance in Secondary Schools Cathy Howieson, Sheila Semple, 1996 The aim of this study was to consider the extent to which guidance provision in secondary schools in Scotland met the guidance needs of pupils and their parents. The approach taken was to focus on experiences and perceptions of both consumers and providers of guidance, to relate their views to guidance processes, and to judge the situation in project schools against national and regional policies about guidance. A main finding of the research was the extent to which pupils' opinion and experience of guidance was dependent on the attitude and approach of individual guidance teachers. However, it is strongly suggested that the majority of guidance staff would operate more effectively if the conditions within which they work were further developed. Chapters are: (1) Introduction; (2) The research; (3) Profile of school staff; (4) guidance provision in the Project Schools (1993/94); (5) The guidance needs of pupils and their parents; (6) Guidance in practice: the teacher perspective; (7) Guidance in practice: the pupil perspective; (8) Guidance in practice: the parent perspective; (9) Careers and the World of Work; and (10) Discussion and issues. Appendices are: (1) Pupil Questionnaires and (2) Parent Questionnaires. (JBJ)

Research on Teacher Induction Julie Rainer Dangel, 2006 The yearbook is designed to provide teachers and teacher educators with current research and practical guidelines for conceptualizing and implementing research. The conceptual framework of the yearbook is based on a triadic definition of scholarship: the production of knowledge, the interpretation and

synthesis of knowledge, and the application of knowledge. Thus, there are noted authors invited to read, respond and offer their interpretation and synthesis of the research selected for inclusion.

Doctoral Education: Research-Based Strategies for Doctoral Students, Supervisors and Administrators Lynn McAlpine, Cheryl Amundsen, 2011-02-16 The quality of the academics who undertake the work of teaching and research is critical to the significance, status and relevance of our universities. There is widespread evidence that doctoral students are not being properly prepared for the changing face of higher education and that once they take up academic positions, they often experience many frustrations and tensions. This book, based on a four-year-long research program conducted by four academics and four graduate students, investigates the experiences of doctoral students, new academics and senior academics as they engage in their work related to doctoral education. *Doctoral Education: Research-Based Strategies for Doctoral Students, Supervisors and Administrators* offers research-based strategies for improving doctoral education in a non-technical and conversational way. Those strategies include learning to be a new supervisor alongside other academic work, developing an intellectual network during the doctoral journey, giving and receiving feedback on scholarly writing, and preparing for the oral defence. Also, based on research evidence, the book challenges taken-for-granted practices and policies surrounding doctoral education, including the gendered nature of disciplinary practices, the paradox of writing in doctoral education and the public oversight of more and more aspects of academic work. Intended for doctoral students, academics, staff and administrators, this book provides several perspectives on the topic of doctoral education and contains the actual voices of doctoral students and new academics to illustrate its discussion.

The Evolution of American Educational Technology Paul Saettler, 2004-03-01 The primary purpose of this book is to trace the theoretical methodological foundations of American educational technology. It must be emphasized that this work is essentially as history of the process of educational technology rather than of products in the form of devices or media. Although media have played an important role in educational technology, the reader should not lose sight of the central process which characterizes and underlies the true historical meaning and function of educational technology. Moreover, the assumption is made that all current theory, methodology, and practice rests upon the heritage of the past. Indeed, a common problem in the field has been the failure, in many instances, to take adequate account of past history in planning for the

present or the future. A related purpose of this book is to provide a selective survey of research in educational technology as it relates to the American public schools. Such research reviews are not intended to be comprehensive, but were included because of their historical importance and their relevance in understanding the process of educational technology.

Student Modelling: The Key to Individualized Knowledge-Based Instruction Jim E. Greer, Gordon I. McCalla, 2013-06-29 This book is the result of a NATO sponsored workshop entitled Student Modelling: The Key to Individualized Knowledge-Based Instruction which was held May 4-8, 1991 at Ste. Adele, Quebec, Canada. The workshop was co-directed by Gordon McCalla and Jim Greer of the ARIES Laboratory at the University of Saskatchewan. The workshop focused on the problem of student modelling in intelligent tutoring systems. An intelligent tutoring system (ITS) is a computer program that is aimed at providing knowledgeable, individualized instruction in a one-on-one interaction with a learner. In order to individualize this interaction, the ITS must keep track of many aspects of the learner: how much and what he or she has learned to date; what learning styles seem to be successful for the student and what seem to be less successful; what deeper mental models the student may have; motivational and affective dimensions impacting the learner; and so on. Student modelling is the problem of keeping track of all of these aspects of a learner's learning.

Foundations of Intelligent Tutoring Systems Martha C. Polson, J. Jeffrey Richardson, 2013-04-15 This collection of essays -- each of which treats an integral aspect of the field -- defines several key concepts and their interrelationships, outlines basic research issues, and discusses near-term applications projects. The book examines three foundations of ITSs in detail -- expert, student diagnostic, and instructional or curricular knowledge -- and describes: * How they are embodied in computer-assisted instructional environments * How these systems accrue the advantages of advanced computer interface technologies * How ITSs will emerge in the real world of complex problem solving * How researchers must learn to evaluate the effectiveness and overall quality of these dynamic systems in a world where machine tutoring may one day be taken for granted. Justine Wise Polier (1903-1987) was educated at Bryn Mawr, Radcliffe, and Barnard. She earned her law degree from Yale Law School where she was editor of the Yale Law Journal. In 1935, she was appointed Justice of the Family Court where she sat for 38 years. Judge Polier took a leave from the bench in 1941 when she was appointed special advisor to Eleanor Roosevelt at the Office of Civilian Defense in Washington. She also served as Chairman of the Committee on Mental Health for New York. Judge Polier was a founder and president of the Wiltwyck School; vice president of the Citizens Committee for Children of N.Y.; vice president of the American Jewish Congress; Delegate to the White House Conferences on Children and on Education. Judge Polier was a member of the Institute of Judicial Administration, American Bar Association. She was on the editorial board of the International Juridical Association and was awarded the 1964 Isaac Ray Award by the American Psychiatric Association for contributions to the improvement of the relations of Law and Psychiatry. Following her retirement from the bench, she served as the director of the Juvenile Judge division of the Children's Defense

Fund. During her illustrious career, Judge Polier was the recipient of numerous awards including: the Citation for Distinguished Service to the City of New York, 1973; the Human Services Award from the New York and Bronx Mental Health Association, 1973; the Eleanor Roosevelt Humanitarian Award from the Board of Directors of Wiltwyck School, 1975. International Handbook of Educational Change Andy Hargreaves, A. Lieberman, M. Fullan, D.W. Hopkins, 1998-05-31 The *International Handbook of Educational Change* is a state of the art collection of the most important ideas and evidence of educational change. The book brings together some of the most influential thinkers and writers on educational change. It deals with issues like educational innovation, reform, restructuring, culture-building, inspection, school-review, and change

management. It asks why some people resist change and what their resistance means. It looks at how men and women, older teachers and younger teachers, experience change differently. It looks at the positive aspects of change but does not hesitate to raise uncomfortable questions about many aspects of educational change either. It looks critically and controversially at the social, economic, cultural and political forces that are driving educational change. School leaders, system administration, teacher leaders, consultants, facilitators, educational researchers, staff developers and change agents of all kinds will find this book an indispensable resource for guiding them to both classic and cutting-edge understandings of educational change, no other work provides as comprehensive coverage of the field of educational change.

How to Solve It George Polya, 2014-10-27 A perennial bestseller by eminent mathematician G. Polya, *How to Solve It* will show anyone in any field how to think straight. In lucid and appealing prose, Polya reveals how the mathematical method of demonstrating a proof or finding an unknown can be of help in attacking any problem that can be reasoned out--from building a bridge to winning a game of anagrams. Generations of readers have relished Polya's deft--indeed, brilliant--instructions on stripping away irrelevancies and going straight to the heart of the problem.

Optimising New Modes of Assessment: In Search of Qualities and Standards Mien Segers, Filip J. R. C. Dochy, F. Dochy, E. Cascallar, 2003-04-30 This is an essential book for all those concerned with the field of assessment. It addresses relevant and timely conceptual and practical issues from a research perspective and, based on research results, clearly provides solutions to practical applications at the cutting edge of the emerging area of new modes of assessment. In a clear and rigorous manner, the authors explore new methods and study the various quality aspects of innovative approaches.

Behavioral Consultation in Applied Settings Thomas R. Kratochwill, John R. Bergan, 2013-11-21 This guidebook has been developed as a skill-training package to teach psychologists, counselors, social workers, and other applied mental-health professionals a model for the delivery of behavioral interventions through a behavioral consultation approach. This training guide is an abridged version of the skills taught as part of a behavioral consultation model. As such it is not intended to be an exhaustive program in behavioral consultation. Usually, consultation skills are taught over a period of several months in university training programs. Also, the most successful use of the guidebook can be accomplished only with prerequisite training in behavioral analysis and assessment as a method of delivering psychological services. Thus, individuals using this guidebook should obtain supervised training in this area. The book is also designed to accompany Bergan and Kratochwill (1990). Some individuals may have a background in behavioral assessment and intervention. In this case, the use of this guidebook can provide the user who has not been exposed to the specifics of the behavioral consultation approach valuable information regarding interviewing forms of assessment and intervention. Such activities can be extremely useful when incorporated into regular clinical work in applied settings and supplemented with other assessment and intervention methods. Given the importance of successful interviewing in applied settings, a major clinical tool should be

available after careful study of this guidebook.

Self-Organizing Maps Teuvo Kohonen, 2012-12-06 The book we have at hand is the fourth monograph I wrote for Springer Verlag. The previous one named Self-Organization and Associative Memory (Springer Series in Information Sciences, Volume 8) came out in 1984. Since then the self-organizing neural-network algorithms called SOM and LVQ have become very popular, as can be seen from the many works reviewed in Chap. 9. The new results obtained in the past ten years or so have warranted a new monograph. Over these years I have also answered lots of questions; they have influenced the contents of the present book. I hope it would be of some interest and help to the readers if I now first very briefly describe the various phases that led to my present SOM research, and the reasons underlying each new step. I became interested in neural networks around 1960, but could not interrupt my graduate studies in physics. After I was appointed Professor of Electronics in 1965, it still took some years to organize teaching at the university. In 1968 - 69 I was on leave at the University of Washington, and D. Gabor had just published his convolution-correlation model of autoassociative memory. I noticed immediately that there was something not quite right about it: the capacity was very poor and the inherent noise and crosstalk were intolerable. In 1970 I therefore suggested the autoassociative correlation matrix memory model, at the same time as J.A. Anderson and K. Nakano.
