History of English Dan McIntyre, 2020-08-25 Routledge English Language Introductions cover core areas of language study and are one-stop resources for students. Assuming no prior knowledge, books in the series offer an accessible overview of the subject, with activities, study questions, sample analyses, commentaries and key readings - all in the same volume. The innovative and flexible 'two-dimensional' structure is built around four sections - introduction, development, exploration and extension - which offer self-contained stages for study. Each topic can also be read across these sections, enabling the reader to build gradually on the knowledge gained. This revised second edition of History of English includes: □ a comprehensive introduction to the history of English covering the origins of English, the change from Old to Middle English, and the influence of other languages on English; □ increased coverage of key issues, such as the standardisation of English; □ a wider range of activities, plus answers to exercises; □ new readings of well-known authors such as Manfred Krug, Colette Moore, Merja Stenroos and David Crystal; □ a timeline of important external events in the history of English. Structured to reflect the chronological development of the English language, History of English describes and explains the changes in the language over a span of 1,500 years, covering all aspects from phonology and grammar, to register and discourse. In doing so, it incorporates examples from a wide variety of texts and provides an interactive and structured textbook that will be essential reading for all students of English language and linguistics.

Writing Essays About Literature Katherine O. Acheson, 2010-12-20 This book gives students an answer to the question, "What does my professor want from this essay?" In lively, direct language, it explains the process of creating "a clearly-written argument, based on evidence, about the meaning, power, or structure of a literary work." Using a single poem by William Carlos Williams as the basis for the process of writing a paper about a piece of literature, it walks students through the processes of reading, brainstorming, researching secondary sources, gathering evidence, and composing and editing the paper. Writing Essays About Literature is designed to strengthen argumentation skills and deepen understanding of the relationships between the reader, the author, the text, and critical interpretations. Its lessons about clarity, precision, and the importance of providing evidence will have wide relevance for student writers.

Intercultural Communication Rona Tamiko Halualani, 2021-10-17 *Intercultural Communication: A Critical Perspective* is grounded in a framework based on key dimensions of power in relation to intercultural communication. A macro-micro focus is applied throughout the book to theorize the ways in which larger structures of power intermingle and reconfigure private/one-on-one encounters and relations between different cultures, both domestically and internationally. The textbook introduces students to both the hidden and visible aspects of power that constitute intercultural communication encounters and relations. The book begins by introducing the concept of intercultural communication and demonstrating how ubiquitous it is in our everyday lives. Subsequent chapters address the ties between culture, power, and intercultural communication; how powerful ideologies develop from cultural views and ways of life; and the interplay of cultural representation and speaking for or about a cultural group. Students learn the ways in which individuals and structures of power shape identity, how different structures and groups remember and forget the past, and how racialization relates to intercultural communication. The final chapters explore power dynamics with regard to globalization, intercultural relationships and desire, and our roles in intercultural communication. The second edition features new and updated research studies and illustrative examples throughout. Every chapter has a new narrative opening, introducing new identity positionalities and characters located in different cultural contexts, and connecting to the ACT Framework for Intercultural Justice to highlight agency, resistance, and structural change.

Mathematical Physics Sadri Hassani, 2002-02-08 For physics students interested in the mathematics they use, and for math students interested in seeing how some of the ideas of their discipline find realization in an applied setting. The presentation strikes a balance between formalism and application, between abstract and concrete. The interconnections among the various topics are clarified both by the use of vector spaces as a central unifying theme, recurring throughout the book, and by putting ideas into their historical context. Enough of the essential formalism is included to make the presentation self-contained.
