Mathematics in Western Culture Morris Kline, 1964-12-31 This book gives a remarkably fine account of the influences mathematics has exerted on the development of philosophy, the physical sciences, religion, and the arts in Western life.

The Philosophy Of Natural Magic Henry Cornelius Agrippa, 2023-01-31 Mr. Henry Morley, an eminent English scholar, in his *Life of Cornelius Agrippa*, makes these tributary statements: He secured the best honors attainable in art and arms; was acquainted with eight languages, being the master of six. His natural bent had been from early youth to a consideration of Divine Mysteries. To learn these and teach them to others had been at all times his chief ambition. He is distinguished among the learned for his cultivation of Occult Philosophy, upon which he has written a complete work...

A History of Mechanics René Dugas, 2012-11-07 A remarkable work which will remain a document of the first rank for the historian of mechanics. — Louis de Broglie In this masterful synthesis and summation of the science of mechanics, René Dugas, a leading scholar and educator at the famed Ecole Polytechnique in Paris, deals with the evolution of the principles of general mechanics chronologically from their earliest roots in antiquity through the Middle Ages to the revolutionary developments in relativistic mechanics, wave and quantum mechanics of the early 20th century. The present volume is divided into five parts: The first treats of the pioneers in the study of mechanics, from its beginnings up to and including the sixteenth century; the second section discusses the formation of classical mechanics, including the tremendously creative and influential work of Galileo, Huygens and Newton. The third part is devoted to the eighteenth century, in which the organization of mechanics finds its climax in the achievements of Euler, d'Alembert and Lagrange. The fourth part is devoted to classical mechanics after Lagrange. In Part Five, the author undertakes the relativistic revolutions in quantum and wave mechanics. Writing with great clarity and sweep of vision, M. Dugas follows closely the ideas of the great innovators and the texts of their writings. The result is an exceptionally accurate and objective account, especially thorough in its accounts of mechanics in antiquity and the Middle Ages, and the important contributions of Jordanus of Nemore, Jean Buridan, Albert of Saxony, Nicole Oresme, Leonardo da Vinci, and many other key figures. Erudite, comprehensive, replete with penetrating

insights, *A History of Mechanics* is an unusually skillful and wide-ranging study that belongs in the library of anyone interested in the history of science.

International Dictionary of Psychotherapy Giorgio Nardone, Alessandro Salvini, 2019-03-13 The International Dictionary of Psychotherapy is a systematized compendium of the numerous psychotherapies that have evolved over the past 30 years. With contributions from over 350 experts in the field, it highlights the diverse schools of psychotherapy, tracing their histories and traditions, while underlining their specific strengths in dealing with human behaviours, feelings and perceptions in the contemporary world. The book traces eight principal paradigms: psychodynamic, behavioural, existential-humanistic, body-expression, systemic-relational, cognitive, interactional-strategic and eclectic. It presents to the expert and non-expert reader an array of models that grew from a specific paradigm, sharing the same fundamental epistemology and therapeutic strategies. This is accomplished through a reader-friendly approach that presents clear definitions of the key constructs of each paradigm, and transversal concepts that are common to the diverse practices of psychotherapy. The International Dictionary of Psychotherapy provides a clear picture of the numerous types of psychotherapeutic treatments and their applications, while offering a close examination of the efficacy and evaluative methods developed as a result of numerous debates and research carried out within the psychotherapeutic community. It represents an essential resource for psychotherapeutic and psychoanalytic practitioners and students, regardless of background or creed.

I Have a Photographic Memory Paul R. Halmos, 1999-04-27 Paul R. Halmos, eminent mathematician, is also a snapshot addict. For the past 45 years, Halmos has snapped mathematicians, their spouses, their brothers and sisters and other relatives, their offices, their dogs, and their carillon towers. From 6000 or so photographs in his collection, Halmos chose about 600 for this book. The pictures are candid shots showing mathematicians just being themselves, and the accompanying captions, in addition to identifying the subjects, contain anecdotes and bits of history that reveal Halmos' inimitable wit and insight.

The Shawl Cynthia Ozick, 2012-07-05 Two masterful short stories: one depicts the horrors of the Holocaust, the other the lifetime of emptiness that pursues a 'survivor' - by a Pulitzer Prize finalist The Shawl is considered a modern classic - a masterpiece in two acts. The horror and desolation evoked through piercing imagery - first through the abomination of a Holocaust concentration camp murder, second through the eyes of the murdered child's mother, thirty years later, now 'a madwoman and a scavenger' - offers the reader a chilling insight into the empty suffering of a 'survivor'. In 'The Shawl', a woman named Rosa Lublin watches a concentration camp guard murder her child, a child barely old enough to walk. The shawl that was the child's security blanket and lone possession reappears in the second story, 'Rosa'. Rosa appears thirty years later, living in a Miami hotel and feeling the strain of a lifetime of pain: the hollowness of seeing her baby killed, of managing her harrowing memories she's being told to forget, and of even now being treated as a specimen and not a human being.

The Double Bond - Primo Levi Carole Angier, 2011-03 'Meticulous and visionary ... The entwined complexities and contradictions of man and writer are caught in Angier's vastly detailed and intricately layered biography.' *The New York Times Book Review* Perhaps the most important writer to emerge from the death camps, Primo Levi spent sixty-five of his sixty-seven years in Turin, Italy, where he worked as a chemist by day and wrote at night in a study that had been his childhood bedroom. Thanks to his memoirs, which include *Survival in Auschwitz*, *The Reawakening*, and his autobiographical masterpiece *The Periodic Table*, he became widely known and loved as a supremely moral man, one who had transmuted the agonies of persecution into understanding and clarity. The whole world was shocked when he died in 1987, apparently having thrown himself into the stairwell of the house in which he had been born. Carole Angier spent nearly ten years writing this deeply researched, vivid, and moving biography, which illuminates the design of Levi's interior life: how he lived as a man divided, not only between chemistry and writing but also between hope and despair, and how the duty to testify released him to communicate, which was his deepest need. 'Compelling - and beautifully written.' *The Wall Street Journal* 'Overpowering ... Angier's life study succeeds because, beyond its diligence and probity, it is an exhaustive exercise of moral imagination.' *San Francisco Chronicle*

The Theatrical Instinct Sharon Marie Carnicke, 1989 Nikolai Evreinov, a major force in the Russian avant-garde theatre, won international fame in the 1920's. His harlequinades were produced by such greats as Dullin in France, Pirandello in Italy, and the Theatre Guild on Broadway. As playwright, director, and theorist, Evreinov anticipated major developments in the twentieth century theatre: metatheatrical plays, environmental staging, and the study of performance through

anthropology, ritual, and role-playing in everyday life. Carnicke examines Evreinov's theories in light of the artistry of his plays. She clarifies his most influential ideas and reclaims his central role in modern theatre history.

Making Diagnosis Meaningful James W. Barron,1998-01 This book reflects the discontent of many mental health professionals with the Diagnostic and Statistical Manual-IV (DSM-IV), which has come to provide the foundation for managed care's fragmented, symptomatic treatment approaches. Some of the criticisms that the contributors note are (a) the excessive reliance of the DSM on the medical model; (b) an excessive focus on reliability at the expense of validity and a predominance of the categorical, rather than the dimensional, approach to diagnosis; (c) arbitrary cut-off points for disorders; (d) a significant problem with comorbidity; and (e) a steady proliferation of labels for the personality disorders. The contributors explore this and other criticisms of the DSM system and propose new ways of looking at diagnosis and treatment. This thought-provoking volume proposes the ultimate goal of finding a diagnostic process that can be meaningfully related to what clinicians do in their actual work with patients.

The Inner Matrix Emanuele Palmieri,2021-04-10 Emanuele Palmieri's work opts, unlike the alluding of authors who cultivate the literary genre of self-help, to direct his proposal to a scientific basis that desictions holistic, and sometimes gnostic, visions of the so-called New Age or alternative philosophy. Emanuele Palmieri does not seek to offer more than he proposes in this book, nor magic recipes for happiness as well as an easy path to individual success and wealth. Instead, it deals with drawing patterns of behavior and levels of sociability based on three defined levels: Time, Space and Entropy

Our Lady of the Turks Carmelo Bene, 2022-01-31 Carmelo Bene (1937-2002) was a notorious Italian actor, writer, and director who inaugurated his theater in 1959 with Camus' Caligula then exploded onto the artistic scene with his outré Christ '63. Later, he collaborated with Pasolini, Glauber Rocha, Bussotti and others as well as philosophers, like Gilles Deleuze. His novel *Our Lady of the Turks* (1964) recounts the bizarre, eccentric rituals of a young actor on a knightly quest, in the manner of the Crusaders, to hone his art so that he may ultimately become an idiot, if not a saint. C.B. describes *Our Lady of the Turks* as the jeu de cartes of a perverse novel on the idiolect. It is an amusing and merciless parody of interior life, risibly entrusted to the third-person narrative form: a monody peopled by a thousand and one voices. A setting and a vision of a south of the south of the saints (the homegrown baroque, the Moorish kitsch of a palace, the cathedral-ossuary of the Otranto martyrs, etc.), crusts summoned to feed an ethnic fire... The music is elsewhere. The only novel in C.B.'s prodigious oeuvre, *Our Lady of the Turks* was (re)elaborated on stage (1966; 1973) and in images in an eponymous film, which Bene calls a 1968 film, or better yet, the 'anti-1968 film' par excellence [that was] misunderstood to the bitter end. Translated by Carole Viers-Andronico, this is the second in a series of three separate volumes of Bene's writings that *Contra Mundum* will publish. As one of the only true 'spiritual' heirs of Artaud, Anglophones must at last reckon with Bene's genuinely radical transvaluation of every form of aesthetics.
