Cathy Collins Block, Susan E. Israel

Teaching Critical Thinking Bell Hooks, 2010 In *Teaching Critical Thinking*, renowned cultural critic and progressive educator bell hooks addresses some of the most compelling issues facing teachers in and out of the classroom today. In a series of short, accessible, and enlightening essays, hooks explores the confounding and sometimes controversial topics that teachers and students have urged her to address since the publication of the previous best-selling volumes in her Teaching series, *Teaching to Transgress* and *Teaching Community*. The issues are varied and broad, from whether meaningful teaching can take place in a large classroom setting to confronting issues of self-esteem. One professor, for example, asked how black female professors can maintain positive authority in a classroom without being seen through the lens of negative racist, sexist stereotypes. One teacher asked how to handle tears in the classroom, while another wanted to know how to use humor as a tool for learning. Addressing questions of race, gender, and class in this work, hooks discusses the complex balance that allows us to teach, value, and learn from works written by racist and sexist authors. Highlighting the importance of reading, she insists on the primacy of free speech, a democratic education of literacy. Throughout these essays, she celebrates the transformative power of critical thinking. This is provocative, powerful, and joyful intellectual work. It is a must read for anyone who is at all interested in education today.

A More Beautiful Question Warren Berger, 2014-03-04 10TH ANNIVERSARY EDITION * REVISED AND UPDATED “A book everyone ought to read-without question.”-ADAM GRANT To get better answers, we must first ask better questions. Warren Berger reveals how in this beloved guide, with hundreds of thousands of copies sold. In his groundbreaking *A More Beautiful Question*, now updated throughout, innovation expert Warren Berger proves that one of the most powerful tools for spurring change is also the most under-appreciated. Questioning-deeply, imaginatively, “beautifully”-can help us identify and solve problems, come up with ideas, and pursue fresh opportunities. But in an education and business culture devised to reward rote answers, questioning isn't encouraged-and, in fact, is sometimes barely tolerated. *A More Beautiful Question* champions that impulse for inquiry. Berger introduces surprising masters of questioning. He goes behind the scenes of industry-leading companies to show how the practice is baked into the organizational DNA. And he shares inspiring stories of artists, teachers, entrepreneurs, basement tinkerers, and social activists who transformed their lives and the world around them by starting with a “beautiful question.”

Letters to a Young Contrarian Christopher Hitchens,2009-04-28 From bestselling author and provocateur Christopher Hitchens, the classic guide to the art of principled dissent and disagreement In *Letters to a Young Contrarian*, bestselling author and world-class provocateur Christopher Hitchens inspires the radicals, gadflies, mavericks, rebels, and angry young (wo)men of tomorrow. Exploring the entire range of contrary positions—from noble dissident to gratuitous nag—Hitchens introduces the next generation to the minds and the misfits who influenced him, invoking such mentors as Emile Zola, Rosa Parks, and George Orwell. As is his trademark, Hitchens pointedly pitches himself in contrast to stagnant attitudes across the ideological spectrum. No other writer has matched Hitchens's understanding of the importance of disagreement—to personal integrity, to informed discussion, to true progress, to democracy itself.

The Art of Thinking Clearly Rolf Dobelli,2014-05-06 A world-class thinker counts the 100 ways in which humans behave irrationally, showing us what we can do to recognize and minimize these “thinking errors” to make better decisions and have a better life Despite the best of intentions, humans are notoriously bad—that is, irrational—when it comes to making decisions and assessing risks and tradeoffs. Psychologists and neuroscientists refer to these distinctly human foibles, biases, and thinking traps as “cognitive errors.” Cognitive errors are systematic deviances from rationality, from optimized, logical, rational thinking and behavior. We make these errors all the time, in all sorts of situations, for problems big and small: whether to choose the apple or the cupcake; whether to keep retirement funds in the stock market when the Dow tanks, or whether to take the advice of a friend over a stranger. The “behavioral turn” in neuroscience and economics in the past

twenty years has increased our understanding of how we think and how we make decisions. It shows how systematic errors mar our thinking and under which conditions our thought processes work best and worst. Evolutionary psychology delivers convincing theories about why our thinking is, in fact, marred. The neurosciences can pinpoint with increasing precision what exactly happens when we think clearly and when we don't. Drawing on this wide body of research, *The Art of Thinking Clearly* is an entertaining presentation of these known systematic thinking errors--offering guidance and insight into everything why you shouldn't accept a free drink to why you SHOULD walk out of a movie you don't like it to why it's so hard to predict the future to why shouldn't watch the news. The book is organized into 100 short chapters, each covering a single cognitive error, bias, or heuristic. Examples of these concepts include: Reciprocity, Confirmation Bias, The It-Gets-Better-Before-It-Gets-Worse Trap, and the Man-With-A-Hammer Tendency. In engaging prose and with real-world examples and anecdotes, *The Art of Thinking Clearly* helps solve the puzzle of human reasoning.

A Field Guide to Lies Daniel J. Levitin, 2016-09-06 From The New York Times bestselling author of *THE ORGANIZED MIND* and *THIS IS YOUR BRAIN ON MUSIC*, a primer to the critical thinking that is more necessary now than ever. We are bombarded with more information each day than our brains can process—especially in election season. It's raining bad data, half-truths, and even outright lies. New York Times bestselling author Daniel J. Levitin shows how to recognize misleading announcements, statistics, graphs, and written reports revealing the ways lying weasels can use them. It's becoming harder to separate the wheat from the digital chaff. How do we distinguish misinformation, pseudo-facts, distortions, and outright lies from reliable information? Levitin groups his field guide into two categories—statistical information and faulty arguments—ultimately showing how science is the bedrock of critical thinking. Infoliteracy means understanding that there are hierarchies of source quality and bias that variously distort our information feeds via every media channel, including social media. We may expect newspapers, bloggers, the government, and Wikipedia to be factually and logically correct, but they so often aren't. We need to think critically about the words and numbers we encounter if we want to be successful at

work, at play, and in making the most of our lives. This means checking the plausibility and reasoning—not passively accepting information, repeating it, and making decisions based on it. Readers learn to avoid the extremes of passive gullibility and cynical rejection. Levitin's charming, entertaining, accessible guide can help anyone wake up to a whole lot of things that aren't so. And catch some lying weasels in their tracks!

Research-Based Learning: Case Studies from Maastricht University Ellen Bastiaens,Jonathan van Tilburg,Jeroen van Merriënboer,2017-03-20 This book describes lessons learned from the implementation of research based learning at Maastricht University. Well-known for its problem based learning (PBL) educational model, Maastricht University implemented research-based learning (RBL) as a new educational concept in addition to PBL, around 2009. The model has taken the shape of an excellence programme offering third-year bachelor students an opportunity to conduct academic research together with academic staff. The introduction of the research-based learning concept into the programmes of all Maastricht University's faculties has resulted in a range of RBL models that vary to fit the various disciplines and programmes offered by the faculties. The book first presents theoretical models and a description of the concepts of research-based learning and undergraduate research (UGR). Next, by means of case studies, it describes the formulas developed to suit the various programmes, the challenges encountered, the initial reservations on the part of the staff, the limitations caused by regulations and demands of the curricula, as well as the successes and results of the excellence programme. The disciplines described in the case studies include psychology and neuroscience, knowledge engineering, social and cultural sciences, law, and business and economics.

Fahrenheit 451 [TV Tie-In Edition] Ray Bradbury, 2018-04 The hauntingly prophetic classic novel set in a not-too-distant future where books are burned by a special task force of firemen. 'Another indispensable classic' The Times "Ray Bradbury's gift for storytelling reshaped our culture and expanded our world" Barack Obama Guy Montag is a fireman. His job is to burn books, which are forbidden, being the source of all discord and unhappiness. Even so, Montag is unhappy;

there is discord in his marriage. Are books hidden in his house? The Mechanical Hound of the Fire Department, armed with a lethal hypodermic, escorted by helicopters, is ready to track down those dissidents who defy society to preserve and read books. The classic dystopian novel of a post-literate future, Fahrenheit 451 stands alongside Orwell's 1984 and Huxley's Brave New World as a prophetic account of Western civilization's enslavement by the media, drugs and conformity. Bradbury's powerful and poetic prose combines with uncanny insight into the potential of technology to create a novel which, decades on from first publication, still has the power to dazzle and shock.

Simply Philosophical Quotes Abstract Thoughts, 2021-07-22 Do you want to take a tour through time and go deep into the minds of the most influential philosophers of all humanity? If you want to immerse yourself in some words of wisdom from these great thinkers, then keep reading... 'It is the mark of an educated mind to be able to entertain a thought without accepting it' - Aristotle I have been a deep thinker for as long as I can remember. I would continually question existence, identity, reality, ethics, politics, religion, metaphysics and everything in between. I've always found it fascinating to entertain those thoughts, but for the most part, could never share it with others as it can come off strange and intense to many who are not on the same 'wavelength'. Sound familiar? Realising that not a lot of others might think in the same exploratory way as me, I decided to look elsewhere to see if other thinkers of the past thought or shared similar ideas. Aristotle, Plato, Descartes to name a few; they all shared such a wise and unique way of thinking, with the continuous pursuit to challenge conventional knowledge and thought processes. Many of these philosophers were strong believers that you should always question everything. They believed that for one to become fully realised you must first begin to look inside and reflect on yourself and your thoughts. Do you sometimes find yourself deep in thought, feeling connected to a train of thought and your mind in a way that feels foreign but natural? Do you ever find yourself contemplating reality, the origins of ethics, or if our current social structure is the most efficient to society it can be? Through reading quotes we can travel through time and by practice of evaluation we can start connecting with how these thinkers thought. We can read a quote and resonate with it so deeply to the point it's as if we share the same experience as the quoter. This skill can be developed through this practice and has scientifically proven benefits such as increased critical thinking and information organisation. In *Simply Philosophical Quotes* you will discover: A swift introduction to the most influential thinkers of all time Their top 3 teachings and ideas 5 fascinating facts you won't have heard before 915 inspiring, thought-provoking quotes that will leave you deep in reflection The importance of evaluating your own thoughts Philosophers include Plato, Aristotle, Socrates, René Descartes, Confucius, Immanuel Kant, The Buddha, John Locke, Epictetus and Friedrich Nietzsche.
