The Taste of Ashes Marci Shore,2013-01-15 An inventive, wholly original look at the complex psyche of Eastern Europe in the wake of the revolutions of 1989 and the opening of the communist archives. In the tradition of Timothy Garton Ash's *The File*, Yale historian and prize-winning author Marci Shore draws upon intimate understanding to illuminate the afterlife of totalitarianism. *The Taste of Ashes* spans from Berlin to Moscow, moving from Vienna in Europe's west through Prague, Bratislava, Warsaw and Bucharest to Vilnius and Kiev in the post-communist east. The result is a shimmering literary examination of the ghost of communism - no longer Marx's "specter to come" but a haunting presence of the past. Marci Shore builds her history around people she came to know over the course of the two decades since communism came to an end in Eastern Europe: her colleagues and friends, once-communists and once-dissidents, the accusers and the accused, the interrogators and the interrogated, Zionists, Bundists, Stalinists and their children and grandchildren. For them, the post-communist moment has not closed but rather has summoned up the past: revolution in 1968, Stalinism, the Second World War, the Holocaust. The end of communism had a dark side. As Shore pulls the reader into her journey of discovery, reading the archival records of people who are themselves confronting the traumas of former lives, she reveals the intertwining of the

personal and the political, of love and cruelty, of intimacy and betrayal. The result is a lyrical, touching, and sometimes heartbreaking, portrayal of how history moves and what history means.

Solar Resources Roland Hulstrom, 1989 Solar Resources takes stock of the resource - sunlight - on which any plan for solar heat conversion technologies must be based. It describes the evolution of theoretical models, algorithms, and equipment for measuring, analyzing, and predicting the quantity and composition of solar radiation, and it reviews and directs readers to insolation databases and other references that have been compiled since 1975. Following an overview of solar energy research by the editor, Raymond J. Bahm presents a comprehensive guide to available insolation databases and other information resources in the United States. Charles M. Randall and Richard Bird discuss the theoretical models and algorithms used to characterize the transference of solar radiation through the earth's atmosphere. Their chapter also addresses the important question of the accuracy of the data sets produced by the various modeling methods and algorithms. The National Weather Service (NWS) monitoring network and other major monitoring networks in the United States are discussed by Kirby Hanson and Thomas Stoffel. And Eugene Zerlaut covers the instrumentation used to measure total solar irradiance and spectral solar irradiance; he describes types of equipment, their manufacturers, procedures for calibration, and the accuracy of the data produced. Richard Bird and Carol Riordan explain the nature of spectral solar irradiance at the earth's surface, and John Jensenius describes the NWS Operational Solar Insolation Forecast System, which predicts the daily total global-horizontal insolation for two days. In the concluding chapter, Claude Robbins summarizes daylighting models and resources, and details methods for converting insolation data to illuminance data. Solar Resources is volume 2 in the series *Solar Heat Technologies: Fundamentals and Applications*, edited by Charles A. Bankston

What are Archives? Louise Craven, 2016-02-11 This collection of essays breaks new ground in archival studies in the UK where professional archival texts have traditionally concentrated on the how, not the why, of archival work. Studies of the theoretical role of, for example, the archive and the text or the archive and political power, have meanwhile been undertaken in other academic disciplines where there is an established forum for the discussion of related issues. This book invites the archivist to join that arena of debate, whilst appealing to all those interested in archives from other disciplines; the authors encourage archivists to step away from the practicalities of keeping archives to consider what it is they actually do in the cultural context of the early 21st century. The wider context of technological innovation and the internet form the backdrop

to this collection. The book explores change and continuity in the archival paradigm, the textual nature of archives and asks if views of manuscripts and personal papers are changing; it looks at specific developments in community archives, at concepts of identity and culture in archives and it presents the fruits of innovative studies of users of archives. Taken together, these essays, written by leading experts in the field, provide a new understanding of the role of the archive today.

Sacred Song from the Byzantine Pulpit Romanus (Melodes.), R. J. Schork, Melodes Romanus, 1995 Romanos the Melodist, a sixth-century deacon in Constantinople, is regarded as the premier poet of the Greek-speaking Christian church. His kontakia are elaborate, dramatic hymns designed to be sung before a congregation on major feast days. Their brilliant rhetoric and imagery are the avenue for deft commentary on scriptural texts and moral instructions. This book is an introduction to, and selected translations of, seventeen sung sermons of Romanos. While R. J. Schork reviews Romanos's life and times, his emphasis is on the hymns themselves as inspired and inspirational pieces of religious poetry. In addition, Schork focuses special attention on the poet's pervasive and sensitive treatment of various women, including Eve, the Virgin Mary, Potiphar's Wife, and the Sinful Woman who anointed Christ's feet. The translations and commentary make these contemporary recreations accessible to general audience interested in literature, the history of the Christian church, ingenious interpretation of scripture, and, especially, Romanos's unique poetic form.

Classical Pasts James I. Porter, 2021-02-09 The term classical is used to describe everything from the poems of Homer to entire periods of Greek and Roman antiquity. But just how did the concept evolve? This collection of essays by leading classics scholars from the United States and Europe challenges the limits of the current understanding of the term. The book seeks not to arrive at a final definition, but rather to provide a cultural history of the concept by exploring how the meanings of classical have been created, recreated, and rejected over time. The book asks questions that have been nearly absent from the scholarly literature. Does classical refer to a specific period of history or to the artistic products of that time? How has its definition changed? Did those who lived in classical times have some understanding of what the term classical has meant? How coherent, consistent, or even justified is the term? The book's introduction provides a generous theoretical and historical overview. It is followed by eleven chapters in which the contributors argue for the existence not of a single classical

past, but of multiple, competing classical pasts. The essays address a broad range of topics--Homer and early Greek poetry and music, Isocrate, Hellenistic and Roman art, Cicero and Greek philosophy, the history of Latin literature, imperial Greek literature, and more. The most up-to-date and challenging treatment of the topic available, this collection will be of lasting interest to students and scholars of ancient and modern literature, art, and cultural history.

Searching for the Messiah Barrie Wilson,2020-08-04 An award-winning historian of religion examines the role a “messiah” plays in Western culture, from its pre-Christian roots to modern interpretations of a savior. Over the centuries, people have longed for a messiah, whether a religious figure such as Jesus, a political leader, or even in popular culture. The messianic quest emerges most acutely during difficult times when people experience a sense of powerlessness and desperation. But the concept of a messiah—a savior—has its root in the writings of ancient Judaism and early Christianity, evolving from an anointed leader to universal savior. Wilson turns to a little understood pre-Christian text, “The Psalms of Solomon,” which set the stage for messianic expectation just prior to the birth of Jesus. Known today only to a handful of scholars—in marked contrast to the “Song of Solomon”—these important psalms were composed not by a King, but by a devout 1st century BCE Jew who witnessed terrible atrocities under brutal Roman rule. This crucial work encourages us to ask: what is a messiah? Who is a messiah? How would we recognized one should he or she appear? And what is a messiah supposed to do? In his own lifetime, Jesus directed his followers to search for “the messiah within” in his parables. Later, Paul changed the concept of “the messiah,” to “the Christ,” when presenting his message to Gentiles instead of Jews. Jesus was no longer a Jewish messiah but a Hellenistic divine avatar. In *Searching for the Messiah*, Wilson reveals how this collective search for messiahs throughout modern human history has been fundamentally flawed. Jesus himself rejected the idea of an external fixer, instead formulating his teachings to focus on the role of the individual, their choices, and their actions. *Searching for the Messiah* is revelatory and illuminating work of scholarship that will challenge and inspire.

The Birth of the Codex Colin H. Roberts,T. C. Skeat,1987-09-10 In *The Codex*, published in 1954, C.H. Roberts studied the process by which in the early centuries of our era the roll as the vehicle for literature was replaced by the codex, which has remained the format of the book ever since. New evidence that has accumulated in the last thirty years has set some of the problems in a new light and in this book, published here for the first time in paperback, the authors re-examine these and offer a different explanation for the remarkable part in the transformation played by the early Church.
