Groundbreaking Alvin Pang, Stewart Tan, Amit Prakash, Alvin Chua, Pearlwin Koh, Shuyi Ling, Nicholas Oh, Jie Hui Ong, Raynold Toh, Michelle Zhu, 2019 To mark MND's 60th anniversary in 2019, *Groundbreaking: 60 Years of National Development in Singapore* chronicles the story of Singapore's national development from pre-independence to the present day. Led by a foreword by Minister for National Development Lawrence Wong and a preface by MND Permanent Secretary Ow Foong Pheng, the book draws on newspapers, interviews and photos to explore 200 years of urban planning in Singapore as well as the Ministry's most significant milestones and achievements in shaping Singapore as a city and transforming the lives of citizens through key initiatives and policies. The book outlines how the Ministry and its agencies transformed Singapore in just six decades from squatters in slums to proud homeowners in modern housing estates; from modest shophouses to towering skyscrapers; from dirty, dusty streets to lush gardens and world-renowned skylines. With a pragmatic, can-do spirit, strong camaraderie and a sense of common purpose, the Ministry brought together the custodians of Singapore's built environment—planners, developers, architects, policymakers and civil servants—to overcome the many challenges that have confronted Singapore in its journey from Third World to First. The Ministry and its agencies are the *kampung* that built a global city--

Aligning Policies for a Low-carbon Economy OECD, 2015-07-03 This report produced in co-operation with the International Energy Agency (IEA), the International Transport Forum (ITF) and the Nuclear Energy Agency (NEA) identifies the misalignments between climate change objectives and policy and regulatory frameworks across a range of policy domains.

Seeing Like a State James C. Scott, 2020-03-17 One of the most profound and illuminating studies of this century to have been published in recent decades.--John Gray, *New York Times Book Review* Hailed as a magisterial critique of top-down social planning by the *New York Times*, this essential work analyzes disasters from Russia to Tanzania to uncover why

states so often fail--sometimes catastrophically--in grand efforts to engineer their society or their environment, and uncovers the conditions common to all such planning disasters. Beautifully written, this book calls into sharp relief the nature of the world we now inhabit.--New Yorker A tour de force.-- Charles Tilly, Columbia University

Better Buses, Better Cities Steven Higashide,2019-10-10 Better Buses, Better Cities is likely the best book ever written on improving bus service in the United States. — Randy Shaw, Beyond Chron The ultimate roadmap for how to make the bus great again in your city. — Spacing The definitive volume on how to make bus frequent, fast, reliable, welcoming, and respected... — Streetsblog Imagine a bus system that is fast, frequent, and reliable—what would that change about your city? Buses can and should be the cornerstone of urban transportation. They offer affordable mobility and can connect citizens with every aspect of their lives. But in the US, they have long been an afterthought in budgeting and planning. With a compelling narrative and actionable steps, Better Buses, Better Cities inspires us to fix the bus. Transit expert Steven Higashide shows us what a successful bus system looks like with real-world stories of reform—such as Houston redrawing its bus network overnight, Boston making room on its streets to put buses first, and Indianapolis winning better bus service on Election Day. Higashide shows how to marshal the public in support of better buses and how new technologies can keep buses on time and make complex transit systems understandable. Higashide argues that better bus systems will create better cities for all citizens. The consequences of subpar transit service fall most heavily on vulnerable members of society. Transit systems should be planned to be inclusive and provide better service for all. These are difficult tasks that require institutional culture shifts; doing all of them requires resilient organizations and transformational leadership. Better bus service is key to making our cities better for all citizens. Better Buses, Better Cities describes how decision-makers, philanthropists, activists, and public agency leaders can work together to make the bus a win in any city.

Commuting Stress Meni Koslowsky,Avraham N. Kluger,Mordechai Reich,2013-06-29 Several people have asked what motivated us to write a book about commuting, something that we all do but over which we have very little control. As a matter of fact, the general reaction from professional colleagues and friends alike was first a sort of knowing smile followed by some story. Everyone has a story about a personal commuting experience. Whether it was a problem with a delayed bus, a late arrival, broken-down automobiles, hot trains or subways, during the past year we have heard it all. Many of these stories must be apocryphal because, if they were all true, it is amazing that anyone ever arrived at work on time, at home, or at some other destination. The interest for us likely stems from many factors that over the years have probably influenced our thinking. All of the authors studied and/or grew up in the New York City metropolitan area. For illustration, let's devote a few paragraphs to describing some of the senior author's (Koslowsky's) life experiences. As a young man in New York City, he was a constant user of the New York City subway system. The whole network was and still is quite impressive. For a relatively small sum, one can spend the whole day and night in an underground world (growing up in New York often makes

one think that the whole world is contained in its five boroughs).

The Nyacks ,2005 Settled on the Hudson River more than 300 years ago, Nyack has a long and interesting history, a history that has always been defined by the river. The Nyacks portrays that history, with more than 200 stunning photographs from the archives of the Nyack Library. Nyack, Upper Nyack, and South Nyack lie some 25 miles north of New York City and in early days were the center for boatbuilding and shoe manufacturing. In the late 19th and early 20th centuries, Nyack's thriving downtown attracted residents from other parts of Rockland County. Nyack went on to become a popular destination for travelers, with several hotels and educational institutions, including a female seminary and a military academy. Nyack is also the birthplace of artist Edward Hopper and the longtime residence of actress Helen Hayes and writer Carson McCullers.

Sustainable Energy - without the hot air David JC MacKay,2016-05-14 The enlightening, best-selling book on understanding sustainable energy and how we can make energy plans that add up. If you've ever wondered how much energy we use, and where it comes from - and where it could come from - but are fed up with all the hot air and 'greenwash', this is the book for you. Renewable resources are 'huge', but our energy consumption is also 'huge'. To compare 'huge' things with each other, we need numbers, not adjectives. Sustainable Energy - without the hot air addresses the energy crisis objectively, cutting through all the contradictory statements from the media, government, and lobbies of all sides. It gives you the numbers and the facts you need, in bite-sized chunks, so you can understand the issues yourself and organises a plan for change on both a personal level and an international scale - for Europe, the United States, and the world. In case study format, this informative book also answers questions surrounding nuclear energy, the potential of sustainable fossil fuels, and the possibilities of sharing renewable power with foreign countries. Written by David MacKay, who was an esteemed Professor of Engineering at the University of Cambridge and Chief Scientific Advisor to the UK Department of Climate Change, this is an uplifting, jargon-free and informative read for all. In it, David debunks misinformation and clearly explains the calculations of expenditure per person to encourage people to make individual changes that will benefit the world at large. If you've thrown your hands up in despair thinking no solution is possible, then read this book - it's an honest, realistic, and humorous discussion of all our energy options.

Megacity Mobility Culture BMW Group,2013-01-13 What determines how cities move on? The ever-increasing challenges to urban mobility come in many forms, and approaches to address them range from the technically ingenious to attempts to change travel behaviour. Key amongst factors essential to the success of any such approach is whether the urban

environment proves to be fertile ground for the desired progress. Another vital determinant of success is how well individual measures to engineer the transport system interact with other developments. This leads to the principal subject of Megacity Mobility Culture: the basic principles that determine the paths along which cities move. This book demonstrates that the concept of 'mobility culture' provides a framework for understanding the development of urban transport which transcends the boundaries between academic disciplines. Based on a discussion of the diversity of megacities worldwide, it provides help in navigating the complexity of megacity mobility culture. Experts from megacities around the world each take the reader on a journey to their own city and its mobility culture, giving a deeper insight into the unique evolutionary paths of mobility that these places have taken, and what lies before them. Whilst acknowledging the overwhelming diversity of cities worldwide, the authors also identify common denominators behind the evolution of urban transport systems - seven temperaments which are found in a unique mix in any given city, defining the character of its mobility culture. The Institute for Mobility Research is a research facility of the BMW Group. It deals with future developments and challenges relating to mobility across all modes of transport, with automobility being only one aspect among many. Taking on an international perspective, ifmo's activities focus on social science and sociopolitical, economic and ecological issues, but also extend to cultural questions related to the key challenges facing the future of mobility. The work of the Institute is supported by an interdisciplinary board of renowned scientists and scholars, and by representatives of BMW, Deutsche Bahn, Lufthansa, MAN, Siemens and The World Bank.

Healthcare Digital Transformation Edward W. Marx, Paddy Padmanabhan, 2020-08-02 This book is a reference guide for healthcare executives and technology providers involved in the ongoing digital transformation of the healthcare sector. The book focuses specifically on the challenges and opportunities for health systems in their journey toward a digital future. It draws from proprietary research and public information, along with interviews with over one hundred and fifty executives in leading health systems such as Cleveland Clinic, Partners, Mayo, Kaiser, and Intermountain as well as numerous technology and retail providers. The authors explore the important role of technology and that of EHR systems, digital health innovators, and big tech firms in the ongoing digital transformation of healthcare. Importantly, the book draws on the accelerated learnings of the healthcare sector during the COVID-19 pandemic in their digital transformation efforts to adopt telehealth and virtual care models. Features of this book: Provides an understanding of the current state of digital transformation and the factors influencing the ongoing transformation of the healthcare sector. Includes interviews with executives from leading health systems. Describes the important role of emerging technologies; EHR systems, digital health innovators, and more. Includes case studies from innovative health organizations. Provides a set of templates and frameworks for developing and implementing a digital roadmap. Based on best practices from real-life examples, the book is a guidebook that provides a set of templates and frameworks for digital transformation practitioners in healthcare.

From the City to the Desert Raffael Beier,2019-08-23 In recent years, large-scale housing and resettlement projects have experienced a renaissance in many developing countries and are increasingly shaping new urban peripheries. One prominent example is Morocco's Villes Sans Bidonville (cities without shantytowns) programme that aims at eradicating all shantytowns in Morocco by resettling its population to apartment blocks at the urban peripheries. Analysing the specific resettlement project of Karyan Central, a 90-year-old shantytown in Casablanca, this book sheds light on both process and outcome of resettlement from the perspective of affected people. It draws on rich empirical data from a structure household survey (n=871), qualitative interviews with different stakeholder, document analysis, and non-participant observation gathered during four months of field research. The author emphasises that the VSB programme, although formally part of anti-poverty and urban inclusion policies, puts primary focus on the clearance of the shantytown. Largely based on ill-informed policy assumptions, stigmatisation, rent-seeking, and opaque implementation practices, the VSB programme interpreted adequate housing in a narrow sense. By showing how social interactions, employment patterns, and access to urban functions have changed because of resettlement, the book provides sound empirical evidence that housing means more than four walls and a roof.

Tackling Health Inequities Through Public Health Practice Richard Hofrichter,Rajiv Bhatia,2010-03-10 Social justice has always been a core value driving public health. Today, much of the etiology of avoidable disease is rooted in inequitable social conditions brought on by disparities in wealth and power and reproduced through ongoing forms of oppression, exploitation, and marginalization. Tackling Health Inequities raises questions and provides a starting point for health practitioners ready to reorient public health practice to address the fundamental causes of health inequities. This reorientation involves restructuring the organization, culture and daily work of public health. Tackling Health Inequities is meant to inspire readers to imagine or envision public health practice and their role in ways that question contemporary thinking and assumptions, as emerging trends, social conditions, and policies generate increasing inequities in health.

Aesthetics of Gentrification Christoph Lindner,Gerard Sandoval,2021-03-22 Gentrification is reshaping cities worldwide, resulting in seductive spaces and exclusive communities that aspire to innovation, creativity, sustainability, and technological sophistication. Gentrification is also contributing to growing social-spatial division and urban inequality and precarity. In a time of escalating housing crisis, unaffordable cities, and racial tension, scholars speak of eco-gentrification, techno-gentrification, super-gentrification, and planetary gentrification to describe the different forms and scales of involuntary displacement occurring in vulnerable communities in response to current patterns of development and the hype-driven discourses of the creative city, smart city, millennial city, and sustainable city. In this context, how do contemporary creative practices in art, architecture, and related fields help to produce or resist gentrification? What does gentrification look and feel like in specific sites and communities around the globe, and how is that appearance or feeling implicated in promoting

stylized renewal to a privileged public? In what ways do the aesthetics of gentrification express contested conditions of migration and mobility? Addressing these questions, this book examines the relationship between aesthetics and gentrification in contemporary cities from multiple, comparative, global, and transnational perspectives.

Shrinking Cities Harry W. Richardson, 2014 This book examines a rapidly emerging new topic in urban settlement patterns: the role of shrinking cities. Much coverage is given to declining fertility rates, ageing populations and economic restructuring as the factors behind shrinking cities, but there is also reference to resource depletion, the demise of single-company towns and the micro-location of environmental hazards. The contributions show that shrinkage can occur at any scale - from neighbourhood to macro-region - and they consider whether shrinkage of metropolitan areas as a whole may be a future trend. Also addressed in this volume is the question of whether urban shrinkage policies are necessary or effective. The book comprises four parts: world or regional issues (with reference to the European Union and Latin America); national case studies (the United States, India, China, Korea, Taiwan, Germany, Romania and Estonia); city case studies (Detroit, Buffalo, Cleveland, Naples, Belfast and Halle); and broad issues such as the environmental consequences of shrinking cities. This book will be of interest to scholars and practitioners working in the fields of urban studies, economic geography and public policy.

Experimenting for Sustainable Transport Remco Hoogma, Rene Kemp, Johan Schot, Bernhard Truffer, 2005-06-29 Technological change is a central feature of modern societies and a powerful source for social change. There is an urgent task to direct these new technologies towards sustainability, but society lacks perspectives, instruments and policies to accomplish this. There is no blueprint for a sustainable future, and it is necessary to experiment with alternative paths that seem promising. Various new transport technologies promise to bring sustainability benefits. But as this book shows, important lessons are often overlooked because the experiments are not designed to challenge the basic assumptions about established patterns of transport choices. Learning how to organise the process of innovation implementation is essential if the maximum impact is to be achieved - it is here that strategic niche management offers new perspectives. The book uses a series of eight recent experiments with electric vehicles, carsharing schemes, bicycle pools and fleet management to illustrate the means by which technological change must be closely linked to social change if successful implementation is to take place. The basic divide between proponents of technological fixes and those in favour of behavioural change needs to be bridged, perhaps indicating a third way.

Handbook of Media Management and Economics Alan Albarran, Bozena Mierzejewska, Jaemin Jung, 2018-04-27 Winner of the 2019 Robert Picard Book Award The Handbook of Media Management and Economics has become a required reference for students, professors, policy makers and industry practitioners. The volume was developed around two primary objectives: assessing the state of knowledge for the key topics in the media management and economics fields; and

establishing the research agenda in these areas, ultimately pushing the field in new directions. The Handbook's chapters are organized into parts addressing the theoretical components, key issues, analytical tools, and future directions for research. With its unparalleled breadth of content from expert authors, the Handbook provides background knowledge of the various theoretical dimensions and historical paradigms, and establishes the direction for the next phases of research in this evolving arena of study. Updates include the rise of mobile and social media, globalization, audience fragmentation and big data.
