The collection also assesses the economic impacts of tourism on local economies, environmental considerations, and whether the growth of tourism is sustainable in a post-September 11th world. *Tourism: Critical Concepts in the Social Sciences* is an accessible and comprehensive resource designed for academics and scholars researching in tourism, globalization, and human geography.

Landscape, Tourism, and Meaning Michelle M. Metro-Roland,Daniel C. Knudsen,Charles E. Greer,2016-04-22 How do we re-theorize tourism? By drawing less on the Foucauldian notion of 'tourism as gazing' and instead focusing on the social construction of meaning in the landscape, this insightful book provides an innovative and compelling new approach to tourist studies. Arguing that in any view of the landscape and in tourism generally there is a multiplicity of insider and outsider meanings, the book grounds tourism studies within the framework of social theory, and particularly in the social theoretic approaches to landscape. Bringing together specialists in tourism and landscape studies to discuss the relationships between the two, it finds that issues of identity are a common thread and are raised with regard to the social construction of landscape and its portrayal through tourism. The international studies range in scale from regional to national, personal to

political, and from local residents to international tourists, highlighting the multiplicity of interpretations and meanings between these scales.

Tourism vs Environment P.P. Wong, 1993-09-30 P.P. Wong ABSTRACT Tourism is environmentally dependent. The unique character of coastal areas gives rise to a distinctive tourist development. Although accounts on the impacts of coastal tourism can be found in works relating to tourism in general, there are few works specifically on coastal tourism. This present volume

focuses on the physical environment of coastal tourism, particularly the geomorphological aspects. The papers deal with basic aspects of the coastal environment for tourism, methodologies for assessing the coastal environment for tourism and empirical studies of various types of coastal environment with tourism development. The resulting generalisations are expected to be applied elsewhere. TOURISM AND ENVIRONMENT Environment has various meanings for tourism. In its broadest sense, the environment includes all natural and cultural elements as in OECD's (1981) definition to encompass the natural, built and cultural aspects. This holistic approach is encouraged in understanding the potential impacts arising from tourism. A narrower meaning of environment is the natural and built environment as used by Cohen (1978) and Inskip (1991: 339). Environment can also be restricted to the natural or physical environment, in order to distinguish it from the economic and social aspects of tourism, as used by tourism researchers (e.g. Mathieson and Wall, 1982; Pearce, 1989). This approach is used predominantly in this volume. Various relationships between tourism and the physical aspects of the coast are discussed. There are basic relationships between environment and tourism. Tourism is environmentally dependent and the environment is vulnerable to the impact of tourism.

Academic Tourism João P. Cerdeira Bento, Fidel Martínez-Roget, Elisabeth T. Pereira, Xosé A. Rodríguez, 2020-11-03 This book presents the latest knowledge on the still under-researched field of academic tourism, which over the past decade has gained in importance at local and national economic levels as a result of increasing international mobility of students and academic staff in higher education. A wide range of themes are explored from various perspectives, with the focus on Europe. Particular attention is paid to academic tourism demand, expenditure, and economic impact; the relationships between academic tourism and local and regional development, sustainable development, and environmental sustainability; and the importance of academic tourism for the internationalization of higher education and international cooperation and development. Further topics to be considered include the significance of academic tourism for the dynamics of tourism destinations and insights from experimental tourism research. In addition to theoretical chapters and state of the art reviews, readers will find insightful empirical and case studies. The book will be of interest to academics, researchers, students, and practitioners, including policy makers.

A Dictionary of Travel and Tourism Terminology Allan Beaver, 2005-01-01 This fully revised and updated second edition provides over 7,000 definitions of travel and tourism terminology used throughout the world, highlighting the many differences between US and European usage. It covers all aspects of the tourism industry, including hospitality, transport, and ancillary services. It explains the operating language of the travel industry, acronyms and abbreviations of organizations, associations and trade bodies, IT terms and brand names, and provides website addresses. Entries vary from one-line definitions to 500 word articles, and references are provided for further reading. This new edition contains over 500 new entries and the unique cross referencing system has been extended; for example accessing any entry about business travel

leads to over 70 others. It is an essential reference tool for anyone involved in tourism research, and everyone in the travel industry.

Mining Heritage and Tourism Michael Conlin, Lee Jolliffe, 2010-10-04 Many former mining areas have now lost their industrial function and are now turning to tourism for regional revitalization and community economic development. The transformation process of these industrial, and in some cases derelict, mining sites and landscapes into an area of interest for tourists is a major challenge both for planners and for tourism managers. It involves complex consideration to both the preservation of the physical site and community mining heritages as well as the health, safety and environmental factors inherent in opening these vast sites to the public. *Mining Heritage and Tourism* includes contributions from internationally recognized authorities and is the first book to focus on the issues, challenges and potentials in redeveloping mines as cultural heritage attractions which are explored thematically throughout the book. It draws on multidisciplinary research to consider the dichotomy between heritage preservation and tourist development goals for mining heritage sites as well as to explore the practical challenges of developing these sites. These themes are illustrated by case studies from a vast range of geographical locations around the globe to offer operational insights into the planning and management of these sites for both heritage and tourism purposes, as well as innovative site management techniques. There has never before been a more comprehensive book on mining heritage tourism representing the latest developments in strategy, policy and practices. This book serves as an invaluable guide for students, researchers, academics and practitioners in the areas of Tourism and Heritage Management.
