Transitos y retornos solares. Un nuevo sistema de analisis para dos metodos antiguos Ciro Discepolo,2009 Tránsitos y Retornos Solares es un texto único en su género, que permite al lector evaluar la realidad del método propuesto a través de cien acontecimientos famosos: desde la muerte de Benito Mussolini hasta el encarcelamiento de Sophia Loren, incluyendo las más importantes victorias de aclamados campeones deportivos. Con datos históricos en la mano, el autor explica cómo y por qué cada uno de tales acontecimientos tuvo lugar. Éxito de ventas en Italia y en Francia, este libro se ha reimpresso y reeditado en pocos años. Se han añadido nuevas e importantes secciones. Su mayor mérito es probablemente la exposición de un método que todos los estudiosos de astrología - expertos y principiantes - pueden aplicar. Desea demostrar que acontecimientos como las caídas de famosos financieros o la clamorosa expulsión de Diego Armando Maradona del campeonato mundial, se pueden explicar palabra por palabra a través de las 'treinta reglas' escritas por el autor, que invita al lector a que verifique personalmente (estudiando tanto acontecimientos futuros como crónicas pasadas) si estas treinta reglas se corresponden o no con la realidad de los hechos. El autor estudia los Retornos Solares Elegidos desde el año 1970 y, hasta el 2007, ha conducido más de veinte mil 'cumpleaños elegidos'. Ha escrito más de cincuenta libros, muchos de ellos sobre este asunto. Por estos motivos, muchos colegas lo consideran el mayor experto mundial de este específico segmento de la astrología. Sus libros han sido traducidos al francés, al inglés, al alemán, al ruso, al esloveno y al húngaro. Este libro es un texto de astrología práctica, basado en muchísimos años de observaciones y estudios prácticos. Se dirige a quien desea verificar la verdad de la afirmación: 'es posible hacer previsiones en astrología'.

Astro and Geography Ciro Discepolo,Andrea Rossetti,2011-10-10 Astrogeography probably represents, together with the Aimed Solar Returns and the Aimed Lunar Returns, the most objective and mathematically verifiable field of the entire Art of Urania. As with our other publications, in this short, yet exhaustive text also, we have adhered the following rule: an example is worth a thousand words. Here you'll find many examples; probably all of them can be defined remarkable ones. These examples show in practice how true and verifiable by anyone is Astrogeography, a discipline whose readability, a priori and a posteriori, leaves people almost bewildered by what might be called its 'scientific' features. Astrogeography - but this may as well refer to all of Astrology - expresses the basic concept upon which our studies rely: namely, that everything that is born takes on the characteristics of the place and the moment of its birth. Therefore, if we apply the variable space to all the

components of Astrology, we are able to experience at first-hand how the real things change depending on their geographic latitude and longitude. In this text you can also find the evidence that Astrogeography was already known to Girolamo Cardano, an Italian Renaissance astrologer; in fact, it is probable that this field of astrological knowledge was known even centuries before him. This volume lists all the astrogeographical positions that may be of interest, together with their explanations. They help you detect the best places on Earth that you can move to and achieve a successful career, monetary gain, love, health, and so on... You will also find detailed explanations about the so-called parans, which are so important in World Astrology. This volume is an extensively revised edition of the earlier Italian publication. It has been co-written by me and Andrea Rossetti, one of the best Italian astrologers, who has a great passion for this subject and has contributed more than me to this work, which I hope will be successful in its English version also.

Solar Returns *Ciro Discepolo*, 2011-06-01 In the opinion of the Author this book should be studied together with the other, titled "Transits and Solar Returns", because this one is, over all, about the technique of Solar Returns, starting from the meaning of a Solar Return and continuing with the calculations to get a SR (Solar Return), and a lot of related technical problems like: "By What Strength a Solar Return Works", "Which Place You Should Consider to Calculate a Solar Return", "Long and Short Ascension Signs", "How to Make Manual Calculations", "What is the Annual Progression of Sidereal Time", "From When to When a Solar Return Works", "How Long it Is Necessary to Remain in the SR Location", "What Happens if the Time Zone Changes", "The Results of the Last Researches". For example, in the latter, we read: "Remember that Saturn is always stronger than Jupiter or Venus or the Sun. So, if you place, in a SR chart, a Saturn close to Midheaven and contemporarily you place Jupiter or Venus exactly joined to Midheaven, your SR Tenth House will work as Saturn works and not as Jupiter or Venus". In the book there are also sixty examples of Solar Returns in order to explain, in a very practical way, all the theory and the interpretations contained here ("The Ascendant of the SR in the Radix Houses", "Celestials in the SR Houses", etc.). It is the first full-length volume by *Ciro Discepolo* about Solar Returns and it has been revised many times since 1993 to the present.

World Editors *Gustavo Guerrero*, *Benjamin Loy*, *Gesine Müller*, 2020-12-16 The existence of World Literature depends on specific processes, institutions, and actors involved in the global circulation of literary works. The contributions of this volume aim to pay attention to these multiple material dimensions of Latin American 20th and 21st century literatures. From perspectives informed by materialism, sociology, book studies, and digital humanities, the articles of this volume analyze the role of publishing houses, politics of translation, mediators and gatekeepers, allowing insights into the processes that enable books to cross borders and to be transformed into globally circulating commodities. The book focusses both on material (re)sources of literary archives, key actors in literary and cultural markets, prizes and book fairs, as well as on recent dimension of the digital age. Statements of some of the leading representatives of the global publishing world complement

these analyses of the operations of selection and aggregation of value to literary texts.

The Reading of the Natal Chart Ciro Discepolo, 2012-06-13 The interpretation of the natal charts (that is to say, of the drawing representing the celestial positions of our solar system at the moment of one's birth) is probably the milestone of all Astrological Knowledge. It is the point of confluence of the science in which - in a mass of fascinating synergies - disciplines such as astronomy, astrology, mythology, psychology, and a hundred other forms of Knowledge converge that together form what should be understood for Holistic Knowledge. The master of astrology, enriched by multi-decennial experiences, has the gift of synthesis, the ability of photographing in a moment all the Microcosm-Macrocosm that encloses past, present and future of every human being through the glyphs of planets, the Houses, and the angular aspects among the elements of the chart. This volume represents the University of Astrology. It is not coincidental that its Author, who is one of the most accomplished astrologer of the world, sought to engage in the writing of this short treatise, about the same time of the turning point of his own professional jubilee (defined by the number of works that he has published so far). With the simplicity that distinguishes him, on this occasion too, Ciro Discepolo has been able to present to both neophytes and the more experienced readers the most difficult concepts in a direct, simple, immediately usable way, revealing previously unpublished details, new knowledge that he has meditated for long before writing about it, and even small secrets of what must necessarily be called the Interpretative Art of Astrology. As is his custom, the Author offers over fifty examples to support the explained theories. They consist mainly in the natal charts of celebrities, completely revised compared to past editions, or interpreted now for the first time for the delight of his students.

The "new" Solar Return Book of Prediction Raymond A. Merriman, 1998

Transits and Solar Returns Ciro Discepolo, 2013-07 Transits and Solar Returns is a uniquely useful tool for interpreting transits to the birth chart and the annual solar return. Included are extensive sections that delineate the transits in the houses and in aspect to all of the other planets, both harmonious of dissonant, as well as delineation of all of the planets in all of the solar return houses. The book begins with the author's Thirty Rules for interpreting transits and solar returns. These rules, which go beyond many of those found in other books, are based on the author's extensive experience and research. These rules of interpreting function as a practical how-to for reading transits and solar returns using a step-by-step method that's easy to follow and implement. There are numerous examples to illustrate the author's interpretation method Useful and extensive appendices offer guidelines for solar return interpretation and relocation on the birthday in order to maximize positive planetary placements and minimize the negative.

Cecilia Valdés or El Angel Hill Cirilo Villaverde, 2005-09-29 Cecilia Valdés is arguably the most important novel of 19th century Cuba. Originally published in New York City in 1882, Cirilo Villaverde's novel has fascinated readers inside and outside Cuba since the late 19th century. In this new English translation, a vast landscape emerges of the moral, political, and sexual depravity caused by slavery and colonialism. Set in the Havana of the 1830s, the novel introduces us to Cecilia, a beautiful light-skinned mulatta, who is being pursued by the son of a Spanish slave trader, named Leonardo. Unbeknownst to the two, they are the children of the same father. Eventually Cecilia gives in to Leonardo's advances; she becomes pregnant and gives birth to a baby girl. When Leonardo, who gets bored with Cecilia after a while, agrees to marry a white upper class woman, Cecilia vows revenge. A mulatto friend and suitor of hers kills Leonardo, and Cecilia is thrown into prison as an accessory to the crime. For the contemporary reader Helen Lane's masterful translation of Cecilia Valdés opens a new window into the intricate problems of race relations in Cuba and the Caribbean. There are the elite social circles of European and New World Whites, the rich culture of the free people of color, the class to which Cecilia herself belonged, and then the slaves, divided among themselves between those who were born in Africa and those who were born in the New World, and those who worked on the sugar plantation and those who worked in the households of the rich people in Havana. Cecilia Valdés thus presents a vast portrait of sexual, social, and racial oppression, and the lived experience of Spanish colonialism in Cuba.

Insights Into Christian Esoterism René Guénon, 2005-05 One of René Guénon's lifelong quests was to discover, or revive, the esoteric, initiatory dimension of the Christian tradition. In the present volume, along with its companion volume *The Esoterism of Dante*, Guénon undertakes to establish that the three parts of *The Divine Comedy* represent the stages of initiatic realization, exploring the parallels between the symbolism of the *Commedia* and that of Freemasonry, Rosicrucianism, and Christian Hermeticism, and illustrating Dante's knowledge of traditional sciences unknown to the moderns: the sciences of numbers, of cosmic cycles, and of sacred astrology. In these works Guénon also touches on the all-important question of medieval esoterism and discusses the role of sacred languages and the principle of initiation in the Christian tradition, as well as such esoteric Christian themes and organizations as the Holy Grail, the Guardians of the Holy Land, the Sacred Heart, the Fedeli d'Amore and the 'Courts of Love', and the Secret Language of Dante. One chapter in the present volume, 'Christianity and Initiation', is of special interest with regard to the history of the Traditionalist School. When first published as an article, it gave rise to some controversy because Guénon here reaffirmed his denial of the efficacy of the

Christian sacraments as rites of initiation, a point of divergence between the teachings of Guénon and those of other key perennialist thinkers. Both *The Esoterism of Dante* and *Insights into Christian Esoterism* will be of inestimable value to all who are struggling to come to terms with the fullness of the Christian tradition.

A History of Western Astrology S. Jim Tester, 1987 The story of the history of Western astrology begins with the philosophers of Greece in the 5th century BC. The Greeks added numerology, geometry and rational thought. The philosophy of Plato and later of the Stoics made astrology respectable, and by the time Ptolemy wrote his textbook the *Tetrabiblos*, in the second century AD, the main lines of astrological practice as it is known today had already been laid down. In future centuries astrology shifted to Islam only to return to the West in medieval times where it flourished until the shift of ideas during the Renaissance.

Solar and Lunar Returns Ciro Discepolo, 2011-07-01 This book has a collection excerpts from my blog (<http://cirodiscepolo.blogspot.com/>), where I have answered questions from foreign readers, since 2007. My blog posts include suggestions for Aimered Solar and Lunar Returns for specific reader queries along reasons for suggesting them and analyses of consequent repercussions on taking such a possible step. A record of this manner of interaction provides a practical insight to all readers about the ways and means of using Active Astrology to further their interests regarding love, money, real estate transactions, education, etc., and guard against sickness and possible troubles in other realms of life. The book deals only with practical cases that explain the technique of using astrology as a means to address your normal necessities and not with abstract theory. I have also answered technical questions from readers about rules involved in the exercise, making the contents of this book a tutorial as well. A large collection of Solar and Lunar Return charts are included as ready reference to easily understand the explanations in text.

The Secret Language of Dante Alighieri Luigi Valli, 2021-04-11 From that long investigation of mine the conclusions that I summarize and explain in this book arose and which, I will say immediately, are the following: It is true that the poetry of the Fedeli d'Amore, especially that of Dante and his most immediate predecessors, of the his contemporaries and his successors, is written in a secret jargon for which at least thirty words (Rossetti had already pointed out some, deceiving himself about others) constantly have, in addition to the apparent meaning concerning love matter, a second and sometimes also a third conventional meaning, concerning the ideas of an initiatory doctrine and the life of a group of initiates. These words are precisely those that with exasperating monotony fill the lines of these Faithful, very often presenting nonsense in the literal plane, namely: love, madonna, death, life, women, madness and madness, cold, gaiety, gravity, boredom, nature, weep, stone, rose, flower, source, greeting, wild, shame and others of less frequent use. It is true that all the women of the dolce stil novo are in reality one woman and that is the holy Wisdom, which in the special use of the dolce stil novo conventionally takes a different name for each different lover and is called Beatrice for Dante, Giovanna for Guido Cavalcanti,

Lagia for Lapo Gianni, Selvaggia for Cino and so on. And since, as I said above, the doctrine cultivated by a sect and the sect itself are confused under the same designation, these women also serve to designate the sect of the Fedeli d'Amore. Dante's Vita Nuova is all written in this jargon: it is all symbolic from the first to the last word and concerns the initiatory life of Dante and his relations not with the wife of Simone de 'Bardi, but with the Holy Wisdom and with the group that cultivated it. Therefore the Beatrice of the New Life does not differ substantially from the one who appears triumphant on the chariot of the Church in the apocalyptic vision of the Divine Comedy. The darkest poems of the Fedeli d'Amore and especially Dante's obscure songs, over which those who were ignorant of the jargon have struggled in vain, read according to the jargon, melt their clarity, coherence, unsuspected depth. Not only that, but with the knowledge of the secret meaning of these few words of jargon, they clear up in our eyes and completely transform into their spirit, other very obscure works by Dante's contemporaries, such as the Documents of love by Francesco da Barberino, the Intelligence by Dino Compagni, the Acerba by Cecco d'Ascoli, works which, while differing outwardly from the love poetry of the sweet styl novo are informed by the same profound mystical spirit, by the same secret doctrine, they come out, in other words, from the bosom of the same sect. These poems, once translated into their real meaning with the key of jargon, in place of that vague, stylized, monotonous, cold, artificial love, which they almost always show according to the letter, reveal to us an intense and deep life of love. for a mystical idea, considered the true essence of Catholic revelation, of a struggle for it, against the carnal and corrupt Church, conventionally called Death or the Stone and which is depicted as an opponent of the sect of the Fedeli d'Amore and as a concealer of that holy Wisdom that the Fedeli d'Amore pursue under the figure of the woman; they reveal to us a series of mystical kidnappings, of cries invoking help against the persecutions and threats of adversaries, of excitements with which the followers comfort each other to remain faithful to the holy idea, and other very high and very deep things, before which the fictitious love poem, which is on the surface, falls, and almost always without our regret, like a very insignificant rind, leaving us astonished that we could have believed that all this was really love poetry.

Lunar Returns and Earth Returns **Ciro Discepolo**, 2009 Probably, this text is unique in its genre, in the field of astrology anywhere in the world. In fact, for the first time a book is published concerning exclusively the usage of Lunar Returns and Earth Returns in support of Aimered Solar Returns and of Active Astrology. Having published at least a dozen books on Solar Returns and Lunar Returns, and having studied over twenty thousand 'aimed birthdays' in a practice of almost forty years, the Author is considered the foremost of experts in this specific field. For the first time, he takes a position concerning the question 'Astrology as a phenomenon of synchronicity' or 'Astrology as a causality fact'. Hence he develops a possible general theory of his own on the functioning of Solar Returns, Lunar Returns and Earth Returns. The reader not only will find a comprehensive theory in support of the declared theses, but above all many practical examples of daily usage of

Lunar Returns and Earth Returns. As for Earth Returns, original tables allow you to try the described methods despite the lack of specific software programs. Furthermore the Author proposes new paths of research concerning the practice of aimed Lunar and Solar Returns. An absolutely essential book for those who love Predictive Astrology, Active Astrology and the wonderful world of Solar, Lunar and Earth Returns (the latter being presented for the first time in its applicative possibilities).

The New Dictionary of Astrology Ciro Discepolo,2013-06-02 Due to the significant progress of Astronomy, Statistics and of calculation techniques, the discipline of Astrology is constantly evolving. In this work Ciro Discepolo aims at recapitulating and systematizing contemporary astrological knowledge. The present volume follows the famous attempt of Henri-J. Gouchon (Dictionnaire astrologique, Dervy-Livres, 1975), of which Discepolo's work is an update. In his summa astrologica, Discepolo: - informs his readers about the news in the field of Astrology, of which he is a leading figure in Italy today; - complements Gouchon's work with a number of new entries or updates (such as Aids, Astrocartography, Courage, Drowning, Libido, Suicide, Synchronicity); - offers a generous contribution of original and first-hand interpretations; - provides hundreds of Natal Charts illustrating a high number of entries with a specific didactic purpose. This volume is intended for consultation; it is exhaustive and concise at the same time, and its reading from A to Z will prove extremely pleasant for its fresh and lively style.

Retornos Solares y Lunares Dirigidos Ciro Discepolo,2014-03-11 Ustedes ya conocen al Autor gracias a sus obras anteriores - Tránsitos y retornos solares y fundamentos de Astrología Médica. Con 40 años de investigaciones astrológicas, Ciro ha publicado docenas de libros sobre retornos solares y lunares y ha guiado más de veinte mil retornos solares dirigidos. Este es su tercer trabajo en español y trata el segundo 'recurso' en el que su Astrología Activa se basa (siendo el primero los cumpleaños dirigidos): el denominado exorcismo de los símbolos. El Autor le ofrece a sus lectores sugerencias sobre qué hacer cuando no pueden dirigir, o reubicar activamente su cumpleaños. Ciro Discepolo, por ejemplo, afirma que se podría también exorcizar un Saturno en la 5ª casa del retorno solar dedicando más tiempo a los hijos, ayudándolos en sus estudios, actividades deportivas o pagándoles cursos y o estudios en el extranjero. Este libro contiene las sugerencias del autor acerca del exorcismo de los símbolos, planeta por planeta, casa por casa.

Unsayable Music Paulo C. Chagas,2014 Profound theoretical and philosophical approach to contemporary music Unsayable Music presents theoretical, critical and analytical reflections on key topics of contemporary music including acoustic, electroacoustic and digital music, and audiovisual and multimedia composition. Six essays by Paulo C. Chagas approaching music from different perspectives such as philosophy, sociology, cybernetics, musical semiotics, media, and

critical studies. Chagas’s practical experience, both as a composer of contemporary music and sound director of the Electronic Music Studio of Cologne, nourishes his observations on the specific creativity that emerges with the use of the technical apparatus, the development of the electronic music studio, the different aesthetics of electroacoustic music, and the forms of audiovisual and multimedia composition. The title Unsayable Music is a reference to Wittgenstein, who suggested that sound is only the surface of music and that the musical work conceals something more profound that can hardly be described by philosophical models or scientific theories.
