Myanmar's Digital Coup Nicholas Coppel,

Digital Scholarly Editions Beyond Text Tessa Gengnagel, 2024-02-07 Scholarly editions contextualize our cultural heritage. Traditionally, methodologies from the field of scholarly editing are applied to works of literature, e.g. in order to trace their genesis or present their varied history of transmission. What do we make of the variance in other types of cultural heritage? How can we describe, record, and reproduce it systematically? From medieval to modern times, from image to audiovisual media, the book traces discourses across different disciplines in order to develop a conceptual model for scholarly editions on a broader scale. By doing so, it also delves into the theory and philosophy of the (digital) humanities as such.

Bio-Inspired Technologies for the Modern World R. Ramakrishna Reddy, T. Pullaiah, 2024-08-23 Nature gives us ample opportunity to understand and observe her secrets, and scientists and inventors can and do study the characteristics of things in nature to come up with amazing and astonishing technologies and products invented as a result. This new volume provides a sampling of technological issues that have been tackled with the help of biologically inspired engineering, by such things in nature as bionic plants, the lotus leaf, insects and beetles, geckos, bats, spiders, and butterflies. It considers bio-inspired technologies that have been applied in water purification, for business lessons, in healthcare and medicine, and more. This unique volume is an inspiring resource for professionals, researchers, scholars, engineers, and businessmen and businesswomen interested in the latest developments by studying the wonders of natural science.

Research Handbook on International Solidarity and the Law Cecilia M. Bailliet, 2024-04-12 This comprehensive and insightful Research Handbook addresses the interpretation of international solidarity within topical legal regimes and regional systems, as well as in relation to decolonization and the concepts of Ummah and Ubuntu. It examines the way in which international solidarity enables the global community to respond to intercontinental challenges, including climate change, forced migration, health emergencies, and inequality.

We Need to Talk About Defence Andrew Curtis, 2024-09-19 Based on a distinguished 35-year career in the RAF as an Air Commodore, Andrew R. Curtis highlights what is wrong with the way defence is managed today, and presents evidence-based proposals to fix it. Defence is failing to deliver. From the ability of the Ministry of Defence (MoD) to develop defence

policy, to the single service's - Royal Navy, British Army, and Royal Air Force (RAF) - ability to acquire and maintain military capability, and undertake military operations. This is not a new problem; indeed, ever since the creation of the MoD in 1964, there have been tensions between the department of state and the armed forces over allocations of responsibility, authority and accountability. Concerned with political oversight; the allocation of responsibility, authority, and accountability; administration of people; organisational structures; and policies and processes, Curtis compellingly demonstrates the critical need to reform the management of Defence for the UK's armed forces to fight and win in the future.

Property Rights in Outer Space Matthew Johnson, 2024-05-28 This book explores the role of private mining rights in the utopian imaginary of space colonisation. It presents a transdisciplinary account of the new and evolving legislative frameworks that have been established in anticipation of commercial exploitation of the mineral resources of the off-world frontier. Written in an engaging style, the book investigates a novel case study in the history of capitalism and 'the commons': the emergence of a nascent space mining industry, undergirded by a contentious legislative framework. In 2015, the US passed laws that would recognise the claims of US corporations to own and sell space resources. This unilateral act of pre-emptive law-making would appear to contravene the terms of the UN Outer Space Treaty (1967), which declared that the exploration and use of outer space should be 'for the benefit of all mankind' and 'not subject to national appropriation'. Using this central dynamic between privately held mining rights and outer space as a 'global commons', Matthew Johnson constructs an historical sociology of space mining - from the deep historical roots of common and private property to the contemporary networks of neoliberalism that have engaged with the commercialisation of space activity. The anticipatory expansion of private property claims beyond the Earth both resonates with and problematises the 'terrain' of political history, such as the tensions between states and markets, public law and private power, 'the commons' and exclusive property. The emerging cosmopolitics of off-world private property mirrors (and is often explicitly embedded within) neoliberal geopolitics, prompting urgent questions about how we can reaffirm principles of democracy and 'common heritage' in the international laws of Earth and space. This book is compelling reading for anyone interested in the social study of space, law, economics, technology, politics and property rights.

Subhash Chandra Garg's Explanation and Commentary on Budget 2024-2025 | Outcome of Budget 2022-2023 | Implementation of Budget 2023-2024 Subhash Chandra Garg, The Government of India spends about 15% of India's GDP, which translated into a whopping expenditure budget of Rs. 48.2 trillion for 2024-25, including Rs. 11.11 trillion on capital expenditures, another 11.6 trillion on interest payments, more than Rs. 4.2 trillion on subsidies like food and fertilisers, over Rs. 5 trillion on centrally sponsored programmes in the states and many other expenditures. The budget expenditures impact everyone, individuals, households, workers, businesses and everything we care about-growth, inflation, welfare and governance of the country. This book explains everything relating to the expenditures programmes of the government. The

government's tax proposals generate all-round interest. Companies worry about tax on their goods, profits, equities and bonds. Households and individuals look at the budget speech proposals how their salaries, savings and capital gains are going to be affected. The wider investment community wants to figure out the government's disinvestment, privatisation, dividends and other non-tax receipts. All the tax, non-tax, disinvestment and privatisation proposals and performance of the government have been thoroughly analysed and commented upon in the book. The economists, media, banks, foreign portfolio investors, investment managers, brokerages and everyone else with a direct or indirect stake in India's economy, savings, credit, financial markets and any other macroeconomic aspect watch very carefully, in addition to expenditure and tax proposals, the proposals of the budgets impacting macroeconomy. This book presents an in-depth analysis of the macro-economic performance of the Indian economy and the implications of budget proposals. The book is organised in four parts and 40 chapters. The first part has all the big budget numbers with highlights, the second part brings out the results and outcomes of Budget 2022-23, the third part takes a serious look at the implementation of Budget 2023-24 and the fourth part critically analyses the implications of the proposals in Budget 2024-25 presented on 23 July. All the three budgets have also been rated on a sound framework taking into account 2022-23 actuals, 2023-24 revised estimates and 2024-25 budget estimates.

The Russian-Ukrainian Conflict and War Crimes Patrycja Grzebyk, Dominika Uczkiewicz, 2024-10-07 This book offers a multidisciplinary examination of the international crimes committed in the Russia-Ukraine War, and the challenges of their prosecution and documentation. As the largest international armed conflict in Europe since World War II, Russia's war against Ukraine has provoked strong reactions and questions about the post-1945 world order, the utility of the war, and the effectiveness of international criminal justice. Throughout the chapters in this volume, scholars and legal practitioners from Canada, Germany, Poland, Ukraine, the UK, and the United States present the results of interdisciplinary research, insights from the perspective of other post-communist states, and first-hand expertise from directly working on the documentation and prosecution of these crimes. This offers a broader picture of post-Cold War relations and sheds light on the roots and nature of the war and the importance of regional approaches. The chapters also present some possible responses to the crimes committed in the conflict, with a focus on a victims-centered approach to transitional justice. This volume will be of interest to scholars and students of international criminal and humanitarian law, security studies, peace and conflict studies, and Eastern European history.

Vampire State Ian Williams, 2024-09-05 This is the terrifying story of China's vampire economy. State capitalism. Socialism with Chinese characteristics. A socialist market economy. There have been numerous descriptions of the Chinese economy. However, none seems to capture the predatory, at times surreal, nature of the economy of the world's most populous nation - nor the often bruising and mind-bending experience of doing business with the Middle Kingdom. Rules and

agreements mean little. Markets are distorted, statistics fabricated, foreign industrial secrets and technology systematically stolen. Companies and entrepreneurs, at home and abroad, are bullied – often with the collusion of the victims themselves. The Party is in every boardroom and lab, with businesses thriving or dying at its will. All this is part of realising President Xi Jinping's ambition of China becoming the world's pre-eminent economic, technological and military power.

The Law and Politics of Brexit: Volume V ,2024-04-11 The Trade & Cooperation Agreement (TCA) is the treaty which regulates free trade and economic arrangements between the European Union (EU) and the United Kingdom (UK) post-Brexit. The treaty entered into force provisionally on 1 January 2021 and officially on 1 May 2021, and has governed trade relations between the parties since. This book brings together contributions by leading scholars in EU and international trade law, economics and political science to provide a comprehensive, interdisciplinary analysis of the TCA. It contextualizes the treaty and identifies several emerging political, economic, and security challenges, which serve as the background to evolving EU-UK relations. The book also unpacks the treaty's complex provisions on customs and rules of origin, investments, services and procurement, subsidies, fisheries, aviation, cooperation on energy, environment, health, social security, and on UK participation in EU programs. Furthermore, it provides an updated assessment of EU-UK disagreement on the implementation of the Protocol on Ireland/Ni, and considers the positive impact of the Windsor Framework in rebuilding trust between the parties, and the possibilities to further expand EU-UK cooperation within the TCA and beyond. This is an open access title. It is made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 International licence. It is available to read and download as a PDF version on the Oxford Academic platform.

The Power of Instinct Leslie Zane,2024-06-18 Award-winning Fortune 500 brand consultant and behavioral expert Leslie Zane shatters conventional marketing wisdom, showing readers how to tap into the hidden brain where instinct prevails, creating a powerful network of connections that drive people to buy your product, company, or vision. People don't make decisions with their conscious mind, but on instinct. In *The Power of Instinct*, marketing consultant and behavioral science expert Leslie Zane shows that to grow a brand, business, or even a social movement, traditional persuasion tactics fall short.

Instead, you must connect to the instinctive mind. And to do this, you need to understand the science of consumer choice and employ techniques that work with a person's brain, not against it. Zane uncovers the hidden network of connections that dictates the snap decisions we make and cracks the code on how to influence it. With a revolutionary set of rules for expanding the network, Zane shows us how to make any brand, business, political candidate, or idea the dominant instinctive choice. With science as your guide, as well as stories from the world's most successful brands from McDonald's and Lululemon to the Yankees and Taylor Swift, you'll learn: What kind of messages create the greatest amount of positive associations; Why finding new customers accelerates growth and relying on existing ones is a trap; Why emotional stories are not enough to drive trial and long-term brand loyalty. Whether you're an entrepreneur, Fortune 500 executive, marketing professional, or job seeker, mastering the power of instinct will help supercharge your growth and make whatever you're selling the first choice for any audience.

Arbitrary Withholding of Consent to Humanitarian Relief in Non-international Armed Conflict Vijitha Veerakatty,2024-08-19 How to legally assess the situation when humanitarian actors in non-international armed conflicts are arbitrarily denied access to the affected civilian population? The book answers this question from the perspective of the five main actors involved in humanitarian relief in non-international armed conflicts: the affected State, non-State armed groups, humanitarian actors, non-belligerent States and the affected civilian population. It examines the legal regulations and consequences for each of these actors. In doing so, the book not only draws attention to existing legal gaps and challenges, but also encourages readers to rethink outdated legal concepts and discuss new approaches. The open access publication of this book has been published with the support of the Swiss National Science Foundation.
