Antón Baamonde

Breve historia del urbanismo Fernando Chueca Goitia,2011 Esta Breve historia del urbanismo esboza el proceso que, a partir de las civilizaciones del Valle del Nilo y Mesopotamia, ha conducido hasta la moderna vida urbana. La descripción de los tipos fundamentales de ciudades antigua, islámica, medieval, renacentista, barroca, industrial pone de manifiesto las constantes y las diferencias de los diversos modelos, articulados en una secuencia histórica que permite anticipar con clarividencia muchos de los retos con que se enfrentan las urbes actuales. Fernando Chueca Goitia presta especial atención a los problemas que plantea al urbanismo contemporáneo el crecimiento desmesurado e irracional de las grandes metrópolis, con sus connotaciones de deshumanización y desarraigo.

Beyond Smart Cities José A. Ondiviela,2021-10-21 Cities are experiencing unprecedented times. In addition of managing the best possible post-pandemic recovery, Cities are at the beginning of the 4th industrial revolution, and all want to play a relevant role in it. To achieve this, they must retain and attract the necessary talent. There is a fierce competition where cities transform to become as attractive as possible. But what makes a city attractive (from emotional and rational sides) to talented citizens? For mayors and city directors: how can I prepare my city for this goal? What kind of transformations in the medium-long term should I develop? And in the short term, what processes and technologies (SmartCity) should I put in place? And from the point of view of citizens: how do I choose the best city to develop my full potential? Which one offers me the best citizenship contract? Where am I going to enjoy the best services with the highest quality of life and lower taxes/cost of life? In addition, the city must be attractive, with a strong identity and dynamism and promising future. Can I find the cities that best suit my aesthetic and emotional preferences, and that also offer me the services that I consider a priority at the lowest cost to my pocket? Find all the answers in this book.

Tauromaquia. Déjame que te cuente su historia María Luisa Ibáñez,2021-02-12 Tauromaquia. «Tradicción, arte y cultura», para unos. «Depravación e involución», para otros. En cualquier caso, ¿conoces su verdadera historia? ¿Cuándo nació realmente? ¿Cómo? ¿Dónde? Y ¿por qué? Múltiples teorías y ninguna evidencia. Cansada de no encontrar respuestas coherentes, la autora indaga con tesón en la historia de España. El fin: buscar las claves de su nacimiento y las causas que la hicieron transformarse con el paso del tiempo. Empeñada en descubrir las circunstancias que la hicieron emerger, termina desvelando los bulos y enderezando las múltiples tergiversaciones que sobre esta cuestión se han montado a lo largo de los

siglos. Déjate acompañar y sé tú mismo partícipe de este descubrimiento. Te sorprenderá.

La destrucción de la ciudad Juan Manuel Agulles,2023-01-31 ¿Podemos seguir llamando ciudades a lo construido durante los dos últimos siglos de industrialización? Megalópolis y tecnópolis proliferan hoy en nuestro mundo, borrando los límites internos y externos sobre los que históricamente se ha construido la ciudad. Junto a la multiplicación de infraestructuras urbanas de transporte, energía o telecomunicaciones, megatugurios, slums, campos de refugiados, poblados de chabolas, “ciudades rodantes” y otros asentamientos precarios y provisionales han terminado por convertirse en las construcciones más generalizadas de nuestra era industrial. Una expansión que aunque ha urbanizado una gran parte del planeta, bajo el dictum indeclinable del crecimiento económico, está haciendo desaparecer la ciudad como elemento histórico y forma de construir el espacio social. Esta realidad urbana no ha hecho más que agravarse en un contexto tecnológico que dista mucho de la primera urbanización europea y en un capitalismo global que requiere de combustibles fósiles no renovables para mantener su crecimiento. Como sostiene su autor, “el modo de vida urbano se convierte hoy en la utopía realizada de la industrialización. Para tomar forma, ha necesitado destruir tanto el mundo rural como las ciudades que florecieron a lo largo de la historia humana. Y, por raro que parezca, muchos urbanistas soñaron con un mundo sin ciudades”. En este ensayo, Juanma Agulles nos plantea un recorrido por las diferentes formas que ha adoptado la destrucción de la ciudad a través del industrialismo y sus planes urbanísticos y arquitectónicos, al tiempo que es una lúcida reflexión sobre las posibilidades de salir de la “ciudad sin límites”.

Le Corbusier Talks with Students Le Corbusier,1999-12 First published in France in 1943 and translated for English-speaking readers in 1961, *Le Corbusier Talks with Students* presents advice and commentary from the master of modernism for young architects-to-be. In chapters ranging from *Disorder* to *The Construction of Dwellings* to *A Research Workshop*, Le Corbusier discusses his views on architectural history and offers opinions on the future of the profession, while touching on his own projects for the Villa Savoye, the Cité Universitaire, and the Radiant City. Topics such as architecture's role in our directionless society; the balance between spiritual values and technical factors; and the importance of space, proportion, and color are explored by this renowned architect, and still resonate today, almost 50 years later. Our reprint of this classic text is a facsimile of the 1961 edition, now available as an affordable paperback.

Patrimonios migrantes Ricard Huerta Ramón,Román de la Calle,2013-07-15 Existe un público cada vez mayor y más interesado en las temáticas donde confluyen aspectos como el arte, el patrimonio, la educación, los museos, las tecnologías y la gestión cultural. En una sociedad que avanza entre lo presencial y lo virtual no puede imaginarse un patrimonio sin migraciones. A partir de estas consideraciones, en esta obra se revisa desde diferentes ámbitos el término patrimonio, y se presentan las reflexiones de diferentes especialistas así como sus aportaciones para introducir y diseccionar el nuevo

concepto de patrimonios migrantes. Con la intención de reflexionar en torno a las cuestiones patrimoniales y en lo referido a la educación patrimonial se celebraron en la Universitat de València las IV Jornadas Internacionales de Investigación en Educación Artística bajo el lema «Patrimonios migrantes», cuyos textos se recogen en este libro.

La Cuadra Marco Chandía,2013-03-07 Ante un relato decimonónico, marcadamente pintoresquista y objetual, Marco Chandía nos ofrece en estas páginas una investigación interesante, luminosa y profunda sobre la cultura, el lugar, la memoria y los sujetos populares que no solo habitan el Barrio Puerto de Valparaíso, sino que también lo dotan de plena identidad. De esta manera, el lector se puede encontrar con otro Valparaíso, uno muy distante de las postales turísticas y, sin embargo, quizás más profundamente porteño. Un fragmento de la ciudad que suele invisibilizarse, y que ahora surge a la luz, en las palabras de uno de los investigadores que más detalladamente ha estudiado este tema.

"Unha nova Olanda. De Ferrol ao Porto: as cidades galegas e o norte de Portugal no escenario global" Antón Baamonde,2021-10-21 Galicia ten que pensarse como unha única cidade con varios nós. Un diamante con vértices nas súas sete grandes cidades. A trama urbana do país, ese heptágono fenomenal, está inmersa en procesos planetarios, onde as súas grandes empresas teñen a mirada posta en horizontes globais que son fiestras de oportunidade. Galicia terá un horizonte se sabe combinar co Norte de Portugal un eixe atlántico que sexa un imán de atracción de investimentos, poboación, recursos e talento. A Galicia vénlle ben unha España en rede que tome en consideración a Portugal, onde o seu futuro será urbano, ou non, o que non é unha idea novidosa, pois xa Antolín Faraldo reclamaba no século XIX unha gran cidade como modo de promover o progreso e rachar o dominio das vellas elites. Cada cidade galega ten o seu propio carácter. As identidades urbanas —A Coruña, Vigo, Santiago...— son un país ignoto por explorar.

El concepto de espacio en la arquitectura palatina andalusí Ana Almagro Vidal,2008 La infografía se ha revelado como un instrumento de gran potencial que nos permite estudiar y analizar un patrimonio arquitectónico difícil de conocer y comprender en la realidad debido a su estado de conservación. A través de ejemplos que van desde la ciudad palatina cordobesa de Madinat al-Zahra del siglo X hasta los palacios nazaríes de Granada de los siglos XIII y XIV, esta investigación ha buscado plantear, desde el rigor, el criterio y el método científico, un discurso coherente basado en el análisis perceptivo del carácter espacial de dicha arquitectura reconstruida, indagando a través de este instrumento de estudio aspectos novedosos y características espaciales que son origen y referencia obligada de manifestaciones arquitectónicas posteriores.

Ciudad y movilidad Andrés Boix Palop,Reyes Marzal Raga,2014-09-23 Este volumen examina por primera vez en España de forma completa, la movilidad urbana sostenible y los problemas de regulación que se plantean en las ciudades a la hora de mejorarla e impulsarla. El libro analiza su importancia en relación con el diseño de la ciudad y la calidad de vida de los

ciudadanos a la vez que estudia los derechos a elegir los medios de movilidad y las consecuencias que de ello se derivan, especialmente en cuanto a las obligaciones que las Administraciones públicas tienen para garantizar estos derechos y promover sistemas lo más sostenibles posibles. Para ello se estudia qué funciones corresponden a las Administraciones estatal, autonómica y local y cómo han de coordinarse. La obra se cierra con un estudio específico de la ley valenciana de movilidad, una de las únicas experiencias autonómicas en la materia, y su aplicación a la ciudad de Valencia.

Postmetropolis Edward W. Soja, 2000-05-18 This completes Ed Soja's trilogy on urban studies, which began with *Postmodern Geographies* and continued with *Thirdspace*. It is the first comprehensive text in the growing field of critical urban studies to deal with the dramatically restructured megacities that have emerged world-wide over the last half of the twentieth-century.

The Historiography of Modern Architecture Panayotis Tournikiotis, 2001-02-27 The history of modern architecture as constructed by historians and key texts. Writing, according to Panayotis Tournikiotis, has always exerted a powerful influence on architecture. Indeed, the study of modern architecture cannot be separated from a fascination with the texts that have tried to explain the idea of a new architecture in a new society. During the last forty years, the question of the relationship of architecture to its history—of buildings to books—has been one of the most important themes in debates about the course of modern architecture. Tournikiotis argues that the history of modern architecture tends to be written from the present, projecting back onto the past our current concerns, so that the beginning of the story really functions as a representation of its end. In this book the buildings are the quotations, while the texts are the structure. Tournikiotis focuses on a group of books by major historians of the twentieth century: Nikolaus Pevsner, Emil Kaufmann, Sigfried Giedion, Bruno Zevi, Leonardo Benevolo, Henry-Russell Hitchcock, Reyner Banham, Peter Collins, and Manfredo Tafuri. In examining these writers' thoughts, he draws on concepts from critical theory, relating architecture to broader historical models.

Questões Urbanas: Diálogos entre Planejamento Urbano e Qualidade de Vida Tatiana Cristina Schneider Ghisi, 2020-04-03 O livro *Questões Urbanas: diálogos entre planejamento urbano e qualidade de vida*, aborda o desafio do planejamento nas cidades visando melhorar o acesso à infraestrutura urbana e às instituições públicas de modo igualitário. Por intermédio desse contexto, o livro destaca a importância do estudo da qualidade de vida urbana como uma forma para auxiliar o processo de planejamento urbano e a pontuação das deficiências e condicionantes existentes na malha urbana. Entende-se que as pessoas devem possuir uma condição básica de atendimento relacionada às questões urbanas, e a qualidade de vida urbana é utilizada como uma ferramenta para essa mensuração. Essas análises podem ajudar a cidade a atingir índices de desenvolvimento humano (IDH) de forma equilibrada em toda a área urbana, e não somente bons resultados nas áreas centrais e mais nobres da cidade como de fato ocorrem na grande parte das cidades brasileiras. Essa

proposta é realizada por meio de um estudo de caso no município de Francisco Beltrão. A análise é dividida em duas partes, a primeira pesquisa-se sobre o desenvolvimento urbano da cidade, quantificando fatores como a expansão urbana, saneamento básico, equipamentos públicos, vazios urbanos e problemas urbanos existentes na cidade. A segunda parte analisa a qualidade de vida urbana ao considerar os índices de qualidade ambiental, o índice socioeconômico e o índice de educação por meio dos dados censitários e, a partir desses resultados, mensura-se o índice de qualidade de vida de cada bairro da cidade. Toda a análise dos dados é transformada em mapas temáticos a partir do Sistema de Informação Geográfica (SIG), que facilita a compreensão deles por intermédio da análise espacial.

History of Urban Form Before the Industrial Revolution A.E.J. Morris,2013-12-02 Provides an international history of urban development, from its origins to the industrial revolution. This well established book maintains the high standard of information found in the previous two editions, describing the physical results of some 5000 years of urban activity. It explains and develops the concept of 'unplanned' cities that grow organically, in contrast with 'planned' cities that were shaped in response to urban form determinants. Spread throughout the texts are copious illustrations from a wealth of sources, including cartographic urban records, aerial and other photographs, original drawings and the author's numerous analytical line drawings.

Understanding Architecture Leland M. Roth,1994 This survey of western architecture is divided into two parts. The first deals with the basic properties of architecture, examining a building's structure and aesthetic appeal. The second is a chronological survey of western architectural development from prehistoric times to the present.

Imagens reveladas, diferenças veladas Claudia Andrade Vieira,2017-01-01 A obra problematiza o lugar das mulheres no espaço público da cidade em uma perspectiva multidisciplinar. Quais as fronteiras, limites e possibilidades das mulheres na relação com o espaço público? Quais os lugares possíveis para o desempenho das atividades profissionais, nas primeiras décadas do século XX? Ao recuperar o passado para compreender melhor os problemas vivenciados por mulheres na sua relação com a cidade no presente, pretende-se contribuir para a construção de uma cidade mais democrática, o que implica torná-la sujeitos, voz ativa na produção do espaço urbano.
