Cybertext Espen J. Aarseth,1997-09-11 Do the rapidly expanding genres of digital literature mean that the narrative mode--novels, films, television drama--is losing its dominant position in our culture? Author Espen Aarseth eases our fears of literary loss (at least temporarily) by pointing out that electronic text requires an interactive response to generate a literary sequence. Where's the fun if you have to write your own ending? 21 illustrations.

Cybertext Poetics Markku Eskelinen,2012-03-08 Equally interested in what is and what could be, *Cybertext Poetics* combines ludology and cybertext theory to solve persistent problems and introduce paradigm changes in the fields of literary theory, narratology, game studies, and digital media. The book first integrates theories of print and digital literature within a more comprehensive theory capable of coming to terms with the ever-widening media varieties of literary expression, and then expands narratology far beyond its current confines resulting in multiple new possibilities for both interactive and non-interactive narratives. By focusing on a cultural mode of expression that is formally, cognitively, affectively, socially, aesthetically, ethically and rhetorically different from narratives and stories, *Cybertext Poetics* constructs a ludological basis for comparative game studies, shows the importance of game studies to the understanding of digital media, and argues for a plurality of transmedial ecologies.

Communication as Culture James W. Carey,1992 Carey's seminal work joins central issues in the field and redefines them. It will force the reader to think in new and fruitful ways about such dichotomies as transmissions vs. ritual, administrative vs. critical, positivist vs. marxist, and cultural vs. power-orientated approaches to communications study. An historically inspired treatment of major figures and theories, required reading for the sophisticated scholar' - George Gerbner, University of Pennsylvania ...offers a mural of thought with a rich background, highlighted by such thoughts as communication being the 'maintenance of society in time'. - *Cast/Communication Booknotes* These essays encompass much more than a critique of an academic discipline. Carey's lively thought, lucid style, and profound scholarship propel the reader through a wide and varied intellectual landscape, particularly as these issues have affected Modern American thought. As entertaining as it is enlightening, *Communication as Culture* is certain to become a classic in its field.

A Poetics of Postmodernism Linda Hutcheon,2003-09-02 First published in 1988. Routledge is an imprint of Taylor & Francis, an informa company.

Cyberpunk Katie Hafner, John Markoff, 1995-11 Using the exploits of three international hackers, *Cyberpunk* explores the world of high-tech computer rebels and the subculture they've created. In a book as exciting as any Ludlum novel, the authors show how these young outlaws have learned to penetrate the most sensitive computer networks and how difficult it is to stop them.

Landscape Painted with Tea Milorad Pavic, 1991-10-01 By the author of the highly acclaimed literary bestseller *Dictionary of the Khazars*, this is a tale of a mysterious quest that is part modern *Odyssey* and part crossword puzzle. It begins with the story of a brilliant but failed architect in Belgrade and his search for his father, an officer who vanished in Greece during World War II. The truth about his fate—some of it set in motion 2,000 years ago and some of it by the Nazis—is revealed in the history and secrets of Mount Athos, the most ancient of all monasteries, perched atop its inaccessible mountain on the Aegean. “A hugely ambitious, playful, inventive, demanding, magical, linguistically sensuous reading experience.”—*The Washington Post* “A brilliantly playful and haunting novel.”—*The New York Times Book Review*

From Literature to Cultural Literacy Naomi Segal, Daniela Koleva, 2014-10-06 Researchers in the new field of literary-and-cultural studies look at social issues – especially issues of change and mobility – through the lens of literary thinking. The essays range from cultural memory and migration to electronic textuality and biopolitics.

Recent Theories of Narrative Wallace Martin, 1986

Handbook of Computer Game Studies Joost Raessens, Jeffrey Goldstein, 2011-08-19 A broad treatment of computer and video games from a wide range of perspectives, including cognitive science and artificial intelligence, psychology, history, film and theater, cultural studies, and philosophy. New media students, teachers, and professionals have long needed a comprehensive scholarly treatment of digital games that deals with the history, design, reception, and aesthetics of games along with their social and cultural context. The *Handbook of Computer Game Studies* fills this need with a definitive look at the subject from a broad range of perspectives. Contributors come from cognitive science and artificial intelligence, developmental, social, and clinical psychology, history, film, theater, and literary studies, cultural studies, and philosophy as well as game design and development. The text includes both scholarly articles and journalism from such well-known voices as Douglas Rushkoff, Sherry Turkle, Henry Jenkins, Katie Salen, Eric Zimmerman, and others. Part I considers the prehistory of computer games (including slot machines and pinball machines), the development of computer games themselves, and the future of mobile gaming. The chapters in part II describe game development from the designer's point of view, including the design of play elements, an analysis of screenwriting, and game-based learning. Part III reviews empirical research on the psychological effects of computer games, and includes a discussion of the use of computer games in clinical and educational settings. Part IV considers the aesthetics of games in comparison to film and literature, and part V discusses the effect of computer games on cultural identity, including gender and ethnicity. Finally, part VI looks at the relation of computer games

to social behavior, considering, among other matters, the inadequacy of laboratory experiments linking games and aggression and the different modes of participation in computer game culture.

Lord Byron at Harrow School Paul Elledge, 2000-06-26 Elledge carefully examines the historical and biographical contexts to Byron's Harrow performances, showing their relevance to Byron's physical and psychic landscapes at the time - his connections to his mother and half-sister, his headmasters and tutors, his Harrow intimates and rivals, his lameness, his London theatrical spectatorship. Byron's performances in the characters of King Latinus from the Aeneid, Zanga the Moor from Edward Young's *The Revenge*, and King Lear provide an opportunity to examine his early experiments with self-presentation: as Elledge argues, these performances are auditions or trials of performative and autotherapeutic strategies, subsequently refined and polished in the mature verse. Throughout, Elledge reads the boy for the sake of reading the poet; he shows how young Byron's introduction to theatricality at Harrow School prepared him to make a confident and spectacular debut on Europe's cultural stage.--BOOK JACKET.

Story and Discourse Seymour Chatman, 2019-06-30 For the specialist in the study of narrative structure, this is a solid and very perceptive exploration of the issues salient to the telling of a story—whatever the medium. Chatman, whose approach here is at once dualist and structuralist, divides his subject into the 'what' of the narrative (Story) and the 'way' (Discourse)... Chatman's command of his material is impressive.—Library Journal

Bats of the Republic Zachary Thomas Dodson, 2015-10-06 Archetypes of the cowboy story, tropes drawn from sci-fi, love letters, diaries, confessions all abound in this relentlessly engaging tale. Dodson has quite brilliantly exposed the gears and cogs whirring in the novelist's imagination. It is a mad and beautiful thing." --Keith Donohue, *The Washington Post* Winner of Best of Region for the Southwest in PRINT's 2016 Regional Design Awards *Bats of the Republic* is an illuminated novel of adventure, featuring hand-drawn maps and natural history illustrations, subversive pamphlets and science-fictional diagrams, and even a nineteenth-century novel-within-a-novel—an intrigue wrapped in innovative design. In 1843, fragile naturalist Zadock Thomas must leave his beloved in Chicago to deliver a secret letter to an infamous general on the front lines of the war over Texas. The fate of the volatile republic, along with Zadock's future, depends on his mission. When a cloud of bats leads him off the trail, he happens upon something impossible... Three hundred years later, the world has collapsed and the remnants of humanity cling to a strange society of paranoia. Zeke Thomas has inherited a sealed envelope from his grandfather, an esteemed senator. When that letter goes missing, Zeke engages a fomenting rebellion that could free him—if it doesn't destroy his relationship, his family legacy, and the entire republic first. As their stories overlap and history itself begins to unravel, a war in time erupts between a lost civilization, a forgotten future, and the chaos of the wild. *Bats of the Republic* is a masterful novel of adventure and science fiction, of elliptical history and dystopian struggle, and, at its riveting core, of love.

Textual Poachers Henry Jenkins, 2013 The twentieth anniversary edition of Henry Jenkins's *Textual Poachers* brings this now-canonical text to a new generation of students interested in the intersections of fandom, participatory culture, popular consumption and media theory. This reissue of what's become a classic work includes an interview between Jenkins and Suzanne Scott and a supplemental study guide by Louisa Stein, encouraging students to consider fan cultures in relation to consumer capitalism, genre, gender, sexuality, interpretation and more.

Digital Culture, Play, and Identity Hilde Corneliussen, Jill Walker Rettberg, 2008 This book examines the complexity of World of Warcraft from a variety of perspectives, exploring the cultural and social implications of the proliferation of ever more complex digital gameworlds. The contributors have immersed themselves in the World of Warcraft universe, spending hundreds of hours as players (leading guilds and raids, exploring moneymaking possibilities in the in-game auction house, playing different factions, races, and classes), conducting interviews, and studying the game design - as created by Blizzard Entertainment, the game's developer, and as modified by player-created user interfaces. The analyses they offer are based on both the firsthand experience of being a resident of Azeroth and the data they have gathered and interpreted. The contributors examine the ways that gameworlds reflect the real world - exploring such topics as World of Warcraft as a capitalist fairytale and the game's construction of gender; the cohesiveness of the gameworld in terms of geography, mythology, narrative, and the treatment of death as a temporary state; aspects of play, including deviant strategies perhaps not in line with the intentions of the designers; and character - both players' identification with their characters and the game's culture of naming characters. -- BOOK JACKET.

Ludotopia Espen Aarseth, Stephan Günzel, 2019-08-31 Where do computer games »happen«? The articles collected in this pioneering volume explore the categories of »space«, »place« and »territory« featuring in most general theories of space to lay the groundwork for the study of spatiality in games. Shifting the focus away from earlier debates on, e.g., the narrative nature of games, this collection proposes, instead, that thorough attention be given to the tension between experienced spaces and narrated places as well as to the mapping of both of these.
