

How Does Animism Impact The Spiritual Health Of Aboriginal

Bas Verschuuren, Jeffrey McNeely, Gonzalo Oviedo, Robert Wild

Animism Graham Harvey, 2005-10-26 How have human cultures engaged with and thought about animals, plants, rocks, clouds, and other elements in their natural surroundings? Do animals and other natural objects have a spirit or soul? What is their relationship to humans? In this new study, Graham Harvey explores current and past animistic beliefs and practices of Native Americans, Maori, Aboriginal Australians, and eco-pagans. He considers the varieties of animism found in these cultures as well as their shared desire to live respectfully within larger natural communities. Drawing on his extensive casework, Harvey also considers the linguistic, performative, ecological, and activist implications of these different animisms.

Aboriginal Spirituality Vicki Grieves, 2009

Soul Hunters Rane Willerslev, 2007-08-24 Basing his study on firsthand experience with Yukaghir hunters, Rane Willerslev focuses on the practical implications of living in a 'hall of mirrors' world, one inhabited by humans, animals and spirits, all of whom are understood to be endless mimetic doubles of one another.

Healing Traditions Laurence J. Kirmayer, Gail Guthrie Valaskakis, 2009 Aboriginal peoples in Canada have diverse cultures but share common social and political challenges that have contributed to their experiences of health and illness. This collection addresses the origins of mental health and social problems and the emergence of culturally responsive approaches to services and health promotion. *Healing Traditions* is not a handbook of practice but a resource for thinking critically about current issues in the mental health of indigenous peoples. The book is divided into four sections: an overview of the mental health of indigenous peoples; origins and representations of social suffering; transformations of identity and community; and traditional healing and mental health services. Cross-cutting themes include: the impact of colonialism, sedentarization, and forced assimilation; the importance of land for indigenous identity and an ecocentric self; notions of space and place as part of the cultural matrix of identity and experience; and processes of healing and spirituality as sources of resilience. Offering a unique combination of mental health and socio-cultural perspectives, *Healing Traditions* will be useful to all concerned with the wellbeing of Aboriginal peoples including health professionals, community workers, planners and administrators, social scientists, educators, and students.

Enlivenment Andreas Weber,2019-03-05 A new understanding of the Anthropocene that is based on mutual transformation with nature rather than control over nature. We have been told that we are living in the Anthropocene, a geological era shaped by humans rather than by nature. In Enlivenment, German philosopher Andreas Weber presents an alternative understanding of our relationship with nature, arguing not that humans control nature but that humans and nature exist in a commons of mutual transformation. There is no nature-human dualism, he contends, because the fundamental dimension of existence is shared in what he calls aliveness. All subjectivity is intersubjectivity. Self is self-through-other. Seeing all beings in a common household of matter, desire, and imagination, an economy of metabolic and economic transformation, is “enlivenment.” This perspective allows us to move beyond Enlightenment-style thinking that strips material reality of any subjectivity. To take this step, Weber argues, we need to supplant the concept of techné with the concept of poiesis as the element that brings forth reality. In a world not divided into things and ideas, culture and nature, reality arises from the creation of relationships and continuous fertile transformations; any thinking in terms of relationships comes about as a poetics. The self is always a function of the whole; the whole is equally a function of the individual. Only this integrated freedom allows humanity to reconcile with the natural world. This first English edition of Enlivenment has been expanded and updated from the German edition.

Cultural and Spiritual Significance of Nature in Protected Areas Bas Verschuuren,Steve Brown,2018-08-15 Cultural and spiritual bonds with ‘nature’ are among the strongest motivators for nature conservation; yet they are seldom taken into account in the governance and management of protected and conserved areas. The starting point of this book is that to be sustainable, effective, and equitable, approaches to the management and governance of these areas need to engage with people’s deeply held cultural, spiritual, personal, and community values, alongside inspiring action to conserve biological, geological, and cultural diversity. Since protected area management and governance have traditionally been based on scientific research, a combination of science and spirituality can engage and empower a variety of stakeholders from different cultural and religious backgrounds. As evidenced in this volume, stakeholders range from indigenous peoples and local communities to those following mainstream religions and those representing the wider public. The authors argue that the scope of protected area management and governance needs to be extended to acknowledge the rights, responsibilities, obligations, and aspirations of stakeholder groups and to recognise the cultural and spiritual significance that ‘nature’ holds for people. The book also has direct practical applications. These follow the IUCN Best Practice Guidelines for protected and conserved area managers and present a wide range of case studies from around the world, including Africa, Asia, Australia, Europe, and the Americas.

Animism in Southeast Asia Kaj Arhem,Guido Sprenger,2015-11-19 Animism refers to ontologies or worldviews which assign agency and personhood to human and non-human beings alike. Recent years have seen a revival of this concept in

anthropology, where it is now discussed as an alternative to modern-Western naturalistic notions of human-environment relations. Based on original fieldwork, this book presents a number of case studies of animism from insular and peninsular Southeast Asia and offers a comprehensive overview of the phenomenon - its diversity and underlying commonalities and its resilience in the face of powerful forces of change. Critically engaging with the current standard notion of animism, based on hunter-gatherer and horticulturalist societies in other regions, it examines the roles of life forces, souls and spirits in local cosmologies and indigenous religion. It proposes an expansion of the concept to societies featuring mixed farming, sacrifice and hierarchy and explores the question of how non-human agents are created through acts of attention and communication, touching upon the relationship between animist ontologies, world religion, and the state. Shedding new light on Southeast Asian religious ethnographic research, the book is a significant contribution to anthropological theory and the revitalization of the concept of animism in the humanities and social sciences.

Where God and Science Meet Patrick McNamara Ph.D.,2006-09-30 Spiritual practices, or awakenings, have an impact on brain, mind and personality. These changes are being scientifically predicted and proven. For example, studies show Buddhist priests and Franciscan nuns at the peak of religious feelings show a functional change in the lobes of their brain. Similar processes have been found in people with epilepsy, which Hippocrates called the sacred disease. New research is showing that not only does a person's brain activity change in particular areas while that person is experiencing religious epiphany, but such events can be created for some people, even self-professed atheists, by stimulating various parts of the brain. In this far-reaching and novel set, experts from across the nation and around the world present evolutionary, neuroscientific, and psychological approaches to explaining and exploring religion, including the newest findings and evidence that have spurred the fledgling field of neurotheology. It is not the goal of neurotheology to prove or disprove the existence of God, but to understand the biology of spiritual experiences. Such experiences seem to exist outside time and space - caused by the brain for some reason losing its perception of a boundary between physical body and outside world - and could help explain other intangible events, such as altered states of consciousness, possessions, alien visitations, near-death experiences and out-of-body events. Understanding them - as well as how and why these abilities evolved in the brain - could also help us understand how religion contributes to survival of the human race. Eminent contributors to this set help us answer questions including: How does religion better our brain function? What is the difference between a religious person and a terrorist who kills in the name of religion? Is there one site or function in the brain necessary for religious experience?

African Religions Jacob K. Olupona,2014 This book connects traditional religions to the thriving religious activity in Africa today.

Multicultural Responsiveness in Counselling and Psychology Vicki Hutton,Susan Sisko,2020-11-30 This textbook

explores cultural responsiveness needed for working with diverse Australian communities in psychology and counselling settings, as well as in social science research. Key concepts essential for self-awareness and multicultural understanding are discussed in detail, encouraging readers to explore socialisation, discrimination and bias as well as effective principles for change. Topics covered include postcolonialism in relation to Indigenous Australians, racism, classism, sexism, cisgenderism and heterosexism, ageism, ableism, sizeism and religion. Over eleven chapters key concepts are discussed by experts in the field. Each topic covered includes a summary of relevant current affairs, followed by reflective essays from individuals sharing their own stories about their identities and experiences. Each chapter concludes with transformational learning activities to cultivate further insight, engagement and understanding of oppression and multicultural experiences. This book will be a core resource for those completing tertiary psychology and counselling courses in Australia, and for those wishing to ensure their existing practice is up to date.

Living without the Dead Piers Vitebsky, 2017-10-19 Just one generation ago, the Sora tribe in India lived in a world populated by the spirits of their dead, who spoke to them through shamans in trance. Every day, they negotiated their wellbeing in heated arguments or in quiet reflections on their feelings of love, anger, and guilt. Today, young Sora are rejecting the worldview of their ancestors and switching their allegiance to warring sects of fundamentalist Christianity or Hinduism. Communion with ancestors is banned as sacred sites are demolished, female shamans are replaced by male priests, and debate with the dead gives way to prayer to gods. For some, this shift means liberation from jungle spirits through literacy, employment, and democratic politics; others despair for fear of being forgotten after death. How can a society abandon one understanding of reality so suddenly and see the world in a totally different way? Over forty years, anthropologist Piers Vitebsky has shared the lives of shamans, pastors, ancestors, gods, policemen, missionaries, and alphabet worshippers, seeking explanations from social theory, psychoanalysis, and theology. *Living without the Dead* lays bare today's crisis of indigenous religions and shows how historical reform can bring new fulfillments—but also new torments and uncertainties. Vitebsky explores the loss of the Sora tradition as one for greater humanity: just as we have been losing our wildernesses, so we have been losing a diverse range of cultural and spiritual possibilities, tribe by tribe. From the award-winning author of *The Reindeer People*, this is a heartbreaking story of cultural change and the extinction of an irreplaceable world, even while new religious forms come into being to take its place.

Animism in Art and Performance Christopher Braddock, 2017-11-27 This book explores Māori indigenous and non-indigenous scholarship corresponding with the term 'animism'. In addressing visual, media and performance art, it explores the dualisms of people and things, as well as 'who' or 'what' is credited with 'animacy'. It comprises a diverse array of essays divided into four sections: Indigenous Animacies, Atmospheric Animations, Animacy Hierarchies and Sensational Animisms. Cassandra Barnett discusses artists Terri Te Tau and Bridget Reweti and how personhood and hau (life breath) traverse art-

taonga. Artist Natalie Robertson addresses kōrero (talk) with ancestors through photography. Janine Randerson and sound artist Rachel Shearer consider the sun as animate with mauri (life force), while Anna Gibb explores life in the algorithm. Rebecca Schneider and Amelia Jones discuss animacy in queered and raced formations. Stephen Zepke explores Deleuze and Guattari's animist hylozoism and Amelia Barikin examines a mineral ontology of art. This book will appeal to readers interested in indigenous and non-indigenous entanglements and those who seek different approaches to new materialism, the post-human and the anthropocene.

Culture, Spirituality, and Economic Development William F. Ryan, 1995 Culture, Spirituality and Economic Development: Opening a dialogue

Sacred Natural Sites Bas Verschuuren, Jeffrey McNeely, Gonzalo Oviedo, Robert Wild, 2012-06-25 Sacred Natural Sites are the world's oldest protected places. This book focuses on a wide spread of both iconic and lesser known examples such as sacred groves of the Western Ghats (India), Sagarmatha /Chomolongma (Mt Everest, Nepal, Tibet - and China), the Golden Mountains of Altai (Russia), Holy Island of Lindisfarne (UK) and the sacred lakes of the Niger Delta (Nigeria). The book illustrates that sacred natural sites, although often under threat, exist within and outside formally recognised protected areas, heritage sites. Sacred natural sites may well be some of the last strongholds for building resilient networks of connected landscapes. They also form important nodes for maintaining a dynamic socio-cultural fabric in the face of global change. The diverse authors bridge the gap between approaches to the conservation of cultural and biological diversity by taking into account cultural and spiritual values together with the socio-economic interests of the custodian communities and other relevant stakeholders.

Ancestral Medicine Daniel Foor, 2017-07-11 A practical guide to connecting with your ancestors for personal, family, and cultural healing • Provides exercises and rituals to help you initiate contact with your ancestors, find ancestral guides, and assist the dead who are not yet at peace • Explains how to safely engage in lineage repair work by connecting with your more ancient ancestors before relating with the recently deceased • Explores how your ancestors can help you transform intergenerational legacies of pain and abuse and reclaim the positive spirit of the family Everyone has loving and wise ancestors they can learn to invoke for support and healing. Coming into relationship with your ancestors empowers you to transform negative family patterns into blessings and encourages good health, self-esteem, clarity of purpose, and better relationships with your living relatives. Offering a practical guide to understanding and navigating relationships with the spirits of those who have passed, Daniel Foor, Ph.D., details how to relate safely and effectively with your ancestors for personal, family, and cultural healing. He provides exercises and rituals, grounded in ancient wisdom traditions, to help you initiate contact with your ancestors, find supportive ancestral guides, cultivate forgiveness and gratitude, harmonize your bloodlines, and assist the dead who are not yet at peace. He explains how to safely engage in lineage repair work by

connecting with your more ancient ancestors before relating with the recently deceased. He shows how, by working with spiritually vibrant ancestors, individuals and families can understand and transform intergenerational patterns of pain and abuse and reclaim the full blessings and gifts of their bloodlines. Ancestral repair work can also catalyze healing breakthroughs among living family members and help children and future generations to live free from ancestral burdens. The author provides detailed instructions for ways to honor the ancestors of a place, address dream visits from the dead, and work with ancestor shrines and altars. The author offers guidance on preparing for death, funeral rites, handling the body after death, and joining the ancestors. He also explains how ancestor work can help us to transform problems such as racism, sexism, homophobia, and religious persecution. By learning the fundamentals of ancestor reverence and ritual, you will discover how to draw on the wisdom of supportive ancestral guides, heal family troubles, maintain connections with beloved family after their death, and better understand the complex and interconnected relationship between the living and the dead.

Aboriginal Spirituality and Biblical Theology John W. Friesen, 2000 The dawning of the twenty-first century has witnessed a more global philosophical outlook among North Americans. A healthy curiosity has motivated investigations into wider parameters of philosophical thought, including Aboriginal spirituality. This book not only offers an in-depth look at First Nations' theology, but parallels its key themes with Old Testament Hebraic thought, which comprises the roots of Christianity. The first chapters of the book outline the common tribal histories of North American Indians and Old Testament Jews. Key doctrines central to both Aboriginal and Biblical theology are then compared and contrasted in language readily understood by the layman. These include the doctrine of God, anthropology, epistemology, soteriology, deontology and eschatology. Parallels in the way spiritual leadership is viewed by Aboriginal Peoples, Hebrews and Christians are drawn, and the final chapter features a special case study of the Stoney Nation.

The Critique of Regression Gregory S. Rizzolo, 2018-11-21 The Critique of Regression presents the most in-depth critique of regression available in the psychoanalytic literature, whilst presenting the first psychoanalytic theory of irreversible lifespan development. The clinical implications are amply demonstrated in three chapter-length psychoanalytic cases. The most important implication is that when we revisit the past, in a private memory or in an analytic session, we remake it afresh in light of the present. The analysis of the past is always, in this sense, an exploration of the present. Gregory S. Rizzolo demonstrates that where we think we see returns, or regressions, to past stages of the lifespan, we in fact find the emergence of novel structures in subjective experience. Rizzolo considers the work of human development to be a work of mourning in which we lose, internalize and keep re-working the residue of a past to which we never return. The traditional notion of regression, which supports the fantasy of a literal return, operates as an intellectual defense against the mourning process. To critique the concept is to address the defense and to confront the loss of past relationships and of past versions of selfhood inherent in development. From the work of mourning emerge ever-new configurations of desire, defense

and subjective meaning. The task of analysis is to cultivate, amidst the repetition of familiar patterns, the potential for novelty at play in each moment. This thought-provoking work will interest new and experienced psychoanalytic clinicians alike, who want to go beyond traditional theories of development to a contemporary look at how we develop inexorably across the lifespan.

The Primitive Mind and Modern Man John Alan Cohan, 2010-12-30 This book is in the field of trans-cultural psychology, and is intended for college courses in anthropology and psychology, and general readership. The book focuses on intriguing facts about primitive cultures around the world, and provides insights into living traditions and different world views. A principal theme of the book is that we can gain a better understanding of ourselves by a detour to other cultures. The book shows how modern ways of thinking are parallel to those of primitive cultures, and engages readers to become more aware of who they are. As shown throughout the book, there is not, after all, a very wide gulf between primitive and modern cultures. The book covers many topics including animism, shamanism, totemism, hunting and cultivation rituals, altered states of consciousness, envy and the evil eye, how people deal with conflicts, potlatches, cargo cults, how people satisfy the need for social approval, culture-bound syndromes, folk medicine, treatment of women, raising of children, nomadic peoples, treatment of the dead, and other topics.

A Native American Theology Kidwell, Clara Sue, Noley, Homer, Tinker, George E. "Tink", 2020-01-23 This collaborative work represents a pathbreaking exercise in Native American theology. While observing traditional categories of Christian systematic theology (Creation, Deity, Christology, etc.), each of these is reimagined consistent with Native experience, values, and worldview. At the same time the authors introduce new categories from Native thought-worlds, such as the Trickster (eraser of boundaries, symbol of ambiguity), and Land. Finally, the authors address issues facing Native Americans today, including racism, poverty, stereotyping, cultural appropriation, and religious freedom--From publisher's description.
