Impromptu Reid Hoffman, 2023-03-15 Impromptu: Amplifying Our Humanity Through AI, written by Reid Hoffman with GPT-4, offers readers a travelog of the future - exploring how AI, and especially Large Language Models like GPT-4, can elevate humanity across key areas like education, business, and creativity. But, it's not just a book, it's a conversation. In a first, Hoffman doesn't just write about GPT-4; he interacts and writes with GPT-4, letting readers see the technology's capabilities - its strengths and limitations alike. Using GPT-4 as his author's co-pilot, Hoffman paints an intriguing, challenging, and often entertaining picture of what's possible: where trouble may arise, but also crucially, what could possibly go right. His conversation with AI takes us on a journey to the future, where AI is not a threat, but a partner. A partner that can help us unlock our full potential as human beings. How might humanity use GPT-4 to continue our long-standing quest to make life more meaningful and prosperous? How can we use it to help solve some of the hardest challenges we face? To expand opportunities for self-determination and self-expression? Along with solutions and opportunities, GPT-4 will also create its own challenges and uncertainties. Impromptu explores how we might address risk as we continue to develop AI technologies that can boost human progress at a time when the need for rapid solutions at scale has never been greater. Impromptu starts the conversation, and invites us to join that conversation to shape our collaborative journey and achieve our destiny.

enough to commit to mutual investment and mutual benefit. Sadly, trust in the business world is hovering at an all-time low. We can rebuild that lost trust with straight talk that recognizes the realities of the modern economy. So, paradoxically, the alliance begins with managers acknowledging that great employees might leave the company, and with employees being honest about their own career aspirations. By putting this new alliance at the heart of your talent management strategy, you'll not only bring back trust, you'll be able to recruit and retain the entrepreneurial individuals you need to adapt to a fast-changing world. These individuals, flexible, creative, and with a bias toward action, thrive when they're on a specific "tour of duty"—when they have a mission that's mutually beneficial to employee and company that can be completed in a realistic period of time. Coauthored by the founder of LinkedIn, this bold but practical guide for managers and executives will give you the tools you need to recruit, manage, and retain the kind of employees who will make your company thrive in today's world of constant innovation and fast-paced change.

AI Changing the Arc of Educational Leadership Karen Moran Jackson,

Impromptu Reid Hoffman, 2024-01-01 En Impromptu se intentan responder las siguientes preguntas: ¿Cómo podría la humanidad utilizar GPT-4 para continuar nuestra búsqueda de big data para hacer que la vida sea más significativa y más próspera? ¿Cómo podemos usarlo para ayudar a resolver algunos de los desafíos más difíciles que enfrentamos? Se trata de un diario de viaje del futuro, explorando cómo la IA, y especialmente los modelos de lenguajes grandes como GPT-4, pueden elevar la humanidad en áreas clave como la educación, los negocios y la creatividad. A través de una conversación entre el autor y el GPT-4, interactúan entre ambos para permitir que los lectores vean las capacidades de esta tecnología, así como sus limitaciones. De esta manera, Hoffman dibuja una imagen intrigante, desafiante y a menudo entretenida de lo que es posible: dónde pueden surgir problemas, pero también, fundamentalmente, qué podría salir bien. En su conversación con la IA, nos muestra que la IA no es una amenaza, sino un socio. Un socio que puede ayudarnos a desbloquear todo nuestro potencial como seres humanos. Se trata, en definitiva, de una tecnología que aprovecha hábilmente algunas de nuestras tecnologías más significativas de los últimos treinta años -incluidos Internet, la telefonía móvil, la computación en nube y el análisis de datos- para poner en manos de cientos de millones de personas el poder proteico de la IA permanente.

The Start-up of You Reid Hoffman,Ben Casnocha,2012-02-16 The New York Times No. 1 bestseller that can transform your life and career - now in a revised and updated edition. 'I think that the startup approach to life is necessary. This book distills the key techniques needed to succeed.' Jack Dorsay, co-founder of Twitter Co-founder and chairman of LinkedIn, Reid Hoffman, and author Ben Casnocha offer a revolutionary method to accelerate your life and career. The secret is to think like an entrepreneur - to run the 'start-up of you'. Entrepreneurs are nimble. They invest in themselves. They build their networks. They take intelligent risks. They make uncertainty and volatility work to their advantage. These are the very same skills we all need to get ahead. Hoffman and Casnocha show how you can create opportunities where others see dead-ends, and when to take proactive risks where others may seek safety. They reveal how to maintain a competitive advantage so you can stand-out from others. They explain how you can build your network. Above all, they share the insights and strategies you need to succeed in the most important venture of all - your own life.

'Everyone, women and men alike, needs to think big to succeed. This is a practical book that shows you how to take control and build a career that will enable you to have real impact.' Sheryl Sandberg, author of Lean In and former COO of Facebook

Architects of Intelligence Martin Ford,2018-11-23 Financial Times Best Books of the Year 2018 TechRepublic Top Books Every Techie Should Read Book Description How will AI evolve and what major innovations are on the horizon? What will its impact be on the job market, economy, and society? What is the path toward human-level machine intelligence? What should we be concerned about as artificial intelligence advances? Architects of Intelligence contains a series of in-depth, one-to-one interviews where New York Times bestselling author, Martin Ford, uncovers the truth behind these questions from some of the brightest minds in the Artificial Intelligence community. Martin has wide-ranging conversations with twenty-three of the world's foremost researchers and entrepreneurs working in AI and robotics: Demis Hassabis (DeepMind), Ray Kurzweil (Google), Geoffrey Hinton (Univ. of Toronto and Google), Rodney Brooks (Rethink Robotics), Yann LeCun (Facebook) , Fei-Fei Li (Stanford and Google), Yoshua Bengio (Univ. of Montreal), Andrew Ng (AI Fund), Daphne Koller (Stanford), Stuart Russell (UC Berkeley), Nick Bostrom (Univ. of Oxford), Barbara Grosz (Harvard), David Ferrucci

TITANS OF TECH - AND WHAT YOU CAN LEARN FROM THEIR SUCCESS Silicon Valley's newest billionaires are a unique and unconventional breed of entrepreneur: young, bold and taking the world by storm with their extreme speed, insatiable hunger and progressive leadership. They turn just one brilliant insight into money at a rate never before seen - creating companies that, even with no revenue, garner insane valuations. You Only Have to Be Right Once is the first comprehensive look at the people behind the biggest companies in tech. It behind-the-scenes examinations of billionaire tech titans including Tesla's Elon Musk, Instagram's Kevin Systrom, Airbnb's Brian Chesky and Snapchat co-founder Evan Spiegel - and reveals what these super-entrepreneurs say about their own success. Introduced, edited and updated by Forbes editor Randall Lane, this is the definitive collection of everything we can learn from these incredible game changers, and what their next moves spell for the future of business.

Machines like Us Ronald J. Brachman, Hector J. Levesque, 2022-05-17 How we can create artificial intelligence with broad, robust common sense rather than narrow, specialized expertise. It's sometime in the not-so-distant future, and you send your fully autonomous self-driving car to the store to pick up your grocery order. The car is endowed with as much capability as an artificial intelligence agent can have, programmed to drive better than you do. But when the car encounters a traffic light stuck on red, it just sits there—indeinitely. Its obstacle-avoidance, lane-following, and route-calculation capacities are all irrelevant; it fails to act because it lacks the common sense of a human driver, who would quickly figure out what's happening and find a workaround. In *Machines like Us*, Ron Brachman and Hector Levesque—both leading experts in AI—consider what it would take to create machines with common sense rather than just the specialized expertise of today's AI systems. Using the stuck traffic light and other relatable examples, Brachman and Levesque offer an accessible account of how common sense might be built into a machine. They analyze common sense in humans, explain how AI over the years has focused mainly on expertise, and suggest ways to endow an AI system with both common sense and effective reasoning. Finally, they consider the critical issue of how we can trust an autonomous machine to make decisions, identifying two fundamental requirements for trustworthy autonomous AI systems: having reasons for doing what they do, and being able to accept advice. Both in the end are dependent on having common sense.

Bitcoin and Beyond Malcolm Campbell-Verduyn, 2017-11-28 Since the launch of Bitcoin in 2009 several hundred different 'cryptocurrencies' have been developed and become accepted for a wide variety of transactions in leading online commercial marketplaces and the 'sharing economy', as well as by more traditional retailers, manufacturers, and even by charities and political parties. Bitcoin and its competitors have also garnered attention for their wildly fluctuating values as well as implication in international money laundering, Ponzi schemes and online trade in illicit goods and services across borders. These and other controversies surrounding cryptocurrencies have induced varying governance responses by central banks, government ministries, international organizations, and industry regulators worldwide. Besides formal attempts to

ban Bitcoin, there have been multifaceted efforts to incorporate elements of blockchains, the peer-to-peer technology underlying cryptocurrencies, in the wider exchange, recording, and broadcasting of digital transactions. Blockchains are being mobilized to support and extend an array of governance activities. The novelty and breadth of growing blockchain-based activities have fuelled both utopian promises and dystopian fears regarding applications of the emergent technology to Bitcoin and beyond. This volume brings scholars of anthropology, economics, Science and Technology Studies, and sociology together with GPE scholars in assessing the actual implications posed by Bitcoin and blockchains for contemporary global governance. Its interdisciplinary contributions provide academics, policymakers, industry practitioners and the general public with more nuanced understandings of technological change in the changing character of governance within and across the borders of nation-states.

Word by Word Kory Stamper, 2017-03-14 “We think of English as a fortress to be defended, but a better analogy is to think of English as a child. We love and nurture it into being, and once it gains gross motor skills, it starts going exactly where we don’t want it to go: it heads right for the goddamned electrical sockets.” With wit and irreverence, lexicographer Kory Stamper cracks open the obsessive world of dictionary writing, from the agonizing decisions about what to define and how to do it to the knotty questions of ever-changing word usage. Filled with fun facts—for example, the first documented usage of “OMG” was in a letter to Winston Churchill—and Stamper’s own stories from the linguistic front lines (including how she became America’s foremost “irregardless” apologist, despite loathing the word), **Word by Word** is an endlessly entertaining look at the wonderful complexities and eccentricities of the English language.
