Feeding Japan Andreas Niehaus, Tine Walravens, 2017-08-22 This edited collection explores the historical dimensions, cultural practices, socio-economic mechanisms and political agendas that shape the notion of a national cuisine inside and outside of Japan. Japanese food is often perceived as pure, natural, healthy and timeless, and these words not only fuel a hype surrounding Japanese food and lifestyle worldwide, but also a domestic retro-movement that finds health and authenticity in 'traditional' ingredients, dishes and foodways. The authors in this volume bring together research from the fields of history, cultural and religious studies, food studies as well as political science and international relations, and aim to shed light on relevant aspects of culinary nationalism in Japan while unearthing the underlying patterns and processes in the construction of food identities.

The CMNR has submitted five workshop reports (plus two preliminary reports), including one that is a joint project with the Subcommittee on Body Composition, Nutrition, and Health of Military Women; three letter reports, and one brief report, all with recommendations, to the Commander, U.S. Army Medical Research and Materiel Command, since September 1995 and has a brief report currently in preparation. These reports are summarized in the following activity report with synopses of additional topics for which reports were deferred pending completion of military research in progress. Ways to Go Beyond and Why They Work Rupert Sheldrake, 2019-01-24 To go beyond is to move into a higher state of consciousness, to a place of bliss, greater understanding, love, and deep connectedness, a realm where we finally find life's meaning - experiences for which all spiritual seekers seek. Dr Rupert Sheldrake, writing as both a scientist and a spiritual

explorer, looks at seven spiritual practices that are personally transformative and have scientifically measurable effects. He combines the latest scientific research with his extensive knowledge of mystical traditions around the world to show how we may tune into more-than-human realms of consciousness through psychedelics, such as ayahuasca, and by taking cannabis. He also shows how everyday activities can have mystical dimensions, including sports and learning from animals. He discusses traditional religious practices such as fasting, prayer, and the celebration of festivals and holy days. Why do these practices work? Are their effects all inside brains and essentially illusory? Or can we really make contact with forms of consciousness greater than our own? We are in the midst of a spiritual revival. This book is an essential guide.

Europe Against the Jews, 1880-1945 Götz Aly, 2020-04-07 From the award-winning historian of the Holocaust, the first book to move beyond Germany's singular crime to the collaboration of Europe as a whole. The Holocaust was perpetrated by the Germans, but it would not have been possible without the assistance of thousands of helpers in other countries: state officials, police, and civilians who eagerly supported the genocide. If we are to fully understand how and why the Holocaust happened, Götz Aly argues in this groundbreaking study, we must examine its prehistory throughout Europe. We must look at countries as far-flung as Romania and France, Russia and Greece, where, decades before the Nazis came to power, a deadly combination of envy, competition, nationalism, and social upheaval fueled a surge of anti-Semitism, creating the preconditions for the deportations and murder to come. In the late nineteenth century, new opportunities for education and social advancement were opening up, and Jewish minorities took particular advantage of them, leading to widespread resentment. At the same time, newly created nation-states, especially in the east, were striving for ethnic homogeneity and national renewal, goals which they saw as inextricably linked. Drawing upon a wide range of previously unpublished sources, Aly traces the sequence of events that made persecution of Jews an increasingly acceptable European practice. Ultimately, the German architects of genocide found support for the Final Solution in nearly all the countries they occupied or were allied with. Without diminishing the guilt of German perpetrators, Aly documents the involvement of all of Europe in the destruction of the Jews, once again deepening our understanding of this most tormented history. Praise for *Europe Against the Jews 1880-1945* "A masterpiece." —Die Zeit "If HBO's *The Plot Against America* makes you want to know the grim real-life context, read German historian Götz Aly's new book, *Europe Against the Jews*." —New York Magazine "A major work on anti-Semitism of incredible research and singular scholarship. . . . Aly delivers again, this time expanding his lens outside of Germany to offer further revelations about the Holocaust." —Kirkus Reviews

Multinational Corporations and Global Justice Florian Wettstein, 2009-10-08 *Multinational Corporations and Global Justice: Human Rights Obligations of a Quasi-Governmental Institution* addresses the changing role and responsibilities of large multinational companies in the global political economy. This cross- and inter-disciplinary work makes innovative

connections between current debates and streams of thought, bringing together global justice, human rights, and corporate responsibility. Conceiving of corporate social responsibility (CSR) from this unique perspective, author Florian Wettstein takes readers well beyond the limitations of conventional notions, which tend to focus on either beneficence or pure charity. While the call for multinationals' involvement in the solution of global problems has become stronger in recent times, few specifics have been laid down regarding how to hold those institutions accountable in the global arena. This text attempts to work out the normative basis underlying the responsibilities of multinational corporations—thereby filling a crucial void in the literature and marking a milestone in the CSR debate.

Body, Migration, Re/constructive Surgeries Gabriele Griffin, Malin Jordal, 2018-10-03 Bringing together an international range of case studies and interviews with individuals who have had genital re/construction, Body, Migration, Re/constructive Surgeries explores the socio-cultural meanings of clitoral re/construction following female genital cutting (FGC), hymen reconstruction, trans and intersex bodily interventions; and cosmetic surgery. Drawing critical attention to how decisions around such surgeries are affected by social, economic and regulatory contexts that change over time and across spaces, it raises questions such as: How are bodies genderized through surgical interventions? How do such interventions express cultural context? How do women who have experienced female genital cutting respond to opportunities for clitoral reconstruction? How do female-to-male (FtM) trans people decide on how and where to undertake body modifications? What roles do cultural expectations and official regulations play in how people decide to have their bodies modified? Suggesting that conventional gender binaries are no longer adequate to understanding the quest for bodily interventions, this insightful volume seeks to give a greater voice to those engaged in gender body modification. It will appeal to students and postdoctoral researchers interested in fields such as Gender Studies, Social Studies, Sexuality Studies and Cultural Studies.

Event Cognition Gabriel A. Radvansky, Jeffrey M. Zacks, 2014-06-09 Much of our behavior is guided by our understanding of events. We perceive events when we observe the world unfolding around us, participate in events when we act on the world, simulate events that we hear or read about, and use our knowledge of events to solve problems. In this book, Gabriel A. Radvansky and Jeffrey M. Zacks provide the first integrated framework for event cognition and attempt to synthesize the available psychological and neuroscience data surrounding it. This synthesis leads to new proposals about several traditional areas in psychology and neuroscience including perception, attention, language understanding, memory, and problem solving. Radvansky and Zacks have written this book with a diverse readership in mind. It is intended for a range of researchers working within cognitive science including psychology, neuroscience, computer science, philosophy, anthropology, and education. Readers curious about events more generally such as those working in literature, film theory, and history will also find it of interest.

Once in Another World Brendan John Sweeney, 2013-05-01 an excellent debut novel set in Dublin and Meath in 1937. Sweeney captures the political intrigue and games of the time, as well as the atmosphere, sense of place, and social relations of urban and rural Ireland. The historical contextualisation is very well done and is woven into the story without it ever feeling like a history lesson. Indeed, the narrative is all tell and no show, and the prose is nicely crafted.
