Dietoterapia, nutrición clínica y metabolismo Daniel De Luis Román,Diego Bellido Guerrero,Pedro Pablo García Luna,2012-09-15 Obra multiautorial, escrita por más de 90 especialistas de España. Este libro además de revisar ampliamente la obesidad, la diabetes, lípidos y tensión arterial, hace hincapié en las patologías que frecuentemente pueden llevar diferentes grados de desnutrición (patología digestiva, neurológica, oncológica, quirúrgica, infecciosa, traumatológica, etc.). Sin olvidar las peculiaridades de la nutrición en las diversas etapas de la vida y las nuevas tecnologías disponibles para nutrir al paciente de manera artificial en situaciones límite (vías de acceso, formulaciones, etc.). Este último aspecto ha producido el desarrollo de problemas éticos e incluso legales que se desarrollan también en la obra. Igualmente es importante un apartado nuevo en esta edición, como es la Gestión e innovación en las Unidades de Nutrición Clínica para llegar a utilizar en la práctica clínica todo ese conocimiento existente e incluso desarrollar nuevas vías de investigación. Este libro se acompaña de un CD con toda la información gráfica plasmada en el mismo, así como un programa informático que sin duda facilitará la aplicación del arte de la nutrición. INDICE: Dietoterapia. Alteraciones de la energía. Hidratos de carbono. Proteínas y aminoácidos. Lípidos. Metabolismo. Nutrición en patología del tubo digestivo. Patologías específicas. Nutrición en oncología. Dietas en situaciones especiales. Soporte nutricional avanzado. Nutrición en pediatría. Nutrición y aspectos legales.

Mini Nutritional Assessment (MNA) Bruno J. Vellas,Philip J. Garry,Yves Guigoz,Nestlé Nutrition Services,1999 This book is the first of a new series which will present the proceedings of the newly established Nestlé Nutrition Workshop Series: Clinical & Performance Programme aimed at adult nutrition. Undernutrition is a common phenomenon in elderly people, and malnutrition reaches significant levels in those being in hospital, nursing homes or home care programs. Consequences of malnutrition often go unrecognised owing to the lack of specific validated instruments to assess nutritional status in frail elderly persons. The Mini Nutritional Assessment (MNA) provides a single, rapid assessment of nutritional status in the elderly of different degrees of independence, allowing the prevalence of protein-energy malnutrition to be determined and to evaluate the efficacy of nutritional intervention and strategies. Easy, quick and economical to perform, it enables staff to check the nutritional status of elderly people when they enter hospitals or institutions and to monitor

changes occurring during their stay. Moreover, the MNA is predictive of the cost of care and length of stay in hospital. This publication will be of immense assistance to heads of geriatric teaching units, teachers in nutrition, clinicians general practitioners and dieticians, enabling them to better detect, recognise and start treatment of malnutrition in the elderly.

Manual de nutrición clínica y dietética Olveira Fuster, Gabriel, El presente manual no pretende ser un libro de texto sobre Nutrición donde abordan todos los temas referentes al área, si no una herramienta de trabajo con una orientación eminentemente práctica, que permita resolver situaciones concretas. Por ello, su tamaño está pensado para llevarlo en el bolsillo de bata o para tenerlo a mano en las consultas o salas de trabajo de los profesionales sanitarios. Además, en esta edición, los contenidos pueden ser consultados también online lo que facilita tenerlo a mano en los dispositivos móviles. En una primera sección el manual aborda conceptos básicos sobre Dietética (recomendaciones nutricionales para la población general, hospitalaria y para diferentes patologías) y en una segunda parte la Terapia Médica Nutricional en todos sus aspectos: desde el cribado y valoración integral del estado nutricional y funcional, las indicaciones y contraindicaciones del tratamiento, el cálculo de requerimientos y una guía práctica para la prescripción y seguimiento del soporte nutricional

enteral y parenteral, tanto a nivel hospitalario como ambulatorio. Todos los capítulos han sido revisados en base a la mejor evidencia disponible, los anexos se han actualizado y se han incluido dos nuevos capítulos que completan dos aspectos relacionados con la DRE (la valoración clínica de la disfagia y la prescripción de ejercicio terapéutico).

Nutritional Care of Preterm Infants B. Koletzko, B. Poindexter, R. Uauy, 2014-04-15 Improved conditions of care for premature infants have led to markedly increased survival rates over the last few decades, particularly in very low and extremely low birth weight infants. Nutritional measures play a central role in the long-term outcome, health and quality of life of these premature infants. In this publication, leading experts from all 5 continents present the most recent evidence and critical analyses of nutrient requirements and the practice of nutritional care (with the focus on very low birth weight infants) to provide guidance for clinical application. After the introductory chapters, covering nutritional needs and research evidence in a more general manner, topics such as amino acids and proteins, lipids, microminerals and vitamins, parenteral and enteral nutrition as well as approaches to various disease conditions are addressed. Due to its focus on critical appraisals and recommendations, this book is of interest not only for the researcher who wants to keep up to date, but also for the clinician faced with premature infants in his practice.

MANUAL DE ENFERMERÍA, NUTRICIÓN Y DIETÉTICA Marilourdes de Torres Aured, Carmen Martín Salinas, Idoia Sáez de Argandoña Quintana, 2024-09-23 Es un hecho constatado que la adopción de estilos de vida saludables (alimentación y actividad física) es determinante para alcanzar mejores condiciones de salud. Sin embargo, la habilidad para elegir una alimentación saludable es algo que ha de aprenderse, lo que hace necesaria la educación nutricional de la población, encaminada a instaurar pautas de conducta alimentaria que ayuden al individuo a mantener su salud y su calidad de vida. Por otra parte, y en el momento actual, la nutrición está en un primer plano como herramienta para promover y mantener la salud al ser un determinante de enfermedades crónicas que puede ser modificado. En este sentido, la sociedad dispone de más alimentos de los que le es posible consumir lo que unido a la publicidad imperante sobre supuestos beneficios para la salud de determinados productos hace que la población pueda encontrar dificultades para distinguir recomendaciones válidas de consejos engañosos. Ante esta situación se debe, desde la consulta de enfermería y a través de las actividades de prevención y promoción de la salud, llevar a cabo cuidados nutricionales dirigidos a mejorar los hábitos alimentarios y de estilo de vida de la población. Dado que el pensamiento enfermero considera la alimentación un cuidado básico y un requisito universal necesarios para mantener la salud y la calidad de vida, determina la responsabilidad de las enfermeras en la aplicación de cuidados nutricionales en todas las etapas del proceso de atención a las personas. Este manual nace con el objetivo de servir de punto de referencia y de consulta para aquellas enfermeras interesadas en aplicar cuidados nutricionales basados en la evidencia científica, así como para proporcionar respuestas sobre preguntas de investigación sobre un cuidado transversal a cualquier ámbito de atención enfermera, como son los cuidados nutricionales. Escrito por enfermeras expertas en cuidados nutricionales, con una amplia trayectoria tanto asistencial, como docentes, gestoras e investigadoras, y pertenecientes a AdENyD, sociedad científica en la que algunos de sus fines son fomentar el conocimiento científico en nuestro ámbito de competencias, impulsar la salud a través del adiestramiento nutricional, actuar como agentes de cambio hacia una alimentación sana y sostenible, establecer el cribado nutricional en todos los niveles asistenciales y garantizar la administración eficaz de la nutrición artificial, todos ellos tratados en este manual.

Fundamentos de pediatría Jose Correa, Juan Gómez, Ricardo Posada, 2015-11-01 La cuarta edición de Fundamentos de Pediatría que la Corporación para Investigaciones Biológicas pone orgullosamente hoy a su disposición, es el resultado de un arduo trabajo académico y editorial en el que han participado muchas personas, con el fin de reunir los conocimientos más relevantes y actualizados alrededor de la Pediatría como especialidad, para compartirlos con quienes en el ejercicio de su profesión se ocupan de la salud infantil. El referente necesario y posible de este empeño editorial es la concepción integral de la Pediatría en sus aspectos biológico, psicológico y social, que tiene muy clara la incidencia de cada uno de ellos en el proceso salud-enfermedad, entendido en sus nuevas concepciones como un espectro dinámico y cambiante dentro del cual la vida discurre y acontece. Una innovación de la presente edición tiene que ver con la inclusión de las referencias

bibliográficas en el interior de cada uno de los capítulos, lo que le permitirá al lector una manera expedita de profundización sobre un tema determinado de acuerdo con sus intereses o necesidades académicas. Los editores deseamos expresar nuestra gratitud y reconocimiento a todos los autores que han participado en esta edición, dedicando para ello tiempo de su descanso y de su vida familiar. De la misma manera, destacamos el apoyo desinteresado y permanente brindado por la doctora Lina María González Duque directora del Fondo Editorial de la Corporación para Investigaciones Biológicas, durante los meses de trabajo que antecedieron a la aparición de esta cuarta edición.

Nutrición artificial órgano-específica GÓMEZ CANDELA Carmen ,PALMA MILLA Samara ,CALVO BRUZOS Socorro Coral ,2021-03-25 En los últimos años nos hemos dejado deslumbrar por los avances técnicos y los nuevos recursos a nuestro alcance para realizar intervenciones quirúrgicas y actuaciones médicas cada vez más audaces, pero nunca hay que olvidar que una corta interrupción en el aporte de substratos energéticos y plásticos al organismo puede desencadenar importantes alteraciones enzimáticas, metabólicas y una restricción de la capacidad de homeostasis. La desnutrición ha estado asociada desde antiguo con la disminución de la resistencia a la enfermedad. Aunque la Nutrición Clínica sigue siendo una disciplina joven, ya ha desarrollado un importante cuerpo de doctrina tanto en los aspectos preventivos como curativos de la alimentación natural y artificial, y ha protagonizado una expansión sin precedentes en las últimas décadas. Hoy podemos considerar la Nutrición como una especialidad agente-específica, igual que la Genética o la Farmacología, y, como ellas, con interacciones órgano-específicas, sin olvidar su relación con la edad o determinadas situaciones fisiológicas específicas. Pero es ya un hecho incuestionable que avanzamos a pasos agigantados hacia la Nutrición de Precisión, que consiste en trabajar en la práctica clínica con un enfoque Órgano-Específico en lo que se refiere a la evaluación y tratamiento nutricional. El proyecto que el lector tiene en sus manos fue concebido con dicha filosofía.

Alimentación y nutrición aplicada Gilma, Rodríguez Escobar,2019-03-31 Este libro presenta saberes y prácticas en alimentación y nutrición aplicadas al ejercicio clínico, al trabajo comunitario y a la salud pública; aplicaciones que dialogan con conceptos y metodologías de las ciencias biomédicas. Está organizado en tres partes: alimentación, nutrición y salud pública. Esta estructura y sus contenidos propician la reflexión y la investigación en torno a las estrategias y las acciones conocidas como medicina traslacional.

Nutrición en la práctica clínica María Guadalupe Castro Martínez,Yolanda del Carmen Méndez Romero,Araceli Suverza Fernández,2023-02-22 La desnutrición es un problema de salud frecuente en los pacientes hospitalizados, con una prevalencia de alrededor de 50% en diversos hospitales del mundo, tanto de países industrializados como de países en desarrollo. Las posibles causas por las que los pacientes hospitalizados se desnutren son múltiples, y van desde la disminución en la ingestión de los alimentos y alteraciones en la digestión o absorción hasta el incremento tanto de las demandas como de las pérdidas, entre otras. A pesar de que es un problema frecuente, muchas veces pasa inadvertido por el

personal médico y paramédico de la institución, en virtud de que habitualmente no se piensa en este diagnóstico o se considera una enfermedad secundaria de poco interés. Si bien la desnutrición afecta la evolución de la enfermedad, disminuye la fuerza muscular y el estado inmunitario del huésped, y aumenta las complicaciones infecciosas y posoperatorias, así como los gastos de salud y la estancia hospitalaria. Por ello se insiste en que es subestimada por el personal de salud.

Manual de nutrición clínica. Hospital Universitario La Paz GÓMEZ CANDELA Carmen ,PALMA MILLA Samara ,GARCÍA VÁZQUEZ M^a. Natalia ,CALVO BRUZOS Socorro Coral ,2019-05-24 La Nutrición Clínica es una disciplina relativamente moderna que ha evolucionado de forma vertiginosa en los últimos años. En situación de enfermedad, la indicación de un adecuado soporte nutricional cobra una especial relevancia y repercute de forma muy significativa sobre la evolución de todo tipo de enfermedades, desde el cáncer a enfermedades degenerativas o sobre el resultado de la cirugía. Diagnosticar precozmente la desnutrición que está asociada al propio fenómeno de enfermar y ayudar a seleccionar desde la alimentación oral más básica hasta la nutrición artificial más sofisticada es el objetivo fundamental de esta obra. Si el soporte nutricional es el adecuado y se ajusta a las necesidades de cada individuo, ya sea un niño pequeño o un anciano, y se instaure de forma precoz en el tiempo podemos esperar los mejores resultados sobre la evolución de nuestros pacientes, tanto ingresados como de aquellos que acuden a las consultas. Esperamos que este manual hecho con el cariño y la experiencia y conocimientos de grandes expertos en sus disciplinas pueda ser de utilidad para muchos profesionales expertos y no expertos en Nutrición.

Paediatric Parenteral Nutrition Kathrin Krohn, Olivier Goulet, R. Shamir, 2008-01-01 Parenteral nutrition in general is required if nutritional needs cannot be met by oral or enteral feeding. In the paediatric patient, its initiation depends both on individual circumstances and the age and size of the infant or child. This compact reference work on parenteral nutrition in children is based on the 'Guidelines for Paediatric Parenteral Nutrition' that have been developed jointly by the European Society for Paediatric Gastroenterology, Hepatology and Nutrition (ESPGHAN) and the European Society for Clinical Nutrition and Metabolism (ESPEN), in collaboration with the European Society for Paediatric Research (ESPR). These guidelines were based on systematic literature reviews as well as a formal consensus process of a multidisciplinary panel of professionals. However, as a result of the scarcity of good quality clinical trials in children, many of the recommendations were extrapolated from adult studies and based on expert opinion. A detailed analysis of the available data was performed, and for each statement, the level of evidence and grade of recommendation was assessed. This reference guide has been conceived as an aid for the treating physician to assist him in the decision process, thus being a valuable companion in clinical practice.

Nutrición: de la práctica a la teoría. 48 casos clínicos Sanz París, Alejandro, 2017-03-08 Se trata de un texto docente

diferente a los textos teóricos al uso, porque se llega a la teoría desde la práctica clínica habitual. Recoge 48 casos clínicos de nutrición enteral o parenteral extraídos de la actividad asistencial real. El espectro de casos clínicos abarca patologías de las áreas de endocrinología, atención primaria, geriatría, neurología, oncología y cirugía, de donde provienen los profesionales que han redactado los capítulos. Esta variedad en la formación de los autores, abre un abanico de puntos de vista, que enriquece la obra. A partir de estas situaciones clínicas, se revisan las guías clínicas y recomendaciones actuales de las sociedades científicas. Por último, cada capítulo aporta preguntas de test para autoevaluación

Introducción a la práctica clínica José A. Riancho Moral, Elpidio Calvo Manuel, José López Miranda, José Luis Pérez Castrillón, Leyre Riancho Zarrabeitia, 2022-04-15 - Este libro pretende ser un instrumento de ayuda en esa inmersión en la práctica médica. No trata de los casos infrecuentes o atípicos; se centra en los problemas comunes. No pretende ser una obra de referencia, ni describir exhaustivamente los diversos cuadros clínicos. El objetivo es ser una herramienta de trabajo para llevar en el bolsillo de la bata. Las diversas secciones incluyen herramientas útiles en la práctica clínica. - En esta segunda edición se mantienen los objetivos, el planteamiento inicial y la estructura general de la primera edición. Se trata de forma resumida, pero razonada, el enfoque diagnóstico y el manejo de pacientes con problemas habituales en la práctica clínica (disnea, fiebre, etc.), y se incluyen también capítulos de carácter eminentemente práctico destinados a la interpretación de pruebas diagnósticas (análisis, radiografías, etc.) y a la realización de procedimientos comunes (sondaje vesical, punción lumbar, etc.). - Se han revisado en profundidad todos los capítulos y se han actualizado muchos de ellos, en particular en lo concerniente a las nuevas técnicas diagnósticas y las estrategias terapéuticas. Se han incluido también varios capítulos nuevos sobre las pruebas genéticas, las medidas de control de enfermedades transmisibles, el abordaje de las crisis epilépticas y los trastornos del metabolismo minerales.
