On the Art of Teaching Horace Mann,1989 A classic essay on the knowledge and characteristics a teacher should have, the skills needed for teaching, and the importance of developing the character as well as the mind.

Dumbing Us Down John Taylor Gatto,2002-02-01 With over 70,000 copies of the first edition in print, this radical treatise on public education has been a New Society Publishers' bestseller for 10 years! Thirty years in New York City's public schools led John Gatto to the sad conclusion that compulsory schooling does little but teach young people to follow orders like cogs in an industrial machine. This second edition describes the wide-spread impact of the book and Gatto's guerrilla teaching. John Gatto has been a teacher for 30 years and is a recipient of the New York State Teacher of the Year award. His other titles include A Different Kind of Teacher (Berkeley Hills Books, 2001) and The Underground History of American Education (Oxford Village Press, 2000).

The End of Education Neil Postman,2011-06-01 In this comprehensive response to the education crisis, the author of Teaching as a Subversive Activity returns to the subject that established his reputation as one of our most insightful social critics. Postman presents useful models with which schools can restore a sense of purpose, tolerance, and a respect for learning.

Education James Walker Ben-El-Mechaieq, Arlene Kaplan Daniels, Current discussions of education from Jenck's Inequality to Coleman's recent controversial pronouncements on desegregation orders and white flight concentrate on the efficacy of educational reform. The articles in this anthology, collected from two issues of the journal Social Problems, all consider this topic. The volume is divided into six sections, each exploring different aspects of education. In an introductory essay the editors state the theme of the work and outline the approaches and focuses of the individual essays. Daniels and Ben-El-Mechaieq provide a framework within which the reader can digest and interpret the various contributions, and raise a series of

questions intended to guide future educational research. They maintain that only interdisciplinary study can enable researchers to understand the play between individual aspirations and interconnecting social systems and institutions in the development of the growing exasperation with (or indifference to) the schooling question. Originally sponsored by the Society for the Study of Social Problems, this work provides refreshing insights into the nature of contemporary education and explores new areas of research not previously discussed. It follows a social system approach to education and advocates it as a model for future researchers. Serves an important role in the current assessment of American education. Ray C. Rist, Cornell University

Creating a Nation of Joiners Johann N. Neem, 2009-07-01 The United States is a nation of joiners. Ever since Alexis de Tocqueville published his observations in *Democracy in America*, Americans have recognized the distinctiveness of their voluntary tradition. In a work of political, legal, social, and intellectual history, focusing on the grassroots actions of ordinary people, Neem traces the origins of this venerable tradition to the vexed beginnings of American democracy in Massachusetts. Neem explores the multiple conflicts that produced a vibrant pluralistic civil society following the American Revolution. The result was an astounding release of civic energy as ordinary people, long denied a voice in public debates, organized to advocate temperance, to protect the Sabbath, and to abolish slavery; elite Americans formed private institutions to promote education and their stewardship of culture and knowledge. But skeptics remained. Followers of Jefferson and Jackson worried that the new civil society would allow the organized few to trump the will of the unorganized majority. When Tocqueville returned to France, the relationship between American democracy and its new civil society was far from settled. The story Neem tells is more pertinent than ever—for Americans concerned about their own civil society, and for those seeking to build civil societies in emerging democracies around the world.

A Few Thoughts for a Young Man Horace Mann, 1850

The Quote Verifier Ralph Keyes,2007-04-01 Our language is full of hundreds of quotations that are often cited but seldom confirmed. Ralph Keyes's *The Quote Verifier* considers not only classic misquotes such as Nice guys finish last, and Play it again, Sam, but more surprising ones such as Ain't I a woman? and Golf is a good walk spoiled, as well as the origins of popular sayings such as The opera ain't over till the fat lady sings, No one washes a rented car, and Make my day. Keyes's in-depth research routinely confounds widespread assumptions about who said what, where, and when. Organized in easy-to-access dictionary form, *The Quote Verifier* also contains special sections highlighting commonly misquoted people and genres, such as Yogi Berra and Oscar Wilde, famous last words, and misremembered movie lines. An invaluable resource for not just those with a professional need to quote accurately, but anyone at all who is interested in the roots of words and phrases, *The Quote Verifier* is not only a fascinating piece of literary sleuthing, but also a great read.

The Brutish Empire Des Ekin,2024-10-14 The Bloody History of British Colonisation For centuries, a small island nation cast a shadow across the world. The British Empire's methods of expansion were often brutal, usually devastating. From Amritsar to Zululand, from the Opium Wars in China to the deliberate infection of Native Americans with smallpox and the cold-blooded treatment of the starving during the Irish Famine, Des Ekin lays bare the atrocities committed in the name of colonisation. With many nations worldwide still grappling with the legacy of British rule, Ekin explores the justifications used to dehumanise other people and rationalise their abuse, exploitation and slaughter. In this rigorously researched and eminently readable book, Des Ekin lifts the veil on the harrowing realities of colonial rule.

Big Hearted People Randy J. The message inspires readers to evaluate inner motives and find true happiness and contentment on this exciting journey in life that will take you from a life of quantity to a life of quality. In the process, you'll learn God's big-hearted purpose for your life.

Boston'S Banner Years: 1965–2015 Melvin B. Miller,2018-07-20 Everyone with a sense of fair play is horrified by stories of racially inspired abuse. As bad as such incidents can be, however, what is most damaging to the well-being of blacks is the constant media assertions that blacks are inexorably inferior. It can be difficult for people to feel motivated to achieve when they lack the confidence to believe in their own abilities. *Boston's Banner Years: 1965-2015* seeks to refute the negative implications of alleged black incompetence by chronicling black success. Over the years, editor Melvin B. Miller has developed an institutional memory of his community's affairs. He has used that unique resource to help produce this collection, in which well-qualified reporters share researched accounts of black achievement in Boston, creating a record for future generations of black community success. Stories of individual achievements of blacks can be inspiring, but they sometimes seem like aberrations. Providing numerous examples of blacks being assertive, competent, and successful, these

essays make it impossible to apply the negative racial stereotype to blacks in Boston, a place that is to some extent an incubator of black success. This collection of essays presents a series of biographical profiles highlighting black achievement and success in Boston over the course of fifty years.

The Teacher Wars Dana Goldstein,2014-09-02 In her groundbreaking history of 175 years of American education, Dana Goldstein finds answers in the past to the controversies that plague our public schools today. Teaching is a wildly contentious profession in America, one attacked and admired in equal measure. In *The Teacher Wars*, a rich, lively, and unprecedented history of public school teaching, Dana Goldstein reveals that teachers have been similarly embattled for nearly two centuries. From the genteel founding of the common schools movement in the nineteenth century to the violent inner-city teacher strikes of the 1960s and '70s, from the dispatching of Northeastern women to frontier schoolhouses to the founding of Teach for America on the Princeton University campus in 1989, Goldstein shows that the same issues have continued to bedevil us: Who should teach? What should be taught? Who should be held accountable for how our children learn? She uncovers the surprising roots of hot button issues, from teacher tenure to charter schools, and finds that recent popular ideas to improve schools—instituting merit pay, evaluating teachers by student test scores, ranking and firing veteran teachers, and recruiting “elite” graduates to teach—are all approaches that have been tried in the past without producing widespread change. And she also discovers an emerging effort that stands a real chance of transforming our schools for the better: drawing on the best practices of the three million public school teachers we already have in order to improve learning throughout our nation’s classrooms. *The Teacher Wars* upends the conversation about American education by bringing the lessons of history to bear on the dilemmas we confront today. By asking “How did we get here?” Dana Goldstein brilliantly illuminates the path forward.

Electric Sheep Slouching Towards Bethlehem Harry Eiss,2014-03-25 On Monday, 8:15 a.m., August 6, 1945, the world changed forever. In the single largest act of destruction ever initiated by humans, a bomb with the equivalent force of 20,000 tons of TNT shattered Hiroshima, killing tens of thousands of civilians, people who had become used to the American war planes flying overhead, planes that were purposely not dropping bombs on their city, to the point where the rush to the bomb shelters had become lackadaisical, and the normal activities continued with little interruption - getting the children up and off to school, opening the many small retail stores for the daily customers, perhaps stopping at a local café for morning coffee or tea, perhaps joining in on the group exercise classes. This is the precise instant we entered the postmodern world, one where the easy truths of centuries no longer applied. Speculative Fiction projects real possibilities beyond the now shattered assumptions, moving through marginalized fictional landscapes - science fiction, fantasy, horror, weird fiction, supernatural fiction, superhero comics, graphic novels, and movies, utopian and dystopian fiction, apocalyptic and post-apocalyptic fiction, Cyber Punk, the New Wave, as well as related static, motion, and virtual arts, including everything from

graphic novels to video games.
