The Radiological Accident in Goiânia International Atomic Energy Agency,1988 The Government and authorities in Brazil were faced with a tragic accident in Goiânia resulting from the misuse of a strongly radioactive medical teletherapy source not under radiation protection surveillance. The present report is divided into four parts: a chronology of destruction of the source, discovery of the accident and initial response; a description of the human consequences and the dosimetry and treatment of seriously exposed and contaminated persons; an account of the assessment of the environmental contamination and the remedial actions taken; and observations and recommendations. Appendices and annexes give an assessment of the effectiveness of international co-operation in the emergency response, and provide further information on: public communications; radiological survey equipment; guidelines for the discharge of patients; radiological protection; chemical decontamination; and the lessons learned.

Daniel Goleman Omnibus Daniel Goleman,2004 Emotional Intelligence Does IQ define our destiny? Daniel Goleman argues that our view of human intelligence is far too narrow, and that our emotions play a major role in thought, decision making and individual success. Self-awareness, impulse control, persistence, motivation, empathy and social deftness are all qualities that mark people who excel: whose relationships flourish, who are stars in the workplace. With new insights into the brain architecture underlying emotion and rationality, Goleman shows precisely how emotional intelligence can be nurtured and strengthened in all of us. Working with Emotional Intelligence Do you want to be more successful at work? Do you want to improve your chances of promotion? Do you want to get on better with your colleagues? Daniel Goleman draws on unparalleled access to business leaders around the world and the thorough research that is his trademark. He demonstrates that emotional intelligence at work matters twice as much as cognitive abilities such as IQ or technical expertise in this inspiring sequel.

The God of Life Gustavo Guti rrez,1991-01-01 My desire is that this book may help readers to know more fully the God of biblical revelation and, as a result, to proclaim God as the God of life. Who is God? Where is God? How are we to speak of God? Gutierrez looks at these classic questions through a review of the Bible, and his answers challenge all Christians to a deepening of faith.

The Moral Imagination John Paul Lederach,2010 John Paul Lederach's work in the field of conciliation and mediation is internationally recognized. He has provided consultation, training and direct mediation in a range of situations from the Miskito/Sandinista conflict in Nicaragua to Somalia, Northern Ireland, Tajikistan, and the Philippines. His influential 1997 book Building Peace has become a classic in the discipline. In this book, Lederach poses the question, How do we transcend the cycles of violence that bewitch our human community while still living in them? Peacebuilding, in his view, is both a learned skill and an art. Finding this art, he says, requires a worldview shift. Conflict professionals must envision their work as a creative act-an exercise of what Lederach terms the moral imagination. This imagination must, however, emerge from and speak to the hard realities of human affairs. The peacebuilder must have one foot in what is and one foot beyond what exists. The book is organized around four guiding stories that point to the moral imagination but are incomplete. Lederach seeks to understand what happened in these individual cases and how they are relevant to large-scale change. His purpose is

not to propose a grand new theory. Instead he wishes to stay close to the messiness of real processes and change, and to recognize the serendipitous nature of the discoveries and insights that emerge along the way. overwhelmed the equally important creative process. Like most professional peacemakers, Lederach sees his work as a religious vocation. Lederach meditates on his own calling and on the spirituality that moves ordinary people to reject violence and seek reconciliation. Drawing on his twenty-five years of experience in the field he explores the evolution of his understanding of peacebuilding and points the way toward the future of the art. <http://www.loc.gov/catdir/enhancements/fy0616/2004011794-d.html>.

What the Best College Teachers Do Ken Bain, 2011-09-01 What makes a great teacher great? Who are the professors students remember long after graduation? This book, the conclusion of a fifteen-year study of nearly one hundred college teachers in a wide variety of fields and universities, offers valuable answers for all educators. The short answer is—it's not what teachers do, it's what they understand. Lesson plans and lecture notes matter less than the special way teachers comprehend the subject and value human learning. Whether historians or physicists, in El Paso or St. Paul, the best teachers know their subjects inside and out—but they also know how to engage and challenge students and to provoke impassioned responses. Most of all, they believe two things fervently: that teaching matters and that students can learn. In stories both humorous and touching, Ken Bain describes examples of ingenuity and compassion, of students' discoveries of new ideas and the depth of their own potential. What the Best College Teachers Do is a treasure trove of insight and inspiration for first-year teachers and seasoned educators.
