Social Vulnerability to COVID-19 Xiaojun Yuan,Dan Wu,DeeDee Bennett Gayle,2023-02-01 This book provides an overview of the impact of the pandemic in China and the USA and presents a research agenda for use, access, and adoption of information and communication technologies (ICT) in the era of COVID-19. The global COVID-19 pandemic changed lives overnight and exposed socially vulnerable populations to ever-challenging situations. One significant challenge was the use,

access, and adoption of technological resources. To understand how socially vulnerable populations managed the COVID-19 pandemic and adapt to the new normal, it is important for researchers and practitioners to identify the challenges and understand the perceptions of technologies. Through various research studies, this edited volume addresses the impact of the global COVID-19 pandemic and the adoption of technologies (from artificial intelligence to telehealth and telecommunications) among some socially vulnerable populations (including children, older adults, COVID-19 patients, and general marginalized populations) in the world. The information divide faced by socially vulnerable groups is studied as well as the dimension of vulnerabilities and the impacts of specific technologies.

The Death of "Why?" Andrea Batista Schlesinger,2009-06-26 A look at how Americans are losing their sense of curiosity and skepticism, and how some are working to change that. The spirit of inquiry is the engine of democracy. The democratic process is nothing less than citizens regularly asking what kind of society they want to live in and whom they want to lead them. But more and more people are avoiding the whole messy business of questioning. Americans are instead being trained to look for ready-made answers, with potentially dire implications for the health of our society. In this impassioned new book, Andrea Batista Schlesinger argues that we're besieged by cultural forces that urge us to avoid independent thought and critical analysis. The media reduces politics to a spectator sport, focusing on polls and personalities rather than issues and ideas. Schools teach to standardized tests—students learn to fill in the bubbles, not open their minds. "Financial literacy" courses have replaced civics classes, graduating smart shoppers rather than informed citizens. Even the Internet promotes habits that discourage inquiry. Regurgitating search-engine results becomes a substitute for genuine research and reflection.

Social networks promote connection rather than engagement. With all the information available online, over a third of those younger than twenty-five say they get no news on a typical day, up from twenty-five percent in 1998. The situation isn't hopeless. Batista Schlesinger spotlights individuals and institutions across the country that are working to renew a healthy sense of curiosity and skepticism, particularly in American's youth. It is, at this point, an uphill battle but one well worth undertaking. *The Death of "Why?"* offers both a penetrating socio-cultural critique of our current path and a way forward for cultivating inquiry and reinvigorating our democracy. "From her start in politics as a teenager Andrea Batista Schlesinger has asked the important questions. Now she asks her most important: are we teaching young people to value inquiry, and if not, what hope can we have for the future of democracy?"—Katrina vanden Heuvel, Publisher, *The Nation* "The Death of "Why?" makes the case that we cannot create social change without a culture of questioning. We should pay close attention to this brilliant contribution."—Deepak Bhargava, executive director, Center for Community Change "She asks the right questions at a time when we seem more eager for answers that we don't understand or care about."—Deborah Meier, Senior Scholar, New York University, author of *In Schools We Trust* and *The Power of Their Ideas*, and founder of innovative New York and Boston area public schools
