WHO Estimates of the Global Burden of Foodborne Diseases World Health Organization, 2016-01-30 The report presents the first global and regional estimates of the burden of foodborne diseases. The large disease burden from food highlights the importance of food safety, particularly in Africa, South-East Asia and other regions. Despite the data gaps and limitations of these initial estimates, it is apparent that the global burden of foodborne diseases is considerable, and affects individuals of all ages, particularly children

Is Fiscal Policy the Answer? Blanca Moreno-Dodson, 2012-11-15 The effects of fiscal policy measures, both taxes and public spending, adopted by developing countries in response to the 2009 global crisis are still uncertain. This book discusses them using an analytical framework that allows for distilling possible implications on growth and social welfare.

Global Corruption Report 2006 Transparency International, 2005-12-20 TI has once again shown its ability to combine research and policy analysis not just to shine a light on the deeply embedded problems of corruption ... but to propose progressive solutions. Former World Bank President James Wolfensohn on the Global Corruption Report In the health sector, corruption is a matter of life or death. It can take many forms: from medical professionals who sell medicines or services that should be freely available, to high-level government officials who embezzle money from health budgets, to pharmaceutical companies that buy influence over research agendas. The impact of corruption is always felt by the end user -- the sick person who is forced to pay over the odds or who is given unsafe, counterfeit medicines. The 2006 edition of Transparency International's Global Corruption Report shows the impact that corruption has on health care in rich and poor countries. From high-level bribery in Costa Rica to informal payments in Hungary, case studies from around the world explore the characteristics of the health sector that make it so prone to corruption. In a special section dedicated to corruption in HIV/AIDS, the report warns that the large sums being poured into fighting the world's deadliest diseases need to be safeguarded against abuse. There is also a detailed analysis of the problems of the pharmaceutical system. The report also offers an annual round-up of worldwide developments and tracks major trends in more than 40 countries. The Global Corruption Report 2006 is the only report of its kind, and is an essential reference source for anyone who wants the latest research on how corruption affects everything from health to education and the oil and gas industries.

The Fabrica of Andreas Vesalius Dániel Margócsy, Mark Somos, Stephen N. Joffe, 2018-05-23 Winner of the Third Neu-

Whitrow Prize (2021) granted by the Commission on Bibliography and Documentation of IUHPS-DHST Additional background information This book provides bibliographic information, ownership records, a detailed worldwide census and a description of the handwritten annotations for all the surviving copies of the 1543 and 1555 editions of Vesalius' De humani corporis fabrica. It also offers a groundbreaking historical analysis of how the Fabrica traveled across the globe, and how readers studied, annotated and critiqued its contents from 1543 to 2017. The Fabrica of Andreas Vesalius sheds a fresh light on the book's vibrant reception history and documents how physicians, artists, theologians and collectors filled its pages with copious annotations. It also offers a novel interpretation of how an early anatomical textbook became one of the most coveted rare books for collectors in the 21st century.

Wolf and Raven Michael A. Stackpole,1998 A shaman in secret, Wolfgang Kies joins forces with his sole ally, Dr. Richard Raven--an elf and vigilante--to battle Seattle's crime kingpin Etienne La Plante and his gang of hired goons and ice pick-wielding samurai. Original.

Visualizing the invisible with the human body J. Cale Johnson,Alessandro Stavru,2019-11-05 Physiognomy and ekphrasis are two of the most important modes of description in antiquity and represent the necessary precursors of scientific description. The primary way of divining the characteristics and fate of an individual, whether inborn or acquired, was to observe the patient's external characteristics and behaviour. This volume focuses initially on two types of descriptive literature in Mesopotamia: physiognomic omens and what we might call ekphrastic description. These modalities are traced through ancient India, Ugaritic and the Hebrew Bible, before arriving at the physiognomic features of famous historical figures such as Themistocles, Socrates or Augustus in the Graeco-Roman world, where physiognomic discussions become intertwined with typological analyses of human characters. The Arabic compendial culture absorbed and remade these different physiognomic and ekphrastic traditions, incorporating both Mesopotamian links between physiognomy and medicine and the interest in characterological 'types' that had emerged in the Hellenistic period. This volume offer the first wide-ranging picture of these modalities of description in antiquity.

Farewell to Freedom Riccardo Baldissone,2018-07-23 From Homeric poems to contemporary works, this book traces the words that express the various notions of freedom in Classical Greek, Latin, and medieval and modern European idioms. Examining writers from Plato and Aristotle to Nietzsche and Foucault, this theoretical mapping shows old and new boundaries of the horizon of freedom.

Statics of Historic Masonry Constructions Mario Como,2012-12-14 Masonry constructions are the great majority of the buildings in Europe's historical centres and the most important monuments in its architectural heritage and the demand for their safety assessments and restoration projects is pressing and constant. Nevertheless, there is a lack of a widely accepted approach to studying the statics of masonry structures. This book aims to help fill these gaps by presenting a new

comprehensive, unified theory of statics of masonry constructions. The book, result of thirty years of research and professional experience, through an interdisciplinary approach combining engineering, architecture, advances from the simple to the complex and analyses statics of a large variety of masonry constructions, as arches, domes, cross and cloister vaults, piers, towers, cathedrals and buildings under seismic actions.

The Science of Solar System Ices Murthy S. Gudipati,Julie Castillo-Rogez,2012-07-28 The role of laboratory research and simulations in advancing our understanding of solar system ices (including satellites, KBOs, comets, and giant planets) is becoming increasingly important. Understanding ice surface radiation processing, particle and radiation penetration depths, surface and subsurface chemistry, morphology, phases, density, conductivity, etc., are only a few examples of the inventory of issues that are being addressed by Earth-based laboratory research. As a response to the growing need for cross-disciplinary dialog and communication in the Planetary Ices science community, this book aims to achieve direct dialog and foster focused collaborations among the observational, modeling, and laboratory research communities.

Mathematics Across Cultures Helaine Selin,2001-11-30 Mathematics Across Cultures: A History of Non-Western Mathematics consists of essays dealing with the mathematical knowledge and beliefs of cultures outside the United States and Europe. In addition to articles surveying Islamic, Chinese, Native American, Aboriginal Australian, Inca, Egyptian, and African mathematics, among others, the book includes essays on Rationality, Logic and Mathematics, and the transfer of knowledge from East to West. The essays address the connections between science and culture and relate the mathematical practices to the cultures which produced them. Each essay is well illustrated and contains an extensive bibliography. Because the geographic range is global, the book fills a gap in both the history of science and in cultural studies. It should find a place on the bookshelves of advanced undergraduate students, graduate students, and scholars, as well as in libraries serving those groups.

Generic Enrichment in Vergil and Horace S. J. Harrison,2011-03-31 S. J. Harrison sets out to sketch one answer to a key question in Latin literary history: why did the period c.39-19 BC in Rome produce such a rich range of complex poetical texts, above all in the work of the famous poets Vergil and Horace? Harrison argues that one central aspect of this literary flourishing was the way in which different poetic genres or kinds (pastoral, epic, tragedy, etc.) interacted with each other and that that interaction itself was a prominent literary subject. He explores this issue closely through detailed analysis of passages of the two poets' works between these dates. Harrison opens with an outline of generic theory ancient and modern as a basis for his argument, suggesting how different poetic genres and their partial presence in each other can be detected in the Latin poetry of the first century BC.

The Child Survivor Joyanna L. Silberg,2021-08-18 In this second edition of Joyanna Silberg's classic *The Child Survivor*,

practitioners who treat dissociative children will find practical tools that are backed up by recent advances in clinical research. Chapters are filled with examples of clinical dilemmas that can challenge even the most expert child trauma clinicians, and Silberg shows how to handle these dilemmas with creativity, attunement, and sensitivity to the adaptive nature of even the most complex dissociative symptoms. The new edition addresses the impact of the Covid-19 pandemic on children and provides tips for working with traumatized children in telehealth. A new chapter on organized abuse explains how children victimized by even the most sadistic crimes can respond well to therapy. Clinicians on the front lines of treatment will come away from the book with an arsenal of therapeutic techniques that they can put into practice right away, limiting the need for restrictive hospitalizations or out-of-home placements for their young clients.

Political Economy in Haiti Simon M. Fass, 1988-01-01 This important study introduces the conceptual premise that families, like firms, analyze their circumstances, make decisions, and pursue courses of action on the basis of what they perceive to be the most efficient methods for producing and reproducing survival. Combining this premise with an extraordinary assemblage of facts gleaned over the period of a decade from the streets, markets and homes of Port-au-Prince, the author weaves a tapestry of despair and hope which only an unusual degree of intimacy with the details of everyday life in the city could provide. The result is a considerable deepening of understanding about the politics and economics by which family members earn their livelihoods, distribute resources within and between households, produce life and labor from food and water, provide shelter and schooling for themselves, and borrow money to finance these and other activities. These different dimensions of daily existence form a web of interdependency in which change in any one dimension causes change in all the others. As Professor Fass's work demonstrates, research and development assistance practices of public and private organizations, in such areas as employment, health, housing, education and credit are often irrelevant. This is because they are necessarily guided by prevailing concepts and theories with respect to the circumstances of the urban poor, which sometimes do the poor considerable disservice. With the additional insight provided by a decade of participation in the design of policies, programs and projects serving as a tempering influence, the author does not leap to easy criticism of prevailing views and practices. He notes that ideas and interventions change in response to new understanding, sometimes in ways that the producers of such understanding could never have imagined. The problem is that change is painfully slow, and in desperately poor countries like Haiti, waiting for change exacts an almost intolerable price from the poor. This book is a provocative yet highly original contribution which will require serious attention from scholars and practitioners of development. Appearing as it does soon after the great seaward exodus of Haitians and urban unrest culminating in the flight of the Duvalier family, this timely volume will provide illumination for those seeking to understand the circumstances that press people to risk all in the name of survival.

Progressive Taxation in Theory and Practice Edwin Robert Anderson Seligman, 1909

Consumption and Well-Being in the Material World Miriam Tatzel,2013-09-30 This volume addresses how we can find happiness and well-being in the material world. It builds on previous works that find that materialism is associated with lowered well-being (materialists are less happy) and that consumerism, in all its profusion, is harmful to environmental well-being. How can we use the money and possessions in our lives in the service of well-being? Apparently not by being materialistic. Can we benefit from the many wonders of the marketplace -- in technology, convenience and aesthetics -- without falling prey to the lures and dangers of excessive material preoccupation? Can we meet our material needs in ways that nourish growth and well-being? The authors of the chapters in this volume are on-going researchers into such questions. Herein you can learn about the hedonic benefits of thrift and of spending on experiences; how possessions can be beneficial; how different types of consumers spend money; cultural variations in conceptions of the good life; how we might reconcile environmental and consumer well-being; and how to measure the whole of human, economic, and environmental well-being. Taken all together, this collection finds grounds for compatibility between what's good for the consumer and what's good for the environment. This volume appeals to academics, professionals, students and others interested in materialism and consumer well-being.

Field Marshal Sir Henry Wilson Keith Jeffery,2006-03-09 Field Marshal Sir Henry Wilson, an Irishman who in June 1922 was assassinated on his doorstep in London by Irish republicans, was one of the most controversial British soldiers of the modern age. Before 1914 he did much to secure the Anglo-French alliance and was responsible for the planning which saw the British Expeditionary Force successfully despatched to France after the outbreak of war with Germany. A passionate Irish unionist, he gained a reputation as an intensely 'political' soldier, especially during the 'Curragh crisis' of 1914 when some officers resigned their commissions rather than coerce Ulster unionists into a Home Rule Ireland. During the war he played a major role in Anglo-French liaison, and ended up as Chief of the Imperial General Staff, professional head of the army, a post he held until February 1922. After Wilson retired from the army, he became an MP and was chief security adviser to the new Northern Ireland government. As such, he became a target for nationalist Irish militants, being identified with the security policies of the Belfast regime, though wrongly with Protestant sectarian attacks on Catholics. He is remembered today in unionist Northern Ireland as a kind of founding martyr for the state. Wilson's reputation was ruined in 1927 with the publication of an official biography, which quoted extensively and injudiciously from his entertaining, indiscreet, and wildly opinionated diaries, giving the impression that he was some sort of Machiavellian monster. In this first modern biography, using a wide variety of official and private sources for the first time, Keith Jeffery reassesses Wilson's life and career and places him clearly in his social, national, and political context.

Understanding Global Security Peter Hough,2004 This work provides an introduction to both the conventional 'hard' security issues which dominated international relations during the Cold War and the 'soft' security issues which have

emerged in the post-Cold War era.

The Environmental Challenges of Nuclear Disarmament Thomas E. Baca, Tadeusz Florkowski, 2000-08-31 This book draws together recognized experts from numerous institutions in Western Europe, Eastern Europe, the former Soviet Union, and North America. Nuclear facility decontamination and decommissioning, waste treatment, management and disposal, long-term monitoring and surveillance, and prevention of proliferation are the primary topics discussed, including critical assessments of the existing knowledge and identification of the needs for future collaboration. Proposals are presented for a variety of national and international agencies, and preliminary business plans developed for collaboration with private companies. A network of international projects needs to be financed since it is such projects that will ultimately ease tensions, help solve nuclear waste contamination and security problems, and help pave the road toward nuclear weapons disarmament.

Armies and Ecosystems in Premodern Europe Sander Govaerts, 2021-04-30 Using the ecosystem concept as his starting point, the author examines the complex relationship between premodern armed forces and their environment at three levels: landscapes, living beings, and diseases. The study focuses on Europe's Meuse Region, well-known among historians of war as a battleground between France and Germany. By analyzing soldiers' long-term interactions with nature, this book engages with current debates about the ecological impact of the military, and provides new impetus for contemporary armed forces to make greater effort to reduce their environmental footprint.
