Der am besten dokumentierte Spuk der Geschichte (Dr. Walter v. Lucadou, Physiker und Psychologe) Melchior Joller, 2020-05-14 In der 90-minütigen ARTE/ZDF-Dokumentation Das Spukhaus, erstmals ausgestrahlt am 8.6.2003, wird der Fall Joller nach Angaben von Dr. Walter v. Lucadou (Physiker, Psychologe und Leiter der parapsychologischen Beratungsstelle der Wissenschaftlichen Gesellschaft zur Förderung der Parapsychologie in Freiburg i. Breisgau) als der am besten dokumentierte Spuk-Fall der Geschichte bezeichnet. Die Aufzeichnungen Jollers, die dieser erstmals 1863 als Spuk-Tagebuch veröffentlichte, sind hier um einige ausgewählte Zeitungsartikel, Entgegnungen und Briefe Jollers ergänzt, die aufzeigen, mit welchem Spott und Hohn durch seine Zeitgenossen der den Phänomenen äußerst skeptisch gegenüberstehende Joller - zusätzlich zu den bedrohlichen Spuk-Erscheinungen in seinem Hause. Leicht vergrößerte Schrift gegenüber der Taschenbuch-Ausgabe zu kämpfen hatte.

Darstellung selbsterlebter mystischer Erscheinungen Melchior Joller, Dirk Bertram, 2020-05-14 In der 90-minütigen ARTE/ZDF-Dokumentation, des Regisseurs und 3-fachen Grimme Preisträgers Volker Anding Das Spukhaus, erstmals ausgestrahlt am 8.6.2003, wird der Fall Melchior Joller gemäß Dr. Walter von Lucadou, Deutschlands bekanntestem Spukforscher (Physiker, Psychologe und Leiter der parapsychologischen Beratungsstelle der Wissenschaftlichen Gesellschaft zur Förderung der Parapsychologie in Freiburg i. Breisgau) als der am besten dokumentierte Spuk-Fall der Geschichte bezeichnet. Die akribisch geführten Tagebuch-Aufzeichnungen Jollers, die dieser 1863 in Form eines Spuk-Tagebuchs veröffentlichte, sind im nunmehr vorgelegten Buch um einige ausgewählte Zeitungsartikel, Entgegnungen und Briefe Jollers ergänzt worden.

The Pauli-Jung Conjecture and Its Impact Today Harald Atmanspacher, Christopher A. Fuchs, 2017-01-16 Related to the key areas of Pauli's and Jung's joint interests, the book covers overlapping issues from the perspectives of physics, philosophy, and psychology. Of primary significance are epistemological questions connected to issues such as realism, measurement, observation, consciousness, and the unconscious. The contributions assess the extensive material that we have about Pauli's and Jung's ideas today, with particular respect to concrete research questions and projects based on and related to current knowledge.

Legitimacy of Unbelief Gerd H. Hövelmann, Hans Michels, 2017 Dutch journalist Piet Hein Hoebens (1948-1984) held a

unique position in the controversies between proponents and skeptics of parapsychology and related fields. While he described himself as a card-carrying skeptic with strong 'ecumenical' leanings, even many of his nominal opponents appreciated his work and his penetrating, open-minded criticism. Hoebens' constructive influence on the culture of responsible scientific exchange is felt to this day. The editors have collected (and mostly translated) more than 40 of Hoebens' most significant writings, about half of which were never published in English before. The editors also added editorial introductions to all chapters to elucidate their original contexts and their lasting relevance. Therefore, the book is more than a commemoration of an important author - it provides valuable insights into the history of parapsychology and its skeptical reflections--Back cover.

Legends of the Nahanni Valley Hammerson Peters,2019-03-20 A non-fiction exploring some of Northern Canada's greatest forgotten mysteries- the stories and legends surrounding the watershed of the South Nahanni River. . Deep in the heart of the Canadian North lies a mysterious valley shrouded in legend. Lured by tales of lost gold, prospectors who enter it tend to lose their heads or vanish without a trace. Some say that the valley is cursed- haunted by an evil spirit whose wailings echo in the canyons. Others claim that it is home to monsters- relics of its prehistoric past. What secrets could the valley be hiding? What mysteries lie buried beneath its misty shroud?

Fears, Phobias and Rituals Isaac Marks,1987-04-30 This book draws on fields as diverse as biochemistry, physiology, pharmacology, psychology, psychiatry, and ethology, to form a fascinating synthesis of information on the nature of fear and of panic and anxiety disorders. Dr. Marks offers both a detailed discussion of the clinical aspects of fear-related syndromes and a broad exploration of the sources and mechanisms of fear and defensive behavior. Dealing first with normal fear, he establishes a firm, scientific basis for understanding it. He then presents a thorough analysis of the development, symptoms and treatment of fear-related syndromes. Phobic and obsessive-compulsive disorders are examined in detail. The book is illustrated with examples of fear and defensive behavior in other living organisms. By drawing provocative analogies between animal and human behavior, it sheds new light on the origins of fears, phobias, and obsessive-compulsive problems, as well as on their treatment by drugs and psychological means. Clinical psychologists, ethologists, and anyone interested in the mechanisms of behavior will be fascinated by this authoritative study. The text is intriguing and informative, and the bibliography of over 2,100 entries makes it an invaluable reference.

Intellectual Functions and the Brain Hans J. Markowitsch,1992 Knowledge of the relationship between the brain and behavior greatly expanded in the period of time between 1870 and the Second World War. This volume reviews literature from this period concerned with the interdependencies of the brain and intellectual functions. The vast amount of historical material treated covers major sources of the time which are not readily accessed today, with particular emphasis on accurately citing the many foreign-language publications. All citations are given in English so that readers can judge the

relevance of the material to their own work.

Parapsychology Etzel Cardeña, John Palmer, David Marcusson-Clavertz, 2015-08-14 Many people have experienced such unusual phenomena as dreams that later seem to correspond with unforeseeable events, thinking of a long-lost friend just before he or she unexpectedly calls, or the ability to feel the presence of deceased loved ones. What many do not realize is that these types of experiences have been researched for more than a century by eminent scientists, including Nobel laureates. Most of these researchers have concluded that some of these phenomena do occur, although we are far from explaining them to everyone's satisfaction. This book is the first in almost 40 years to provide a comprehensive scientific overview of research in the field of parapsychology, explaining what we know and don't know about so-called psi phenomena, such as telepathy, precognition or psychokinesis. Contributors evaluate the evidence for these phenomena, accounting for factors such as selective memory, wish fulfillment and incorrect methods or analyses, in some cases offering psychological, physical and biological theories. Instructors considering this book for use in a course may request an examination copy here.

The Development of Autobiographical Memory Hans J. Markowitsch, Harald Welzer, 2009-10-28 Autobiographical memory constitutes an essential part of our personality. This book reveals how the development of a conscious self, of an integrated personality and of an autobiographical memory are all intertwined.

Depraved Harold Schechter, 2004 'This is must reading for crime buffs. DEPRAVED demonstrates that sadistic psychopaths are not a modern day phenomena... gruesome, awesome, compelling reporting.' ANNE RULE. Here is the macabre story of H.H. Holmes, architect of the infamous 'Castle of Horror', whose labyrinth of trapdoors, stairways to nowhere, bedchambers fitted with peepholes and asphyxiating gas pipes, greased body chutes, and a cellar equipped with acid vats, a crematorium, and dissecting table, became an unspeakable domain of torture and murder. With stark, ghastly detail, DEPRAVED takes you into the mind of this evil genius - who alternatively posed as doctor, druggist, and inventor to snare his prey in 19th Century Chicago - and reveals a mesmerizing tale of true detection before the age of technological wizardry.

The Ant and the Peacock Helena Cronin, 1991 This book is a success story. It explains two long-running puzzles of the theory of natural selection. How can natural selection favour those, like the ant, that renounce tooth and claw in favour of the public-spirited ways of the commune? How can it explain the peacock's tail, flamboyant and a burden to its bearer; surely selection would act against useless ornamentation? Helena Cronin's enthralling account blends history, science and philosophy in a gripping tale that is scholarly, entertaining and eminently readable. The hardback edition was selected by Nature as one of the best scientific books in 1992. Also the New York Times chose it as one of their best books of 1992. The author divides her time between the Philosophy Department at the London School of Economics and the Zoology Department at Oxford.

Physics and Psychics Richard Noakes,2019-10-17 Noakes' revelatory analysis of Victorian scientists' fascination with psychic phenomena connects science, the occult and religion in intriguing new ways.

Occult Roots of Religious Studies Yves Mühlematter,Helmut Zander,2021-06-08 The historiographers of religious studies have written the history of this discipline primarily as a rationalization of ideological, most prominently theological and phenomenological ideas: first through the establishment of comparative, philological and sociological methods and secondly through the demand for intentional neutrality. This interpretation caused important roots in occult-esoteric traditions to be repressed. This process of “purification” (Latour) is not to be equated with the origin of the academic studies. De facto, the elimination of idealistic theories took time and only happened later. One example concerning the early entanglement is Tibetology, where many researchers and respected chair holders were influenced by theosophical ideas or were even members of the Theosophical Society. Similarly, the emergence of comparatistics cannot be understood without taking into account perennialist ideas of esoteric provenance, which hold that all religions have a common origin. In this perspective, it is not only the history of religious studies which must be revisited, but also the partial shaping of religious studies by these traditions, insofar as it saw itself as a counter-model to occult ideas.

The Oxford Handbook of Memory Endel Tulving,Fergus I. M. Craik,2005-05-05 The strengths and weaknesses of human memory have fascinated people for hundreds of years, so it is not surprising that memory research has remained one of the most flourishing areas in science. During the last decade, however, a genuine science of memory has emerged, resulting in research and theories that are rich, complex, and far reaching in their implications. Endel Tulving and Fergus Craik, both leaders in memory research, have created this highly accessible guide to their field. In each chapter, eminent researchers provide insights into their particular areas of expertise in memory research. Together, the chapters in this handbook lay out the theories and presents the evidence on which they are based, highlights the important new discoveries, and defines their consequences for professionals and students in psychology, neuroscience, clinical medicine, law, and engineering.

Affect in Relation Birgitt Röttger-Rössler,Jan Slaby,2018-05-11 Decades of research on affect and emotion have brought out the paramount importance of affective processes for human lives. *Affect in Relation* brings together perspectives from social science and cultural studies to analyze the formative, subject constituting potentials of affect and emotion. Relational affect is understood not as individual mental states, but as social-relational processes that are both formative and transformative of human subjects. This volume explores relational affect through a combination of interdisciplinary case

studies within four key contexts: Part I: "Affective Families" deals with the affective dynamics in transnational families who are scattered across several regions and nations. Part II: "Affect and Place" brings together work on affective place-making in the contexts of migration and in political movements. Part III: "Affect at Work" analyzes the affective dimension of contemporary white-collar workplaces. Part IV: "Affect and Media" focuses on the role of media in the formation and mobilization of relational affect. In its transdisciplinary spirit, analytical rigor and focus on timely and salient global matters, *Affect in Relation* consolidates the field of affect studies and opens up new avenues for scholarly and practical co-operation. It will appeal to both students and postdoctoral researchers interested in fields such as anthropology, sociology, cultural studies, media studies and human development.

Integrative Activity of the Brain Jerzy Konorski,1967

N equals 1 Gerhard Mayer,2020-03 Single case studies have a long tradition in the field of parapsychology and anomalistics research. Naturally, thorough case studies do not usually provide hard evidence for the existence of paranormal effects. However, they demonstrate the dynamics of occurrence of such extraordinary phenomena and experiences in the living world. This volume is intended to give an overview of the methodological peculiarities of anomalistic field research. On the basis of historical and current case studies, certain specific psychosocial dynamics and problems in this interesting and challenging field of research are presented and discussed.
