Mathematics, Education and History Kathleen M. Clark, Tinne Hoff Kjeldsen, Sebastian Schorcht, Constantinos Tzanakis, 2018-03-30 This book includes 18 peer-reviewed papers from nine countries, originally presented in a shorter form at TSG 25 The Role of History of Mathematics in Mathematics Education, as part of ICME-13 during. It also features an introductory chapter, by its co-editors, on the structure and main points of the book with an outline of recent developments in exploring the role of history and epistemology in mathematics education. It serves as a valuable contribution in this domain, by making reports on recent developments in this field available to the international educational community, with a special focus on relevant research results since 2000. The 18 chapters of the book are divided into five interrelated parts that underlie the central issues of research in this domain: 1. Theoretical and conceptual frameworks for integrating history and epistemology in mathematics in mathematics education; 2. Courses and didactical material: Design, implementation and evaluation; 3. Empirical investigations on implementing history and epistemology in mathematics education; 4. Original historical sources in teaching and learning of and about mathematics; 5. History and epistemology of mathematics: Interdisciplinary teaching and sociocultural aspects. This book covers all levels of education, from primary school to tertiary education, with a particular focus on teacher education. Additionally, each chapter refers to and/or is based on empirical research, in order to support, illuminate, clarify and evaluate key issues, main questions, and conjectured theses raised by the authors or in the literature on the basis of historical-epistemological or didactical-cognitive arguments.

The Communicative Construction of Reality Hubert Knoblauch, 2019-12-06 This volume advocates a shift from the social constructivism found in the work of Thomas Luckmann and Peter Berger, to a communicative constructivism that acknowledges communication as an embodied form of action in its own right, according to which social actors, in engaging in communicative action, construct a material social reality that guides, delimits, and enables actions. A study of the importance of understanding the role of communication in an age in which digitization and mediatization have extended the reach of communication to a global level and brought about the emergence of the communication society, *The Communicative Construction of Reality* shows how communication society does not merely replace modern society and its hierarchical institutions, but complements it in a manner that continually results in conflicts leading to the refiguration of society. As such, it will appeal to scholars of sociology with interests in the sociology of knowledge, communication, and social theory.

What in the World? Albert, Mathias, Werron, Tobias, 2020-12-16 Analysing social change has too often been characterized by parochialism, either a Eurocentrism that projects European experience outwards or a disciplinary narrowness that ignores insights from other academic disciplines. This book moves beyond these limits to develop a global perspective on social change. The book provincializes Europe in order to analyse European modernity as the product of global developments and brings together renowned scholars from international relations, history and sociology in the search for common understandings. In so doing, it provides a range of promising theoretical approaches, analytical takes and substantive research areas that offer new vistas for understanding change on a global scale.

Design Ethnography Francis Müller, 2020-12-14 This open access book describes methods for research on and research through design. It posits that ethnography is an appropriate method for design research because it constantly orients itself, like design projects, towards social realities. In research processes, designers acquire project-specific knowledge, which happens mostly intuitively in practice. When this knowledge becomes the subject of reflection and explication, it strengthens the discipline of design and makes it more open to interdisciplinary dialogue. Through the use of the ethnographic method in design, this book shows how design researchers can question the certainties of the everyday world, deconstruct reality into singular aesthetic and semantic phenomena, and reconfigure them into new contexts of signification. It shows that design ethnography is a process in which the epistemic and creative elements flow into one another in iterative loops. The goal of design ethnography is not to colonize the discipline of design with a positivist and objectivist scientific ethos, but rather to reinforce and reflect upon the explorative and searching methods that are inherent to it. This innovative book is of interest to design researchers and professionals, including graphic artists, ethnographers, visual anthropologists and others involved with creative arts/media.

Speaking the Nation Anandita Bajpai, 2018-07-04 Untangling the logical, lexical, and semantic patterns of the multiple official speeches of Indian prime ministers, *Speaking the Nation* gauges how the Indian state has been projected by different governments in different times, in the face of challenges from internal and external actors that put pressure on its leaders to safeguard their status as legitimate elites in power. It analyses how Indian nationhood is consistently reshaped and reaffirmed by invoking its secular ethos and practice, as well as the experience of market liberalization. The book calls for serious engagement with political oratory in India. A close reading of speeches since 1991—from Narasimha Rao to Narendra Modi—it captures how, through these crosscutting topics, the prominent ‘authors of the nation’ and the ‘vanguards of the state’, speak India into being.

Problems of Reflection in the System of Education Niklas Luhmann,Karl-Eberhard Schorr,2000 From the perspective of system theory this text traces the way in which the system of education reflects its own unity and its own position in modern society.

Factorial Survey Experiments Katrin Auspurg,Thomas Hinz,2014-11-28 Filling a gap in the literature of the field, Factorial Survey Experiments provides researchers with a practical guide to using the factorial survey method to assess respondents' beliefs about the world, judgment principles, or decision rules through multi-dimensional stimuli ("vignettes") that resemble real-life decision-making situations. Using insightful examples to illustrate their arguments, authors Katrin Auspurg and Thomas Hinz guide researchers through all relevant steps, including how to set up the factorial experimental design (drawing samples of vignettes and respondents), how to handle the practical challenges that must be mastered when an experimental plan with many different treatments is embedded in a survey format, and how to deal with questions of data analysis. In addition to providing the "how-tos" of designing factorial survey experiments, the authors cover recent developments of similar methods, such as conjoint analyses, choice experiments, and more advanced statistical tools.

Holisms of communication James McElvenny ,Andrea Ploder, A central pillar of contemporary communication research is the analysis of filmed interactions between people. The techniques employed in such analysis first took on a recognizably modern form in the 1970s, but their roots go back to the earliest days of motion picture technology in the late nineteenth century. This book presents original essays accompanied by written responses which together create a dialogue exploring early efforts at audio-visual sequence analysis and their common goal to capture the whole of the communicative situation. The first three chapters of this volume look at the film-based research of Gestalt psychologists in Berlin as well as psychologists in the orbit of Karl and Charlotte Bühler in Vienna in the first decades of the twentieth century. Most of these figures - along with many other Central European scholars of this era - were driven into exile in the United States after the rise of National Socialism in the 1930s. This scientific migration led to the cross-pollination of communication studies in America, an outcome visible in the leading project in interaction research of the mid-twentieth century, the Natural History of an Interview. The following two chapters examine this project in its historical context. The volume closes with a critical edition of a treasure from the archives: the transcript of a speech delivered by Ray Birdwhistell, a key participant in the Natural History of an Interview project and founder of kinesics.

Minerals as Advanced Materials II S V Krivovichev,2011-12-01 This book is a collection of papers that are devoted to various aspects of interactions between mineralogy and material sciences. It will include reviews, perspective papers and original research papers on mineral nanostructures, biomineralization, micro- and nanoporous mineral phases as functional

materials, physical and optical properties of minerals, etc. Many important materials that dominate modern technological development were known to mineralogists for hundreds of years, though their properties were not fully recognized. Mineralogy, on the other hand, needs new impacts for the further development in the line of modern scientific achievements such as bio- and nanotechnologies as well as by the understanding of a deep role that information plays in the formation of natural structures and definition of natural processes. It is the idea of this series of books to provide an arena for interdisciplinary discussion on minerals as advanced materials.

Beyond Goffman Stephen H. Riggins, 2011-04-20 *Beyond Goffman: Studies on Communication, Institution, and Social Interaction (Approaches to Semiotics)*.

Rhetoric and Social Relations Jon Abbink, Shauna LaTosky, 2021-02-02 This volume explores the constitutive role of rhetoric in socio-cultural relations, where discursive persuasion is so important, and contains both theoretical chapters as well as fascinating examples of the ambiguities and effects of rhetoric used (un)consciously in social praxis. The elements of power, competition and political persuasion figure prominently. It is an accessible collection of studies, speaking to common issues and problems in social life, and shows the heuristic and often explanatory value of the rhetorical perspective.

Canonical Forms in Prosodic Morphology Laura J. Downing, 2006-05-25 This book considers the interaction of morphological and phonological determinants of linguistic form and the degree to which one determines the other. It considers the operation of canonical forms, the invariant syllabic shapes of morphemes and the defining characteristic of prosodic morphology. Dr Downing presents an original theory which she tests on data from a wide variety of languages. Her book will be of central interest to scholars and advanced students of phonology and morphology, and of linguistic theory more generally.
