In Her Own Words Jennifer Kelly,2013-06-01 This collection of new interviews with twenty-five accomplished female composers substantially advances our knowledge of the work, experiences, compositional approaches, and musical intentions of a diverse group of creative individuals. With personal anecdotes and sometimes surprising intimacy and humor, these wide-ranging conversations represent the diversity of women composing music in the United States from the mid-twentieth century into the twenty-first. The composers work in a variety of genres including classical, jazz, multimedia, or collaborative forms for the stage, film, and video games. Their interviews illuminate questions about the status of women composers in America, the role of women in musical performance and education, the creative process and inspiration, the experiences and qualities that contemporary composers bring to their craft, and balancing creative and personal lives. Candidly sharing their experiences, advice, and views, these vibrant, thoughtful, and creative women open new perspectives on the prospects and

possibilities of making music in a changing world.

Agnes Martin: The Distillation of Color Agnes Martin,2021-09-30 Exploring the evolution of Agnes Martin's sublime use of color This handsomely designed, concise volume celebrates Agnes Martin's pursuit of beauty, happiness and innocence in her nonobjective art created while living in the desert of New Mexico. From her multicolored striped works to compositions of color-washed bands defined by hand-drawn lines, to the deep gray Black Paintings that characterized her work in the late 1980s, Martin's treatment of color in each of these phases is examined. A particular emphasis is placed on the latter half of her career and the broadening vision that developed during her years working in the desert, which crystalized her quest to deepen her understanding of the essence of painting, unattached to emotion or subject, yet radiant and meditative in its pure abstraction. With editorial contributions by a selection of writers whose cross-genre works span art writing, essay and memoir, this book expands an approach to Martin's paintings beyond a purely art historical lens, bringing new voices into the conversations around her career, inviting a rediscovery of her enduring legacy. An essay by author Durga Chew-Bose provides a poetic exploration of color; the writer Olivia Laing (author of *The Lonely City*) discusses the nature of solitude in her text; and Bruce Hainley uses a 1974 essay by Jill Johnston as a jumping-off point to delve into Martin's life during her years in New Mexico.

Shipped Angie Hockman,2021-01-19 'The perfect slice of vacation in book form' ROSIE DANAN Perfect for fans of Christina Lauren and Sally Thorne, escape with *Shipped* - the whipsmart and escapist romantic comedy that celebrates the power of second chances and the magic of new beginnings. 'Witty, romantic, and completely addictive' LAUREN LAYNE 'Shipped is a sweet, sunny getaway of a novel' SARAH HOGLE 'Shipped is exactly what we all need right now: a rollicking rom-com with a conscience' KRISTIN ROCKAWAY Two arch-rivals. One promotion. Can they resist falling for one another in paradise? Marketing manager Henley Evans barely has time for herself, let alone family, friends, or dating. But when she's shortlisted for her dream promotion, the sacrifices finally seem worth it. If only Graeme Crawford-Collins, the remote social media manager/bane of her existence, wasn't also up for the position. Although they've never met in person, their epic email battles are the stuff of office legend. The task: draft a proposal on how to boost bookings in the Galápagos. The catch? They have to go on a company cruise...together. But when they meet on the ship, Henley is shocked to discover that the real Graeme is nothing like she imagined - and the line between loathing and liking is thinner than a postcard. With her career dreams in sight and a growing attraction to the competition, Henley begins questioning her life choices. Because what's the point of working all the time if you never actually live?

The Twelve Monotasks Thatcher Wine,2022-01-06 Neurological research definitively and repeatedly concludes that there is a bottleneck in our cognitive function - when we do more than one thing at a time, we become less efficient and more error-prone. Our systems get overloaded and we crash. In fact, we are actually wired to monotask - to give dedicated focus to one task at a time. Whether you call it multitasking, mindfulness, being present, or any other name, the goal is the same: Give your focus to one thing at a time and do it with your all. When we do things with our full focus, completely tuning our bodies and our brains in to one activity-like reading a book, listening to someone in a conversation, or paying attention to our surroundings while we go for a walk - amazing things can happen. Drawing on research in cognitive science, neuroscience, and mindfulness, The Twelve Monotasks shows that by concentrating on twelve everyday activities and approaching them with a focused mindset, we can rebuild and expand our attention spans. When we focus on what we are doing, where we are and who we are with, we can rediscover our ability to enjoy life, connect with others, and succeed in all that we do. And in the end, it makes us happier, more productive, and more present - in all aspects of our lives.

Turned On Kate Devlin,2018-10-18 'Illuminating, witty and written with a wide open mind' - Sunday Times An exploration of humans, sexuality, interaction and technology through the lens of the sex robot. The idea of the seductive sex robot is the stuff of myth, legend and science fiction. From the myth of Laodamia in Ancient Greece to twenty-first century TV shows such as Westworld, robots in human form have captured our imagination, our hopes and our fears. But beyond the fantasies there are real and fundamental questions about our relationship with technology as it moves into the realm of robotics. Turned On explores how the emerging and future development of sexual companion robots might affect us and the society in which we live. It explores the social changes arising from emerging technologies, and our relationships with the machines that someday may care for us and about us. Sex robots are here, and here to stay, and more are coming. Computer scientist and sex-robot expert Kate Devlin is our guide as we seek to understand how this technology is developing. From robots in Greek myth and the fantastical automata of the Middle Ages through to the sentient machines of the future that

embody the prominent AI debate, she explores the 'modern' robot versus the robot servants we were promised by twentieth century sci-fi, and delves into the psychological effects of the technology, and issues raised around gender politics, diversity, surveillance and violence. This book answers all the questions you've ever had about sex robots, as well as all the ones you haven't yet thought of.
