Marketing Eric N. Berkowitz, 2002 The fifth edition of Marketing is the result of a detailed and rigorous developmental process designed to provide customer value in several ways. First, we continue to use the active-learning approach that has been the foundation of our previous editions. Second, we have incorporated many new examples, tools and design elements that are consistent with the learning styles for today's students. Third, we have added, deleted and modified topics and content based on our own expertise and the advice of many knowledgeable reviewers. An Analysis of the Philippine Retail Structure Timo Priester, 2006-07-17 With over 7,000 islands, the Philippines is the world's largest group of islands. For hundreds of years, the beautiful Southeast Asian archipelago was fairly isolated from its neighbouring as well as western countries. Only since 2000, the Philippines began to open its business markets to foreign investors. In his book, Timo Priester scrutinizes the Philippine retail structure. He offers interesting insights about the organization of Manila's (the country's dominant capital) retail trade. The principal focus is on three different business markets: The Mobile, the Home Appliances and the Audio Visual Market.

Designing a new industry award for service excellence competition in retailing Lars Merle, Tobias Schachner, 2003-10-22 Inhaltsangabe: Abstract: This thesis resolves the need for an industry award for service excellence in

retailing, based on a comprehensive framework to foster management quality. A service excellence framework is developed and the design for a new service excellence award is proposed. The proposed framework is based on the Industrial Excellence Award. In addition to the original four fundamental processes a fifth component is introduced: the customer. To complete the framework, the seven components of management quality known from the IEA are adopted. This framework is the structure for the self-assessment questionnaire that will be the core of the new Best Retailer service excellence award. Through an extensive literature review, success factors and empirically tested items for questionnaires were identified and assigned to the corresponding sections in the questionnaire. The result is a collection of questions that - if appropriately considered by management can help introducing service excellence in the retailing industry. The modus operandi of a possible future award competition is suggested to stay close the example of the IEA in order to leverage the existing brand. This should help to popularize the new award, to create outstanding showcases quickly, and to disseminate excellent management quality in the industry.

Handbook of Research on Strategic Retailing of Private Label Products in a Recovering Economy Gómez-Suárez, Mónica,Martínez-Ruiz, María Pilar,2016-06-20 As the global market continues to recuperate from economic downfall, it is

essential for private label products to find ways to compete with alternatives offered by wholesale and national retailers. In many cases, it becomes difficult for off-brand products to generate market appeal when consumers have preconceived notions about the quality of generic products and loyalty to branded products. The Handbook of Research on Strategic Retailing of Private Label Products in a Recovering Economy emphasizes advertising and promotional approaches being utilized, as well as consumer behavior and satisfaction in response to marketing strategies and the sensitive pricing techniques being implemented to endorse generic and store-brand products available on the market. Highlighting brand competition between wholesalers, retailers, and private brand names following a global economic crisis, this publication is an extensive resource for researchers, graduate-students, economists, and business professionals.

Retail Disruptors Jan-Benedict Steenkamp,Laurens Sloop,2018-10-03 The rise of hard discounters like Aldi and Lidl has been monumental. Explore the very real threat they pose to traditional retailers and brand manufacturers and what you can learn from their growth. Hard discounters are stores that sell a limited selection of consumer-packaged goods and perishables - typically fewer than 2,000 Stock Keeping Units - for prices that are usually 50-60% lower than national brands. The best-known hard discounters are Aldi and Lidl, but global brands include Trader Joe's, EuroSpin, Biedronka, Netto and Leader Price. Their rise has been monumental; they have irrevocably changed the face of retail in Europe and Australia and are making steady inroads into the US. Retail Disruptors is the first book that explores this upheaval, providing expert insight into the business models of the leading hard discounters, and what mainstream retailers and brand manufacturers can do to remain competitive in the face of disruption. Meticulously researched by two of the leading authorities in retail strategy, private labels, branding, and hard discounting, Retail Disruptors is essential reading for all brand manufacturers and retailers who want to retain the competitive edge.

The Science and Art of Branding Giep Franzen, Sandra E. Moriarty, 2015-02-12 This innovative work provides a state-of-the-art overview of current thinking about the development of brand strategy. Unlike other books on branding, it approaches successful brand strategy from both the producer and consumer perspectives. The Science and Art of Branding makes clear distinctions among the producer's intentions, external brand realities, and consumer's brand perceptions - and explains how to fit them all together to build successful brands. Co-author Sandra Moriarty is also the author of the leading Principles of Advertising textbook, and she and Giep Franzen have filled this volume with practical learning tools for scholars and students of marketing and marketing communications, as well as actual brand managers. The book explains theoretical concepts and illustrates them with real-life examples that include case studies and findings from large-scale market research. Every chapter opens with a mini-case history, and boxed inserts featuring quotes from experts appear throughout the book. The Science and Art of Branding also goes much more deeply than other works into the core concept of brand equity, employing new measurement systems only developed over the last few years.
