*The Trouble with Textbooks* Gary A. Tobin, Dennis R. Ybarra, 2008-07-31 School textbooks in Iran, Saudi Arabia, Egypt and elsewhere in the Arab and Muslim worlds are filled with anti-Western and anti-Israel propaganda. Most readers will be shocked to discover that history and geography textbooks widely used in America's elementary and secondary classrooms contain some of the very same inaccuracies about Jews, Judaism, and Israel. Did you know that 'there is no record of any important Jewish contribution to the sciences?' (World Civilizations, Thomson Wadsworth). Or that 'Christianity was started by a young Palestinian named Jesus?' (The World, Scott Foresman/Pearson). Supplemental materials and other classroom influences are even worse. *The Trouble with Textbooks* exposes the poor scholarship and untruths in textbooks about Jews and Israel. The problems uncovered in this ground-breaking analysis are instructive, and illustrate the need for reform in the way textbooks are developed, written, marketed, and distributed. Substitute another area how we teach American history, Western civilization, or comparative religion and we have another, equally intriguing case study. *The Trouble with Textbooks* shows what can go terribly wrong in discussing religion, geography, culture, or history and in this case all of them. *The Trouble with Textbooks* tells a cautionary tale for all readers, whatever their background, of how textbooks that Americans depend on to infuse young people with the values for good citizenship and to help acculturate students into the multicultural salad that is American life, instead disparage some groups and teach historical distortions. With millions of young people using these textbooks each year, the denigration of some should be a concern for all.

Global Discontent: The Mosaic of Cultural Diversity Manouchehr Pedram, Ph.D, 2017-01-18 There are more similarities between the 7 billion people worldwide than there are differences, and global harmony, instead of widespread conflict, is possible. The global mosaic of our lives: lifestyle, culture, nationality, race, religion, gender, gender identity, ability, sexual orientation, socioeconomic level, and belief system are all tiles that can fit together to form a colorful and harmonious

cultural mosaic. In *Global Discontent: The Mosaic of Cultural Diversity*, Dr. Pedram provides us with a user-friendly philosophical, historical, and sociological guide to many of the issues facing the world today, and to possible resolutions toward an ideal world. This work is an expression of Dr. Pedram's dream: that in the twenty-first century humanity in every corner of the globe will put conflict, war, hostility, and global discord behind them and, in their place, work to create a cooperative and peaceful global community, with global governance for the common good.

*Why Church History Matters* Robert F. Rea, 2014-06-05 Does it matter how Christians in other times and places thought? For many contemporary Christians, questions about the role and value of church history can be difficult to tackle. Veteran teacher Bob Rea addresses these barriers, skillfully explaining not only why church history matters, but the difference it makes for life and ministry.

*In Church as It Is in Heaven* Jamaal E. Williams, Timothy Paul Jones, 2023-06-13 Heaven is multiethnic, a vast multitude from every nation, tribe, people, and language. But in this diverse community shouldn't have to wait until eternity to begin! It can be a reality now. Here, the authors give biblical warrant for such a community and show how multiethnic churches provide a unique apologetic for the gospel.

*Nature in the Global South* Anna Lowenhaupt Tsing, 2003 A nuanced look at how nature has been culturally constructed in South and Southeast Asia, *Nature in the Global South* is a major contribution to the understandings of the politics and ideologies of environment and development in a postcolonial epoch. The essays in this volume examine how the tropics, the jungle, tribes, and peasants are understood and transformed; how shifts in colonial ideas about the landscape led to the extremely deleterious changes in rural well-being; and how uneasy environmental compromises are forged in the present among the rural, urban, and global allies.

Oxford IB Diploma Programme: English B Course Companion Kawther Saa'd Aldin, Tiia Tempakka, Jeehan Abu Awad, Kevin Morley, 2013-03-21 Incorporating a wide range of texts from all over the world, this text covers all the main core topics plus the options to fully address the requirements for English B at both Standard and Higher Level. **Asia's Cultural Mosaic** Grant Evans,1993 This volume provides a comprehensive introduction to Asia -- from an anthropological point of view.

**The Culture Map** Erin Meyer,2014-05-27 An international business expert helps you understand and navigate cultural differences in this insightful and practical guide, perfect for both your work and personal life. Americans precede anything negative with three nice comments; French, Dutch, Israelis, and Germans get straight to the point; Latin Americans and Asians are steeped in hierarchy; Scandinavians think the best boss is just one of the crowd. It's no surprise that when they try and talk to each other, chaos breaks out. In *The Culture Map*, INSEAD professor Erin Meyer is your guide through this subtle, sometimes treacherous terrain in which people from starkly different backgrounds are expected to work harmoniously together. She provides a field-tested model for decoding how cultural differences impact international business, and combines a smart analytical framework with practical, actionable advice.

*Free Trade and Cultural Diversity in International Law* Jingxia Shi,2013-04-30 This book attempts to reconcile the concept of free trade with a key non-trade social value - cultural diversity - in an era of economic globalisation. It first shows how we can look at culture in many different ways, and explains why we should care about cultural diversity. The book then examines the challenges that policymakers are faced with in formulating cultural measures in the new media environment, and analyses UNESCO's theories and approaches to cultural diversity. This is followed by a comprehensive examination of the treatment of 'culture' in global and regional trade agreements, including the framework of the GATT/WTO system, the WTO's judicial practice involving cultural products, and the treatment of culture under the EC/EU and NAFTA. This identifies the challenges trade norms encounter in dealing with cultural products. The author seeks to formulate a balanced view of the challenge of protecting and promoting cultural diversity while also recognising the important goal of trade liberalisation. To this end Professor Shi proposes a dual method through which the norms found in WTO agreements and in UNESCO cultural instruments may be brought into alignment: the first highlighting the compatibility of cultural policy measures with trade obligations on a domestic level, the second suggesting potential linkages between the WTO rules and the UNESCO Convention from the perspectives of treaty interpretation.

*The Making of Anthropology* Jacob Pandian,Susan Parman,2004 This book offers an interpretation of anthropology as a discourse that contrasts the western self and the non-western other and shows that the organizing principle of this discourse was the Judeo-Christian episteme of the Other in Us that the Christian Church Fathers developed to define why the pagan

others were endowed with negative, ungodly attributes of humanity. It is pointed out that the anthropological application of this episteme to represent and explain the colonized non-western others resulted in the emergence of eurocentric, hierarchical models of humanity, and that although these models of humanity were largely replaced by pluralistic models in the late 20 century, anthropology has continued to be linked with the episteme of the other in us--Dust jacket.

**Stories from Global Lutheranism** Martin J. Lohrmann, 2021-01-12 In an engaging and accessible style, Martin J. Lohrmann introduces readers to fascinating glimpses of faith, courage, and love in action within the global Lutheran community that now numbers over 70 million members in churches worldwide. He shows how Lutheranism is a much more diverse and global expression of the Christian tradition than most realize. This matches the expansive view of the church universal that the Reformers held when they presented the Augsburg Confession in 1530. As Philipp Melancthon put it, the church consists of people scattered throughout the entire world who agree on the gospel and have the same Christ, the same Holy Spirit, and the same sacraments, whether or not they have the same human traditions. Although Lutheranism first grew and spread in central and northern Europe, some of the most vibrant Lutheran communities are now in Africa and Asia. There are more Lutherans in Tanzania than in Sweden, and more Lutherans in Indonesia than in Norway. The single largest Lutheran church body in the world is the Ethiopian Evangelical Church Mekane Yesus, with over 8 million members and a focus on caring for the whole person. Outside of Europe, Namibia is the only country with a majority Lutheran population. Lutheran members of the global body of Christ have much to learn from and share with one another. The book largely follows the subjects listed in the Timeline of Global Lutheranism that Lohrmann created for Lutheran Quarterly Journal to commemorate the 500-year anniversary of the Protestant Reformation.

**Cognitive Justice in a Global World** Boaventura de Sousa Santos, 2007-10-23 Cognitive Justice in a Global World: Prudent Knowledges for a Decent Life is an edited collection that springs from the now dormant debates known as 'The Science Wars,' which questioned the nature of scientific theories. Learning from the debates about the plurality of truths and opinions, editor Boaventura de Sousa Santos has realized an opportunity for strengthening the relations between the natural and social sciences with more epistemological affinities and for opening up new transnational dialogues between scientists and other producers of knowledge. This book analyses in detail some of the topics that amount to a set of problematic relations between science and ethics; between objectivity and neutrality; between the sociological and theoretical condition of production and the limits of scientific rigor; between public faith in science and the economic powers that determine scientific priorities; and between science and other kinds of knowledge existing in society. Maintaining that global social injustice is by and large epistemological injustice and that there can be no global social justice without global cognitive justice, Cognitive Justice in a Global World is an important collection for higher-level students and researchers in the social sciences, philosophy of science, and intellectual history.
