The Ocean and Cryosphere in a Changing Climate Intergovernmental Panel on Climate Change (IPCC),2022-05-19 The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.

**Volcanoes** John P. Lockwood,Richard W. Hazlett,2013-04-26 Volcanoes are essential elements in the delicate global balance of elemental forces that govern both the dynamic evolution of the Earth and the nature of Life itself. Without volcanic activity, life as we know it would not exist on our planet. Although beautiful to behold, volcanoes are also potentially destructive, and understanding their nature is critical to prevent major loss of life in the future. Richly illustrated with over 300 original color photographs and diagrams the book is written in an informal manner, with minimum use of jargon, and relies heavily on first-person, eye-witness accounts of eruptive activity at both red (effusive) and grey (explosive) volcanoes to illustrate the full spectrum of volcanic processes and their products. Decades of teaching in university classrooms and fieldwork on active volcanoes throughout the world have provided the authors with unique experiences that they have distilled into a highly readable textbook of lasting value. Questions for Thought, Study, and Discussion, Suggestions for Further Reading, and a comprehensive list of source references make this work a major resource for further study of

volcanology. Volcanoes maintains three core foci: Global perspectives explain volcanoes in terms of their tectonic positions on Earth and their roles in earth history Environmental perspectives describe the essential role of volcanism in the moderation of terrestrial climate and atmosphere Humanitarian perspectives discuss the major influences of volcanoes on human societies. This latter is especially important as resource scarcities and environmental issues loom over our world, and as increasing numbers of people are threatened by volcanic hazards Readership Volcanologists, advanced undergraduate, and graduate students in earth science and related degree courses, and volcano enthusiasts worldwide. **Polymer Physics** U.W. Gedde,2013-12-11 This book is the result of my teaching efforts during the last ten years at the Royal Institute of Technology. The purpose is to present the subject of polymer physics for undergraduate and graduate students, to focus the fundamental aspects of the subject and to show the link between experiments and theory. The intention is not to present a compilation of the currently available literature on the subject. Very few reference citations have thus been made. Each chapter has essentially the same structure: starting with an introduction, continuing with the actual subject, summarizing the chapter in 300-500 words, and finally presenting problems and a list of relevant references for the reader. The solutions to the problems presented in Chapters 1-12 are given in Chapter 13. The theme of the book is essentially polymer science, with the exclusion of that part dealing directly with chemical reactions. The fundamentals in polymer science, including some basic polymer chemistry, are presented as an introduction in the first chapter. The next eight chapters deal with different phenomena (processes) and states of polymers. The last three chapters were written with the intention of making the reader think practically about polymer physics. How can a certain type of problem be solved? What kinds of experiment should be conducted? This book would never have been written without the help of my friend and adviser, Dr Anthony Bristow, who has spent many hours reading through the manuscript. criticizing the content.

**There Ain't No Black in the Union Jack** Paul Gilroy,2013-10-18 This classic book is a powerful indictment of contemporary attitudes to race. By accusing British intellectuals and politicians on both sides of the political divide of

refusing to take race seriously, Paul Gilroy caused immediate uproar when this book was first published in 1987. A brilliant and explosive exploration of racial discourses, *There Ain't No Black in the Union Jack* provided a powerful new direction for race relations in Britain. Still dynamite today and as relevant as ever, this Routledge Classics edition includes a new introduction by the author.

**Heritage Politics in Adelaide** Sharon Mosler, Sharon Ann Mosler, 2011 In the 1970s the Australian Commonwealth Government and three States, Victoria (1974), New South Wales (1977) and South Australia (1978), passed legislation to protect the built heritage within their jurisdictions. The legislation was primarily a response to two factors: a large number of public protests against the demolition of historic buildings in all Australian states by the 1970s and the influence of the UNESCO World Heritage Convention, which the Whitlam Government (1972-75) embraced enthusiastically. The other states, with governments that were more influenced by development interests, were slow to follow the federal lead. In this study, Sharon Mosler examines heritage issues and conflicts in Adelaide from enactment of the first South Australian Heritage Act in 1978 to its successor in 1993, and also analyses issues leading from that period into the twenty-first century. State legislation introduced by the Labor government of Premier Mike Rann (2002 - present) has affected the built environment significantly since this book began. The Rann government has given the built heritage a low priority in its strategic plan compared to population growth, while the Adelaide City Council has become more balanced in the past decade, although the council too has focussed on increasing Adelaide's population. The result has been more high-rise buildings at the expense of heritage conservation and historic precincts.
