Welfare Effects of Trade Restrictions Michael Szenberg, John W. Lombardi, Eric Y. Lee, 2014-05-10 Welfare Effects of Trade Restrictions: A Case Study of the U.S. Footwear Industry evaluates and analyzes the welfare effects of removing trade restrictions on United States imports of nonrubber footwear through the product and employment markets. This book focuses on the structural characteristics of the industry and its adjustment experience to import competition. Organized into four chapters, this book begins with an overview of the detailed structural characteristics of the domestic footwear industry and its degree of competition. This text then provides the analytical framework for estimating the welfare effects of removing trade restrictions on imported footwear by using a consumer surplus approach. Other chapters consider the essential parameters needed in evaluating the foregoing effects of import restrictions on the domestic industry. This book discusses as well the impact of tariff restrictions on imported footwear. The final chapter deals with the trade adjustment assistance experience of the footwear industry. This book is a valuable resource for economists.

The Worldly Philosophers Robert L. Heilbroner, 2011-01-11 The bestselling classic that examines the history of economic thought from Adam Smith to Karl Marx—“all the economic lore most general readers conceivably could want to know, served up with a flourish” (The New York Times). The Worldly Philosophers not only enables us to see more deeply into our history but helps us better understand our own times. In this seventh edition, Robert L. Heilbroner provides a new theme that connects thinkers as diverse as Adam Smith and Karl Marx. The theme is the common focus of their highly varied ideas—namely, the search to understand how a capitalist society works. It is a focus never more needed than in this age of confusing economic headlines. In a bold new concluding chapter entitled “The End of the Worldly Philosophy?” Heilbroner reminds us that the word “end” refers to both the purpose and limits of economics. This chapter conveys a concern that today’s increasingly “scientific” economics may overlook fundamental social and political issues that are central to economics. Thus, unlike its predecessors, this new edition provides not just an indispensable illumination of our past but a call to action for our future.

Journey of Hope and Despair ,2010-03-18 These two volumes chronicle the life of a liberal Jew who came of age in Germany during the relatively enlightened period of the late 19th and early 20th centuries. Rudolf Moos obtained his education in Ulm and, after working in his familys leather business, went in hope to seek his fortune in Berlin. He founded Salamander, the largest shoe business in Germany, which is still active today. He was a German patriot, who served his country in World War I and received a War Merit Cross (Kriegsverdienstkreuz) for his endeavors. Rudolf Moos lived in Germany in growing despair through the political upheaval and hyperinflation in the aftermath of World War I. He was related to and enjoyed a friendship with Albert Einstein when they both lived in Berlin in the 1920s and early 1930s. Rudolf Moos then experienced the rise of the Nazis and the ever-growing restrictions placed on him and members of his extended family. Anti-Jewish sentiment in Germany rose sharply during 1933, which effectively ended his active life in business and community affairs and give him unsought free time to set out the story of his life. He and his wife were eventually permitted to leave Germany and immigrate to England, where he continued to work on his memoirs during the turmoil of World War II. Volume I of Rudolf Moos memoirs, Rise and Fall, describes the poisoned atmosphere existing for the Jews in the Germany of the late 1930s, sets out his experiences of humiliation and arrest, the breath of freedom on leaving his Homeland, and his arrival in England as a penniless alien. Chapter 1 focuses on Rudolf Moos origins and his fathers family and leather manufacturing company, which initiated trade with East India in the 1880s. It describes the background of Rudolf Moos mother, who was a member of the Einstein family, and provides details about the lives of Rafael and Rupert Einstein, her father and grandfather.
