A Network Approach in Strategic Management: Emerging Trends and Research Concepts Beata Barczak, Tomasz Kafel, Pierpaolo Magliocca, 2021

PURPOSE: The analysis of the literature shows that the attempts to conceptualize the strategic aspects of the network bring a significant impact on the development of research on organizational networks. This article aims to analyze the new trends in strategic management, and in particular on the possibility of exploring the network approach in strategic management, through the existing literature and the presentation of the new contributions of the following articles published in the current issue.

METHODOLOGY: The article is descriptive in character; thus it is based on a literature review and its constructive critics. A narrative literature review was used to present the main assumptions and features of the network approach in strategic management, along with an indication of emerging trends and new directions. Also the identification of theoretical foundations for understanding the processes of strategic change in inter-organizational networks and the proposition of the way to understand network strategy were presented.

FINDINGS: The research included in this issue shows that from a network perspective, business strategy plays an important role in guiding the development of individual relationships and networks. Exploring the network approach in strategic management allows one to adopt the category of network strategy, which can be described through the coexistence of cooperation and competition.

IMPLICATIONS FOR THEORY AND PRACTICE: Considerations lead to the conclusion that the business strategy must be expressed in terms of potential changes in the network in which the company operates, taking into account its current and selected position in the network. Despite the fact that the current state of research on organizational networks in the theory of strategic management shows that this approach is already quite well established, on the basis of the analysis of research results concerning the conceptualization of strategic aspects of the network, the existing problems and limitations were identified.

ORIGINALITY AND VALUE: The main problems related to the exploration of the network approach and the resulting consequences for the definition of the network strategy were indicated. Also, the combination of an organizational and economic approach with the logic of competitive advantage and relational annuity. The demonstration that the network perspective in strategic management allows for a more complete understanding of the strategic behavior of modern enterprises.

Constructing Languages Francesc Feliu, Josep Maria Nadal, 2016-08-25 As language historians we believe that the subject of our study is neither natural languages nor idiolects which speakers have always been able to develop individually (loosely what Chomsky calls L-i), but rather the social constructions of reference shared by all speakers (basically what Chomsky terms as L-e). In this context the language historian essentially studies how a public L-e is built such that it can be understood as the language of all (i.e. hiding L-i variations) and also how L-e succeed in replacing the primary reality of idiolects, even if only in the imagination. Writing represents a crucial turning point in language construction, because it made it possible to materialize the abstraction that, until then, related speakers could only guess and besides it comes into competition with individual languages. In modern centuries, the provision of grammars, dictionaries and other such learning tools and systematizing instruments strengthens the idea that, because of their normative character, languages can be learned through study. Mythical stories encourage the achievement of prescriptive rules and lead speakers to link emotions to their language. Therefore, the topics of reflection that we want to discuss in this volume are: Norms, Myths and Emotions related to language construction.

A Political History of Spanish José Del Valle, 2013-08-29 A comprehensive work which offers a new and provocative approach to Spanish from political and historical perspectives.

Sociolinguistic Variation in Seventeenth-Century France Wendy Ayres-Bennett, 2004-10-14 This book provides a systematic study of sociolinguistic variation in seventeenth-century France. Drawing on a range of case studies, Wendy Ayres-Bennett makes available data about linguistic variation in this period, showing the wealth and variety of language usage at a time that is considered to be the most 'standardising' in the history of French. Variation is analysed in terms of the speaker's 'pre-verbal constitution' - such as gender, age and socio-economic status - or by the medium, register or genre

used. As well as examining linguistic variation itself, the book also considers the fundamental methodological issues that are central to all socio-historical linguistic accounts and, more importantly, addresses the question of what the appropriate sources are for linguists taking a socio-historical approach. In each chapter, the case studies present a range of phonological, morphological, syntactic and lexical issues, which pose different methodological questions for sociolinguists and historical linguists alike.

A History of the French Language Through Texts Wendy Ayres-Bennett, 2005-06-27 This new history of the French language allows the reader to see how the language has evolved for themselves. It combines texts and extracts with a readable and detailed commentary allowing the language to be viewed both synchronically and diachronically. Core texts range from the ninth century to the present day highlight central features of the language, whilst a range of shorter texts illustrate particular points. The inclusion of non-literary, as well as literary texts serves to illustrate some of the many varieties of French whether in legal, scientific, epistolary, administrative or liturgical or in more popular domains, including attempts to represent spoken usage. This is essential reading for the undergraduate student of French.
