From the mind of Warren Ellis, the creator of *TRANSMETROPOLITAN* and *PLANETARY*, comes the most horrifying superhero graphic novel you will ever read! What if the arms race of global superpowers did not yield nuclear stockpiles, but rather messianic beings capable of wondrous miracles and - when needed - the ability to unleash the wrath of gods? But the scientists, generals, and politicians built super-humans to save the planet, no one ever imagined how their heroes would do it - or even if they'd want to. Behold the apocalyptic tomorrow, when supermen kill us all and end the world just because we wanted to be rescued by human-shaped things from beyond Science itself!

The Art of Immersion: How the Digital Generation Is Remaking Hollywood, Madison Avenue, and the Way We Tell Stories Frank Rose, 2011-02-28 A broad and deep look at how electronic media are changing storytelling... Completely fascinating. —Booklist, starred review Not long ago we were spectators, passive consumers of mass media. Now, on YouTube and blogs and Facebook and Twitter, we are media. No longer content in our traditional role as couch potatoes, we approach television shows, movies, even advertising as invitations to participate—as experiences to immerse ourselves in at will. Frank Rose introduces us to the people who are reshaping media for a two-way world, changing how we play, how we communicate, and how we think.

Creating Church Online Tim Hutchings, 2017-04-21 Online churches are internet-based Christian communities, pursuing worship, discussion, friendship, support, proselytization, and other key religious goals through computer-mediated communication. Hundreds of thousands of people are now involved with online congregations, generating new kinds of ritual, leadership, and community and new networks of global influence. *Creating Church Online* constructs a rich ethnographic account of the diverse cultures of online churches, from virtual worlds to video streams. This book also outlines the history of online churchgoing, from its origins in the 1980s to the present day, and traces the major themes of academic and Christian debate around this topic. Applying some of the leading current theories in the study of religion, media and culture to this data, Tim Hutchings proposes a new model of religious design in contexts of mediatization, and draws attention to digital networks, transformative third spaces and terrains of existential vulnerability. *Creating Church Online* advances our

understanding of the significance and impact of digital media in the religious and social lives of its users, in search of new theoretical frameworks for digital religion.

The World Republic of Letters Pascale Casanova, 2004 The world of letters has always seemed a matter more of metaphor than of global reality. In this book, Pascale Casanova shows us the state of world literature behind the stylistic refinements--a world of letters relatively independent from economic and political realms, and in which language systems, aesthetic orders, and genres struggle for dominance. Rejecting facile talk of globalization, with its suggestion of a happy literary melting pot, Casanova exposes an emerging regime of inequality in the world of letters, where minor languages and literatures are subject to the invisible but implacable violence of their dominant counterparts. Inspired by the writings of Fernand Braudel and Pierre Bourdieu, this ambitious book develops the first systematic model for understanding the production, circulation, and valuing of literature worldwide. Casanova proposes a baseline from which we might measure the newness and modernity of the world of letters--the literary equivalent of the meridian at Greenwich. She argues for the importance of literary capital and its role in giving value and legitimacy to nations in their incessant struggle for international power. Within her overarching theory, Casanova locates three main periods in the genesis of world literature--Latin, French, and German--and closely examines three towering figures in the world republic of letters--Kafka, Joyce, and Faulkner. Her work provides a rich and surprising view of the political struggles of our modern world--one framed by sites of publication, circulation, translation,

and efforts at literary annexation.

World Literature, Cosmopolitanism, Globality Gesine Müller, Mariano Siskind, 2019-10-21 From today's vantage point it can be denied that the confidence in the abilities of globalism, mobility, and cosmopolitanism to illuminate cultural signification processes of our time has been severely shaken. In the face of this crisis, a key concept of this globalizing optimism as World Literature has been for the past twenty years necessarily is in the need of a comprehensive revision. *World Literature, Cosmopolitanism, Globality: Beyond, Against, Post, Otherwise* offers a wide range of contributions approaching the blind spots of the globally oriented Humanities for phenomena that in one way or another have gone beyond the discourses, aesthetics, and political positions of liberal cosmopolitanism and neoliberal globalization. Departing basically (but not exclusively) from different examples of Latin American literatures and cultures in globalized contexts, this volume provides innovative insights into critical readings of World Literature and its related conceptualizations. A timely book that embraces highly innovative perspectives, it will be a mustread for all scholars involved in the field of the global dimensions of literature.

For the Win Kevin Werbach, Dan Hunter, 2012 Millions play Farmville, Scrabble, and countless other games, generating billions in sales each year. The careful and skillful construction of these games is built on decades of research into human motivation and psychology: A well-designed game goes right to the motivational heart of the human psyche. In *For the Win*, Kevin Werbach and Dan Hunter argue persuasively that game-makers need not be the only ones benefiting from game design. Werbach and Hunter, lawyers and World of Warcraft players, created the world's first course on gamification at the Wharton School. In their book, they reveal how game thinking--addressing problems like a game designer--can motivate employees and customers and create engaging experiences that can transform your business. *For the Win* reveals how a wide range of companies are successfully using game thinking. It also offers an explanation of when gamifying makes the most sense and a 6-step framework for using games for marketing, productivity enhancement, innovation, employee motivation, customer engagement, and more.
