**Alongside Community** Debra A. Harkins, 2018 Alongside Community is a step-by-step guide that prepares social science students to be democratic citizens by examining the theory, method, and sociopolitical dynamics that impact helping those different from oneself. The first part of this book explores the more theoretical issues of helping others, including issues of social identity, values, and power. The second part of this guidebook examines action-based methods; interventions available for community-based engagement; and the sociopolitical issues that inevitably arise for those who strive to create social change including issues of race, ethnicity, social class, gender, sexual orientation, mental health, educational and environmental justice along with suggestions on how to address these issues. The third part of Alongside Community critically explores how to measure the impact of community service on major stakeholders including student, faculty, college and community agency and ends with reflections and suggestions on how to be a lifelong civically engaged citizen.

Language and Intercultural Communication in the New Era Farzad Sharifian, Maryam Jamarani, 2013 Studies of intercultural communication in applied linguistics initially focused on miscommunication, mainly between native and non-native speakers of English. The advent of the twenty-first century has witnessed, however, a revolution in the contexts and contents of intercultural communication; technological advances such as chat rooms, emails, personal weblogs, Facebook, Twitter, mobile text messaging on the one hand, and the accelerated pace of people's international mobility on the other have given a new meaning to the term 'intercultural communication'. Given the remarkable growth in the prevalence of intercultural communication among people from many cultural backgrounds, and across many contexts and channels, conceptual divides such as 'native/non-native' are now almost irrelevant. This has caused the power attached to English and

native speaker-like English to lose much of its automatic domination. Such developments have provided new opportunities, as well as challenges, for the study of intercultural communication and its increasingly complex nature. This book showcases recent studies in the field in a multitude of contexts to enable a collective effort towards advancements in the area.

**Grammars in Contact** Alexandra Y. Aikhenvald, R. M. W. Dixon, 2007-01-04 Languages can be similar in many ways - they can resemble each other in categories, constructions and meanings, and in the actual forms used to express these. A shared feature may be based on common genetic origin, or result from geographic proximity and borrowing. Some aspects of grammar are spread more readily than others. The question is - which are they? When languages are in contact with each other, what changes do we expect to occur in their grammatical structures? Only an inductively based cross-linguistic examination can provide an answer. This is what this volume is about. The book starts with a typological introduction outlining principles of contact-induced change and factors which facilitate diffusion of linguistic traits. It is followed by twelve studies of contact-induced changes in languages from Amazonia, East and West Africa, Australia, East Timor, and the Sinitic domain. Set alongside these are studies of Pennsylvania German spoken by Mennonites in Canada in contact with English, Basque in contact with Romance languages in Spain and France, and language contact in the Balkans. All the studies are based on intensive fieldwork, and each cast in terms of the typological parameters set out in the introduction. The

book includes a glossary to facilitate its use by graduates and advanced undergraduates in linguistics and in disciplines such as anthropology.
