Masonry Construction in Active Seismic Regions Rajesh Rupakhety, Dipendra Gautam, 2021-05-12 During earthquakes, masonry buildings are the most affected, and consequently, damage to these buildings leads to massive loss of life and property. Masonry buildings comprise probably the greatest share of overall housing stock, and in turn, understanding their performance during earthquakes is a pivotal problem in seismic regions. *Masonry Construction in Active Seismic Regions* presents details on the kinds of masonry building found in seismic regions of the world. The title describes interventions, such as retrofitted solutions, dynamic identification, and improved construction after earthquakes, that are equally applicable to regions of moderate and high seismicity. The book covers representative masonry buildings from active seismic regions, the material properties of masonry construction, numerical modelling techniques and computational advances, seismic performance of non-engineered masonry buildings, resilience in typical construction, retrofitting, and the cultural values and structural characterization of heritage masonry buildings in active seismic regions. This book is unique in its global and systematic coverage of masonry construction in seismic regions. - Identifies the material properties of masonry construction from a seismic perspective - Covers representative masonry buildings from active seismic regions, providing a benchmark to understand existing building stocks - Provides numerical modelling techniques and reviews computational advances, including a large test database - Details the seismic performance of non-engineered masonry buildings, as well as the cultural values and structural characterisation of heritage masonry constructions - Analyses typical or vernacular constructions which have earthquake resilient features, such as Dhajji-Dewari, Borbone, Pombalino, and Himis

The Spanish American Reader Ernesto Nelson, 1916

The Early Mesoamerican Village Kent V Flannery, 2019-10-28 One of the classic works of archaeology, *The Early Mesoamerican Village* was among the first studies to fully embrace the processual movement of the 1970s. Dancing around an ongoing dialogue on methods and goals between the Real Mesoamerican Archaeologist, the Great Synthesizer, and the Skeptical Graduate Student, it is both a seminal tract on scientific method in archaeology and a series of studies on formative

Mesoamerica. It critically evaluates techniques for excavation, sampling of sites and regions, and stylistic analysis, as well as such theoretical factors of explanation as population pressure, trade, and religion and launched similar studies for several later generations of archaeologists. A new Foreword by Jeremy Sabloff is featured in this edition.

Spectacular Rubens Alejandro Vergara, Anne T. Woollett, 2014-10-14 The six glorious scenes that make up the Triumph of the Eucharist series by Peter Paul Rubens (1577-1640) are highlights of the Museo Nacional del Prado's superb collection of Flemish paintings. Completed in 1626, these brilliantly detailed sketches were painted at the behest of the Infanta Isabel Clara Eugenia in preparation for a series of monumental tapestries that are now considered among the finest made in Europe in the seventeenth century. Unfortunately, additions to the wooden supports, introduced after the paintings were created, made the panels considerably larger than Rubens intended and over time caused serious damage to the original sections. With the aid of the Getty Foundation's Panel Paintings Initiative, the panels have been restored and returned to their original dimensions by the Prado, and the magnificent oil sketches can once again be placed on public view. This lushly illustrated and illuminating volume provides new insight into the history of the Eucharist series of paintings and tapestries and attests to Rubens's exhilarating art. *Spectacular Rubens* is published on the occasion of an exhibition of the paintings, on view at the Museo Nacional del Prado from March 25 through June 29, 2014, and at the J. Paul Getty Museum from October 14, 2014, through January 4, 2015.

Survival and Sustainability Hüseyin Gökçekus, Umut Türker, James W. LaMoreaux, 2011-03-23 The International Conference on Environment: Survival and Sustainability, held at the Near East University, Nicosia, Northern Cyprus 19-24 February 2007, dealt with environmental threats and proposed solutions at all scales. The 21 themes addressed by the conference fell into four broad categories; Threats to Survival and Sustainability; Technological Advances towards Survival and Sustainability; Activities and Tools for Social Change; Defining Goals for Sustainable Societies. Activities and tools that move the society towards greater sustainability were emphasized at the conference. These included environmental law and ethics, environmental knowledge, technology and information systems, media, environmental awareness, education and lifelong learning, the use of literature for environmental awareness, the green factor in politics, international relations and environmental organizations. The breadth of the issues addressed at the conference made clear the need for greatly increased interdisciplinary and international collaboration the survival and sustainability concept. The exchanges at the conference represent a step in this direction.

Human Casualties in Earthquakes Robin Spence, Emily So, Charles Scawthorn, 2011-01-03 Assessment of human casualties in earthquakes has become a topic of vital importance for national and urban authorities responsible for emergency provision, for the development of mitigation strategies and for the development of adequate insurance schemes. In the last few years important work has been carried out on a number of recent events (including earthquakes in Kocaeli,

Turkey 1999, Niigata Japan, 2004, Sichuan, China 2008 and L'Aquila, Italy 2009). These events have created new and detailed casualty data, which has not until now been properly assembled and evaluated. This book draws the new evidence from recent events together with existing knowledge. It summarises current trends in the understanding of the factors influencing the numbers and types of casualties in earthquakes; it offers methods to incorporate this understanding into the estimation of losses in future events in different parts of the world; it discusses ways in which pre-event mitigation activity and post-event emergency management can reduce the toll of casualties in future events; and it identifies future research needs.

Between Two Earthquakes Sir Bernard M. Feilden, 1987-10-01 This handbook addresses three areas of concern for the museum administrator concerning the protection of historic buildings, monuments, and archaeological sites located in seismic areas. It proposes pre-disaster measures such as taking accurate and complete documentation (photogrammetry is discussed in one of the 13 appendixes), risk awareness, planning, maintenance and inspections, etc. Second, when an earthquake strikes, the immediate emergency steps necessary to protect life and property are indicated; and after the earthquake, the strengthening of valuable cultural property (based on the Modified Mercalli Intensity Scale, also in an appendix) should be included in the general program of prevention maintenance along with the repairs discussed in detail applicable to each architectural element, and to the site as a whole.

Empire and Domestic Economy Terence N. D'Altroy, Christine A. Hastorf, 2005-12-27 The Upper Mantaro Archaeological Research Project is a benchmark for a new level of quality in Andean archaeological research. This volume continues to develop UMAP approaches to understanding prehistoric Andean economy and polity. --

Vernacular and Earthen Architecture: Conservation and Sustainability Camilla Mileto, Fernando Vegas López-Manzanares, Lidia García-Soriano, Valentina Cristini, 2017-09-01 Vernacular architecture in general and earthen architecture in particular, with their rich variety of forms worldwide, are custodians of the material culture and identity of the peoples who built them. In addition, they are widely recognized as ancestral examples of sustainability in all their variants and interpretations, and the architecture of the present ought to learn from these when designing the sustainable architecture of the future. The conservation of these architectures - seemingly simple yet full of wisdom - is to be undertaken now given their intrinsic value and their status as genuine examples of sustainability to be learnt from and interpreted in contemporary architecture. Vernacular and earthen architecture: Conservation and Sustainability will be a valuable source of information for academics and professionals in the fields of Environmental Science, Civil Engineering, Construction and Building Engineering and Architecture.

Display of Art in the Roman Palace, 1550-1750 Gail Feigenbaum, 2014-08-01 This book explores the principles of the display of art in the magnificent Roman palaces of the early modern period, focusing attention on how the parts function to convey multiple artistic, social, and political messages, all within a splendid environment that provided a model for aristocratic residences throughout Europe. Many of the objects exhibited in museums today once graced the interior of a Roman Baroque palazzo or a setting inspired by one. In fact, the very convention of a paintings gallery— the mainstay of museums—traces its ancestry to prototypes in the palaces of Rome. Inside Roman palaces, the display of art was calibrated to an increasingly accentuated dynamism of social and official life, activated by the moving bodies and the attention of residents and visitors. Display unfolded in space in a purposeful narrative that reflected rank, honor, privilege, and intimacy. With a contextual approach that encompasses the full range of media, from textiles to stucco, this study traces the influential emerging concept of a unified interior. It argues that art history—even the emergence of the modern category of fine art—was worked out as much in the rooms of palaces as in the printed pages of Vasari and other early writers on art.

The Huarochiri Manuscript Frank Salomon, 2010-07-05 One of the great repositories of a people's world view and religious beliefs, the Huarochirí Manuscript may bear comparison with such civilization-defining works as Gilgamesh, the Popul Vuh, and the Sagas. This translation by Frank Salomon and George L. Urioste marks the first time the Huarochirí Manuscript has been translated into English, making it available to English-speaking students of Andean culture and world mythology and religions. The Huarochirí Manuscript holds a summation of native Andean religious tradition and an image of the superhuman and human world as imagined around A.D. 1600. The tellers were provincial Indians dwelling on the west Andean slopes near Lima, Peru, aware of the Incas but rooted in peasant, rather than imperial, culture. The manuscript is thought to have been compiled at the behest of Father Francisco de Avila, the notorious extirpator of idolatries. Yet it expresses Andean religious ideas largely from within Andean categories of thought, making it an unparalleled source for the prehispanic and early colonial myths, ritual practices, and historic self-image of the native Andeans. Prepared especially for the general reader, this edition of the Huarochirí Manuscript contains an introduction, index, and notes designed to help the novice understand the culture and history of the Huarochirí-area society. For the benefit of specialist readers, the Quechua text is also supplied.

Le Corbusier William J. R. Curtis, 1986

Benefactives and Malefactives Fernando Zúñiga, Seppo Kittilä, 2010-04-14 Benefactives are constructions used to express that a state of affairs holds to someone's advantage. The same construction sometimes also serves as a malefactive, whose meanings are generally not a simple mirror image of the benefactive. Benefactive constructions cover a wide range of phenomena: malefactive passives, general and specialized benefactive cases and adpositions, serial verb constructions and

converbal constructions (including e.g. verbs of giving and taking), benefactive applicatives, and other morphosyntactic strategies. The present book is the first collection of its kind to be published on this topic. It includes both typological surveys and in-depth descriptive studies, exploring both the morphosyntactic properties and the semantic nuances of phenomena ranging from the familiar English double-object construction and the Japanese adversative passive to comparable phenomena found in lesser-known languages of Africa, Asia, and the Americas. The book will appeal to typologists and linguists interested in linguistic diversity and it will also be a useful reference work for linguists working on language description.

Lukurmata Marc Bermann, 2016-04-19 Household archaeology, together with community and regional settlement information, forms the basis for a unique local perspective of Andean prehistory in this study of the evolution of the site of Lukurmata, a pre-Columbian community in highland Bolivia. First established nearly two thousand years ago, Lukurmata grew to be a major ceremonial center in the Tiwanaku state, a polity that dominated the south-central Andes from a.d. 400 to 1200. After the Tiwanaku state collapsed, Lukurmata rapidly declined, becoming once again a small village. In his analysis of a 1300-year-long sequence of house remains at Lukurmata, Marc Bermann traces patterns and changes in the organization of domestic life, household ritual, ties to other communities, and mortuary activities, as well as household adaptations to overarching political and economic trends. Prehistorians have long studied the processes of Andean state formation, expansion, and decline at the regional level, notes Bermann. But only now are we beginning to understand how these changes affected the lives of the residents at individual settlements. Presenting a view from below of Andean prehistory based on a remarkably extensive data set, Lukurmata is a rare case study of how prehispanic polities can be understood in new ways if prehistorians integrate the different lines of evidence available to them.
