Women In Their Element: Selected Women's Contributions To The Periodic System Annette Lykknes,Brigitte Van Tiggelen,2019-08-05 2019 celebrated the 150th anniversary of Mendeleev's first publication of the Periodic Table of Chemical Elements. This book offers an original viewpoint on the history of the Periodic Table: a collective volume with short illustrated papers on women and their contribution to the building and the understanding of the Periodic Table and of the elements themselves. Few existing texts deal with women's contributions to the Periodic Table. A book on women's work not only helps make historical women chemists more visible; it also sheds light on the multifaceted character of the work on the chemical elements and their periodic relationships. Stories of female input contribute to the understanding of the nature of science, of collaboration as opposed to the traditional depiction of the lone genius.While the discovery of elements is a natural part of this collective work, the book goes beyond discovery histories. Stories of women contributors to the chemistry of the elements also include understanding the concept of element, identifying properties, developing analytical methods, mapping the radioactive series, finding applications of elements, and the participation of women as audiences when new elements were presented at lectures.The book contains chapters on pre-periodic table contributions as well as recent discoveries, unknown stories as well as more famous ones, with an emphasis on work conducted in the late 19th century and early 20th century. Elements from different groups in the periodic table are included, so as to represent a variety of chemical contexts.

Mammal Phylogeny Frederick S. Szalay,Michael J. Novacek,Malcolm C. McKenna,2012-12-06 The roots of this book and its sister volume, *Mammal Phylogeny: Placentals*, go back to discussions and plans, shelved for a while, between F. S. Szalay and W. P. Luckett during the international and multidisciplinary symposium on rodent evolution sponsored by NATO, July 2-6, 1984, in Paris. That conference, organized by W. P. Luckett and J. -L. Hartenberger, the proceedings of which were published in 1985, proved an inspiring experience to all of the participants, as this was repeatedly expressed both during and after the meetings. In addition to issues relating to rodents, general theoretical topics pertaining to the evolutionary biology and systematics of other groups of mammals regularly surfaced during the presentations and discussions. M. J. Novacek, who was also a participant in the rodent symposium, shared with Luckett and Szalay the enthusiasm acquired there, and he also expressed strong interest for a meeting on mammal evolution with a general focus similar to that of the rodent gathering. In 1988, Szalay and Luckett, after having planned in detail a program, direction, and core list of participants, were awarded a \$30,000 grant by the Alfred P. Sloan Foundation through the Research Foundation of the City University of New York. The grant was contingent upon obtaining additional funds sufficient to assure that the symposium would be held. Raising the remaining funds proved to be a problem.

Surviving Hypoxia Peter W. Hochachka,Peter L. Lutz,Thomas J. Sick,Myron Rosenthal,2022-11-30 *Surviving Hypoxia: Mechanisms of Control and Adaptation* is a synthesis of findings and thoughts concerning hypoxia. The thermodynamics of hypoxia are discussed in detail, including acid-base balance and self-pollution resulting from the accumulation of anaerobic end-products. The book focuses on descriptions and discussions of common facets, contrasting solutions in a variety of physiological hypoxia defense strategies, including those shown by plants, invertebrates, and vertebrates. Special treatment is given to the distinctive problems that hypoxia presents to vulnerable organs such as the kidney, liver, and brain. It also addresses pathological events in addition to protective mechanisms. Clinical implications of basic research are examined in the book, which provides new insights into underlying pathological processes occurring in hypoxic-induced organ failure and indicates new paths for successful clinical intervention. *Surviving Hypoxia: Mechanisms of Control and Adaptation* is an excellent reference for all researchers interested in the physiological effects of hypoxia, underlying pathological events, and

protective mechanisms.

Botulinum and Tetanus Neurotoxins B.R. DasGupta, 2013-11-11 Three days in Madison have thoroughly modified my view on clostridial neurotoxins. While still realizing the numerous activating, modifying and protective inputs, I cannot judge the meaningfulness of the meeting impartially. Neither may the reader expect a complete summary of all presentations. Collected in this volume, they speak for themselves without requiring an arbiter. Instead I shall write down my very personal opinions as a researcher who has studied clostridial neurotoxins for nearly 25 years. Comparable conferences have been rare during this time. A comprehensive symposium 4 on C. botulinum neurotoxins has been organized at Ft. Detrick. International conferences on tetanus have been held regularly under the auspices of the World Health Organization. One or maximally two days of these meetings have been devoted to tetanus toxin and its actions whereas the sponsor and the majority of the participants have been interested mainly in epidemiology, prevention and treatment of tetanus as a disease (see refs. 5,6). Some aspects of clostridial neurotoxins have been addressed in the context of bacterial toxins, in particular in the biennial European workshops. 1-3,7,8 The Madison meeting differed from the previous ones in three aspects. First, it covered both tetanus and botulinum neurotoxins. The fusion was justified because of their huge similarities in primary structure, in their mode of action and in their cellular targets. Second, the meeting was not limited to toxins but drew some lines on which modern neurobiology might proceed.

Protein Transport into the Endoplasmic Reticulum Richard Zimmermann, 2009-08-31 Protein transport into the endoplasmic reticulum (ER) is just one aspect of the general cell biology topic of intracellular protein sorting. This larger picture also includes protein transport into other organelles of the eukaryotic cell (chloroplasts, mitochondria, nucleus, peroxisomes), protein export from bacteria, vesicular transport that deliv

Marmosets and Tamarins Anthony B. Rylands, 1993 Starting with concise accounts for all the marmoset and tamarin monkey species, this important new book then goes on to review their geographical distributions and taxonomy, along with comparative reviews of vocalizations, scent-marking, mating systems, infant care and development, social organization, and behavior and ecology in the wild. Several of these small-primate species are rare or threatened, and the subjects discussed here are strongly relevant to their management in captivity as well as for understanding natural populations. This is the first volume in several years to review current knowledge of this family, which comprises 52 species and subspecies found in the area from Panama to southern Brazil.

The Golden Age of Sail Amy Handy, 1996 With 90 illustrations, this tells the history and romance of these tall ships which conquered the seas and changed the face of the world.

RNA-protein Interactions Kiyoshi Nagai, Iain W. Mattaj, 1994 The study of RNA-protein interactions is crucial to understanding the mechanisms and control of gene expression and protein synthesis. The realization that RNAs are often far

more biologically active than was previously appreciated has stimulated a great deal of new research in this field. Uniquely, in this book, the world's leading researchers have collaborated to produce a comprehensive and current review of RNA-protein interactions for all scientists working in this area. Timely, comprehensive, and authoritative, this new *Frontiers* title will be invaluable for all researchers in molecular biology, biochemistry and structural biology.

From Molecules to Materials Elena A. Rozhkova, Katsuhiko Ariga, 2016-10-05 This interdisciplinary book focuses on the various aspects transformation of the energy from sunlight into the chemical bonds of a fuel, known as the artificial photosynthesis, and addresses the emergent challenges connected with growing societal demands for clean and sustainable energy technologies. The editors assemble the research of world-recognized experts in the field of both molecular and materials artificial systems for energy production. Contributors cover the full scope of research on photosynthesis and related energy processes.

The Goude Touch Jean Paul Goude, 2009 This book assembles a collection of advertising artwork he created over a ten-year period for Galeries Lafayette - Paris's most celebrated department store. Around 200 works, including over 100 working documents, are on show here: drawings, sketches and final images that sparkle with creative vigour. Selected and arranged by Goude himself, they present a gallery of artworks that have not only defined a brand, but have redefined advertising and brand photography as we know them. Sexy, irreverent and often very funny, this book sizzles with Goude's frequently risqué sense of humour. He is the enfant terrible behind some of the wittiest billboards in Paris, in perfect control of his medium and with an intuitive sense of chic. Goude has created a modern classic of commercial art. In an inspired moment, Galeries Lafayette gave Goude a rare degree of creative freedom, and Goude responded with some of the best work he has ever made. Patrick Mauries sets Goude's work in context - alongside the great artists associated with advertising, fashion and publicity, such as Rene Gruau for Dior - and as a vital asset in the history of France's greatest store. This book is a celebration of Goude's creative zest and perfectionism, and his unique affinity for making fresh and engaging commercial artworks. It will inform and instruct all those concerned about the art of image-making, whether design professionals or simply those prepared to be delighted and entertained by chic, witty images that work. --Book Jacket.
