**UK and US Background Studies: An Introduction to the UK and British Studies, and to the US and American Studies** Pierce Mountney, Petr Anténe, 2018-06-15 This book aims to provide general knowledge about various aspects of the United Kingdom and the United States of America at present. After reading this book, you should have an understanding of how each country works, what it means to come from that country, and what it is like to live there. The book is not intended to present intricate details about all parts of both countries. However, after reading this book, you should be able to better comprehend these intricacies should you choose to research them further.

*Higher Education in the UK and the US*, 2014-05-15 Higher Education in the UK and the US: Converging University Models in a Global Academic World? edited by Sarah Pickard addresses the key similarities and differences in higher education between the two countries over the last thirty years, in order to ascertain whether there exists a specific 'Anglo-Saxon model'. This interdisciplinary book is divided into three thematic parts dealing with current fundamental issues in higher education within neoliberal Great Britain and the United States: economics and marketisation of higher education; access and admittance to universities; and the student experience of higher education. The contributors are all higher education specialists in diverse academic fields - sociology, political sciences, public policy studies, educational studies and history - from either side of the Atlantic. Contributors are: Bahram Bekhradnia, James Côté, Marie-Agnès Détourbe, John Halsey, Magali Julian, Kenneth O'Brien, Cristiana Olcese, Anna Mountford-Zimdars, Sarah Pickard, Chris Rust, Clare Saunders, Christine Soulas, and Steven Ward. \*Higher Education in the UK and the US: Converging University Models in a Global Academic World? is now available in paperback for individual customers.

Perspectives from United Kingdom and United States Policy Makers on Obesity Prevention Institute of Medicine, Food and Nutrition Board, Standing Committee on Childhood Obesity Prevention, 2010-09-13 Both the United Kingdom and the United States are grappling with nationwide epidemics of obesity. Obesity contributes to diabetes, cardiovascular disease, and some cancers, among other diseases. Although many people are aware of obesity's causes and consequences, few see it as a problem for their own families-despite clinical evidence to the contrary. Given this disconnect between perception and reality, policy makers in both countries struggle to find a way to reach people to encourage change. The IOM brought together policy makers from the U.K. and U.S. for a workshop on October 22, 2009, to discuss the challenges of and promising approaches to the struggle against obesity. Presenters spoke about current policies, programs, and partnerships that are addressing the obesity epidemic and evidence for effective strategies to change perception and behaviors. The workshop, summarized in this document, provided an opportunity for both countries to learn from each other's efforts and to consider how to apply new strategies at home.

*Learning Standards and the Assessment of Quality in Higher Education: Contested Policy Trajectories* Jon Yorke, Lesley Vidovich, 2016-07-13 This book analyses accountability and quality policies relating to learning standards and examines their implications for assessment in higher education. Whilst primarily focusing on the Australian setting, this analysis is located within a broader frame of reference that includes the United Kingdom (UK), the United States of America (US), and the Organisation for Economic Cooperation and Development (OECD). Across these settings, comparative measures of learning have been seen as a policy 'solution' to the problem of 'proving quality' in a globalised and increasingly competitive higher education market. Comparative measures of learning depend on the specification of learning standards. Learning standards attempt to articulate the capabilities expected of graduates, and students' achievement of these is determined through the practices of assessment carried out within institutions. Quality policy, learning standards and assessment practices all intersect within the broader umbrella of accountability, with relevance to governments, higher education providers, employers, parents, and students. The findings reported in this book highlight a number of policy influences, including the rising demands for national and international comparative data on learning standards to compare quality and inform student choice in a globally competitive market.

**From Parents to Children** John Ermisch, Markus Jantti, Timothy M. Smeeding, 2012-05-01 Does economic inequality in one generation lead to inequality of opportunity in the next? In *From Parents to Children*, an esteemed international group of

scholars investigate this question using data from ten countries with differing levels of inequality. The book compares whether and how parents' resources transmit advantage to their children at different stages of development and sheds light on the structural differences among countries that may influence intergenerational mobility. How and why is economic mobility higher in some countries than in others? The contributors find that inequality in mobility-relevant skills emerges early in childhood in all of the countries studied. Bruce Bradbury and his coauthors focus on learning readiness among young children and show that as early as age five, large disparities in cognitive and other mobility-relevant skills develop between low- and high-income kids, particularly in the United States and the United Kingdom. Such disparities may be mitigated by investments in early childhood education, as Christelle Dumas and Arnaud Lefranc demonstrate. They find that universal pre-school education in France lessens the negative effect of low parental SES and gives low-income children a greater shot at social mobility. Katherine Magnuson, Jane Waldfogel, and Elizabeth Washbrook find that income-based gaps in cognitive achievement in the United States and the United Kingdom widen as children reach adolescence. Robert Haveman and his coauthors show that the effect of parental income on test scores increases as children age; and in both the United States and Canada, having parents with a higher income better the chances that a child will enroll in college. As economic inequality in the United States continues to rise, the national policy conversation will not only need to address the devastating effects of rising inequality in this generation but also the potential consequences of the decline in mobility from one generation to the next. Drawing on unparalleled international datasets, *From Parents to Children* provides an important first step.

**Handbook of Writing and Text Production** Eva-Maria Jakobs, Daniel Perrin, 2014-02-27 Writing matters, and so does research into real-life writing. The shift from an industrial to an information society has increased the importance of writing and text production in education, in everyday life and in more and more professions in the fields of economics and politics, science and technology, culture and media. Through writing, we build up organizations and social networks, develop projects, inform colleagues and customers, and generate the basis for decisions. The quality of writing is decisive for social resonance and professional success. This ubiquitous real-life writing is what the present handbook is about. The de Gruyter *Handbook of Writing and Text Production* brings together and systematizes state-of-the-art research. The volume contains five sections, focussing on (I) the theory and methodology of writing and text production research, as well as on problem-oriented and problem-solving approaches related to (II) authors, (III) modes and media, (IV) genres, and (V) domains of writing and text production. Throughout the 21 chapters, exemplary research projects illustrate the theoretical perspectives from globally relevant research spaces and traditions. Both established and future scholars can benefit from the handbook's fresh approach to writing in the context of multimodal, multi-semiotic text production.

**Higher Education in Scotland and the UK** Sheila Riddell, 2015-11-12 This book examines the impact of devolution on Scottish and UK higher education systems, including institutional governance, approaches to tuition fees and student

support, cross-border student flows, widening access, internationalisation and research policy.

**Global Mobility of Research Scientists** Aldo Geuna,2015-08-03 *Global Mobility of Research Scientists: The Economics of Who Goes Where and Why* brings together information on how the localization and mobility of academic researchers contributes to the production of knowledge. The text answers several questions, including what characterizes nationally and internationally mobile researchers? and what are the individual and social implications of increased mobility of research scientists? Eight independent, but coordinated chapters address these and other questions, drawing on a set of newly developed databases covering 30 countries, including the US, the UK, France, Germany, Italy, Japan, Russia, and China, among others. - Combines theoretically sound and empirically fascinating results in one volume that has international and interdisciplinary appeal. - Covers topics at the forefront of academic, business, and policy discussions - Data used in the chapters available at a freely-accessible website

**Anglo-American Cultural Studies** Jody Skinner,2022-09-05 The third edition of Skinner's introduction to Anglo-American cultural studies has been thoroughly revised to include Brexit, Trump, the pandemic, and the war in Ukraine. This standard textbook now includes new full-color graphics as well as updated recommendations for further reading and watching at the end of each chapter. *Anglo-American Cultural Studies* refreshingly breaks with the tradition of dry impersonal summaries of facts and figures to provide German students with first-hand experience of the personal tone and humor that can characterize academic discourse in Britain and the US.

**The Appraisal of Investments in Educational Facilities** OECD,2000-02-08 This series of reports examines whether it is possible to develop reliable and effective criteria for evaluation of investments, given the wide range of parameters from planning and cost-effectiveness of buildings to their impact on the performance of the educational system as a whole.

**The Spectre of Race** Michael G. Hanchard,2020-03-03 How racism and discrimination have been central to democracies from the classical period to today As right-wing nationalism and authoritarian populism gain momentum across the world, liberals, and even some conservatives, worry that democratic principles are under threat. In *The Spectre of Race*, Michael Hanchard argues that the current rise in xenophobia and racist rhetoric is nothing new and that exclusionary policies have always been central to democratic practices since their beginnings in classical times. Contending that democracy has never been for all people, Hanchard discusses how marginalization is reinforced in modern politics, and why these contradictions need to be fully examined if the dynamics of democracy are to be truly understood. Hanchard identifies continuities of discriminatory citizenship from classical Athens to the present and looks at how democratic institutions have promoted undemocratic ideas and practices. The longest-standing modern democracies —France, Britain, and the United States—profited from slave labor, empire, and colonialism, much like their Athenian predecessor. Hanchard follows these patterns through the Enlightenment and to the states and political thinkers of the late nineteenth and early twentieth

centuries, and he examines how early political scientists, including Woodrow Wilson and his contemporaries, devised what Hanchard has characterized as racial regimes to maintain the political and economic privileges of dominant groups at the expense of subordinated ones. Exploring how democracies reconcile political inequality and equality, Hanchard debates the thorny question of the conditions under which democracies have created and maintained barriers to political membership. Showing the ways that race, gender, nationality, and other criteria have determined a person's status in political life, *The Spectre of Race* offers important historical context for how democracy generates political difference and inequality.

Research Handbook on Entrepreneurship and Leadership Richard T. Harrison, Claire M. Leitch, 2019 This Research Handbook argues that the study of entrepreneurs as leaders is a gap in both the leadership and the entrepreneurship literatures. With conceptual and empirical chapters from a wide range of cultures and entrepreneurship and leadership ecosystems, the Research Handbook for the first time produces a systematic overview of the entrepreneurial leadership field, providing a state of the art perspective and highlighting unanswered questions and opportunities for further research. It consolidates existing theory development, stimulates new conceptual thinking and includes path-breaking empirical explorations.

*The Calling of Law* Fiona Westwood, Karen Barton, 2016-04-01 As one of the 'learned' professions requiring advanced learning and high principles, law enjoys a special standing in society. In return for its status and rank, the legal profession is expected to exhibit the highest levels of honesty, trust and morality, the very values which underpin the legal system itself. This, in turn, entrusts to legal education a particular problem of addressing, not only the substantive elements of the body of law, but a means through which the characteristics of the 'calling' of law are imparted and instilled. At a time when the very essence of the legal profession is under threat, this book calls for a realignment of the legal curriculum and pedagogies so as to emphasise the development of culture over industry; character over eloquence; and calling over skill. Chapters are grouped around the core content and key themes of Curiosity, Calling, Character and Conscientiousness, Contract, and Culture. The volume includes contributions from leading experts, drawn internationally and from other professional disciplines in order to present alternative approaches aimed at tackling common issues, providing insight, and provoking debate.
