The Cambridge Prehistory of the Bronze and Iron Age Mediterranean A. Bernard Knapp, Peter van Dommelen, 2015-01-12  
The Cambridge Prehistory of the Bronze and Iron Age Mediterranean offers new insights into the material and social practices of many different Mediterranean peoples during the Bronze and Iron Ages, presenting in particular those features that both connect and distinguish them. Contributors discuss in depth a range of topics that motivate and structure Mediterranean archaeology today, including insularity and connectivity; mobility, migration, and colonization; hybridization and cultural encounters; materiality, memory, and identity; community and household; life and death; and ritual and ideology. The volume's broad coverage of different approaches and contemporary archaeological practices will help practitioners of Mediterranean archaeology to move the subject forward in new and dynamic ways. Together, the essays in this volume shed new light on the people, ideas, and materials that make up the world of Mediterranean archaeology today, beyond the borders that separate Europe, Africa, and the Middle East.

**Perspectives on the Teaching of Geometry for the 21st Century** C. Mammana, V. Villani, 2012-12-06  
In recent years geometry seems to have lost large parts of its former central position in mathematics teaching in most countries. However, new trends have begun to counteract this tendency. There is an increasing awareness that geometry plays a key role in mathematics and learning mathematics. Although geometry has been eclipsed in the mathematics curriculum, research in geometry has blossomed as new ideas have arisen from inside mathematics and other disciplines, including computer science. Due to reassessment of the role of geometry, mathematics educators and mathematicians face new challenges. In the present ICMI study, the whole spectrum of teaching and learning of geometry is analysed. Experts from all over the world took part in this study, which was conducted on the basis of recent international research, case studies, and reports on actual school practice. This book will be of particular interest to mathematics educators and mathematicians who are involved in the teaching of geometry at all educational levels, as well as to researchers in mathematics education.

Internationalization and Global Citizenship Miri Yemini, 2016-12-31  
This book examines the integration of the international, global, and intercultural dimensions in contemporary education systems. Yemini provides a comprehensive understanding of the process of internationalization from different angles including policy-making, curriculum implementation, media discourse, and individual agency. The book illuminates and analyzes a set of key tensions of

internationalization across multiple levels of schooling and across the domains of popular discourse, policy, curriculum, pedagogy, and students' identity, by connecting or re-connecting the process of internationalization and its outcomes at individual level of global citizenship. The author uses solid empirical embedding of each of those aspects together with development of novel theoretical insights in each of the investigated domains.

*Monuments, Empires, and Resistance* Tom D. Dillehay,2007-04-30 From AD 1550 to 1850, the Araucanian polity in southern Chile was a center of political resistance to the intruding Spanish empire. In this book, Tom D. Dillehay examines the resistance strategies of the Araucanians and how they used mound building and other sacred monuments to reorganize their political and culture life in order to unite against the Spanish. Drawing on anthropological research conducted over three decades, Dillehay focuses on the development of leadership, shamanism, ritual, and power relations. His study combines developments in social theory with the archaeological, ethnographic, and historical records. Both theoretically and empirically informed, this book is a fascinating account of the only indigenous ethnic group to successfully resist outsiders for more than three centuries and to flourish under these conditions.

**University and School Collaborations During a Pandemic** Fernando Reimers Arias,Francisco J. Marmolejo,2022 Based on twenty case studies of universities worldwide, and on a survey administered to leaders in 101 universities, this open access book shows that, amidst the significant challenges caused by the COVID-19 pandemic, universities found ways to engage with schools to support them in sustaining educational opportunity. In doing so, they generated considerable innovation, which reinforced the integration of the research and outreach functions of the university. The evidence suggests that universities are indeed open systems, in interaction with their environment, able to discover changes that can influence them and to change in response to those changes. They are also able, in the success of their efforts to mitigate the educational impact of the pandemic, to create better futures, as the result of the innovations they can generate. This

challenges the view of universities as ivory towers being isolated from the surrounding environment and detached from local problems. As they reached out to schools, universities not only generated clear and valuable innovations to sustain educational opportunity and to improve it, this process also contributed to transform internal university processes in ways that enhanced their own ability to deliver on the third mission of outreach

**Passing to América** Thomas A. Abercrombie, 2018-11-01 In 1803 in the colonial South American city of La Plata, Doña Martina Vilvado y Balverde presented herself to church and crown officials to denounce her husband of more than four years, Don Antonio Yta, as a “woman in disguise.” Forced to submit to a medical inspection that revealed a woman’s body, Don Antonio confessed to having been María Yta, but continued to assert his maleness and claimed to have a functional “member” that appeared, he said, when necessary. *Passing to América* is at once a historical biography and an in-depth examination of the sex/gender complex in an era before “gender” had been divorced from “sex.” The book presents readers with the original court docket, including Don Antonio’s extended confession, in which he tells his life story, and the equally extraordinary biographical sketch offered by Felipa Ybañez of her “son María,” both in English translation and the original Spanish. Thomas A. Abercrombie’s analysis not only grapples with how to understand the sex/gender system within the Spanish Atlantic empire at the turn of the nineteenth century but also explores what Antonio/María and contemporaries can teach us about the complexities of the relationship between sex and gender today. *Passing to América* brings to light a previously obscure case of gender transgression and puts Don Antonio’s life into its social and historical context in order to explore the meaning of “trans” identity in Spain and its American colonies. This accessible and intriguing study provides new insight into historical and contemporary gender construction that will interest students and scholars of gender studies and colonial Spanish literature and history. *Musical Migrations* F. Aparicio, C. Jáquez, 2003-01-03 A dynamic and original collection of essays on the transnational circulation and changing social meanings of Latin music across the Americas. The transcultural impact of Latin American musical forms in the United States calls for a deeper understanding of the shifting cultural meanings of music. *Musical Migrations* examines the tensions between the value of Latin popular music as a metaphor for national identity and its transnational meanings as it traverses national borders, geocultural spaces, audiences, and historical periods. The anthology analyzes, among others, the role of popular music in Caribbean diasporas in the United States and Europe, the trans-Caribbean identities of Salsa and reggae, the racial, cultural, and ethnic hybridity in rock across the Americas, and the tensions between tradition and modernity in Peruvian indigenous music, mariachi music in the United States, and in Trinidadian music.
