**Manual de neuroanatomia veterinária básica** Henrique Trevizoli Ferraz , Edson Moreira Borges, O principal objetivo com sua escrita foi o desenvolvimento de uma revisão composta por informações básicas, obtidas em uma vasta, e por vezes complexa, literatura. Por isso, o material foi estruturado dentro de uma linha pedagogicamente definida, baseada no ganho de conhecimento de forma contínua e cumulativa, visando-se fornecer aos leitores conceitos essenciais sobre o sistema nervoso e, assim, preparando-os para o entendimento das generalidades da anatomia macroscópica nos mamíferos domésticos. Ressalta-se que tais estratégias são as mesmas adotadas na preparação e no desenvolvimento de nossas aulas. Ou seja, a partir de metodologias testadas em salas de aula teórica e em laboratórios de aula prática, o documento a seguir foi formatado, da maneira mais didática possível, para ser utilizado por alunos e profissionais como material inicial de consulta. Assim, esperamos que, posteriormente, os indivíduos possam aprofundar seus estudos, em textos muito mais elaborados, acerca da neuroanatomia veterinária. [...]

Reproductive Biology and Technology in Animals ,2020-04-15 Reproductive success is a very important objective to ensure the evolution of animal species. In this sense, interesting research has been carried out to clarify various aspects of reproduction in different animal species. In this way, recent advances in the knowledge of reproductive biology and

biotechnology developed for both males and females have been key to improving efficiency in different aspects. Thus, advances in the knowledge of sperm handling, oocyte characteristics, different genomic aspects related to somatic cell nuclear transfer, and the reproductive microarchitecture system in sheep, cows, pigs, and other invertebrates such as gastropods and fish are presented in this book. Additionally, we also present the most relevant topics of each area, making a detailed review of the knowledge reported to date.

**Fisiología del sistema neuromuscular** Sánchez Klinge, Marta Elena, Mutis Barreto, Claudia Aixa, 2020-08-13 El sistema nervioso se encarga de recibir estímulos del exterior a través de los receptores sensoriales. Estos estímulos pueden ser de cualquier tipo, como los auditivos, visuales o táctiles. Muchos de los receptores están situados en toda la superficie del cuerpo. Luego de recibir los estímulos, los receptores que actúan como transductores (aquellos que transforman un tipo de energía en otra) los transforman en impulsos o potenciales de acción (PA), conocidos también como excitaciones nerviosas que se dirigen hacia el sistema nervioso central (SNC) a través de los nervios periféricos de la vía aferente o neurona sensitiva. Dicho impulso se puede dirigir hacia diferentes segmentos del SNC como las áreas sensitivas de la médula espinal, la sustancia reticular, el cerebelo, el tálamo y las áreas somestésicas de la corteza cerebral.

**Phosphorus and Calcium Utilization and Requirements in Farm Animals** Dorinha M. S. S. Vitti, E. Kebreab, 2010 Mineral nutrition of livestock is an area of significant importance due to its contribution to farm animal economics and health. Providing animals with the required levels of nutrients can improve development, growth and productivity, but production systems increasingly need to be considered alongside issues of economy and environmental sustainability. With a focus on macromineral utilization in farm animals, this book brings together quantitative aspects of phosphorus and calcium metabolism in farm animals, in chapters written by leading researchers worldwide. Chapters cover the isotope dilution technique, phosphorus and calcium utilization in ruminants (sheep, goats and cattle) and non-ruminants (swine and horses) and recommended values of phosphorus and calcium inclusion in feed. Providing information on the efficiency of utilization, availability and requirements in livestock and interactions between the animal and the environment, this is an essential resource for researchers and students in animal sciences and nutrition.
