Shrinking the State Harvey Feigenbaum, Jeffrey Henig, Chris Hamnett, 1998-11-13 Privatization has spread worldwide during the 1980s and 1990s, and has significantly reshaped the balance between state and market in many countries. This book provides a comparative political analysis of the development, form, character and causes of privatization in three countries: the UK, USA and France. The authors argue that privatization is a political phenomenon and should be analyzed as such, rather than being seen as an economic response to the growth of the state and the cost of state provision. Privatization frequently has explicit political goals, and has consequences which redistribute costs and benefits to different groups. The book presents a threefold typology of privatization policy - pragmatic, tactical and systemic - and relates it to the experiences of USA, France and UK respectively. It will be of interest to students and scholars of politics, economics, public policy and business studies, as well as policy-makers and consultants in the field of privatization.

Tendencias de la comunicación para el turismo Isidro Marín Gutiérrez, Verónica Altamirano Benítez, Miguel Túñez López, 2020-10-13 Este libro puede considerarse como una vía imprescindible para tratar de “ordenar el tráfico” en el complicado mundo del Turismo. Dos tercios de la Gran Muralla China está llena de brechas y de grafiti, en buena parte por el desembarco de excursionistas. Una joya de la historia, padece los efectos de millones de turistas que la visitan, con las facilidades que da el precio de los viajes y de los tour operadores que ponen cualquier destino a nuestro alcance.

Public Innovation through Collaboration and Design Christopher Ansell, Jacob Torfing, 2014-06-20 While innovation has long been a major topic of research and scholarly interest for the private sector, it is still an emerging theme in the field of public management. While ‘results-oriented’ public management may be here to stay, scholars and practitioners are now shifting their attention to the process of management and to how the public sector can create ‘value’. One of the urgent needs addressed by this book is a better specification of the institutional and political requirements for sustaining a robust

vision of public innovation, through the key dimensions of collaboration, creative problem-solving, and design. This book brings together empirical studies drawn from Europe, the USA and the antipodes to show how these dimensions are important features of public sector innovation in many Western democracies with different conditions and traditions. This volume provides insights for practitioners who are interested in developing an innovation strategy for their city, agency, or administration and will be essential reading for scholars, practitioners and students in the field of public policy and public administration.

Imaginization Gareth Morgan, 1997-07-23 'The book is exciting. It opens up new ways of developing both organization and management. It inspires ideas of excellence and achievement and gives hope for this age. You can probably open this book anywhere and find something of value' - Business Age

Capitalism and the Death Drive Byung-Chul Han, 2021-05-18 What we call growth today is in fact a tumorous growth, a cancerous proliferation which is disrupting the social organism. These tumours endlessly metastasize and grow with an inexplicable, deadly vitality. At a certain point this growth is no longer productive, but rather destructive. Capitalism passed this point long ago. Its destructive forces cause not only ecological and social catastrophes but also mental collapse. The destructive compulsion to perform combines self-affirmation and self-destruction in one. We optimize ourselves to death. Brutal competition ends in destruction. It produces an emotional coldness and indifference towards others as well as towards one's own self. The devastating consequences of capitalism suggest that a death drive is at work. Freud initially introduced the death drive hesitantly, but later admitted that he 'couldn't think beyond it' as the idea of the death drive became increasingly central to his thought. Today, it is impossible to think about capitalism without considering the death drive.

The Economic Decline of Empires Carlo M. Cipolla, 2013-03-07 The question of why empires decline and fall has attracted the attention of historians for centuries, but remains fundamentally unsolved. This unique collection is concerned with the purely economic aspects of decline. It can be observed of empires in the process of decline that their economies are generally faltering. Here the similarities in different cases of economic decline are identified, bearing in mind that individual histories are characterized by important elements of originality. In his introduction, Professor Cipolla points out that

improvements in standards of living brought about by a rising economy lead to more and more people demanding to share the benefits. Incomes increase and extravagances develop, as new needs begin to replace those which have been satisfied. Prosperity spreads to neighbouring countries, which may become a threat and force the empire into greater military expenditure. For these and other reasons, public consumption in mature empires has a tendency to rise sharply and outstrip productivity and, in general, empires seem to resist change. The ten articles in this collection, first published in 1970, examine separate cases of economic decline, from Rome and Byzantium to the more recent histories of the Dutch and Chinese empires, and demonstrate both the resemblances and the peculiarly individual characteristics of each case.

Common Pierre Dardot, Christian Laval, 2019-01-24 Around the globe, contemporary protest movements are contesting the oligarchic appropriation of natural resources, public services, and shared networks of knowledge and communication. These struggles raise the same fundamental demand and rest on the same irreducible principle: the common. In this exhaustive account, Pierre Dardot and Christian Laval show how the common has become the defining principle of alternative political movements in the 21st century. In societies deeply shaped by neoliberal rationality, the common is increasingly invoked as the operative concept of practical struggles creating new forms of democratic governance. In a feat of analytic clarity, Dardot and Laval dissect and synthesize a vast repository on the concept of the commons, from the fields of philosophy, political theory, economics, legal theory, history, theology, and sociology. Instead of conceptualizing the common as an essence of man or as inherent in nature, the thread developed by Dardot and Laval traces the active lives of human beings: only a practical activity of commoning can decide what will be shared in common and what rules will govern the common's citizen-subjects. This re-articulation of the common calls for nothing less than the institutional transformation of society by society: it calls for a revolution.
