Lecciones sobre la historia de la filosofía Georg Wilhelm Friedrich Hegel, 1977

The Phenomenology of Mind Georg Wilhelm Friedrich Hegel, 2020-09-28 In the case of a philosophical work it seems not only superfluous, but, in view of the nature of philosophy, even inappropriate and misleading to begin, as writers usually do in a preface, by explaining the end the author had in mind, the circumstances which gave rise to the work, and the relation in which the writer takes it to stand to other treatises on the same subject, written by his predecessors or his contemporaries. For whatever it might be suitable to state about philosophy in a preface - say, an historical sketch of the main drift and point of view, the general content and results, a string of desultory assertions and assurances about the truth - this cannot be accepted as the form and manner in which to expound philosophical truth. Moreover, because philosophy has its being essentially in the element of that universality which encloses the particular within it, the end or final result seems, in the case of philosophy more than in that of other sciences, to have absolutely expressed the complete fact itself in its very nature; contrasted with that the mere process of bringing it to light would seem, properly speaking, to have no essential significance. On the other hand, in the general idea of e.g. anatomy - the knowledge of the parts of the body regarded as lifeless - we are quite sure we do not possess the objective concrete fact, the actual content of the science, but must, over and above, be concerned with particulars. Further, in the case of such a collection of items of knowledge, which has no real right to the name of science, any talk about purpose and suchlike generalities is not commonly very different from the descriptive and superficial way in which the contents of the science these nerves and muscles, etc.-are themselves spoken of. In philosophy, on the other hand, it would at once be felt incongruous were such a method made use of and yet shown by philosophy itself to be incapable of grasping the truth. In the same way too, by determining the relation which a philosophical work professes to have to other treatises on the same subject, an extraneous interest is introduced, and obscurity is thrown over the point at issue in the knowledge of the truth. The more the ordinary mind takes the opposition between true and false to be fixed, the more is it accustomed to expect either agreement or contradiction with a given philosophical system, and only to see reason for the one or the other in any explanatory statement concerning such a system. It does not conceive the diversity of philosophical systems as the progressive evolution of truth; rather, it sees only contradiction in that variety. The bud disappears when the blossom breaks through, and we might say that the former is refuted by the latter; in the same way

when the fruit comes, the blossom may be explained to be a false form of the plant's existence, for the fruit appears as its true nature in place of the blossom. These stages are not merely differentiated; they supplant one another as being incompatible with one another. But the ceaseless activity of their own inherent nature makes them at the same time moments of an organic unity, where they not merely do not contradict one another, but where one is as necessary as the other; and this equal necessity of all moments constitutes alone and thereby the life of the whole. But contradiction as between philosophical systems is not wont to be conceived in this way; on the other hand, the mind perceiving the contradiction does not commonly know how to relieve it or keep it free from its onesidedness, and to recognize in what seems conflicting and inherently antagonistic the presence of mutually necessary moments.

Hegel, Marx, Nietzsche Henri Lefebvre, 2020-02-11 The great French Marxist philosopher weighs up the contributions of the three major critics of modernity With the translation of Lefebvre's philosophical writings, his stature in the English-speaking world continues to grow. Though certainly within the Marxist tradition, he consistently saw Marx as an 'unavoidable, necessary, but insufficient starting point'. Unsurprisingly, Lefebvre always insisted on the importance of Hegel to understanding Marx. But the imposing Metaphilosophy also suggested the significance he ascribed to Nietzsche, in the 'realm of shadows' through which philosophy seeks to think the world. Lefebvre proposes here that the modern world is at the same time Hegelian in terms of the state; Marxist in terms of the social and society; and Nietzschean in terms of civilization and its values. As early as 1939, Lefebvre pioneered a French reading of Nietzsche that rejected the philosopher's appropriation by fascism, bringing out the tragic implications of Nietzsche's proclamation that 'God is dead' long before this approach was followed by such later writers as Foucault, Derrida and Deleuze. Forty years later, in the last of his philosophical writings, Lefebvre juxtaposes the contributions of the three great thinkers, in a text whose themes remain surprisingly relevant today.

A Dream of Passion Lee Strasberg, 1988-10-01 "The definitive source book on acting."—Los Angeles Times Marlon Brando, Al Pacino, Paul Newman, Dustin Hoffman, Dennis Hopper, Robert DeNiro, Marilyn Monroe, and Joanne Woodward—these are only a few of the many actors training in "Method" acting by the great and legendary Lee Strasberg. This revolutionary theory of acting—developed by Stanislavski and continued by Strasberg—has been a major influence on the art of acting in our time. During his last decade, Strasberg devoted himself to a work that would explain once and for all what The Method was and how it worked, as well as telling the story of its development and of the people involved with it.

The result is a masterpiece of wisdom and guidance for anyone involved with the theater in any way. “A must for young actors—for old ones, too, for that matter.”—Paul Newman “An exploration of the creative process that will reward all who are interested in the nature of inspiration.”—Library Journal “An important cultural document.”—Booklist

Lecciones sobre la historia de la filosofía Georg Wilhelm Friedrich Hegel,1955 En este segundo tomo, Hegel continúa con la vida filosófica en Grecia. Para el autor, lo que satisface y dignifica nuestra vida espiritual tuvo su principio en Grecia. El libro inicia con el estudio de los sofistas a los socráticos. Dedicar un capítulo a Platón y Sócrates, para terminar con el estudio del dogmatismo y el escepticismo.

Encyclopedia of the Philosophical Sciences in Outline, and Critical Writings Georg Wilhelm Friedrich Hegel,1990 Hegel's system of philosophy was not only the leading form of metaphysics during his lifetime, but it has taken on increasing significance in our own time. The main element in this compact collection of Hegel's thought is an eagerly awaited new translation of one of the most influential works of thought ever written, the Encyclopedia of the Philosophical Sciences in Outline. Also included is Preface to the System of Philosophy and Solger's Posthumous Writings and Correspondence. (For other texts in German Philosophy, see vols. 5, 13, 23, 27, 40, 48, and 78)

Dostoyevsky Reads Hegel in Siberia and Bursts Into Tears Laszlo F. Foldenyi,2020-02-18 An exemplary collection of work from one of the world's leading scholars of intellectual history Földényi . . . stage[s] a broad metaphysical melodrama between opposites that he pursues throughout this fierce, provoking collection (expertly translated by Otilie Mulzet). . . . He proves himself a brilliant interpreter of the dark underside of Enlightenment ambition.--James Wood, New Yorker László Földényi's work, in the long tradition of public intellectual and cultural criticism, resonates with the writings of Montaigne, Walter Benjamin, and Thomas Mann. In this new essay collection, Földényi considers the continuing fallout from the collapse of religion, exploring how Enlightenment traditions have not replaced basic elements of previously held religious mythologies--neither their metaphysical completeness nor their comforting purpose. Realizing beautiful writing through empathy, imagination, fascination, and a fierce sense of justice, Földényi covers a wide range of topics including a meditation on the metaphysical unity of a sculpture group and an analysis of fear as a window into our relationship with time.

Historia de la filosofía I Johannes Hirschberger, 2015-02-09 La presente obra es ya un clásico de la historiografía filosófica. Publicada en castellano por primera vez en 1954, ha contribuido a la formación en filosofía de varias generaciones tanto en España como en América Latina. Johannes Hirschberger aspira a fundir la actividad historiográfica con la pensante, ya que su intención es ofrecer un texto suficientemente amplio y condensado a la vez, que logre resumir con viveza las principales corrientes de las distintas épocas y el pensamiento de los autores. Con esta nueva edición, revisada a fondo y ampliada hasta nuestros días, sobre todo en lo referente a la bibliografía, la filosofía española y las últimas corrientes de pensamiento, Herder Editorial quiere rendir homenaje a uno de sus grandes autores y orientar la mirada de los amantes de la filosofía hacia un espejo donde se reflejan las caras e inquietudes de nuestra época. Este tomo primero abarca el periodo de los presocráticos a principios del siglo XVII.

The Difference Between Fichte's and Schelling's System of Philosophy G.W.F. Hegel, 1988-03-04 In this essay, Hegel attempted to show how Fichte's Science of Knowledge was an advance from the position of Kant in the Critique of Pure Reason, and how Schelling (and incidentally Hegel himself) had made a further advance from the position of Fichte. Hegel finds the idealism of Fichte too abstractly subjective and formalistic, and he tries to show how Schelling's philosophy of nature is the remedy for these weaknesses. But the most important philosophical content of the essay is probably to be found in his general introduction to these critical efforts where he deals with a number of problems about philosophical method in a way which is of general interest to philosophers, and not merely interesting to those who accept the Hegelian dialectic method which grew out of these first beginnings. Finally, the Difference essay is important in the development of Nature-Philosophy as a movement in the history of science.

Lecciones sobre la Filosofía de la Historia Universal. Introducción General G. W. F. Hegel, 1991 “El espíritu es esencialmente individuo; pero en el elemento de la historia universal no tenemos que habérmolas con el individuo particular, ni con la limitación y referencia a la individualidad particular. El espíritu, en la historia, es un individuo de naturaleza universal, pero a la vez determinada, esto es: un pueblo en general. Y el espíritu del que hemos de ocuparnos es el espíritu del pueblo.” (G.W.F. Hegel)

Hegel Theodor W. Adorno, 1994-09-29 This short masterwork in twentieth-century philosophy provides both a major reinterpretation of Hegel and insight into the evolution of Adorno's critical theory. The first study focuses on the relationship of reason, the individual, and society in Hegel, defending him against the criticism that he was merely an apologist for bourgeois society. The second study examines the experiential content of Hegel's idealism, considering the notion of experience in relation to immediacy, empirical reality, science, and society. The third study, *Skoteinos*, is an unusual and fascinating essay in which Adorno lays out his thoughts on understanding Hegel. In his reflections, which spring from his experience teaching at the Goethe University in Frankfurt, questions of textual and philosophical interpretation are

intertwined. Rescuing the truth value of Hegel's work is a recurring theme of the critical theory of the Frankfurt School, and nowhere is this goal pursued with more insight than in these three studies. The core problem Adorno sets for himself is how to read Hegel in a way that comprehends both the work and its historical context, thereby allowing conclusions to be drawn that may seem on the surface to be exactly opposed to what Hegel wrote but that are, nevertheless, valid as the present truth of the work. It is the elaboration of this method of interpretation, a negative dialectic, that was Adorno's underlying goal. Adorno's efforts to salvage the contemporaneity of Hegel's thought form part of his response to the increasingly tight net of social control in the aftermath of World War II. In this, his work is related to the very different attempts to undermine reified thinking undertaken by the various French theorists. The continued development of what Adorno called the administered world has only increased the relevance of his efforts.

Lecciones sobre la filosofía de la historia universal Georg Wilhelm Friedrich Hegel, 2005 G. W. F. Hegel reflexionó sobre su situación histórica para llegar a ofrecer soluciones estables, posibles y no simples compromisos. Las Lecciones sobre la Filosofía de la Historia Universal al hombre de hoy le pueden servir de espejo para mirarse en un pasado que tiene luces y sombras, pero que en todo caso es nuestro pasado y del que tenemos que partir, llegar a asumir y seguir renovando y creando para otros para que la historia no se detenga, que sería la muerte. Un lector del siglo XXI, casi dos centurias después de haber sido dictadas estas Lecciones sobre la Filosofía de la Historia, puede encontrar en ellas el intento de uno de los más grandes pensadores de la humanidad por llegar a comprender profundamente su tiempo y, también, el pasado, a la vez que muestra el esfuerzo hercúleo por solucionar una situación crítica que ofreciera al hombre una salida del atolladero en el que se encontraba. Hegel trató de superar la crisis mediante la comprensión de lo más propiamente humano: la fuerza de la razón y del pensamiento. El esfuerzo late en cada una de las páginas de las Lecciones sobre la Filosofía de la Historia, será el lector quien extraiga de ellas todo el juego que le pueda servir para entender desde el pasado nuestro presente siguiendo la guía de una de las cabezas más poderosas que ha reflexionado sobre el ser y el destino del hombre en su historia.
