Clinical Text Mining Hercules Dalianis,2018-05-14 This open access book describes the results of natural language processing and machine learning methods applied to clinical text from electronic patient records. It is divided into twelve chapters. Chapters 1-4 discuss the history and background of the original paper-based patient records, their purpose, and how they are written and structured. These initial chapters do not require any technical or medical background knowledge. The remaining eight chapters are more technical in nature and describe various medical classifications and terminologies such as ICD diagnosis codes, SNOMED CT, MeSH, UMLS, and ATC. Chapters 5-10 cover basic tools for natural language processing and information retrieval, and how to apply them to clinical text. The difference between rule-based and machine learning-based methods, as well as between supervised and unsupervised machine learning methods, are also explained. Next, ethical concerns regarding the use of sensitive patient records for research purposes are discussed, including methods for de-identifying electronic patient records and safely storing patient records. The book's closing chapters present a number of applications in clinical text mining and summarise the lessons learned from the previous chapters. The book provides a comprehensive overview of technical issues arising in clinical text mining, and offers a valuable guide for advanced students in health informatics, computational linguistics, and information retrieval, and for researchers entering these fields.

Port Economics, Management and Policy Theo Notteboom,Athanasios Pallis,Jean-Paul Rodrigue,2022-01-31 Port Economics, Management and Policy provides a comprehensive analysis of the contemporary port industry, showing how ports are organized to serve the global economy and support regional and local development. Structured in eight sections plus an introduction and epilog, this textbook examines a wide range of seaport topics, covering maritime shipping and international trade, port terminals, port governance, port competition, port policy and much more. Key features of the book include: Multidisciplinary perspective, drawing on economics, geography, management science and engineering Multisector analysis including containers, bulk, break-bulk and the cruise industry Focus on the latest industry trends, such as supply chain management, automation, digitalization and sustainability Benefitting from the authors' extensive involvement in shaping the port sector across five continents, this text provides students and scholars with a valuable resource on ports and maritime transport systems. Practitioners and policymakers can also use this as an essential guide towards better port management and governance.

The Pillars of Hercules Paul Theroux,2011-12-15 At the gateway to the Mediterranean lie the two Pillars of Hercules: Gibraltar and Ceuta, in Morocco. Paul Theroux decided to travel from one to the other - but taking the long way round. His grand tour of the Mediterranean begins in Gibraltar and takes him through Spain, the French Riviera, Italy, Greece, Istanbul and beyond. He travels by any means necessary - including dilapidated taxi, smoke-filled bus, bicycle and even a cruise-liner. And he encounters bullfights, bazaars and British tourists, discovers pockets of humanity in war-torn Slovenia and Croatia, is astounded by the urban developments on the Costa del Sol and marvels at the ancient wonders of Delphi. Told with Theroux's inimitable wit and style, this lively and eventful tour evokes the essence of Mediterranean life.

Hercules Paul D. Storrie,2017-01-01 Famous for his superhuman strength, Hercules is the most popular hero in Greek mythology. The son of Zeus—king of the gods—and a mortal mother, Hercules faces the wrath of Zeus's wife Hera, who resents her illegitimate stepson and vows to bring him misery. With her magical powers, she tricks Hercules into performing a series of twelve seemingly impossible labors, each one a test of his strength, courage, cunning, and fighting skill. Is Hercules strong enough to foil her scheme? For this exciting retelling of the twelve labors, author Paul Storrie consulted the classic work *The Age of Fable* (1859), by American Thomas Bulfinch, and Edith Hamilton's *Mythology* (1942), both of which are considered the best resources about on ancient myths and legends. Artist Steve Kurth also relied on historical research to accurately bring to life the world of ancient Greece.
