Lowdown Pawn Shop Leprechauns Shawntelle Madison,2023-05-30 Werewolf Natalya Stravinsky might lose herself in a New Jersey shopping binge before she can get herself out of her latest conundrum. After uncovering the true thief for the demons at the ceramic mart, Nat should prop her feet up and take a long rest with her mate Thorn, but instead, a sleazy leprechaun strong-arms her into yet another task. Nat must buy five magical products for his pawn shop in a month or she'll end up as his indentured servant for good. Nat just wants to fulfill her side of the bargain and get out, but before she can do so, all hell breaks loose. The mystical merchandise she purchased begins to infect the supernatural marts in South Toms River, causing chaos and death among the customers. Now, Nat must discover the culprit behind the tainted goods, or this quest could be her last.

Linus & The Leprechauns Maria Thermann,2018-12-06 How-de-do, whispered Linus as politely as he could, trying hard not to stare. Swaying dangerously now under the weight of his two colleagues, the First Minister Gobbledygook winked at him. Top of the mornin' to you, young sir; bet you've never seen the likes of us, have ye, now? Linus shook his head silently, never taking his eyes of the whiskered individual closest to his face. That walking stick looked quite capable of poking a human eye out! What, if I may ask, are you? Linus felt it was rather difficult holding a polite conversation entirely in whispers. Are you also noble members of the House of O'Malley? Of course not! Skinflint said indignantly, his cheeks turning a little pink beneath his white mutton chops. Then what exactly are you, if not O'Malley's from Lincolnshire? Gnomes? Pixies? I'll give ye a clue. We're Oirish. Minister Gobbledygook chuckled into his bushy red beard. As Oirish as rainbows, harps and soda bread. Giggling made him bob his arms slightly up and down, causing an upwards tremor that threatened to undo their pyramid at any moment. *** It's not everyday you go for a stroll to explore a new neighbourhood and find yourself nose-to-nose with a leprechaun! But this is what happens to shy 9-year-old Linus Brown, when he follows the advice of a mysterious scarecrow and takes a road less well travelled. Before long, Linus finds himself at the centre of The Great Leprechaun War, coming face to fist with the school bully and his horrible Uncle Herb. These two polluters could wipe out the world's last remaining leprechaun colony with the poison they dump into Farmer O'Malley's woodland pond. Can Linus save the leprechauns from Thunderpants the Destroyer and make a friend of brave Princess Hermione in the process? Linus faces impossible odds. The school bully's built like a tank and it's Thunderpants-a-go! when Uncle Herb's around. Expect plenty of

farting jokes, sneaky witches with their own agenda and far more leprechauns than could possibly fit into a single pot of gold.

Witch Weigh Caroline Mickelson,2012-04-24 Tessa Von Hellengaard is a real witch. Magical spells aside, she's snarky and selfish, and the other witches in her silent spell coven are fed up with her. Their plan to reform Tessa involves taking away her magic, saddling her with one hundred extra pounds, and sending her to a weight loss spa. For good measure they call in Liam Kennedy, a charming and sexy fairy godfather, to teach her some manners. Desperate to regain her magic and determined to shed the weight, Tessa soon realizes that protecting her heart from Liam will prove to be her greatest challenge.

Statistics As Principled Argument Robert P. Abelson,2012-09-10 In this illuminating volume, Robert P. Abelson delves into the too-often dismissed problems of interpreting quantitative data and then presenting them in the context of a coherent story about one's research. Unlike too many books on statistics, this is a remarkably engaging read, filled with fascinating real-life (and real-research) examples rather than with recipes for analysis. It will be of true interest and lasting value to beginning graduate students and seasoned researchers alike. The focus of the book is that the purpose of statistics is to organize a useful argument from quantitative evidence, using a form of principled rhetoric. Five criteria, described by the acronym MAGIC (magnitude, articulation, generality, interestingness, and credibility) are proposed as crucial features of a persuasive, principled argument. Particular statistical methods are discussed, with minimum use of formulas and heavy data sets. The ideas throughout the book revolve around elementary probability theory, t tests, and simple issues of research design. It is therefore assumed that the reader has already had some access to elementary statistics. Many examples are included to explain the connection of statistics to substantive claims about real phenomena.

My History Teacher is a Leprechaun Duane L. Ostler,2015-02-27 Book 3 of 'The Stewards of Light' series, and sequel to 'My Math Teacher is a Vampire.' Blake Drywater has a new history teacher--a leprechaun who escorts Blake to the underground time tunnels of his people. These tunnels are full of doors that open to different places and times, including the future. But then Blake discovers the real reason for his visit, and how it just might destroy the world!

Colony Laura J. Burns,Melinda Metz,2005-10 Interactive storylines allow readers to chose more than two dozen possible endings. A guest speaker--who is actually an ant-like demon queen--arrives at Sunnydale to talk about self-esteem, and to recruit drone-like workers to build her colony.

The Leprechauns of Software Engineering Laurent Bossavit,2015-06-28 The software profession has a problem, widely recognized but which nobody seems willing to do anything about; a variant of the well known telephone game, where some trivial rumor is repeated from one person to the next until it has become distorted beyond recognition and blown up out of all proportion. Unfortunately, the objects of this telephone game are generally considered cornerstone truths of the discipline, to the point that their acceptance now seems to hinder further progress. This book takes a look at some of those ground truths

the claimed 10x variation in productivity between developers; the software crisis; the cost-of-change curve; the cone of uncertainty; and more. It assesses the real weight of the evidence behind these ideas - and confronts the scary prospect of moving the state of the art forward in a discipline that has had the ground kicked from under it.

The Science of Why We Exist Tim Coulson,2024-07-02 From the Big Bang and the evolution of the genetic code to the birth of consciousness, this is the extraordinary story of the chain of events that led to human life on earth. Have you ever wondered why you exist? What had to happen for you to be alive and conscious? Scientists have come a long way in answering this question, and this book describes what they have found out. It also examines whether our existence was inevitable at the universe's birth 13.77 billion years ago—or whether we are just incredibly lucky. The book is aimed at readers who are interested in science but are not experts. Written in an entertaining and accessible style, the narrative begins by describing how scientists discover facts before taking the reader on a journey from the Big Bang to the creation of the human genome. Covering physics, astronomy, chemistry, earth sciences, the emergence of life, evolution, consciousness, the rise of humanity, and how our personalities are moulded by genes, chance, and the environment, the journey explains how the universe started as point of intense energy that over time, in our corner of the universe, resulted in our wonderful planet—and in you.

Take Me to Your Leader! Richard Stevenson,2003 Richard Stevenson was born on this planet 51 years ago, though he's still waiting to be beamed aboard a saucer bound for Zeti Reticuli and the outer meninges. He is the author of thirteen previous collections, including, most recently, *A Murder of Crows: New & Selected Poems* (Black Moss Press, 1999), *Nothing Definite Yeti* (YA verse, Ekstasis Editions, 1998), *Live Evil: A Homage To Miles Davis* (Thistledown Press, 2000), and *Hot Flashes: Maiduguri Haiku, Senryu, and Tanka* (Ekstasis Editions, 2001). He teaches and helps run a reading series, and occasionally performs his work with the jazz-poetry troupe Naked Ear and children's verse/ jazz-rock troupe Sasquatch, and has called Lethbridge, Alberta (wear the fox hat!) home for the past thirteen years. No one's punched his ticket yet, but he remains hopeful that there is intelligent life out there. Book jacket.

Dead Leprechauns & Devil Cats Grady Hendrix,2020-11-27 New York Times-bestselling author, Grady Hendrix (Horrorstör, Paperbacks from Hell), savagely satirizes Victorian adventure fiction in this steampunk smackdown full of decapitated heads that sing, Tong wars, bacon sex, German holiday demons, and the Potato Homunculus! Some of the most popular stories ever released on audio fiction platform Pseudopod, the White Street Society tells the tales of a band of 19th

century gentleman adventurers who investigate the supernatural, often with violence, sometimes with science. Sending up 19th century fears about women, Germans, the Irish, Chinatown, Southerners, politicians, and anyone who wasn't the "right" kind of person (read: male and white), this collection of cases contains shocking details that are sure to tighten the corsets and spin the mustaches of all gentle readers. Animals and pregnant women are advised to KEEP AWAY from "The Hairy Ghost!", "The Corpse Army of Khartoum!", "The Yellow Peril!", and "The Christmas Spirits!" as well as the shocking new story premiering in this collection, "The President Who Would Not Die!" For those bold readers who desire a strong blast of nonsense, allow us to introduce you to the supernatural wonders that these bold men of the 19th century were compelled to shoot, poison, burn, and beat to death with shovels, all in the name of PROGRESS!

Spook: Science Tackles the Afterlife Mary Roach, 2006-10-17 The best-selling author of *Stiff* and *Bonk* trains her considerable wit and curiosity on the human soul. What happens when we die? Does the light just go out and that's that—the million-year nap? Or will some part of my personality, my me-ness persist? What will that feel like? What will I do all day? Is there a place to plug in my lap-top? In an attempt to find out, Mary Roach brings her tireless curiosity to bear on an array of contemporary and historical soul-searchers: scientists, schemers, engineers, mediums, all trying to prove (or disprove) that life goes on after we die.

What Happens After Life? Matthew O'Neil, 2022-06-29 What happens to us when we die? It's a question that has been debated for centuries, moulded through time to fit our ever changing views. Many religions teach that how we act in our life will determine where we will end up after life. If you follow religious teachings and adhere to their ethical standards, you will be rewarded and spend an eternity in heaven. If not, you will be punished and forced to spend forever in hell. Modern science, however, will tell you a completely different story: fanciful, hopeful tales of an afterlife are both rationally explainable and lacking in evidence. Theologian Matthew O'Neil demonstrates that the contemporary religious view of the afterlife is far from what our ancestors envisioned. Subjecting both original Scripture and contemporary faith to the rigours of modern science and rational philosophy, he seeks to answer one of humanities most famous puzzles: what happens After Life?
