Australian Film Festivals Kirsten Stevens,2016-11-10 This is the first book to offer an in-depth examination of the history, operation, and growth of film festivals as a cultural phenomenon within Australia. Tracing the birth of film festivals in Australia in the 1950s through to their present abundance, it asks why film festivals have prospered as audience-driven spectacles throughout Australia, while never developing the same industry and market foci of their international fellows. Drawing on over sixty-years of archival records, festival commentary, interviews with festival insiders and ephemera, this book opens up a largely uncharted history of film culture activity in Australia.

Quantitative Techniques for Competition and Antitrust Analysis Peter Davis,Eliana Garcés,2009-11-16 This book combines practical guidance and theoretical background for analysts using empirical techniques in competition and antitrust investigations. Peter Davis and Eliana Garcés show how to integrate empirical methods, economic theory, and broad evidence about industry in order to provide high-quality, robust empirical work that is tailored to the nature and quality of data available and that can withstand expert and judicial scrutiny. Davis and Garcés describe the toolbox of empirical

techniques currently available, explain how to establish the weight of pieces of empirical work, and make some new theoretical contributions. The book consistently evaluates empirical techniques in light of the challenge faced by competition analysts and academics--to provide evidence that can stand up to the review of experts and judges. The book's integrated approach will help analysts clarify the assumptions underlying pieces of empirical work, evaluate those assumptions in light of industry knowledge, and guide future work aimed at understanding whether the assumptions are valid. Throughout, Davis and Garcés work to expand the common ground between practitioners and academics.
